PSYC 2147 HONORS RESEARCH METHODS IN PSYCHOLOGY (3) LEC. 3. Pr. (PSYC 2130 or PSYC 2133 or STAT 2510 or STAT 2513) and (PSYC 2017 or PSYC 2013 or PSYC 2010). Investigation of descriptive and experimental methods used in psychological research.

PSYC 2510 PSYCHOLOGY OF SEXUAL BEHAVIOR (3) LEC. 3. Biological, social, and psychological dimensions of human sexuality.

PSYC 3120 DEVELOPMENTAL PSYCHOLOGY (3) LEC. 3. Pr. PSYC 2010 or PSYC 2013 or PSYC 2017. Introduction to physical, cognitive, social and emotional development across the lifespan.

PSYC 3500 APPLIED BEHAVIOR ANALYSIS (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Principles and procedures for management of human behavior. Fall, Spring.

PSYC 3510 BEHAVIORAL NEUROSCIENCE (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Exploration of the relationships between the brain and behavior.

PSYC 3520 PSYCHOLOGY OF LEARNING (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Phenomena involved in the acquisition of knowledge, skills, and patterns of action.

PSYC 3530 SENSATION AND PERCEPTION (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Study of perceptual phenomena and the structure and function of sensory systems.

PSYC 3540 COGNITIVE PSYCHOLOGY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Phenomena involved with thinking and remembering.

PSYC 3550 PSYCHOLOGY AND CULTURE (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Survey of the ways culture shapes, modifies and adds distinctiveness to human behaviors.

PSYC 3560 INTRODUCTION TO PSYCHOPATHOLOGY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Exploration of our attempts to understand, explain, and classify abnormal behavior patterns.

PSYC 3570 THEORIES OF PERSONALITY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Survey of selected classical and contemporary theories of personality.

PSYC 3580 SOCIAL PSYCHOLOGY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Scientific study of how people think about, influence, and relate to one another.

PSYC 3590 PSYCHOLOGY IN THE WORKPLACE (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Application of basic psychological principles and theories in the workplace. May count either PSYC 3590 or PSYC 3593.

PSYC 3610 SPORTS PSYCHOLOGY (3) SEM. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Inquiry into how motivation, emotion, personality, and other mind-body variables influence physiology and athletic performance. Seminar class includes applied exercises in emotional expression, stress and pain management, hypnosis, and diet and exercise challenges.

PSYC 3620 COGNITIVE NEUROSCIENCE (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Exploration of how mental functions are linked to neural processes to enable the mind.

PSYC 3640 MOTIVATION AND EMOTION (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Overview of historical and contemporary perspectives on human motivation and emotion.

PSYC 3650 DRUGS AND BEHAVIOR (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Introduction to the behavioral effects of drugs, including drug abuse and its treatment.

PSYC 3660 PSYCHOLOGY OF GOOD AND EVIL (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). This class looks at the reasons why humans can act negatively against other people while maintaining a sense of their personal "normalcy".

PSYC 3670 PSYCHOLOGY OF SLEEP (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). This course will cover several topics pertaining to the psychology and physiology of sleep including circadian rhythms, the neuroscience of sleep, how sleep differs across the lifespan and across cultures, sleep quality, and sleep disorders. Students will also gain a deeper understanding of research methods in the field of sleep science and various theories that address why we sleep.

PSYC 3680 PSYCHOLOGY AND LAW (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). How psychological theories and research can inform civil and criminal legal practice, including psychological evaluations, jury selection, and predictions of violent behavior among other possible topics.

PSYC 3690 PSYCHOLOGICAL TRAUMA AND RESILIENCE (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). This course will provide an introduction to the field of trauma psychology, specifically focusing on definition, epidemiology, and consequences of psychological trauma, risk and protective factors for trauma exposure and outcomes, evidence-based trauma prevention and intervention strategies.

PSYC 3710 INTERGROUP PROCESSES: STEREOTYPING, PREJUDICE AND STIGMA (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). In this course, we will examine stereotyping, prejudice and stigma from a Social Psychological perspective. We will cover a wide variety of topics related to intergroup cognition and behavior (e.g., social cognitive approaches to stereotyping, stereotype threat, intergroup prejudice, and avenues to reduce intergroup biases).

PSYC 3910 SUPERVISED RESEARCH EXPERIENCE (3) LEC. 3. SU. Pr., Departmental approval. Supervised experience in research settings. Course may be repeated for a maximum of 6 credit hours.

PSYC 3940 EXPERIENTIAL LEARNING (3) PRA. 3. SU. Pr., Departmental approval. Supplementary instruction concurrent with job or volunteer experience involving the application of psychological perspectives to community life. Course may be repeated for a maximum of 6 credit hours.

PSYC 3970 SPECIAL TOPICS IN PSYCHOLOGY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Theories, research and issues in contemporary psychology on selected topics. Course may be repeated for a maximum of 6 credit hours.

PSYC 4010 CLINICAL PSYCHOLOGY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Introduction to clinical psychology focusing on techniques of assessment and intervention.

PSYC 4080 HEALTH PSYCHOLOGY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Psychological principles in health maintenance and health problems.

PSYC 4220 CHILD PSYCHOLOGY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Child psychology from a life-span developmental perspective, emphasizing social-emotional development in infancy.

PSYC 4260 PSYCHOLOGY OF ADDICTIVE BEHAVIORS (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Overview of various psychological features of addictive behaviors including alcohol and drug abuse, eating disorders, gambling and excessive sexual behavior.

PSYC 4910 HUMAN SERVICE PRACTICUM (3) PRA. 3. SU. Pr., Departmental approval. Supervised experience in service-delivery settings. Course may be repeated for a maximum of 6 credit hours.

PSYC 4930 DIRECTED STUDIES (1-3) IND. Pr., Departmental approval. In-depth study of a psychological topic under the direction of a faculty member. Only 6 credit hours may be applied to the psychology major. Course may be repeated for a maximum of 9 credit hours.

PSYC 4967 HONORS SPECIAL PROBLEMS (1-3) IND. Pr. Honors College. 2.30 GPA. STAT 2010. Course may be repeated for a maximum of 3 credit hours.

PSYC 4997 HONORS RESEARCH AND THESIS (1-3) IND. Pr. Honors College. STAT 2010. Research in specialized topics. Course may be repeated for a maximum of 6 credit hours.

PSYC 5020 CHILD AND ADOLESCENT PSYCHOPATHOLOGY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Description, etiology, and treatment of psychological disturbances in children and adolescents.

PSYC 5610 BEHAVIORAL EFFECTS OF ENVIRONMENTAL CONTAMINANTS (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Laboratory, occupational and epidemiological assessment of neurotoxic chemicals; risk analysis; developmental and policy considerations. Coverage includes heavy metals, pesticides, solvents, and abused drugs.

PSYC 5620 NEUROPHARMACOLOGY AND BEHAVIOR (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017) and PSYC 3510. Formerly Drugs, Brain, and Behavior. A review of drugs affecting nervous system function and behavioral or neural mechanisms that modify these effects. Topics include substance abuse, preclinical and clinical psychopharmacology, learning and memory, behavioral mitigation of drug effects. Course meets APA criteria for Level 1. May count either PSYC 5620 or PSYC 6620.

PSYC 5690 ADVANCED ANALYTICS FOR SOCIAL AND BEHAVIORAL SCIENCES (3) LEC. 3. Pr. PSYC 2130. Application and interpretation of quantitative approaches used in social and behavioral sciences. May count PSYC 5960 or PSYC 6960.

PSYC 5960 SEMINAR IN PSYCHOLOGY (3) LEC. 3. Pr. (PSYC 2010 or PSYC 2013 or PSYC 2017). Seminar in research and theory on psychological topics. Course may be repeated with changes in topic. Course may be repeated for a maximum of 6 credit hours.

PSYC 6610 BEHAVIORAL EFFECTS OF ENVIRONMENTAL CONTAMINANTS (3) LEC. 3. Laboratory, occupational, and epidemiological assessment of neurotoxic chemicals; risk analysis; developmental exposures; and policy considerations. Coverage includes heavy metals, pesticides, solvents, and abused drugs.

PSYC 6620 NEUROPHARMACOLOGY AND BEHAVIOR (3) LEC. 3. Formerly Drugs, Brain, and Behavior. Review of drugs affecting nervous system function and behavioral or neural mechanisms that modify these effects. Topics include substance abuse, preclinical and clinical psychopharmacology, learning and memory, behavioral mitigation of drug effects. Course meets APA criteria for Level 1 training in psychopharmacology.

PSYC 6690 ADVANCED ANALYTICS FOR SOCIAL AND BEHAVIORAL SCIENCES (3) LEC. 3. Application and interpretation of quantitative approaches used in social and behavioral sciences. May count either PSYC 5690, PSYC 6690 or PSYC 6696.

PSYC 6960 SPECIAL PROBLEMS (3) LEC. 3. Pr., Departmental approval. Seminar in research and theory on psychological topics. Course may be repeated for a maximum of 18 credit hours.

PSYC 7100 HISTORY OF IDEAS IN PSYCHOLOGY (3) LEC. 3. Historical developments in psychology with emphasis on the major theories and systems.

PSYC 7110 ETHICS AND PROBLEMS OF SCIENTIFIC AND PROFESSIONAL PSYCHOLOGY (1) LEC. 1. Survey of ethical issues and current problems in psychology.

PSYC 7120 TEACHING OF PSYCHOLOGY (3) LEC. 3. Problems and practices of teaching psychology at the college level. In addition to seminar meetings, students work with faculty in appropriate courses.

PSYC 7140 LEARNING AND CONDITIONING (3) LEC. 3. Respondent conditioning and operant behavior, including acquisition of language and other forms of individual and environmental interactions.

PSYC 7150 BIOLOGICAL PSYCHOLOGY (3) LEC. 3. Behavior from a biological perspective, including theory and research from the neurosciences and biopsychology.

PSYC 7160 HUMAN DEVELOPMENT (3) LEC. 3. Introduction to conceptual and substantive issues of developmental psychology from a life-span developmental perspective.

PSYC 7170 THEORIES OF PERSONALITY (3) LEC. 3. Analysis of current issues in personality theory.

PSYC 7180 SOCIAL PSYCHOLOGY (3) LEC. 3. Topics and literature on the social foundations of behavior.

PSYC 7190 COGNITIVE PSYCHOLOGY (3) LEC. 3. Survey of the nature of human intellectual functioning, including pattern recognition, memory, problem solving, reasoning, and language comprehension and generation.

PSYC 7200 ANIMAL COGNITION (3) SEM. 3. Experimental analysis of the mechanisms that underlie animal cognition, including attention, concept formation, counting, language, memory, perception, timing, and problem solving.

PSYC 7220 BEHAVIORAL PRINCIPLES (3) LEC. 3. Concepts and principles of operant and respondent conditioning and their relevance to changing and interpreting human behavior.

PSYC 7230 PSYCHOMETRIC THEORY (3) LEC. 3. Pr. P/C PSYC 7270 and P/C PSYC 7280. Introduction to basic quantitative theory behind the construction and interpretation of test scores and scales.

PSYC 7240 METHODS FOR STUDYING INDIVIDUAL BEHAVIOR (3) LEC. 3. Examination of strategies for measuring individual and environment interaction, using environmental interventions and identifying behavior change and its causes.

PSYC 7250 CLINICAL RESEARCH METHODS AND ETHICS (3) LEC. 3. Introduction to research methods and ethics in clinical psychology, with an emphasis on critical analysis of the scientific literature.

PSYC 7260 ETHICAL AND PROFESSIONAL ISSUES IN BEHAVIOR ANALYSIS (3) LEC. 3. Ethical and professional issues relevant to the practice of applied behavior analysis.

PSYC 7270 EXPERIMENTAL DESIGN IN PSYCHOLOGY (4) LEC. 4. Introduction to the analysis of data collected under various different experimental designs. Credit will not be given for both PSYC 7270 and STAT 7270.

PSYC 7280 EXPERIMENTAL DESIGN IN PSYCHOLOGY II (4) LEC. 3. LAB. 2. Pr. PSYC 7270. and Enrollment in Psychology PhD program. Correlational and regression models. Matrix based multiple and logistic regression, moderation and mediation, and introduction to path models.

PSYC 7310 AUTISM AND INTELLECTUAL DISABILITIES (3) LEC. 3. Survey of the definitions, terms, epidemiology, etiologies, and current issues in autism and intellectual disabilities.

PSYC 7320 CLINICAL PSYCHOPHARMACOLOGY (3) LEC. 3. The basic principles of psychopharmacology with special attention given to drugs used in applied or therapeutic settings, their effects, and their potential interactions with behavioral interventions.

PSYC 7400 COGNITIVE NEUROSCIENCE (3) LEC. 3. Exploring how mental functions are linked to neural processes to enable the mind.

PSYC 7700 FOUNDATIONS IN INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY (3) DSL/SEM. 3. This course is designed to be an advanced survey of the Industrial and Organizational Psychology field.

PSYC 7710 TRAINING AND DEVELOPMENT IN ORGANIZATIONS (3) DSL/SEM. 3. A graduate seminar that focuses on critical conceptual and empirical issues facing training and development in the workplace.

PSYC 7720 PERSONNEL SELECTION (3) DSL/SEM. 3. Analysis of classical, contemporary, theoretical, and practical issues related to personnel selection. May count either PSYC 7720, PSYC 7726, PSYC 8720 or PSYC 8726.

PSYC 7730 RESEARCH METHODS IN INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY (3) DSL/SEM. 3. An overview of basic research methodology applicable to the investigation of organizational phenomena.

PSYC 7740 ORGANIZATIONAL CULTURE (3) SEM. 3. Gain an understanding of organizational culture and provides the context in which organizational behavior may be understood.

PSYC 7750 ETHICS AND PROFESSIONAL ISSUES IN INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY (3) DSL/SEM. 3. An introduction to issues faced in professional practice and importance of ethical behavior in the practice of Industrial/Organizational Psychology.

PSYC 7760 OCCUPATIONAL HEALTH PSYCHOLOGY (3) DSL/SEM. 3. Occupational health psychology (OHP) is an emerging interdisciplinary field concerned with psychological factors in employee health, safety, and well-being.

PSYC 7780 WORK MOTIVATION (3) SEM. 3. Analysis of historical and contemporary theories of work motivation and related research.

PSYC 7790 WORKFORCE MANAGEMENT (3) SEM. 3. A comprehensive course that explores the principles and practices of human resource management within organizational settings, emphasizing the application of psychological theories to enhance employee well-being and organizational effectiveness. Students will learn about talent acquisition, development, compensation, and strategic HR planning through a psychological lens.

PSYC 7800 LEADERSHIP (3) SEM. 3. Analysis of historical and contemporary theories of leadership and related research.

PSYC 7910 PRACTICUM IN APPLIED PSYCHOLOGY (1-10) DSL/PRA. Supervised practicum in applied psychology. A maximum of 12 hours will apply toward degree. Department approval. Course may be repeated for a maximum of 30 credit hours.

PSYC 7930 DIRECTED STUDIES (1-3) DSL/IND. Pr., Departmental approval. Work under the direction of a faculty member on a psychological topic of mutual interest. No more than 3 hours count toward major. Course may be repeated for a maximum of 9 credit hours.

PSYC 7970 RESEARCH IN SPECIAL TOPICS (3) IND. 3. Pr., Departmental approval. Supervised scholarly activity related to student's field of study. Course may be repeated with change in topics.

PSYC 7980 APPLIED BEHAVIOR ANALYSIS CAPSTONE PROJECT (1-10) DSL/PRA. Pr., Departmental approval. Supervised practicum in applied psychology behavior analysis project involving delivery of services to a consumer. Maximum of 6 credit hours will count toward degree. Course may be repeated for a maximum of 30 credit hours.

PSYC 7990 RESEARCH AND THESIS (1-10) MST. Departmental approval. Pr., Course may be repeated with change in topics.

PSYC 8180 ADVANCED SOCIAL PSYCHOLOGY (3) LEC. 3. Pr. PSYC 7180. Departmental approval. Theories, research and issues in contemporary social psychology.

PSYC 8240 STRUCTURAL EQUATION MODELING FOR APPLIED RESEARCHERS (3) LEC. 3. This course is to provide an overview and introduction to the use of structural equation modeling in applied research, utilizing Mplus software. This course will be taught from an applied and pragmatic perspective. There will be a particular focus on data analytic issues that are especially relevant to clinical researchers.

PSYC 8250 MULTIVARIATE METHODS (4) LEC. 3. LAB. 2. Pr. PSYC 7270 and PSYC 7280. Introduction to the theory behind multivariate analyses and the statistical programs that support them.

PSYC 8270 FACTOR ANALYSIS (3) SEM. 3. Theoretical and statistical applications of exploratory and confirmatory factor analysis.

PSYC 8280 META-ANALYSIS (3) DSL/SEM. 3. Meta-analysis is a quantitative analysis using techniques to analyze and integrate effect sizes that accrue from research studies.

PSYC 8300 DEVELOPMENTAL PSYCHOPATHOLOGY (3) LEC. 3. Introduction to contemporary concepts, constructs, and controversies in developmental psychopathology.

PSYC 8310 INTRODUCTION TO CLINICAL METHODS AND ETHICS (3) LEC. 3. Enrollment in Clinical Psychology Program. Interviewing introduction to interviewing skills, behavioral assessment, crisis intervention, professional and ethical issues in providing clinical services.

PSYC 8330 COGNITIVE BEHAVIOR THERAPY (3) LEC. 3. Conceptual and applied issues related to behavioral principles of assessment and treatment.

PSYC 8350 APPLIED PSYCHOMETRIC PRINCIPLES (3) LEC. 3. Analysis of classical and modern test theory, with an emphasis on applied psychometric principles.

PSYC 8360 ASSESSMENT OF COGNITIVE ABILITIES AND ACHIEVEMENT (3) LEC. 2. LAB. 2. Theories and techniques for the assessment of cognitive abilities and academic achievement.

PSYC 8370 FOUNDATIONS OF PSYCHOLOGICAL ASSESSMENT (3) LEC. 3. Enrollment in Clinical Psychology program. Measurement theory and introduction to widely used objective personality and behavioral checklists with attention to ethics and diversity.

PSYC 8460 ASSESSMENT AND TREATMENT OF ALCOHOL AND DRUG PROBLEMS (3) LEC. 3. Pr., Departmental approval. Conceptual and empirical bases of clinical assessment and intervention for alcohol and drug problems.

PSYC 8500 COGNITIVE AND BEHAVIORAL SCIENCES SEMINAR (1) SEM. 1. SU. Pr., Enrollment in Cognitive and Behavioral Sciences PhD program. Examination of professional preparation issues and recent scientific developments relevant to careers in the cognitive and behavioral sciences. Course may be repeated for a maximum of 3 credit hours.

PSYC 8510 CONTEXT AND CONSEQUENCES OF BEHAVIOR (3) LEC. 3. Pr. PSYC 7140. Advanced survey of the role that consequences play in acquisition, maintenance, and structure of behavior, and the methods by which this role is studied.

PSYC 8540 BEHAVIORISM (3) LEC. 3. Exploration of the philosophical and theoretical underpinnings of behavior analysis.

PSYC 8550 APPLIED BEHAVIOR ANALYSIS (3) LEC. 3. Pr. PSYC 7140. and Departmental approval. Scientific and conceptual foundations of applied behavior analysis and its strategies of intervention and evaluation.

PSYC 8570 APPLIED BEHAVIOR ANALYSIS 2 (3) LEC. 3. Applications of behavioral principles to the assessment and treatment of problem behavior.

PSYC 8700 ADVANCED INDUSTRIAL PSYCHOLOGY (3) LEC. 3. Analysis of methods and content of industrial psychology.

PSYC 8710 ADVANCED ORGANIZATIONAL PSYCHOLOGY (3) LEC. 3. Departmental approval. Analysis of major issues in organizational psychology.

PSYC 8730 PERFORMANCE APPRAISAL (3) LEC. 3. Analysis of classical, contemporary, theoretical, and practical issues related to the appraisal of employee work performance.

PSYC 8760 DECISION MAKING IN THE WORKPLACE AND ORGANIZATIONS (3) SEM. 3. The application of behavioral decision theory and research to problems in Industrial/Organizational Psychology.

PSYC 8770 ORGANIZATIONAL CHANGE (3) DSL/SEM. 3. A conceptual overview of organizational change and organizational transformation and related specific topics.

PSYC 8780 WORK AND FAMILY (3) SEM. 3. A survey of research and theory in work and family, a content area of organizational psychology.

PSYC 8790 SEMINAR IN INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY (1) SEM. 1. SU. Examination of professional preparation issues and recent scientific developments relevant to careers in Industrial and Organizational Psychology. Enrollment in the Industrial and Organizational Psychology PhD program. Course may be repeated for a maximum of 3 credit hours.

PSYC 8910 CLINICAL PRACTICUM (1-4) DSL/PRA. Supervised practicum experience in clinical assessment and intervention techniques. Course may be repeated for a maximum of 30 credit hours, with 24 counting toward the degree.

PSYC 8920 INTERNSHIP (0) INT. Pr., PhD candidacy. Enrollment in full-time APA-approved 1-year pre-doctoral internship required for the PhD in Clinical Psychology. Student may not enroll in other course work.

PSYC 8930 DIRECTED STUDIES IN PSYCHOLOGY (3) IND. Pr., Approved PhD plan of study. Review of literature leading to the writing and defense of the Major Area Paper (written portion of the general PhD examination). Course may be repeated for a maximum of 9 credit hours.

PSYC 8970 SPECIAL TOPICS (1-3) DSL. Departmental approval. In-depth study of issues related to selected specializations in psychology. Course may be repeated for a maximum of 18 credit hours.

PSYC 8990 RESEARCH AND DISSERTATION (1-10) DSR. Departmental approval. Pr., Course may be repeated for a maximum of 98 credit hours.

Total Hours: 120

1 Students should meet with the psychology adviser to determine approved course listings for psychology electives and other electives. It is recommended that students take foundational courses (those listed in Groups A and B) in their junior year and advanced electives (those in Group C) in their senior year.

2 Students are required to complete a two-course history sequence *or* a two-course literature sequence. They are also required to complete at least one Core History *or* one Core Literature course in the area not selected as the sequence.

3 Work with your advisor to select appropriate courses from Groups A, B, and C or other courses as approved by your advisor.

Psychology Minor

Code	Title	Hours
PSYC 2010/2017	Introduction to Psychology	3
Select Minor Curriculum Track A or Track B:		9
Track A		
Select 3 of the following courses (9 hours):		
PSYC 3120	Developmental Psychology	
PSYC 3560	Introduction to Psychopathology	
PSYC 3570	Theories of Personality	
PSYC 3580	Social Psychology	
PSYC 3590	Psychology in the Workplace	
Track B		
Select 3 of the following courses (9 hours):		
PSYC 3510	Behavioral Neuroscience	
PSYC 3520	Psychology of Learning	
PSYC 3530	Sensation and Perception	
PSYC 3540	Cognitive Psychology	
PSYC 3620	Cognitive Neuroscience	

Take 1 additional 3000 level or above Psychology Course	3
Total Hours	**15**

Calculated GPA in the Minor (2.0 minimum). Students must earn a "C" grade or better in each course taken toward the minor.

* If PSYC 2010 or PSYC 2017 was used to fulfill the Social Science core requirement, an additional psychology course is required to complete the minor.

** Students who wish to purse a specialized minor should consult and obtain approval for minor coursework changes from the undergraduate program director before starting minor curriculum.

Department of Sociology, Anthropology, and Social Work

The Department of Sociology, Anthropology, and Social Work offers three Bachelor of Arts degrees. The **Sociology** major offers two concentration areas: criminology and sociology. Graduates have found positions in social service agencies, law enforcement agencies, non-profit organizations, social science research, and marketing. Some pursue graduate education in sociology, social work, criminology, elementary education, and library sciences, among others. The sociology major provides students a solid foundation within the discipline, particularly in theory, research methods, statistics, and social inequalities. **Anthropology,** the study of human diversity and adaptation, prepares students for domestic or international careers as archaeologists, cultural resource manger, educators, environmental and forensic scientists, museum curators, policy analysts, and researchers. Anthropology graduates have found positions in archaeology, business, communications, education, government, healthcare, museums and archives, and nonprofit foundations. The anthropology major emphasizes foundational knowledge in disciplinary research methods and theory, and provides practical skills training and lab and field experiences. **Social work** graduates are trained to become beginning-level generalist practitioners eligible for licensure and to apply for advanced-standing social work graduate programs. Social work graduates have found positions in family service agencies, child protective services, mental health facilities, hospitals, hospices, nursing homes, addiction treatment and rehabilitation, and criminal justice agencies. The BA in social work is fully accredited by the Council on Social Work Education.

Anthropology

To earn a BA in Anthropology, students must meet these requirements:

- Students must maintain a minimum 2.0 GPA in each of these courses: ANTH 2000, ANTH 3100, ANTH 3300, ANTH 3500, ANTH 4310.

Sociology

To earn a BA in sociology, students must meet these requirements:

- Students must earn a C or better in SOCY 1000, SOCY 3500, SOCY 4400 or SOCY 4700, SOCY 3700 or ANTH 2000, and PSYC 2130 in order to graduate. If they choose to take ANTH 2000 rather than SOCY 3700, they must earn a C in that course.

Social Work

Students must comply with these requirements to be admitted to the BA in social work:

- Students are required to apply for admission to the social work major.
- Their applications must include two letters of recommendation and a personal-statement essay not longer than four double-spaced pages.
- Students must earn a C or better in SOCY 1000, SOWO 2000, and SOWO 3910 and a combined social work GPA of 2.5 before applying to the program.

Once they are admitted, students have to meet these requirements to move through the social work major and graduate:

- Admission to the social work major is required before students can take SOWO 4060.
- Students must maintain a 2.5 GPA in all social work courses.
- Students must have a social work GPA of 2.5 to take SOWO 4920, which is required for graduation.

Majors

- Anthropology (p. 1110)
- Social Work (p. 1111)
- Sociology (p. 1112)

Minors

- Anthropology (p. 1111)
- Social Work (p. 1112)
- Sociology (p. 1113)

Anthropology Courses

ANTH 1000 ANTHROPOLOGY: CULTURE AND ADAPTATION (3) LEC. 3. Social Science core. Anthropology is the exploration of human evolution and cultures. This course surveys the four subfields of Archaeology, Biological Anthropology, Cultural Anthropology and Linguistic Anthropology. We will see how anthropology provides a broad framework for understanding and solving pressing social problems in the world today.

ANTH 1007 HONORS INTRODUCTION TO ANTHROPOLOGY (3) LEC. 3. LAB. 0. Pr. Honors College. Social Science core. Anthropology is the exploration of human evolution and cultures. This course surveys the four subfields of Archaeology, Biological Anthropology, Cultural Anthropology and Linguistic Anthropology. We will see how anthropology provides a broad framework for understanding and solving pressing social problems in the world today. Credit will not be given for both ANTH 1000 and ANTH 1007.

ANTH 2000 ETHNOGRAPHIC METHODS (3) LEC. 3, AAB/LEC. 0. Pr. (ANTH 1000 or ANTH 1003 or ANTH 1007) or (SOCY 1000 or SOCY 1007) or GEOG 1100. Approaches, techniques, and strategies for carrying out ethnographic research and analyzing qualitative data in the social sciences.

ANTH 2500 ANTHROPOLOGY OF GLOBAL STUDIES (3) LEC. 3. Any Social Science Core course. Broad-based study of processes and problems that transcend national boundaries, including global historical processes, politics, migrations, trade, disease, environmental change, and sustainability.

ANTH 2600 MUSEUM STUDIES IN ANTHROPOLOGY (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003. Students will consider the history of museum anthropology and reflect on contemporary anthropological engagement in/of museums and other cultural institutions.

ANTH 2610 FORENSIC ANTHROPOLOGY (3) LEC. 3. Explores standards of practice in forensic anthropology and analysis of case studies.

ANTH 2700 PEOPLES AND CULTURES OF ASIA (3) LEC. 3. Any Social Science Core course. Introduction to the traditions, religions, histories, and nation-states of the people of Asia, using a cultural approach.

ANTH 2800 ANTHROPOLOGY OF THE AFRICAN DIASPORA (3) LEC. 3. Any Social Science Core course. Anthropological perspectives on African Diasporas. Diaspora. Archaeological, ethnohistorical, and contemporary research exploring identity, symbols, power, and social relations in the lives of enslaved Africans and descendants in the Caribbean, Latin America and North America.

ANTH 2900 WORLD PREHISTORY (3) LEC. 3. Explore broad patterns in human prehistory over the past 10,000 years, including the origins of culture, religion, domestication and agriculture, writing, cities, and states.

ANTH 3000 CULTURE, MARRIAGE, AND THE FAMILY (3) LEC. 3. Role and meaning of kinship and its universal and particularistic features in human society.

ANTH 3010 MAGIC, MYTH, AND RITUAL: ANTHROPOLOGY OF RELIGION (3) LEC. Pr. P/C ANTH 1000. This course explores religious beliefs and practices around the world from an anthropological perspective. Our focus will be on how anthropologists study religion and how religious beliefs, practices, and practitioners are understood in their historical and cultural contexts.

ANTH 3100 LANGUAGE AND CULTURE (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Contemporary perspectives on cultural and linguistic anthropology, emphasizing language acquisition and culture change; language as socially charged; performance; status and inequality; and the study of globally diverse linguistic communities of practice.

ANTH 3110 ANTHROPOLOGY AND FICTION (3) LEC. Inter-disciplinary study of fiction from an anthropological perspective.

ANTH 3200 ANTHROPOLOGY OF GENDER (3) LEC. 3. Pr. P/C ANTH 1000 or P/C ANTH 1003 or P/C ANTH 1007 or P/C WMST 2100 or P/C WMST 2103. Gender relations and representations in different cultures, historical periods, and discourses.

ANTH 3300 BIOLOGICAL ANTHROPOLOGY (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007 or BIOL 1000 or BIOL 1010. Overview of biological anthropology, including evolutionary theory and genetics, primatology, human origins, and biological variation of contemporary human populations. Concepts will be applied during in-class exercises and discussions.

ANTH 3410 APPLIED & PRACTICING ANTHROPOLOGY (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Explores application and practice of anthropology in settings such as cultural resource management, museums, social and environmental policy, and healthcare. This course emphasizes how careers in anthropology contribute to resolving contemporary social problems.

ANTH 3500 ARCHAEOLOGY (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Archaeology is the study of human societies based on the material remains they left behind. This course explores the history, theories, methods, and applications of archaeology.

ANTH 3600 MEDICAL ANTHROPOLOGY (3) LEC. 3. Any Social Science Core course. Explores biological and cultural dimensions of global health from an anthropological perspective. Topics include the political economy of health, gendered health disparities, cross-cultural healing traditions, pluralistic medical systems, and evolutionary medicine.

ANTH 3620 FORENSIC ANTHROPOLOGY II: ADVANCED METHODS, THEORY, AND CASE STUDIES (3) LAB. Pr. ANTH 2610. Forensic Anthropology II is a hybrid seminar and lab course that teaches practical applications and methods in forensic anthropology through the exploration of case studies and laboratory exercises.

ANTH 3700 ENVIRONMENTAL ANTHROPOLOGY (3) LEC. 3. Problems in environmental anthropology including ethnoecology, cultural ecology, political ecology and environmentalism.

ANTH 3810 ARCHAEOLOGY OF NORTH AMERICA (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Explores archaeological evidence for the history of indigenous peoples in North America during the past 10,000 years.

ANTH 3850 ARCHAEOLOGY OF THE SOUTHEASTERN AND MIDWESTERN U.S. (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Diversity and complexity of late prehistoric cultures of the Southeastern and Midwestern United States.

ANTH 3900 BIOARCHAEOLOGY (3) LEC. 3. Pr. (ANTH 1000 or ANTH 1003 or ANTH 1007). Archaeologically-derived skeletal remains provide essential information for reconstructing broad patterns of human health and behavior over time. Students will learn to apply methods and theory in social bioarchaeology to understand demography, diet, disease, and physical activity in past populations.

ANTH 3950 CURATION (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. History, legislation, and ethical concerns associated with the accumulation and curation of archaeological collections.

ANTH 4310 THEORIES OF CULTURE IN ANTHROPOLOGY (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Major thinkers in anthropology and their theoretical models considered in historical perspective.

ANTH 4400 ARCHAEOLOGICAL FIELD SCHOOL (3) LEC. 1. LAB. 2. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Field methods, including archaeological surveying and excavation procedures at selected locations. Course may be repeated for a maximum of 6 credit hours.

ANTH 4910 BIOLOGICAL ANTHROPOLOGY LABORATORY PRACTICUM (3) LEC. 1. LAB. 2. Pr. (ANTH 1000 or ANTH 1003 or ANTH 1007). Investigation of specific biological anthropology problem or problems, involving students in laboratory techniques and research.

ANTH 4920 INTERNSHIP IN ANTHROPOLOGY (1-3) AAB/INT. 1-3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Internship for practical work with anthropological/archaeological collections or anthropological research in a professional setting, including federal or state agencies, NGOs, NPOs, community and voluntary organizations, and industry (e.g., healthcare and medicine, advertising/media, architecture/design, high technology, Cultural Resource Management and historic preservation, etc.). Course must be approved by the faculty advisor and department. Internship must be a supervised, closely monitored work experience, appropriate to the major. Course may be repeated for a maximum of 6 credit hours.

ANTH 4930 CULTURAL ANTHROPOLOGY FIELD SCHOOL (3) FLD. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. This practice anthropology course examines the relationship between culture, community, and environment in a particular field setting, in the United States or abroad.

ANTH 4940 ARCHAEOLOGY LABORATORY PRACTICUM (3) LEC. 1. LAB. 2. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Analysis, preservation, cataloging, and restoration of archaeological materials. May count either ANTH 4940 or ANTH 3910.

ANTH 4960 SPECIAL PROBLEMS (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Specific topics in anthropology not covered in other courses. Course may be repeated for a maximum of 6 credit hours.

ANTH 4967 HONORS SPECIAL PROBLEMS (1-3) IND. 3. Pr. Honors College. ANTH 1000. Departmental approval. Specific topics in anthropology not covered in other courses. Course may be repeated for a maximum of 3 credit hours.

ANTH 4997 HONORS THESIS (1-3) IND. Pr. Honors College. ANTH 1000. Departmental approval.. Course may be repeated for a maximum of 3 credit hours.

ANTH 5200 GENDER DEVELOPMENT AND CULTURE (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. or junior standing. Role of gender and culture in Third World development from an anthropological perspective.

ANTH 5600 CULTURE, MEDICINE, AND POWER (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. or junior standing. Power in the context of illness and healing at local, national, and international levels.

ANTH 5700 CRITIQUE OF DEVELOPMENT (3) LEC. 3. Pr. ANTH 3700. Meanings and structures of national and international development.

ANTH 5930 DIRECTED STUDIES (1-3) IND. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Directed study course in anthropology that allows students to explore concepts not covered in other courses. Course may be repeated for a maximum of 6 credit hours.

ANTH 5970 SPECIAL TOPICS IN ANTHROPOLOGY (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Examination of a specific problem in ethnographic methods, theory, and cultural analysis.

ANTH 6200 GENDER DEVELOPMENT AND CULTURE (3) LEC. 3. Role of gender and culture in Third World economic development from an anthropological perspective.

ANTH 6600 CULTURE MEDICINE AND POWER (3) LEC. 3. Power in the context of illness and healing at local, national, and international levels.

ANTH 6930 DIRECTED STUDY (1-3) IND. Directed study course in anthropology that allows students to explore concepts not covered in other courses. Course may be repeated for a maximum of 6 credit hours.

ANTH 6970 SPECIAL TOPICS IN ANTHROPOLOGY (3) LEC. 3. Pr. ANTH 1000 or ANTH 1003 or ANTH 1007. Examination of a specific problem in ethnographic methods, theory, and cultural analysis.

Social Work Courses

SOWO 2000 INTRODUCTION TO SOCIAL WORK (3) LEC. 3. Introduction to social work practice, examining career opportunities, history of the profession, practice settings, values, ethics, and types of clientele.

SOWO 2650 HISTORY OF SOCIAL WELFARE (3) LEC. 3. Development of social welfare policies and programs in the United States, analysis of political, economic, and social factors involved.

SOWO 3500 CHILD WELFARE (3) LEC. 3. Pr. SOCY 1000 or SOCY 1003 or SOCY 1007 or SOWO 2000 or SOWO 2003. Social work practice in settings dealing with child abuse and neglect, foster care, child care, and adoption.

SOWO 3600 AGING ISSUES AND SERVICES (3) LEC. 3. Pr. SOCY 1000 or SOCY 1003 or SOCY 1007. Introduction to social services and social work with the elderly, considering socio-cultural issues and impact on the elderly.

SOWO 3700 ADDICTIONS (3) LEC. 3. Pr. PSYC 2010 or PSYC 2017 or PSYC 2013. Addictions, theories of causality, social impact, and treatment approaches in today's society. Experiential component included.

SOWO 3800 HUMAN BEHAVIOR IN SOCIAL ENVIRONMENT I (3) LEC. 3. Pr. SOWO 2000 or SOWO 2003. Lifespan developmental approach to biopsychosocial examination of human behavior and development, emphasizing the diversity of human experience related to gender, social class, race, ethnicity, sexual orientation, and disability. Experiential component included.

SOWO 3850 HUMAN BEHAVIOR IN THE SOCIAL ENVIRONMENT II (3) LEC. 3. Pr. SOWO 3800. Social systems approach to examination of human behavior and development as influenced by groups, organizations, and communities, emphasizing the forms and mechanisms of oppression and discrimination as well as strategies to advance social and economic justice. Experiential component included.

SOWO 3910 FIELD PRACTICUM SEMINAR (3) PRA. Pr. SOWO 2000 or SOWO 2003. Introduction to fields and settings of social work practice via placement in a selected social service agency. Includes a concurrent integrative seminar to analyze the experience.

SOWO 4060 SOCIAL WORK PRACTICE METHODS I (3) LEC. 3. Pr. (SOWO 2000 or SOWO 2003) and SOWO 3800 and SOWO 3910 and (SOCY 1000 or SOCY 1003 or SOCY 1007). Introduction to generalist practice methods and skills in engagement, assessment, and goal setting with individual clients. Experiential component included.

SOWO 4070 SOCIAL WORK PRACTICE METHODS II (3) LEC. 3. Pr. SOWO 4060. Practice skills and perspectives required for work with families and groups. Experiential component included.

SOWO 4080 SOCIAL WORK PRACTICE METHODS III (3) LEC. 3. Pr. SOWO 4060. Generalist practice theory and skills as applied to communities, organizations, and oppressed populations, emphasizing issues of social justice and social action. Experiential component included.

SOWO 4090 SOCIAL WELFARE POLICY (3) LEC. 3. Pr. SOWO 2650 or SOWO 2653. Critical analysis of policy issues and proposals in selected social welfare programs and their impact upon current social problems and social work values and ethics.

SOWO 4920 INTERNSHIP IN SOCIAL WORK (9) FLD. 9. SU. Pr. SOWO 4080. 480-hour field experience under joint supervision of agency and university. Application of generalist practice skills and research project required.

SOWO 4950 SENIOR INTEGRATIVE SEMINAR (3) SEM. 3. Pr. SOWO 4080. Coreq. SOWO 4920. and Enrollment in SOWO 4920. Integrating theory with practice through analysis of behavior and evaluation of practice skills.

SOWO 4970 SOCIAL WORK SPECIAL TOPICS (3) LEC. 3. Timely and/or controversial topics related to social work. Course content will depend upon the designated topic.

SOWO 7000 INTRODUCTION TO SOCIAL WORK AND SOCIAL WELFARE (3) LEC. 3. This course provides a review of the social work profession, history, and values and ethics. An overview of theory, practice, policy, and research are integrated in exploring the knowledge, values, and skills base of the social work profession.

SOWO 7010 ADVANCED CLINICAL PRACTICE (3) LEC. 3. Pr. SOWO 7020. This course provides intensive study on clinical interventions with individuals, families, and small groups across various fields of practice.

SOWO 7020 PSYCHOPATHOLOGY (3) LEC. 3. This advanced practice course teaches students to recognize selected major mental health disorders in adults, children, and youth and to become familiar with social work practice approaches used in the treatment of these disorders.

SOWO 7030 EVALUATION IN SOCIAL WORK PRACTICE (3) LEC. 3. This course examines quantitative and qualitative evaluation of agency programs and individual practice. Students will engage in hands-on individual and/or small-group research projects to experience all phases of the research process.

SOWO 7040 SOCIAL WORK PRACTICE IN THE HEALTH CARE FIELD (3) LEC. 3. This course will focus on the development of social work practice skills relevant to health care settings, including assessment of the impact of illness, disability, treatment, and hospitalization on patients and families.

SOWO 7050 MENTAL HEALTH (3) LEC. 3. Pr. SOWO 7020. This course focuses on mental health social work practice with children, adolescents and adults, covering assessment and several theoretically based interventions with an emphasis on gaining practice skills. Special attention is given to strengths-based, evidence-based, and recovery-oriented practice models.

SOWO 7060 SOCIAL WORK PRACTICE WITH INDIVIDUALS AND FAMILIES (3) LEC. 3. This foundation course prepares students to apply a generalist perspective and systems framework to social work practice with individuals and families. It emphasizes the basics of communication, interviewing, relationship building, and practice skills essential to effective assessment, intervention, and evaluation.

SOWO 7070 SOCIAL WORK WITH GROUPS AND COMMUNITIES (3) LEC. 3. Pr. SOWO 7060. This macro social work course provides an advanced examination of social work practice in groups and larger systems. Students will develop knowledge, values, and skills in areas of: group practice, community assessment, social planning, community organization, and political strategies.

SOWO 7080 POLICY PRACTICE AND SOCIAL JUSTICE (3) LEC. 3. This course will critically apply conceptual frameworks and empirical research in the examination of social issues, policies, and services, focusing on how policies affect marginalized, oppressed and disadvantaged populations.

SOWO 7090 ADVANCED SOCIAL WELFARE POLICY (3) LEC. 3. The course will review the historical development of social welfare and social policies in the United States and explore their context and underlying values. This course builds knowledge and skills to analyze and make changes in social welfare policy.

SOWO 7100 GERONTOLOGY (3) LEC. 3. The course provides a clinical foundation for clinical work practice with older adults and their families. Primary focus will be on understanding how diversity factors into the physiological, psychological, and social aspects of later life.

SOWO 7110 TRAUMA INFORMED PRACTICE (3) LEC. 3. This course examines social work practice theories and intervention approaches as they apply to practice with survivors of crisis and trauma. The course will focus on engagement, assessment, planning, intervention, evaluation and follow up on all social work practice levels.

SOWO 7120 PSYCHOSOCIAL CONTEXT OF DISABILITY (3) LEC. 3. Prepares the social worker to be an effective practitioner for persons with disabilities by exploring the psychosocial context of the lives and experiences of persons with disabilities and their families from various perspectives.

SOWO 7130 SOCIAL WORK PRACTICE WITH CHILDREN AND ADOLESCENTS (3) LEC. 3. This course develops advanced clinical social work practice knowledge and skills to engage and intervene with children and adolescents with health and mental health risk and provides knowledge for community social workers serving children who are exposed to stress.

SOWO 7140 DIVERSITY AND DIFFERENCE IN PRACTICE (3) LEC. 3. Students must be admitted to the Masters of SocialWork Program to enroll in this course.

SOWO 7600 VETERINARY SOCIAL WORK PRACTICE (3) DSL. This course reviews research, practice settings, and policy needs in the four areas of veterinary social work: the link between human and animal violence, animal assisted interventions, animal related grief and bereavement, and compassion fatigue. Students will be expected to become knowledgeable about research findings and apply them to social work practice skills and policy advocacy.

SOWO 7700 FOUNDATIONS OF SOCIAL WORK RESEARCH (3) LEC. 3. This course provides a study of quantitative and qualitative research methods in order to build knowledge for social work practice. Students will be prepared to develop, implement and communicate ethical, empirically-based scientific knowledge.

SOWO 7800 HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT (3) LEC. 3. This graduate-level foundation course covers theories, themes, and issues that influence individual and group and development across the life span- in interaction with the environment- as it underlies social work practice and research.

SOWO 7920 GENERALIST FIELD (10) INT. 10. SU. This course prepares students for responsible, competent entry into the profession by providing opportunities to practice social work with a generalist perspective in agency settings under educational supervision. This course requires completion of 432 total hours in an agency setting.

SOWO 7930 ADVANCED FIELD (12) INT. 12. SU. Pr. SOWO 7920. Coreq. SOWO 7950. This course provides upper level graduate social work students with opportunities to develop advanced generalist and clinical practice skills under the supervision of an MSW Field Instructor. Students complete 512 hours in an approved agency during this field experience. Course may be repeated for a maximum of 18 credit hours.

SOWO 7940 ADVANCED FIELD PLACEMENT I (6) INT. SU. This is the first course in a sequence of two field placement courses that are taken successively. The course provides upper level graduate social work students with opportunities to develop advanced generalist and clinical practice skills under the supervision of an MSW Field Instructor. Students complete 256 hours in an approved agency in one semester during this field experience.

SOWO 7950 INTEGRATIVE SEMINAR (3) SEM. 3. Pr. SOWO 7020 and P/C SOWO 7930. This seminar course assists students in integrating and applying classroom learning with the advanced field placement. Opportunities are provided for case presentation, discussion and peer consultation.

SOWO 7960 ADVANCED FIELD PLACEMENT II (6) INT. SU. This is the second course in a sequence of two field placement courses that are taken successively. The course provides upper level graduate social work students with opportunities to develop advanced generalist and clinical practice skills under the supervision of an MSW Field Instructor. Students must successfully complete SOWO 7940 Advanced Field I to enter this course. Students complete 256 hours in an approved agency in one semester during this field experience.

SOWO 7970 SPECIAL TOPICS IN SOCIAL WORK (3) LEC. 3. Study of a topic of special interest in professional social work practice beyond current departmental course offerings. Course may be repeated for a maximum of 6 credit hours.

Sociology Courses

SOCY 1000 SOCIOLOGY: GLOBAL PERSPECTIVE (3) LEC. 3. Social Science I Core. Introduction to the study of social and cultural patterns of society.

SOCY 1007 HONORS SOCIOLOGY (3) LEC. 3. Pr. Honors College. Social Science I Core. Introduction to the study of social and cultural patterns in society.

SOCY 1050 AUBURN IN THE WORLD: SOCIETY AND CULTURE (4) LEC. 4. Auburn Global students. Part of the Auburn Global International Accelerator Program. The course will introduce students to American society and culture through core sociological concepts. May count either SOCY 1050 or HIST 1000.

SOCY 1100 CURRENT ISSUES IN RACE AND ETHNICITY (3) LEC. 3. An exploration of how race and ethnicity shape our daily lives and the world around us.

SOCY 2000 SOCIAL ISSUES (3) LEC. 3. Pr. SOCY 1000 or SOCY 1003 or SOCY 1007. Exploration of the claims and conflicts of public issues and moral apprehensions, including crime, the environment, gender and racial inequality, various syndromes.

SOCY 2050 CRIME AND JUSTICE IN AMERICA (3) LEC. 3. Distribution and measurement of crime, different variations in criminal behavior, and handling crime in the American criminal justice system.

SOCY 2100 POPULATION AND SOCIETY (3) LEC. 3. Survey of theories and research of demographic processes and their interaction with the economy, education, family, medicine, science, and technology.

SOCY 2200 SOCIAL PSYCHOLOGY: SOCIOLOGICAL PERSPECTIVES (3) LEC. 3. Examination of collective influences on the person and the role the person plays in sustaining collective conditions.

SOCY 3000 CRIMINOLOGY (3) LEC. 3. Examination of etiological issues related to crime; major theories of crime causation from a wide variety of perspectives.

SOCY 3100 POLICE AND SOCIETY (3) LEC. 3. Pr. SOCY 1000 or SOCY 1003 or SOCY 1007 or Departmental approval. Sociological overview of policing and current issues that relate to the police.

SOCY 3200 SPORTS IN AMERICA (3) LEC. 3. Sociological perspectives on sports in the social system; organization and culture of sports in relationship to social class, race, and gender; and the interconnections between sports and society.

SOCY 3250 SENTENCING AND CORRECTIONS (3) LEC. 3. Pr. SOCY 1000 or SOCY 1003 or SOCY 1007 or Departmental approval. In-depth analysis of sentencing policies and the correction system.

SOCY 3300 SOCIOLOGY OF THE FAMILY (3) LEC. 3. Family as a major social institution, with emphasis on the American family; cross-cultural comparisons for perspective.

SOCY 3500 SOCIAL INEQUALITIES (3) LEC. 3. Pr. SOCY 1000 or SOCY 1003 or SOCY 1007. Exploration of the sources and uses of minority representations in the United States addressing inequalities such as race, ethnicity, gender, and sexual orientation.

SOCY 3550 DELINQUENCY AND JUVENILE JUSTICE (3) LEC. 3. Pr. SOCY 1000 or SOCY 1003 or SOCY 1007. Nature and distribution of delinquency in the United States, as well as the various components of the juvenile justice system.

SOCY 3600 UNDERSTANDING NATURE, SELF, AND SOCIETY (3) LEC. 3. The course examines the intersection between nature, self, and society, and draws on sociological scholarship and nature writing. Through readings, class conversations, imaginative writing reflections, and short field trips, students will be able to critically interrogate our social relationship with nature and study the social dynamics that shape the meanings we attach to nature. Credit will not be given to both SOCY 3600 and SUST 3600.

SOCY 3700 METHODS OF SOCIAL RESEARCH (3) LEC. 3. Pr. SOCY 1000 or SOCY 1003 or SOCY 1007. Methodological approaches to data collection used by social scientists including logic of science, hypothesis formation, and research design.

SOCY 4000 SOCIALIZATION (3) LEC. 3. Examination of mind, self, society, and interaction as symbolic phenomena grounded in social process; covers major intellectual influences, concepts, and figures.

SOCY 4100 DEVIANCE (3) LEC. 3. Analysis of creation and reaction to deviance through theoretical approaches; examines several deviant groups.

SOCY 4200 HEALTH AND SOCIETY (3) LEC. 3. Nature and organization of medical practice and health delivery systems with special attention to the role of physicians, patients, and disease and to the relationship between culture, politics, and health.

SOCY 4300 FIELD INSTRUCTION (3) LEC. 3. Pr., Departmental approval. Supplementary instruction concurrent with experience in some field of work involving application of sociological perspectives to community life. Course may be repeated for a maximum of 6 credit hours.

SOCY 4400 CONTEMPORARY THEORY (3) LEC. 3. Survey of theorists from Comte to the present, emphasizing theory construction, theoretical analysis, and differences in theoretical approaches.

SOCY 4700 THEORIES OF CRIME AND CRIMINALITY (3) LEC. 3. Theories of crime causation with emphasis on theory construction, theory analysis, and differences in theoretical approaches.

SOCY 4920 APPLIED SOCIOLOGY: INTERNSHIP (3) INT/LEC. Pr. SOCY 3500 or SOCY 3700 or ANTH 2000. Departmental approval. Internship in an organization or agency with the goal of learning how to use sociological knowledge in an applied setting. Course may be repeated for a maximum of 6 credit hours.

SOCY 4960 SPECIAL PROBLEMS IN SOCIOLOGY (3) AAB/IND. 3. Pr., Departmental approval. Independent reading program under supervision, to allow pursuit of specific interests in sociology not covered in other course offerings. Course may be repeated for a maximum of 6 credit hours.

SOCY 4970 SPECIAL TOPICS IN SOCIOLOGY (3) LEC. 3. Junior standing. Advanced topics in population and ecology, social structure, social institutions, socialization, religion, or other timely topics related to sociology. Course may be repeated for a maximum of 6 credit hours.

SOCY 5120 CRITICAL THINKING AND STRUCTURED ANALYSIS (3) LEC. 3. Pr. SOCY 1000 or SOCY 1007 or Departmental approval. Exploration of various methodological and analytical issues related to critical thinking and structured analysis.

SOCY 5200 SOCIOLOGY OF LAW (3) LEC. 3. Controversial and contemporary issues in criminal law from a sociological perspective.

SOCY 5300 INFORMATION METHODS AND CYBER ANALYSIS (3) LEC. 3. Pr. (SOCY 1000 or SOCY 1007) and SOCY 5120 or Departmental approval. Overview of various methods and techniques of open source information analysis in the private and public sectors.

SOCY 5310 ADVANCED METHODS OF INFORMATION AND CYBER ANALYSIS (3) LEC. 3. Pr. (SOCY 1000 or SOCY 1007) and SOCY 5120 or Departmental approval. Application of methods and techniques of information analysis and related report writing.

SOCY 5400 SOCIOLOGY OF MENTAL HEALTH (3) LEC. 3. Pr. SOCY 1000 or SOCY 1007. Social analysis of the nature, development, identification, and treatment of mental illness. Credit with not be given for both SOCY 5400 and SOCY 6400.

SOCY 5500 VICTIMOLOGY (3) LEC. 3. Impact of victimization upon the crime victim, offender, and society, as well as the dynamics of the victim-offender relationship. Credit will not be given for both SOCY 5500 and SOCY 6500.

SOCY 5600 SEX CRIMES (3) LEC. 3. Criminal sexual behavior, the social influences on what is defined as sexually deviant, and the ways the criminal justice system handles sex offenders. Credit will not be given for both SOCY 5600 and SOCY 6600.

SOCY 5650 DRUGS AND SOCIETY (3) LEC. 3. Context and correlates of drug use, relationship with crime and delinquency, and societal reaction to drug abuse. Credit will not be given for both SOCY 5650 and SOCY 6650.

SOCY 5670 SOCIOLOGY OF GENDER (3) LEC. 3. Pr. SOCY 1000 or SOCY 1007. Social definitions and implications of gender, with emphasis on work, media, law, and interpersonal relationships. Credit will not be given for both SOCY 5670 and SOCY 6670.

SOCY 5680 SOCIAL MOVEMENTS (3) LEC. Pr. P/C SOCY 1000 or P/C SOCY 1007. Exploration of social movements as collective action leading to different forms of social change. Topics covered include the origins, dynamics and consequences of major social movements, including movements for civil rights, women's rights, disability access, sustainability, etc.

SOCY 5690 SOCIOLOGY OF EMOTIONS (3) LEC. 3. Pr. P/C SOCY 1000 or P/C SOCY 1007. Examination of the social dimensions of emotions. The emotional phenomena covered include love, empathy, anger, sadness, shame, fear, joy, happiness, and gratitude.

SOCY 5970 SPECIAL TOPICS IN SOCIOLOGY (3) LEC. 3. Pr., Departmental approval. Study of substantive areas sociology. Credit will not be given for both SOCY 5970 and SOCY 6970. Course may be repeated for a maximum of 6 credit hours.

SOCY 6120 CRITICAL THINKING AND STRUCTURED ANALYSIS (3) LEC. 3. Pr. SOCY 1000 or SOCY 1007 or Departmental approval. Exploration of various methodological and analytical issues related to critical thinking and structured analysis. Credit will not be given for both SOCY 5120 and SOCY 6120.

SOCY 6200 SOCIOLOGY OF LAW (3) LEC. 3. Controversial and contemporary issues in criminal law from a sociological perspective. Credit will not be given for both SOCY 5200 and SOCY 6200.

SOCY 6300 INFORMATION METHODS AND CYBER ANALYSIS (3) LEC. 3. Pr. SOCY 1000 or SOCY 1007 and (SOCY 5120 or SOCY 6120) or Departmental approval. Overview of various methods and techniques of open source information analysis in the private and public sectors. Credit will not be given for both SOCY 5300 and SOCY 6300.

SOCY 6310 ADVANCED METHODS OF INFORMATION AND CYBER ANALYSIS (3) LEC. 3. Pr. SOCY 1000 or SOCY 1007 and (SOCY 5120 or SOCY 6120) or Departmental approval. Application of methods and techniques of information analysis and related report writing. Credit will not be given for SOCY 5310 and SOCY 6310.

SOCY 6400 SOCIOLOGY OF MENTAL HEALTH (3) LEC. 3. Pr. SOCY 1000 or SOCY 1007. Social analysis of the nature, development, identification, and treatment of mental illness. Credit will not be given credit for both SOCY 5400 and SOCY 6400.

SOCY 6500 VICTIMOLOGY (3) LEC. 3. Impact of victimization upon the crime victim, offender, and society, as well as the dynamics of the victim-offender relationship. Credit will not be given for both SOCY 5500 and SOCY 6500.

SOCY 6600 SEX CRIMES (3) LEC. 3. Criminal sexual behavior, the social influences on what is defined as sexually deviant, and the ways the criminal justice system handles sex offenders. Credit will not be given for both SOCY 5600 and SOCY 6600.

SOCY 6650 DRUGS AND SOCIETY (3) LEC. 3. Context and correlates of drug use, relationship with crime and delinquency, and societal reaction to drug abuse. Credit will not be given for both SOCY 5650 and SOCY 6650.

SOCY 6670 SOCIOLOGY OF GENDER (3) LEC. 3. Pr. SOCY 1000 or SOCY 1007. Social definitions and implications of gender, with emphasis on work, media, law, and interpersonal relationships. Credit will not be given for both SOCY 5670 and SOCY 6670.

SOCY 6680 SOCIAL MOVEMENTS (3) LEC. Exploration of social movements as collective action leading to different forms of social change. Topics covered include the origins, dynamics and consequences of major social movements, including movements for civil rights, women's rights, disability access, sustainability, etc.

SOCY 6690 SOCIOLOGY OF EMOTIONS (3) LEC. Examination of the social dimensions of emotions. The emotional phenomena covered include love, empathy, anger, sadness, shame, fear, joy, happiness, and gratitude.

SOCY 6970 SOCIOLOGY SPECIAL TOPICS (3) LEC. 3. Study of substantive areas of sociology. Credit will not be given for both SOCY 5970 and SOCY 6970. Course may be repeated for a maximum of 6 credit hours.

SOCY 7000 ADVANCED SOCIOLOGICAL THEORY (3) LEC. 3. Pr. SOCY 4400 or Departmental approval. Review of major types of sociological theory within the context of theoretical paradigms and significant theoretical issues that face the discipline.

SOCY 7100 STATISTICAL ANALYSIS OF SURVEY, AGGREGATE, AND LARGE DATA SOURCES (3) LEC. 3. Pr. STAT 2010 or STAT 2017 or Departmental approval. Techniques commonly used in multivariate statistical analysis of data sources such as surveys, archival records, and other large data sets. Credit will not be given for both SOCY 7100 and STAT 7100.

SOCY 7200 SEMINAR IN SOCIAL BEHAVIOR (3) SEM. 3. Research and theory concerning social and group influences on behavior.

SOCY 7250 SOCIOLOGY OF VIOLENCE (3) LEC. 3. In-depth coverage of various forms of violence from the sociological perspective.

SOCY 7850 TECHNOLOGY AND TEACHING IN SOCIOLOGY (1) LEC. 1. SU. Pr., Departmental approval. Technology as a teaching tool sociology classes.

SOCY 7930 DIRECTED STUDIES (3) IND. 3. Pr., Departmental approval. Independent reading course under the supervision of a department faculty member. Course may be repeated for a maximum of 6 credit hours.

SOCY 7990 RESEARCH AND THESIS (1-10) MST. Preparation of a thesis. Course may be repeated with change in topics.

Anthropology (ANTH)

The anthropology program takes a four-field approach to the study of the human condition, offering courses in archaeology, biological anthropology, cultural anthropology, and linguistic anthropology.

Freshman

Fall	Hours	Spring	Hours
ANTH 1000 Anthropology: Culture and Adaptation	3	ENGL 1120 English Composition II	3
ENGL 1100 English Composition I	3	Foreign Language II (College Core)	4
Foreign Language I (College Core)	4	Core Fine Arts	3
Core History[1]	3	Core Mathematics	3
Elective	2	Elective	3

Social Work (SOWO)

The Bachelor of Arts in Social Work is fully accredited by the Council on Social Work Education. Graduates are trained to become beginning-level generalist practitioners eligible for licensure and to apply for advanced standing social work graduate programs. Admission to the program is required before enrolling in SOWO 4060. SOCY 1000, SOWO 2000 and SOWO 3910 must be completed with a C or better prior to application. Students must earn a C and maintain a 2.5 GPA in all major courses. Students must submit two letters of recommendation and a personal statement essay not longer than four double-spaced pages.

Freshman

Fall	Hours	Spring	Hours

Department of Speech, Language, and Hearing Sciences

Students wishing to obtain a degree in Speech, Language, and Hearing Sciences may declare the major without formal admission to the program. Students must earn a C or higher in all major courses. A minimum of a B in SLHS 3400 is required for admission into

many graduate programs in Speech, Language, and Hearing Sciences. SLHS courses with grades below C must be repeated to count in major which may cause graduation to be delayed.

Majors

- Speech, Language, and Hearing Sciences (p. 1118)

Undergraduate Certificates

- Speech, Language, and Hearing Sciences (http://bulletin.auburn.edu/undergraduate/collegeofliberalarts/slhs_ucrt/)

Courses

SLHS 1110 EAGLES SOCIAL SKILLS INSTRUCTION I (1) LEC. 1. Departmental approval. This course offers social skills instruction and introduces topics including basic conversational requirements, electronic communication, non-verbal communication, and miscellaneous social skills.

SLHS 1120 EAGLES SOCIAL SKILLS INSTRUCTION II (1) LEC. 1. Pr. SLHS 1110. Departmental approval. This course offers social skills instruction to EAGLES students and introduces topics including basic conversational requirements, electronic communication, non-verbal communication, and good sportsmanship.

SLHS 1130 EAGLES SOCIAL SKILLS INSTRUCTION III (1) LEC. 1. Pr. SLHS 1120. Departmental approval. This course offers social skills instruction to EAGLES students and introduces topics including get-togethers, handling arguments, and miscellaneous social skills.

SLHS 1140 EAGLES SOCIAL SKILLS INSTRUCTION IV (1) LEC. 1. Pr. SLHS 1130. Departmental approval. This course offers social skills instruction to EAGLES students and introduces topics including basic conversational requirements, handling bullying, minimizing rumors and gossip, and miscellaneous social skills.

SLHS 2500 COMMUNICATION DISORDERS IN SOCIETY (2) LEC. 2. Information on stuttering, speech, language, voice disorders and hearing impairment and how to interact with individuals with communication disorders.

SLHS 3000 INTRODUCTION TO SPEECH, LANGUAGE, AND HEARING SCIENCES (3) LEC. 3. Survey of the field of speech pathology-audiology. Includes history of the profession, the inter-relatedness of the various pathologies, general principles of evaluation and therapy and the profession itself.

SLHS 3100 LINGUISTICS IN SLHS (2) LEC. 2. Pr. SLHS 4520. This course will use a basic linguistic framework of typical development of language from which to study developmental and acquired disorders of language.

SLHS 3400 ANATOMY AND PHYSIOLOGY OF SPEECH (3) LEC. 3. The study of anatomy and physiology of speech production including respiratory, laryngeal and articulatory-resonance systems and the process swallowing. Speech acoustics will be introduced.

SLHS 3410 ARTICULATORY PHONETICS AND PHONOLOGICAL DEVELOPMENT (3) LEC. 3. Pr. SLHS 3400 and P/C SLHS 4520. Principles of phonetics and their application to speech.

SLHS 3550 SPEECH AND HEARING SCIENCE (3) LEC. 3. Pr. SLHS 3400 and SLHS 4600 and SLHS 3410. The acoustic properties of speech, their relationship to perceptual and physiological phonetics, and instrumentation used in speech science.

SLHS 3560 NEUROANATOMY FOR COMMUNICATION DISORDERS (3) LEC. 3. Pr. SLHS 3400 and SLHS 4600. Anatomy and physiology of the central nervous system as it relates to speech, language, hearing and swallowing function and disorders.

SLHS 4100 LANGUAGE DISORDERS ACROSS THE LIFESPAN (3) LEC. 3. Pr. SLHS 4520. Introduction to developmental language impairment from infancy through adolescence as well as acquired language impairment in adulthood with focus on the nature of language impairment, assessment of language disorders, and treatment of language disorders.

SLHS 4200 SPEECH DISORDERS ACROSS THE LIFESPAN (3) LEC. 3. Pr. SLHS 3400 and SLHS 4600 and SLHS 3410. This is one of two courses offered in the area of speech and language disorders. This course reviews the typical acquisition of the speech sound system and reviews basic articulation, phonological, fluency, voice, and motor speech disorders.

SLHS 4300 CRITICAL THINKING AND EVIDENCE-BASED PRACTICE: AN INTRODUCTION (2) LEC. 2. Pr. SLHS 3000 and P/C SLHS 4520. Explores the decision making process in assessment and treatment of individuals with communication disorders. Emphasis on a scientific framework integrating research evidence and critical thinking.

SLHS 4500 SPECIAL OBSERVATION (1) DSL. Pr. (SLHS 4520 or CMDS 4520) and (SLHS 4100) and (SLHS 3410 or CMDS 3410). This course will provide foundational knowledge in treatment methods and guided observation of 25 hours in speech, language, and cognitive-communication evaluation and treatment.

SLHS 4520 LANGUAGE ACQUISITION (3) LEC. 3. First language acquisition in childhood and its change throughout the life span.

SLHS 4580 INTRODUCTION TO CLINICAL PROCEDURES IN SPEECH-LANGUAGE PATHOLOGY (3) LEC. 3, CLN/LEC. 30. Pr. SLHS 4520. Orientation to clinical activities, management methods and preparation of professional reports.

SLHS 4600 AUDIOLOGY AND HEARING SCIENCE (3) LEC. 3. Principles of auditory reception and the problems involved in measuring, evaluating and conserving hearing.

SLHS 4620 HEARING REHABILITATION (3) LEC. 3. Pr. SLHS 4600. Rehabilitation problems of children and adults in the area of auditory training, speech reading and speech conservation; includes clinical practice.

SLHS 4650 INTRODUCTION TO CLINICAL PROCEDURES IN AUDIOLOGY (3) LEC. 3. Pr. SLHS 4600. Audiological instrumentation and test procedures.

SLHS 4930 DIRECTED STUDY IN SPEECH, LANGUAGE & HEARING SCIENCES (1-3) IND. Pr. SLHS 3000 and SLHS 3400 and SLHS 4600. Departmental approval. Directed learning experience in speech, language, or hearing sciences involving literature review and writing related to a topic specific to the student. Course may be repeated for a maximum of 6 credit hours.

SLHS 4967 HONORS SPECIAL PROBLEMS (1-3) IND. Pr. Honors College. Departmental approval. Credit hours that apply towards fulfilling Honors requirement. Course may be repeated for a maximum of 3 credit hours.

SLHS 4980 UNDERGRADUATE RESEARCH (1-3) LAB. 2-9. Pr. P/C SLHS 3000. Departmental approval. This course is designed for active research engagement within a mentor's laboratory or the research implementation phase of an undergraduate research fellowship. Course may be repeated for a maximum of 3 credit hours.

SLHS 4997 HONORS THESIS (1-3) RES. Pr. Honors College. Departmental approval. Credit hours that apply towards Honor thesis requirements, the topic of which determined by the Honor's thesis faculty advisor and the student advisee. Course may be repeated for a maximum of 6 credit hours.

SLHS 5000 STUDY ABROAD IN SPEECH-LANGUAGE PATHOLOGY (3) AAB. Pr. CMDS 3000 or SLHS 3000. Survey of current international research and educational/clinical practices in the field of speech-language pathology. Course may be repeated for a maximum of 6 credit hours.

SLHS 5100 MOTOR LEARNING, GENERALIZATION, AND ADHERENCE FOR SPEECH LANGUAGE PATHOLOGY (2) LEC. 2. Pr. SLHS 3400 and SLHS 4200. Motor learning, generalization, and adherence knowledge and skills required for speech-language therapist assistants and speech-language pathologists use in therapy.

SLHS 5200 CULTURAL ASPECTS IN APPLIED HEALTH SCIENCES (2) LEC. 2. Pr. SLHS 3000. This course is designed to provide undergraduate students in speech, language, and hearing sciences, and other applied health disciplines the opportunity to broaden their knowledge of and implementation of culturally responsive practices when working with patients/clients and team members.

SLHS 5300 COGNITIVE AND LINGUISTIC ASPECTS OF AGING (2) LEC. 2. Pr. SLHS 3560. Explores the age-related changes in cognitive-linguistic decline including the mechanisms of this decline; external factors such as physical exercise, pharmacology, and cognitive rehabilitation; and suggestions for prevention of cognitive decline and dementia.

SLHS 5400 ISSUES IN SPEECH (2) LEC. 2. Pr. SLHS 3400 and SLHS 4200. Current issues related to aspects of development, habilitation, and/or rehabilitation of articulation, voice, or fluency disorders will be explored. Course may be repeated for a maximum of 4 credit hours.

SLHS 5500 ISSUES IN AUDIOLOGY (2) LEC. 2. Pr. SLHS 3400 and SLHS 4600. Current issues related to research methodologies and clinical care of auditory and vestibular development, psychoacoustics, and pathologies of the auditory system will be explored.

SLHS 5960 SPECIAL PROBLEMS IN LANGUAGE (2) LEC. 2. Pr. SLHS 4520. This Special Problems Seminar is a two hour per week meeting for study of topics in language. Topics will include aspects of language acquisition , including autism spectrum disorder and literacy, that are clinically relevant for speech language pathologists. Course may be repeated for a maximum of 8 credit hours.

SLHS 7500 CLINICAL PRACTICUM IN SLP (1-2) PRA. 1-2. Clinical practicum in evaluation and treatment of individuals with speech-language disorders. Course may be repeated for a maximum of 7 credit hours.

SLHS 7510 ADVANCED SPEECH SOUND DISORDERS (3) LEC. 3. Empirical and theoretical bases for speech sound disorders.

SLHS 7520 LANGUAGE DISORDERS: BIRTH TO FIVE (3) LEC. 3. Empirical and theoretical bases for evaluation and treatment of language disorders for the birth to five population.

SLHS 7530 STUTTERING (3) LEC. 3. Empirical and theoretical bases for stuttering, including assessment and intervention.

SLHS 7540 VOICE & UPPER AIRWAY DISORDERS (3) DSL/LEC. Empirical and theoretical bases for voice pathologies, diagnoses and therapies.

SLHS 7550 ADULT APHASIA (3) LEC. 3. Empirical and theoretical bases for adult language disorders associated with CNS pathologies, diagnoses and therapies.

SLHS 7560 CRANIOFACIAL ANOMALIES (3) LEC. 3. A review of syndromic and non-syndromic craniofacial disorders including cleft lip/palate. Assessment and treatment of speech and language problems associated with these anomalies is emphasized.

SLHS 7570 RESEARCH METHODS IN SPEECH-LANGUAGE PATHOLOGY (2) LEC. 2. Survey of experimental designs and statistical procedures used in the speech-language pathology literature for consumers of research.

SLHS 7580 COGNITION ACROSS THE LIFESPAN (3) LEC. 3. Advanced review of concepts and trends associated with cognitive functions. The assessment and intervention of cognitive communication disorders will be discussed.

SLHS 7590 LANGUAGE DISORDERS: SCHOOL-AGE (3) LEC. Empirical and theoretical bases for evaluation and treatment of language disorders for school-age children through adolescence.

SLHS 7600 CLINICAL PROBLEMS IN HEARING (2) LEC. 2. Pr. (CMDS 4650 or SLHS 4650) and (CMDS 4600 or SLHS 4600) and (CMDS 4620 or SLHS 4620). Topics chosen to address topics and problems in hearing. Course may be repeated for a maximum of 12 credit hours.

SLHS 7700 CLINICAL PROBLEM SOLVING I (2) LEC. 2. This course will help students develop problem-solving skills that can be applied to clinical practice in Speech-Language Pathology.

SLHS 7720 CLINICAL PROBLEM SOLVING II (2) LEC. 2. This course will promoted advanced problem-solving skills that can be applied to clinical practice in Speech-Language Pathology.

SLHS 7740 CLINICAL PROBLEM SOLVING III (2) LEC. This course will promoted advanced problem-solving skills that can be applied to clinical practice in Speech-Language Pathology.

SLHS 7800 PROFESSIONAL PRACTICE IN SLP (1) LEC. 1, PRA. 1-3. This course provides specific opportunities and experiences to build and demonstrate clinical knowledge and skills outside the traditional clinical practicum experience. Experiences cross settings and modalities and may include interprofessional team members. Course may be repeated for a maximum of 3 credit hours.

SLHS 7810 MOTOR SPEECH DISORDERS (3) LEC. 3. Empirical and theoretical bases for motor speech disorders, diagnoses and therapies.

SLHS 7820 DYSPHAGIA (3) LEC. 3. The role of speech-language pathology in diagnosing and treating swallowing disorders in children and adults. Emphasis will be placed upon clinical and instrumental assessment and treatment strategies.

SLHS 7840 AUGMENTATIVE AND ALTERNATIVE COMMUNICATION (3) LEC. Process and specific equipment involved in assessment, prescription and intervention with adults and children who are unable to use traditional communication modes.

SLHS 7880 SPECIAL POPULATIONS IN SLHS (2) LEC. 2. This course is intended to engage students in developing practical and clinically applicable knowledge about special populations that are not directly addressed in other courses in the SLHS SLP master's program.

SLHS 7890 COUNSELING IN SPEECH-LANGUAGE PATHOLOGY (2) LEC. 2. This course is designed to provide students with an overview of counseling skills that they can apply to clinical practice with people with communication disorders.

SLHS 7920 INTERNSHIP IN SPEECH-LANGUAGE PATHOLOGY (5) LEC. 5. SU. Completion of all academic course work. Successful completion of comprehensive exams or enrollment in graduate thesis. Course may be repeated for a maximum of 10 credit hours.

SLHS 7930 DIRECTED STUDIES (1-3) IND. Conferences, readings, research or reports in a specialized area of communication disorders. Course may be repeated for a maximum of 3 credit hours.

SLHS 7970 SPECIAL TOPICS SEMINAR (2) SEM. Advanced treatment of contemporary topics and trends, as well as current research aspects of audiology and speech-language pathology. Course may be repeated for a maximum of 4 credit hours.

SLHS 7990 RESEARCH AND THESIS (1-5) MST. Credit hours to fulfill thesis requirements. Course may be repeated with change in topics.

SLHS 8000 PROFESSIONAL DEVELOPMENT FOR RESEARCH CAREERS IN HEALTH SCIENCES (1-2) LEC. 1-2. SU. In-depth survey of professional aspects relevant to research careers in health sciences fields (e.g., ethical research practices, professional communication of scholarly work, employment readiness). Course may be repeated for a maximum of 5 credit hours.

SLHS 8100 HEARING SCIENCE (3) LEC. 3. Introduction to instrumentation and calibration of audiometric equipment. Auditory perception in normal-hearing and hearing impaired listeners.

SLHS 8110 AUDITORY PHYSIOLOGY (3) LEC. 3. Detailed study of the anatomy and physiology of the human auditory, and vestibular system over the lifespan.

SLHS 8120 AUDIOLOGY CLINICAL METHODS (3) LEC. 3. Use of audiometric equipment, administering audiological tests, recording test results, and interpreting test findings, including otoscopy, and cerumen management.

SLHS 8200 DIAGNOSTIC AUDIOLOGY (3) LEC. 3. Basic and advanced audiometric techniques to assess auditory system's site of lesion, including otoscopy, cerumen management, otoacoustic emissions and immittance.

SLHS 8210 MEDICAL ASPECTS OF HEARING DISORDERS (3) LEC. 3. Study of the disorders of hearing including their medical diagnosis, evaluation, and treatment.

SLHS 8220 AMPLIFICATION I (3) LEC. 3. Background and development of hearing aids and other amplification systems; performance standards and measurement techniques; selection, fitting and dispensing procedures

SLHS 8300 CENTRAL AUDITIORY PROCESSING (3) LEC. Selected clinical procedures in audiology, including electrophysiologic and behavioral tests of central auditory functioning.

SLHS 8310 AURAL REHABILITATION (3) LEC. Psychosocial aspects on hearing loss; clinical and therapeutic management of older persons with hearing disorders including counseling of the hearing-impaired and their families.

SLHS 8320 CLINICAL APPLICATIONS OF AMPLIFICATION (2) LEC. Didactic and practical training in use of instrumentation for testing, programming, fitting and verifying amplification.

SLHS 8400 PEDIATRIC AUDIOLOGY (3) LEC. 3. Normal development of speech, language and hearing losses' effect on communication, etiologic factors, screening, audiologic assessment, differential diagnosis and clinical management.

SLHS 8410 AURAL HABILITATION (3) LEC. 3. The parameters involved in the management of hearing-impaired school-aged children.

SLHS 8420 AMPLIFICATION II (3) LEC. 3. Pr. CMDS 8220 or SLHS 8220. Review of recent trends in hearing aid technology including digital and Programmable instruments.

SLHS 8430 CLINICAL APPLICATION OF DIAGNOSTIC AUDIOLOGY (2) LEC. Pr. CMDS 8320 or SLHS 8320. Didactic and practical training for selection, administration, and interpretation of behavioral and electrophysiologic tests, including auditory processing disorders.

SLHS 8500 ELECTROPHYSIOLOGICAL PROCEDURES IN AUDIOLOGY (3) LEC. 3. Selected neurophysiological clinical procedures in audiology, including electronystagmography and auditory evoked potentials.

SLHS 8510 CLINICAL APPLICATION OF BALANCE ASSESSMENT (2) LEC. Pr. (CMDS 8230 and CMDS 8320 and CMDS 8430) or (SLHS 8230 and SLHS 8320 and SLHS 8430). Didactic and practical training for selecting, conducting, and interpreting tests to identify disorders of balance and other auditory related systems.

SLHS 8520 HEARING CONSERVATION (3) LEC. Pr. CMDS 8310 or SLHS 8310. Studies the effects of noise on auditory system and implementation of hearing conservation programs in industry, schools and the military.

SLHS 8570 EVALUATION OF RESEARCH IN AUDIOLOGY (3) LEC. Survey of experimental designs and statistical procedures used in audiology research.

SLHS 8600 BALANCE DISORDERS (3) LEC. 3. Detailed coverage of the assessment and treatment of patients with balance disorders using nystagmography and other techniques.

SLHS 8610 IMPLANT TECHNOLOGY (3) LEC. Detailed study of the assessment and treatment of patients with cochlear implants.

SLHS 8620 OUTCOME MEASURES IN AUDIOLOGY (3) LEC. Application of research methodology to demonstrate efficacy in clinical service delivery in all areas of audiologic practice.

SLHS 8630 COUNSELING IN AUDIOLOGY (3) LEC. 3. Advanced course in the counseling component of rehabilitative audiology.

SLHS 8650 ADVANCED AUDIOMETRY (2) LEC. 2. Pr. (CMDS 8120 and CMDS 8320 and CMDS 8430 and CMDS 8510) or (SLHS 8120 and SLHS 8320 and SLHS 8430 and SLHS 8510). Didactic and practical training for selection, administration, scoring, and interpretation of behavioral audiometric tests and electrophysiologic procedures.

SLHS 8700 PROFESSIONAL ISSUES (3) LEC. 3. Legal and ethical issues in clinical audiology.

SLHS 8800 THE NEUROLOGICAL BASES OF COMMUNICATION DISORDERS (3) LEC. 3. Anatomy and physiology of the central nervous system as it relates to speech, language and hearing function and disorders.

SLHS 8810 PRIVATE PRACTICE (3) LEC. 3. Concepts and strategies for private practice in the areas of clinical and industrial audiology.

SLHS 8850 GRANT PROPOSAL PREPARATION IN HEALTH SCIENCES (3) LEC. 3. Overview of the grant proposal preparation process, from identifying an appropriate funding mechanism to developing the materials for a grant proposal (e.g., specific aims, research plan, budget).

SLHS 8910 CLINICAL PRACTICE IN AUDIOLOGY (2) DSL/LEC. Clinical practicum involving evaluation and management of patients of all ages with disorders of auditory, vestibular, and other auditory related systems.

SLHS 8920 CLINICAL INTERNSHIP (5) INT. SU. Pr. CMDS 8910 or CMDS 8916 or SLHS 8910 or SLHS 8916. Intensive clinical experience at off-campus setting up to 20 hours per week of supervised practicum. Course may be repeated for a maximum of 15 credit hours.

SLHS 8940 CLINICAL RESIDENCY (6) INT. SU. Pr. CMDS 8920 or SLHS 8920. A full time, supervised, nine month residency at an off-campus facility that provides audiological services. Fall, Spring.

SLHS 8950 AUDIOLOGY GRAND ROUNDS (3) LEC. Discussion/Seminar in timely clinical issues in audiology, clinical problem solving and case studies in contemporary audiologic service delivery.

SLHS 8980 CAPSTONE PROJECT (1) IND. A project involving applied clinical research or development of an innovative clinical procedure.

Speech, Language, and Hearing Sciences (SLHS)

Students desiring a degree in Speech, Language, and Hearing Sciences may declare the major without formal admission to the program. Students must earn a C or higher in all major courses. SLHS courses with grades below C must be repeated to count in major which may cause graduation to be delayed.

Total Hours: 120

1 Students are required to complete a two-course history sequence *or* a two-course literature sequence. They are also required to complete at least one Core History *or* one Core Literature course in the area not selected as the sequence.

2 Students should meet with their advisors for the listing of approved courses. SLHS majors are required to select a minimum of 3 electives (total of 6–8 credit hours) from the SLHS elective course offerings.

3 This course can be taken during the summer or fall terms.

4 Minimum of a B in SLHS 3400 is required for admission into many graduate speech language pathology programs.

[5] This course may be taken in person or online before the term in which it is listed in order to be eligible for registration for other major courses.

[6] Students should choose a chemistry or physics course with a corresponding lab to complete this requirement.

Department of Theatre and Dance

Theatre has the potential to foster dialogue, alter perceptions, and inspire social change. The Auburn University Department of Theatre and Dance is dedicated to the education and professional training of theatre artists, scholars, and audiences within a liberal arts environment. The Department champions the interaction between theory and practice and produces citizen artists who advocate for the arts through their own work in local, national, and international communities. Auburn University theatre students think critically, creatively, and collaboratively and carry their knowledge from rehearsal spaces and classrooms to stages, campuses, and communities worldwide.

Students graduating with degrees from the Department of Theatre and Dance find employment in a wide variety of fields including as actors, theatre technicians, administrators, community leaders, and/or educators. The Department of Theatre and Dance provides instruction and production experience for students interested in developing their talents in the theatre arts, whether as majors or non-majors. Consequently, a broad range of classroom, laboratory, and performance experiences is provided in acting, directing, devising, music theatre, dance, scenic and lighting design, costume design, theatre technology, construction and crafts, theatre history, dramatic literature, music theatre, theatre criticism, theatre administration, and management.

The Department of Theatre and Dance offers a Bachelor of Arts in Theatre and a Bachelor of Fine Arts in Theatre. The BA in Theatre is designed for students seeking to study theatre within the liberal arts curriculum. This degree is for students who choose to study theatre as a humanistic discipline or who wish to concentrate in theatre history, criticism, education, dramatic literature, dramaturgy, directing, and multiple other creative disciplines. It is excellent preparation for more specialized training in graduate school or a conservatory program or for careers in a wide variety of creative fields. The BFA in Theatre is designed for students who have specific professional goals in mind. It is for students seeking professional training in an intensive program in a single concentration—performance, music theatre, design/technology, or management. The Department of Theatre and Dance also offers three different minors in theatre, dance, and arts administration.

BA in Theatre

To graduate with a BA in Theatre, students must earn a grade of C or higher in all theatre courses. Any course with a grade below a C must be repeated.

BFA in Theatre

Students must comply with these requirements to be admitted to the BFA in Theatre:

- Students must formally apply for admission to the BFA in Theatre.
- Students entering the BFA options in Design/Technology, Management, and Performance typically apply for admission in the spring of their sophomore year.
- Students entering the BFA option in Music Theatre audition in the fall semester prior to their freshman year.
- Application is through portfolio review (Design/Technology and Management options) or audition (Performance and Music Theatre options).

Once they are admitted to the BFA, students must meet these requirements in order to graduate:

- Students must earn a grade of C or higher in all theatre courses. Any course with a grade below a C must be repeated.
- Continuance in the BFA degree tracks is subject to review each semester by faculty.
- Final recommendation for graduation is made after the successful presentation of a performance recital or the successful execution of a design or major production project during the student's final year. The success of a performance recital, design, or production model is determined by the Department of Theatre faculty.

In all Fine Arts curricula, electives may include six hours Basic ROTC or Advanced ROTC. In curricula that do not allow for six hours of electives, ROTC may be taken in lieu of required courses with approval of the departmental adviser. University core courses may not be replaced by Basic or Advanced ROTC.

Majors

- Theatre (p. 1127)
- Theatre/Fine Arts — Design/Technology Track (p. 1129)
- Theatre/Fine Arts — Management Track (p. 1130)
- Theatre/Fine Arts — Music Theatre Track (p. 1131)
- Theatre/Fine Arts — Performance Track (p. 1133)

Minors

- Arts Administration (p. 1126)
- Dance (p. 1134)
- Theatre (p. 1134)

Courses

THEA 1010 INTRODUCTION TO THEATRE FOR MAJORS I (3) LEC. 2, LLB. 2. Overview of all areas of theatrical collaboration intended specifically for the incoming theatre majors. Introduces theatre majors to academic skills they will need to pursue the theatre major at Auburn University. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 1110 INTRODUCTION TO THEATRE FOR MAJORS II (3) LEC. 2, LLB. 2. Pr. THEA 1010. Introduction to a variety of perspectives regarding theatrical practices, theories, and texts. Focus on productive working relationships and collaborative skills necessary for a successful life in the theatre. Course culminates in the creation of a new performance piece. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 1190 INTRODUCTION TO READING MUSIC FOR THEATRE ARTISTS (1) LEC. 1. Departmental approval. Instruction in how to read music for theatre artists. Course covers reading vocal music, instrumental music, orchestral music, and lead sheets in a variety of musical styles. One 50-minute class per week.

THEA 1340 PERFORMANCE I (1) STU. 1. Pr., Departmental approval. Successful audition. Instruction in major performance medium for the first-year Music Theatre major. Two half-hour private lessons per week.

THEA 1440 PERFORMANCE II (1) STU. 1. Pr. THEA 1340 or MUAP 1530. Departmental approval. Successful audition. Instruction in major performance medium for the first-year Music Theatre major. Two half-hour private lessons per week.

THEA 1530 DANCE LAB 1 - TAP (1) LAB. 3. Introduction to traditional tap dance Exploration of technical concepts, rhythm combinations, and improvisations designed to test and develop tap dance skills. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 2 credit hours.

THEA 1570 DANCE LAB 1 - BALLET (1) LAB. 4.5. Beginning studio introduction to ballet technique Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 2 credit hours.

THEA 1670 DANCE LAB 1 - JAZZ (1) LAB. 3. Studio introduction to and exploration of jazz technique. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 2 credit hours.

THEA 1910 PRODUCTION PRACTICUM I (1) STU. 4. Experience in the design/technical and management areas of production. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 2 credit hours.

THEA 2010 INTRODUCTION TO THEATRE (3) LEC. 3. Fine Arts Core. Appreciation of theatre arts including stage, television, and film. Development of sensitive and critical sophistication as articulate, discriminating theatre-goers. Play and film viewing, play-reading, critiques, and term projects. May count either THEA 2010 or THEA 2013.

THEA 2017 HONORS INTRODUCTION TO THE THEATRE (3) LEC. 3. Pr. Honors College. Fine Arts Core. Appreciation of theatre arts. Development of sensitivity and critical skills as theatre-goers. Play attendance, reading, critiques, and term projects.

THEA 2020 AESTHETICS OF ACTING (3) LEC. 3. Fine Arts Core. An orientation to acting aesthetics as a means of understanding and engaging the arte of theatre.

THEA 2080 PERFORMANCE TECHNIQUES FOR THE CAMERA (3) LEC. 1, LST. 3. Theory and practice of specialized performance techniques for television and film. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 2110 VOICE AND MOVEMENT FUNDAMENTALS (3) STU. 4. Exploration and study of fundamental issues in vocal production, articulation, and movement. Introduction to vocal anatomy, breathing/relaxation/alignment techniques, and integrated vocal and movement exercises applied in a variety of texts. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 2120 ACTING I (3) LEC. 2, LST. 2. Introduction to basic acting techniques, literature, and performance through improvisation, contemporary scene study and attendance at theatre performances. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 2210 MUSIC FUNDAMENTALS FOR MUSIC THEATRE (3) LEC. 3. Fundamental study of music structural procedures, form, and style designed for students in the music theatre major.

THEA 2220 MT PERFORMANCE LAB (1) LAB. Departmental approval. Demonstration and exploration of singing and acting techniques through performance of music theatre repertoire. Course may be repeated for a maximum of 6 credit hours.

THEA 2300 STAGE MANAGEMENT (3) LEC. 3. Examination of the theories and techniques of stage management in the producing organization, including management, organization, auditions, rehearsal, safety practices, and production procedures. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 2310 THEATRE TECHNOLOGY I (3) LEC. 3. A comprehensive introduction to the study of technical theatre; theoretical and practical applications of equipment, materials, and techniques used in technical theatre. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 2330 SCENE PAINTING (3) LEC. 2. LAB. 2. Departmental approval. Studio-oriented course introducing the principles, techniques, and media of the scenic artist. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 2340 PERFORMANCE III (1) STU. 1. Pr. THEA 1440 or MUAP 1630. Departmental approval. Successful audition. Instruction in major performance medium for the second-year Music Theatre major. Two half-hour private lessons per week.

THEA 2400 DESIGN AESTHETICS (3) LEC. 3. An exploration of the fundamental elements and principles of design, pictorial composition, and design theory, and their relationships and potential for application in scenic, costume, and lighting design. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 2440 PERFORMANCE IV (1) STU. 1. Pr. THEA 2340 or MUAP 2530. Departmental approval. Successful audition. Instruction in major performance medium for the second-year Music Theatre major. Two half-hour private lessons per week.

THEA 2450 DRAFTING FOR THE THEATRE I (3) LEC. 2, LST. 2. Pr. P/C THEA 2310. Departmental approval. A comprehensive study of the techniques and methods used in the graphic representation of stage scenery, equipment, and properties design. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 2570 DANCE LAB 2 - BALLET (1) LAB. 4.5. Pr. THEA 1570. Intermediate studio training in ballet technique. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 2 credit hours.

THEA 2610 COSTUME CONSTRUCTION (3) LEC. 1, LST. 3. Fundamentals of machine sewing techniques, pattern drafting and draping, fabric dyes, and craftwork as they relate to theatrical costuming. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 2650 STAGE MAKEUP (3) LEC. 1, LST. 3. Theories and techniques of stage makeup, practical design and execution of basic makeup techniques, special effects, and character makeups. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 2670 DANCE LAB 2 - JAZZ (1) LAB. 3. Pr. THEA 1670. Intermediate studio training in jazz technique. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 2 credit hours.

THEA 2700 TEXT ANALYSIS (3) LEC. 3. Script Analysis provides students with the tools to read and interpret scripts from a variety of perspectives with a focus upon implications for production. Students will analyze plays for character, plot, theme, action, given circumstances, and production requirements.

THEA 2840 BEGINNING DANCE TECHNIQUES (3) LEC. 1, LST. 3. Beginning level dance technique and theory, focusing on dance as an art form, including a survey of dance in different cultural and historical contexts. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 6 credit hours.

THEA 2910 PRODUCTION PRACTICUM II (1) STU. 4. Pr. THEA 1910. Experience in the design/technical and management areas of production. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 4 credit hours.

THEA 2940 APPLIED THEATRE I: ACTING (1) STU. 4. Pr., Cast in Auburn University Theatre production. Intensive applied work for students cast in Auburn University Theatre productions. Course may be repeated for a maximum of 4 credit hours.

THEA 3110 VOICE FOR THE ACTOR II (3) LEC. 2, LST. 2. Pr. THEA 2110. Continuing study of vocal production and articulation techniques in tests of increasing complexity. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3120 ACTING II (3) LEC. 2, LST. 2. Pr. THEA 2120. Exploration of internal and external acting theory and techniques in modern and classical scene study. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3140 MUSIC THEATRE ACTING (3) LEC. 3. LAB. 3. Pr. THEA 1190. Pr., Admission into the (THMU major) or Departmental approval. Students registering for this course should have experience with reading music. Exploration of acting techniques and performance through music theatre scene and song study, analysis, and history of music theatre repertoire culminating in public performance. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3150 BFA PERFORMANCE STUDIO I (4) LEC. 3, LST. 5. Pr., Admission into the THPR or THMU majors. Intensive study and practice integrating advanced contemporary scene study, audition technique, and the Fitzmaurice Voicework system. Students who do not earn a grade of "C" or better must re-audition for the BFA program and repeat the course.

THEA 3160 BFA PERFORMANCE STUDIO II (4) LEC. 3, LST. 5. Pr. THEA 3150. Intensive study and practice integrating Shakespeare and scene study of poetic texts with continuing work in Fitzmaurice Voicework system. Must earn a grade of "C" or higher or re-audition for the BFA program and repeat THEA 3150 and THEA 3160.

THEA 3190 SINGING PRACTICUM (1) STU. 1. Group instruction in musical theatre singing. Students will be introduced to the primary principles of posture, breathing, resonance, vocal health, direction, interpretation, and repertoire selection. Theatre majors who do not earn a grade of "C" or higher must repeat. Course may be repeated for a maximum of 2 credit hours.

THEA 3210 THE BUSINESS OF THEATRE (3) LEC. 3. Pr. THEA 1010 and THEA 1110 and THEA 1910 and THEA 2310 and THEA 2910. Discussion, research, and implementation of the practices necessary to be successful as a freelance artist in the current performing arts field.

THEA 3220 ARTS MANAGEMENT (3) LEC. 3. Departmental approval. Exploration of arts organizational structures, budgeting for non-profit and for-profit arts organizations, basic business and marketing practices, historical principles and practices of arts and cultural organizations.

THEA 3320 THEATRE TECHNOLOGY II (3) LEC. 2, LST. 2. Pr. THEA 2310. Theoretical and practical applications of equipment and techniques in technical theatre. Topics include light, sound mechanics, theatre rigging, equipment, special effects, and computer applications. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3340 PERFORMANCE V (1) STU. 1. Pr. THEA 2440 or MUAP 2630. Departmental approval. Successful audition. Instruction in major performance medium for the third-year Music Theatre major. Two half-hour private lessons per week.

THEA 3350 PRODUCTION MANAGEMENT (3) LEC. 3. Departmental approval required. Exploration of the role and responsibilities of the production manager in the coordination and execution of production elements for projects in theatre, dance, opera, music, etc. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3400 RENDERING FOR THE THEATRE (3) LEC. 2. LAB. 2. Pr. THEA 2400 or Departmental approval. Traditional drawing and rendering techniques and medias that help the designer to communicate scenic, costume, and lighting designs. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3410 SCENE DESIGN I (3) LEC. 2, LST. 2. Pr. THEA 2400 or Departmental approval. Discussion, research, and execution of theory and practices of designing scenery for the stage. Emphasis on traditional style and methods of design and presentation for the proscenium theatre. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3420 PROPERTY DESIGN AND TECHNOLOGY (3) LEC. 2, LST. 2. Pr. THEA 3320 or Departmental approval. History, design, organization, application of materials, and techniques used in the design and construction of properties for the theatre, film, and television. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3440 PERFORMANCE VI (1) STU. 1. Pr. THEA 3340 or MUAP 3530. Departmental approval. Successful audition. Instruction in major performance medium for the third-year Music Theatre major. Two half-hour private lessons per week.

THEA 3460 AUTOCAD FOR PERFORMANCE DESIGN (3) DSL/LEC. Pr. THEA 3450. This course provides students with a broad knowledge of creating 2D drawings and 3D modeling using Computer-Aided Design software (AutoCAD). Students will learn how to use AutoCAD to present their designs, visually and distribute basic, industry-standard drawings.

THEA 3510 LIGHTING DESIGN (3) LEC. 2, LST. 2. Pr. THEA 2310 or Departmental approval. Studio course that explores the theory, research, and practice of stage lighting, practical illumination, and effects lighting. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3520 SOUND DESIGN (3) LEC. 2, LST. 2. Departmental approval. Equipment and techniques used in sound design, as both a design and a technical medium. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3570 DANCE LAB 3 - BALLET (1) LAB. 4.5. Pr. THEA 2570. Intermediate advanced studio in ballet technique. Course may be repeated for a maximum of 2 credit hours.

THEA 3610 ADVANCED COSTUME CONSTRUCTION (3) LEC. 2, LST. 2. Pr. THEA 2610 or Departmental approval. Historical pattern making and draping, millinery skills, and craft techniques, and their practical applications in theatre costuming. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3640 COSTUME DESIGN (3) LEC. 2, LST. 2. Pr. THEA 2400 or Departmental approval. Costume design and rendering as it relates to historical and original design for the theatre. Exploration of design for television, commercials, and rock stars. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3670 DANCE LAB 3 - JAZZ (1) LAB. 3. Pr. THEA 2670. Intermediate advanced studio training in jazz technique. Course may be repeated for a maximum of 2 credit hours.

THEA 3710 THEATRE HISTORY, THEORY AND CRITICISM II - BODY (3) LEC. 2, LST. 2. Examination of the history, literature, and theory of the theatre from prehistory to the present with an emphasis on the human body as a broad category for understanding a variety of issues and topics relevant to contemporary theatre practice. Areas of exploration include such topics as historical and theoretical perceptions of the social status of the actor, the actor's body as a medium of representation, and theatrical representations of gender and ethnicity. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3720 THEATRE HISTORY, THEORY AND CRITICISM III - SPACE (3) LEC. 2, LST. 2. Examination of the history, literature, and theory of the theatre from prehistory to the present with an emphasis on theatrical space as a broad category for understanding a variety of issues and topics relevant to contemporary theatre practice. Areas of exploration include ritual landscapes as they pertain to the origin of drama, the development of the western playhouse, the avant-garde reconceptualization of theatre space, and the development of such spatially oriented American institutions as Broadway and regional theatre. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3730 MUSIC THEATRE HISTORY (3) LEC. 3. Exploration of music theatre literature, performances, historical, analytical and critical trends from the early 20th century to the present day. Areas of exploration include music theatre as a work of art with unique conversations about aesthetics and form, as an entertainment media shaped by its historical and cultural context, and as a viable performance form for the 21st century. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3740 COSTUME HISTORY (3) LEC. 3. History of Western costume and its uses in the theatre from ancient times to the present. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3800 THEATRE EVENTS MANAGEMENT (3) SEM. 3. Pr. THEA 2300. THEA 2300 with a grade of "C" or higher. This course is an introduction to the researching, planning, coordinating, marketing, facilitation/management and assessment of special events, specifically as they relate to the performing arts. Through practical application, each student will gain experience in the basic entrepreneurial skills necessary to plan a public arts event.

THEA 3840 INTERMEDIATE DANCE TECHNIQUES I (3) LEC. 1, LST. 3. Pr. THEA 2840. Intermediate level dance technique and theory, with an emphasis on performance qualities including work on alignment, strength, flexibility, rhythm, musicality, and dynamics, as well as the study of select contemporary choreographers. THEA 3840 and THEA 3850 need not be taken in sequence. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 6 credit hours.

THEA 3850 INTERMEDIATE DANCE TECHNIQUES II (3) LEC. 1, LST. 3. Pr. THEA 2840. Further exploration into intermediate level dance technique and theory, with emphasis on aesthetics and contemporary topics in dance. THEA 3840 and THEA 3850 need not be taken in sequence. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 6 credit hours.

THEA 3860 MOVEMENT FOR THE ACTOR (3) STU. 4. Introduction to the basic concepts of movement as it relates to the actor. Integrative ways of connecting the body to text and space. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3910 PRODUCTION PRACTICUM III (1) STU. 4. Experience in the design/technical and management areas of production. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 2 credit hours.

THEA 3940 APPLIED THEATRE II: ACTING (1) STU. 4. Pr., Cast in Auburn University Theatre production. Intensive applied work for students cast in Auburn University Theatre productions. Course may be repeated for a maximum of 4 credit hours.

THEA 3950 DIRECTING SEMINAR (3) LEC. 2, LST. 2. Pr. THEA 2120. Study of fundamental skills and collaborative processes needed to direct live theatre, including blocking, script analysis, research methods, approaches to casting, and rehearsal techniques. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 3960 DRAMATURGY SEMINAR (3) LEC. 3. Study of fundamental skills and collaborative processes needed to dramaturg a piece of live theatre including both production and new play dramaturgy, critical analysis, research, presentations, and performance. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 4150 BFA PERFORMANCE STUDIO III (4) LEC. 3, LST. 5. Pr. THEA 3160. Professional preparation with particular focus on individual rehearsal and performance techniques covering a broad spectrum of periods and styles geared toward graduate acting program placement and professional employment. Students who do not earn a grade of "C" or higher must re-audition for the BFA program and repeat THEA 3150, THEA 3160, and THEA 4150.

THEA 4160 BFA PERFORMANCE STUDIO IV (4) LEC. 3, LST. 5. Pr. THEA 4150. Special problems and topics in performance. Intensive work integrating and applying acting, voice, and movement techniques in an ensemble capstone recital of work in an adjudicated public performance. Students who do not earn a grade of "C" or higher must re-audition for the BFA program and repeat THEA 3150, THEA 3160, THEA 4150 and THEA 4160.

THEA 4340 PERFORMANCE VII (1) STU. 1. Pr. THEA 3440 or MUAP 3630. Departmental approval. Successful audition. Instruction in major performance medium for the fourth-year Music Theatre major. Two half-hour private lessons per week.

THEA 4420 SCENE DESIGN II (3) LEC. 2, LST. 2. Pr. THEA 3410 or Departmental approval. Advanced course in theory and practice of scenic and lighting design for theatre. Emphasis on experimental and non-traditional staging in a variety of space. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 4440 PERFORMANCE VIII (1) STU. 1. Pr. THEA 4340 or MUAP 4530. Departmental approval. Successful audition. Instruction in major performance medium for the fourth-year Music Theatre major. Two half-hour private lessons per week.

THEA 4450 DRAFTING FOR THE THEATRE II (3) LEC. 2, LST. 2. Pr. THEA 3450. Comprehensive study of computer and digital techniques used in the graphic representation of stage scenery, equipment, and properties design. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 4510 LIGHTING DESIGN II (3) LEC. 3. LAB. 1. Pr. THEA 2400 and THEA 3510. Lighting Design II provides students with in-depth study of advanced stage lighting techniques, including integration of computer graphics and projections with conventional lighting instruments.

THEA 4570 DANCE LAB 4 - BALLET (1) LAB. 4.5. Pr. THEA 3570. Advanced studio training in ballet technique. Course may be repeated for a maximum of 2 credit hours.

THEA 4650 ADVANCED STAGE MAKEUP (3) LEC. 1, LST. 3. Pr. THEA 2650 or Departmental approval. Comprehensive study of specialized makeup, including film and television makeup, mask making, prosthesis, facial hair design, and wig making. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 4670 DANCE LAB 4 - JAZZ (1) LAB. 3. Pr. THEA 3670. Advanced studio training in jazz technique. Course may be repeated for a maximum of 2 credit hours.

THEA 4690 ARTISTS AND COMMUNITIES (3) SEM. 3. An in-depth analysis and exploration of the role and responsibility of the artist and art within communities. We will explore this idea from multiple perspectives: marketing, general management, artistic direction, performance, urban planning/creative placemaking, fundraising, and nonprofit management.

THEA 4750 PLAYWRITING (3) LEC. 3. Discussion of the principles of play construction, playwriting exercises, and completion of a one-act play. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 4770 CAPSTONE SENIOR DANCE LAB (1) LAB. 1. Pr. THEA 1530 and THEA 2570 and THEA 2670. Students must be in good standing in BFA Performance Program. Culminating exploration of, and enrichment in musical theatre dance technique ranging from Ballet to Jazz to Hip-hop. Course culminates in a public capstone dance outcome performance.

THEA 4840 ADVANCED DANCE TECHNIQUES (3) LEC. 1, LST. 3. Pr. THEA 3850. Intensive study of advanced dance techniques in theory and practice. Course often serves as a training and preparation for public performance. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 12 credit hours.

THEA 4910 PRODUCTION PRACTICUM IV (1-4) STU. Pr. THEA 3910. Or Admission into the THDT or THMN program and two semesters of THEA 3910 or departmental approval. Leadership experience in the design/technical and management areas of production. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 4 credit hours.

THEA 4920 PROFESSIONAL INTERNSHIP (1-8) INT. Pr., Departmental approval. Internship with professional or community theatre in the student's field of specialization. Each 10-hour work week equals one hour of credit. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 8 credit hours.

THEA 4930 DIRECTED STUDIES (1-3) IND. Pr., Departmental approval. Directed readings, creative and tutorial projects of interest to the advanced student. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 6 credit hours.

THEA 4940 THEATRE SPECIAL PROJECTS (3) AAB/STU. 4. Pr., Departmental approval. Selected projects related to realizing a theatrical production in public performance. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 9 credit hours.

THEA 4950 THEATRE LITERATURE AND THEORY SEMINAR (3) LEC. 3. Thorough examination of dramatic literature and theory from a narrow perspective (such as genre, style, or era.) Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 6 credit hours.

THEA 4967 HONORS SPECIAL PROBLEMS (1-3) IND. Pr. Honors College. Subject areas to be determined between student and theatre instructor. Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 6 credit hours.

THEA 4970 SPECIAL TOPICS (3) LEC. 3. Special Topics in Theatre or Dance. Course may be repeated for a maximum of 9 credit hours.

THEA 4980 SENIOR CAPSTONE PROJECT (3) LEC. 3. Capstone course to aid senior theatre majors in their transition to the professional world and/or graduate studies. Theatre majors who do not earn a grade of "C" or higher must repeat this course.

THEA 4997 HONORS THESIS (1-6) IND. Pr. Honors College. Final projects of varying natures in theatre Theatre majors who do not earn a grade of "C" or higher must repeat this course. Course may be repeated for a maximum of 6 credit hours.

3 To enroll in Senior Capstone Project, students must be senior theatre majors planning to graduate before the following fall semester.

BFA Theatre — Music Theatre (THEA)

The BFA in Music Theatre is a four-year degree track that offers practical, pre-professional skills in acting, dancing, and singing for the student whose ambition is to be a professional actor and musical theatre artist. In the first two years of the program, students study voice in private sessions, music theory and skills, piano, speech, music theatre acting, ballet, jazz and tap. Both the Performance and Music Theatre degree tracks combine a liberal arts education with applied skills in performance that will serve the undergraduate actor seeking graduate school placement or professional employment

All members of our acting faculty are professional actors with years of experience in the industry as well as terminal degrees in their field.

Theatre majors must earn a grade of C or higher in theatre courses, or they must repeat those courses for credit toward their degrees. Students must formally apply for admission to the BFA in Theatre. Students entering the BFA options in Music Theatre audition in the fall semester prior to their freshman year. Application is through an audition.

Department of World Languages, Literatures, and Cultures

Graduates from the Department of World Languages, Literatures, and Cultures have cited their language studies and skills as the foundation for pursuing graduate studies or obtaining positions in communications, government, health professions, law, business, primary and secondary education, non-profit organizations, or academe. The Department of World Languages, Literatures, and Cultures offers Bachelor of Arts degrees in French, French-international trade, German, German-international trade, Spanish, and Spanish-international trade.

All students with previous language experience in French, German, or Spanish who wish to advance their studies in the same language must take the placement test prior to Camp War Eagle, Successfully Orienting Students, or enrollment in a course in these three world language areas.

Study abroad is recommended for majors in World Languages, Literatures and Cultures.

Students must earn at least a C and maintain a 2.5 GPA in all major courses in order to graduate.

Majors

- French (p. 1151)
- French — International Trade Option (p. 1153)
- German (p. 1154)
- German — International Trade Option (p. 1156)
- International Studies (p. 1157)
- Spanish (p. 1159)
- Spanish — International Trade Option (p. 1161)

Minors

- Asian Studies (p. 1150)
- Classics (p. 1151)
- French (p. 1153)
- French Linguistics (p. 1152)
- German (p. 1156)
- German Linguistics (p. 1155)
- Global Cultures (p. 1157)
- Italian Studies (p. 1159)
- Spanish (p. 1160)

FLSP 6030 ADVANCED CULTURE AND LITERATURE OF SPANISH SPEAKING WORLD (3) LEC. 3. Advanced training in Culture and literature of the Spanish speaking world with specific course materials determined by faculty. Course may be repeated for a maximum of 6 credit hours.

FLSP 7000 GRADUATE SPANISH ABROAD (1-9) AAB/FLD. Pr., Departmental approval. Course work at the graduate level taken on an approved Study Abroad program. Students should consult with the Spanish graduate director for an estimation of credit prior to going abroad. Course may be repeated for a maximum of 9 credit hours.

FLSP 7010 HISTORY OF THE SPANISH LANGUAGE (3) LEC. 3. Diachronic study of the development of the Spanish language from its Latin origins to the present.

FLSP 7020 SPANISH LINGUISTICS (3) LEC. 3. Synchronic study of the Spanish language focusing on phonology, morphology, syntax, and lexicon, taking into consideration dialectal differences.

FLSP 7030 APPLIED SPANISH LINGUISTICS (3) LEC. 3. Critical study of current research in applied linguistics regarding the acquisition of Spanish by non-native speakers, with emphasis on the problems faced by adult English-speaking individuals.

FLSP 7050 LITERARY CRITICISM AND THEORY (3) LEC. 3. Contemporary literary criticism and theory as it relates to Spanish and Spanish-American literature.

FLSP 7060 RESEARCH METHODS (1) LEC. 1. SU. Methods of scholarly investigation in literary history and criticism. Credit may not be used to satisfy degree requirements.

FLSP 7090 INTRODUCTION TO COLLEGE LEVEL SPANISH INSTRUCTION (3) LEC. 3. Instruction for GTAs, including critical observation in performance and guidance by a designated supervisory professor. Required of all students who hold a graduate teaching assistantship.

FLSP 7100 SPANISH MEDIEVAL LITERATURE I (3) LEC. 3. Critical and historical study of medieval Spanish literature through representative texts from the various genres of the period beginning with the origins of Spanish literature until 1299.

FLSP 7110 SPANISH MEDIEVAL LITERATURE II (3) LEC. 3. Study of medieval Spanish literature through representative texts from the various genres of the period 1300-1500.

FLSP 7120 16TH-CENTURY SPANISH LITERATURE (3) LEC. 3. Critical and historical study of representative literary works in all genres from around 1492 to the end of the 16th century.

FLSP 7130 17TH-CENTURY SPANISH LITERATURE (3) LEC. 3. Critical and historical study of representative literary works in all genres in the 17th century with emphasis on Baroque literature.

FLSP 7140 SURVEY OF 18TH AND 19TH-CENTURY SPANISH LITERATURE (3) LEC. 3. Survey of the major literary, cultural, and historical trends in 18th and 19th century Spanish literature.

FLSP 7150 HISPANIC COLONIAL LITERATURE OF THE UNITED STATES (3) LEC. 3. Literature about the colonial Hispanic exploration and colonization of the United States from the 16th to 19th centuries.

FLSP 7160 20TH-CENTURY SPANISH LITERATURE (3) LEC. 3. Critical and historical study of 20th-century Peninsular literature from the Generation of 98 to Spanish post-war literature through representative works in all genres.

FLSP 7170 CONTEMPORARY SPANISH LITERATURE (3) LEC. 3. Critical and historical study of contemporary literature from the Spanish Civil War to the present through representative works in all genres.

FLSP 7210 COLONIAL SPANISH-AMERICAN LITERATURE (3) LEC. 3. Study of representative literary genres and authors of Vice Regal America from Spanish transcription of pre-Columbian works to those just prior to the Wars of Independence.

FLSP 7220 SPANISH-AMERICAN POETRY I (3) LEC. 3. Critical and historical study of Spanish-American poetry from 1824 to the first generation of modernism.

FLSP 7230 SPANISH-AMERICAN POETRY II (3) LEC. 3. Critical and historical study of Spanish-American poetry from post-modernism to the present.

FLSP 7240 SPANISH-AMERICAN POST-COLONIAL PROSE TEXTS TO THE NEW NARRATIVE (3) LEC. 3. Critical and historical study of representative essayists and fiction writers of the 19th and 20th centuries predating the New Narrative.

FLSP 7250 THE NEW NARRATIVE IN SPANISH-AMERICAN FICTION: MODERNIST AND POST-MODERNIST TEXTS (3) LEC. 3. Critical and historical study of major works of modernist and post-modernist fiction that achieved international acclaim during the second half of the 20th century.

FLSP 7270 SPANISH AMERICAN THEATER I (3) LEC. 3. Critical and historical study of the Spanish-American theater, with emphasis on the period prior to 1900.

FLSP 7280 SPANISH AMERICAN THEATER II (3) LEC. 3. Critical and historical study of the Spanish-American theater from 1900 to present.

FLSP 7300 DON QUIJOTE (3) LEC. 3. Critical study of Cervantes' masterpiece.

FLSP 7970 SPECIAL TOPICS IN LINGUISTICS, LITERATURE AND CULTURE (3) AAB. 3. Pr., BA in Spanish or BS in Foreign Language Education in Spanish. In-depth study of an author or authors and analysis of the cultural milieu influencing their creativity or investigation of a specific linguistic phenomenon in Spanish. Course may be repeated with a change in topic. Course may be repeated with change in topics.

FLSP 7990 RESEARCH AND THESIS (1-10) MST. Directed readings and research culminating in a thesis. Course may be repeated with change in topic.

Asian Studies Minor

Code	Title	Hours
Chinese, Japanese or Korean at the 2000 or 3000 level.		3
Elective Courses—See advisor for approved course listing.		12
Total Hours		**15**

[1] Minimum 9 hours at 3000-level or above

At least 9 hours required for the minor must be completed at Auburn or through AU approved study abroad.

Students must earn a C and maintain a 2.5 grade-point average in all courses that count toward the minor.

Certificate in Workplace Intercultural Competence

The Certificate in Workplace Intercultural Competence will give students an opportunity to develop and demonstrate the skills required to work in a diverse setting and engage in intercultural communication.

Code	Title	Hours
FLXX 1020 or higher (2nd course in any language sequence)		4
FLGC 1150	Global Fluency and Awareness	3
Approved Study Abroad or International Internship Experience [1]		3
FLGC 3150	Global Fluency for the Workplace [2]	1

Course (3000-level or higher) in the major/minor [3]	3
Total Hours	**14**

1 Students who are unable to participate in an abroad or internship experience can petition the program director to have this requirement fulfilled by an additional approved upper-level course in the field.

2 FLGC 3150 will act as a capstone for the certificate.

3 Students should meet with the program director to choose an appropriate course. The purpose of this course is to tie the topics of the workplace intercultural competence certificate into learning in the student's major field. These course hours can count in both the certificate and the major/minor program.
Students will be able to choose from a wide range of possibilities. As just some examples: BUSI 3250 (International Business), CTCT 3000 (Leadership Skills for Personal and Organizational Development), FINC 3100 (Fundamentals of Global Trade), HOSP 4500 (Strategic Hospitality Management), MKTG 4400 (International Marketing), POLI 3100 (Introduction to World Affairs). Other upper-level courses with an international and professional focus can also be approved by the director. Students are responsible for satisfying the pre-requisites for any course included in the certificate.

Classics Minor

Code	Title	Hours
Greek or Latin (at the 2000 or 3000 level)		3
Elective Courses - See advisor for approved course listing.		12
Total Hours		**15**

1 Minimum 9 hours at 3000-level or above

At least 9 hours required for the minor must be completed at Auburn or through AU approved study abroad.

Student must earn a C and maintain a 2.5 grade-point average in all courses that count toward the minor.

French (FLFR)

Students must earn a C and maintain a 2.5 GPA in all major courses.

1 Students should meet with their advisors to determine appropriate German, business, and other elective courses.
2 FLGR 4110 and FLGR 4120 may be used.
3 Students are required to take at least one Core History and one Core Literature course. They are also required to take a second course from either Core History or Core Literature to complete the two-course sequence.

Global Cultures Minor

15 semester hours in minor (minimum 9 hours at 3000-level or above). Students take a sequence of two language skills courses at the 2000 or 3000 level and three supporting courses (see advisor for approved course listing). Students must earn a C and maintain a 2.5 GPA for all courses that count toward the minor. Courses taken in fulfillment of the College Core or other majors and minors may not be counted toward the Global Cultures minor.

International Studies in Liberal Arts (ISLA)

International Studies in Liberal Arts is directed toward students interested in the broad study of social, political, cultural and economic global issues, and who want to develop language skills, expertise in a regional area, and personal experience in other cultures.

Housed in the Department of World Languages, Literatures, and Cultures but with the support of departments in the humanities, fine arts, and social sciences, the International Studies in Liberal Arts program is an interdisciplinary major in the College of Liberal Arts. It offers a broad, interdisciplinary approach to international issues, as well as the opportunity to select a regional focus. Students may choose to focus in a particular region of the world, such as Europe, Middle East and Africa, Latin America, or Asia. All ISLA students are required to complete at least four semesters of a foreign language specific to their regional concentration. They are also required to experience a total cultural immersion by participating in a study abroad program in a country that speaks their chosen language and is within their regional concentration Finally, ISLA majors are required to complete an approved internship either abroad, or with an international company or organization based in the US. Along the way students will also take courses that introduce them to the cultures, history, and achievements of the region in which they wish to concentrate. At the end of the program, students will complete a capstone project, working with CLA faculty members in different departments to ensure a broad-based experience in writing and researching methodologies in line with their regional focus.

Students with the International Studies in Liberal Arts B.A. degree are well prepared to work in education, tourism, translation, federal and state government, research and policy think tanks, non-profit and foreign aid organizations, law, the cooperative job sector, international banking and business, and military service.

The College also offers an array of study abroad, exchange, and international internship programs as well as minors and certificates in relevant topics. Check with CLA advisors for more information about these options.

1 Students majoring in Spanish, Spanish International Trade, International Business Spanish, and Foreign Language Education Spanish are required to take FLSP 2020 for those majors and thus will need to replace this required course by completing 4 courses from the menu of courses above which are not required courses for their major.

Spanish Minor

At least 9 hours required for the minor must be completed at Auburn or through Auburn-approved study abroad. At least 9 hours required for this minor must be completed at the 3000 level or above.

Students must earn a C and maintain a 2.5 grade-point average in all courses that count toward the minor.

Code	Title	Hours
Minimum of 6 hours and no more than 8 hours in courses equivalent to FLSP 2010 and FLSP 2020		6-8
FLSP 3060	Communicative Skills in Spanish I	3
FLSP 3080	Intro to Cultural Analysis	3
or FLSP 3100	Introduction to Hispanic Literature	
FLSP Elective at 3000 or above		3
Total Hours		**15-17**

1 Students must see their advisers for approved elective courses.

Spanish — International Trade (FLST)

Students must earn a C and maintain a 2.5 GPA in all major courses.

Women's and Gender Studies Minor

Women’s and Gender Studies, an interdisciplinary minor, advances teaching, research, and scholarship about women's lives and about gender roles, relations, and identities. The minor sheds new light on existing knowledge of women and gender, integrates scholarship on women and gender into traditional disciplines, examines the impact of the social construction of femininity and masculinity, and promotes understanding of and appreciation for the diversity and complexity of gender historically and cross-culturally. To learn more about the program in Women’s and Gender Studies and to see a current listing of courses to fulfill the electives in the minor, go to https://cla.auburn.edu/womens-gender-studies/undergraduate-minor/ (https://nam11.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcla.auburn.edu%2Fwomens-gender-studies%2Fundergraduate-minor%2F&data=05%7C01%7Cblltn%40auburn.edu%7C301a1804aa1340021b6908db476d9afb%7Cccb6deedbd294b388979d72780f62d3b%7C1%7C0%7C638182308327373716%7CUnknown%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQIjoiV2luMzIiLCJBTiI6Ik1haWwiLCJXVCI6Mn0%3D%7C3000%7C%7C%7C&sdata=TOzxFGKCxS0sIKA5vNztcj7djKf2YIuALZGzxTns2zA%3D&reserved=0).

1 Students must complete a minimum 9 hours at 3000-level or above.
ANTH 3000,3200,3600,5200, ARTS 3810, CMJN 4400,COMM 5430, ENGL 4310,4320,4510,4710,4740, HDFS 2000, 3040, 4680, 4700, 5300, HIST 3020, 3560,3600,3610,5030,5060, LEAD 2100, MDIA 3320, MUSI 5110,5113, PHIL 1090, 3800, POLI 3720,4030,5610, PSYC 2510, SOCY 3300,3500,5500,5600,5670, SOWO 3800, 3850, THEA 4950, WMST 3500,3900,3970

Options

Engineering

This program provides for enrollment in the Liberal Arts curriculum and in the Samuel Ginn College of Engineering. Two degrees will be awarded: a bachelor of arts degree in the liberal arts major and a bachelor's degree in the designated engineering field. Students should receive dual advising through the Colleges of Liberal Arts and Engineering. Typically, five to six academic years are necessary to complete dual requirements.

Pre-Law

Most majors and curricula are accepted as preparation for the study of law, but students interested in attending law school should also consider majoring in law and justice. Courses deemed useful, and which may be taken as electives, in majors, and in some cases to fulfill certain core requirements, are available from the pre-law program, located in 7002 Haley Center, where students receive advice on preparing for law school admission and the study of law.

Pre-Health

Most majors and curricula in Liberal Arts are accepted as preparation for professional degrees in health, including advanced degrees from schools of medicine, dentistry, optometry, physical therapy, occupational therapy and others. Generally, particular courses in the sciences, mathematics and philosophy should be taken in the University Core. Additional sciences and mathematics may be needed as electives. The university's pre-health advisor should be consulted for elective and core course guidance and for assistance in applying to graduate/professional schools. The liberal arts advisor is available for all other matters related to the student's undergraduate studies.

College of Nursing

The College of Nursing offers undergraduate and graduate programs designed to equip students with the knowledge, skills, and values to positively impact the health of populations. The college is committed to teaching, research, and outreach that advances health and quality of life in our state, nation, and world. Graduates from the program emerge as leaders in healthcare, prepared to lead advancements in patient care, research, and education.

Undergraduate Program

The College of Nursing includes a Bachelor of Science in Nursing (BSN) program with two pathways, traditional and RN to BSN. The traditional track includes classroom, laboratory, and clinical experiences that prepare graduates for professional nursing practice across the lifespan with diverse populations across a variety of settings. The RN to BSN track has two options, traditional RN to BSN and concurrent RN to BSN. Both tracks provide associate degree nurses with education focused on knowledge development, leadership, evidence-based practice, and quality patient care outcomes. Students in the traditional RN to BSN are licensed associate degree nurses who must complete the required prerequisites followed by the three-semester professional program. Concurrent students complete associate degree and BSN courses concurrently and graduate with the BSN one semester after associate degree completion.

Graduate Programs

The graduate programs in the College of Nursing include Master of Science in Nursing (MSN), Doctor of Nursing Practice (DNP), and Doctor of Philosophy in Nursing (PhD) programs. Students seeking the MSN may select the Primary Care Nurse Practitioner or Nurse Educator track. Graduates of the Primary Care Nurse Practitioner track have specialized, advanced education and clinical practice competencies to provide health care for populations and sit for certification as a Family Nurse Practitioner. The Nurse Educator track prepares graduates to teach both student nurses and professional nurses at the bedside and in academic environments. The DNP is a practice-focused doctorate that prepares advanced practice nurses with advanced knowledge of evidence-based care and the ability to apply this knowledge in practice to improve patient outcomes. There are two options for the DNP, BSN to DNP and post-master's DNP. The PhD in Nursing is a research-focused doctoral degree that prepares nurse scientists for positions in academia and other research settings.

Facilities

The College of Nursing is housed in the nursing building located at 710 South Donahue Drive. Undergraduate clinical nursing experiences are conducted at acute care, community and long-term care facilities in a variety of locations across the state of Alabama and in neighboring states. Graduate clinical nursing experiences are conducted in primary care and other healthcare facilities in Alabama and beyond. Students are responsible for complying with policies and procedures required by agencies in which clinical experiences are completed.

Technical Standards and Requirements

Technical standards are provided to inform incoming and current Auburn University College of Nursing students of the performance abilities and characteristics necessary to successfully meet program outcomes and provide safe and effective nursing care.

Acquire and interpret information (AACN Essentials Domains 1, 4, 7, & 8)

- Ability to acquire and interpret information, including, but not limited to information conveyed through coursework, lecture, group activities, written documents, computer systems, and laboratory, simulation, and clinical experiences.

Communicate with others in oral and written form (AACN Essentials Domains 2, 6, & 8)

- Ability to communicate effectively and sensitively through various mediums with a variety of individuals including patients, families, healthcare team members, faculty and peers of diverse ethnic, religious, and cultural backgrounds.
- Ability to elicit information from patients, family members, and healthcare team members to effectively evaluate and plan patient care.
- Ability to comprehend and use standard professional nursing and medical terminology.
- Ability to convey information to patients, families, and the healthcare team including health teaching and explaining care.

Integrate knowledge to demonstrate clinical judgment (AACN Essentials Domains 1, 2, & 3)

- Ability to assess, interpret, respond to, and evaluate patient health needs.
- Ability to critically think, problem-solve, and apply clinical judgment to care for patients, families, and/or communities across the health continuum in diverse care environments.

Exhibit professional behaviors and attitudes (AACN Essentials Domains 9 & 10)

- Ability to exercise proper judgment and complete responsibilities in a timely and accurate manner.
- Ability to demonstrate concern for others, integrity, accountability, interest, and motivation.
- Possess the emotional health necessary to function under stress and adapt to changing environments within the context of classroom and clinical settings.

Utilize motor skills (AACN Essentials Domains 2 & 5)

- Ability to obtain accurate information from patients using gross and fine motor skills appropriate to the technique.
- Possess psychomotor skills and endurance necessary to provide holistic nursing care.
- Practice in a safe manner using universal precautions.
- Provide timely and appropriate care in urgent and emergent situations.

Accreditation

The baccalaureate degree program in nursing, master's degree program in nursing, Doctor of Nursing Practice program, and post-graduate APRN certificate program at Auburn University are accredited by the Commission on Collegiate Nursing Education (http://www.ccneaccreditation.org). The AUCON prelicensure BSN program is approved by the Alabama Board of Nursing.

Undergraduate Programs

- Nursing — Traditional (p. 1173)
- RN — BSN (p. 1176)

Graduate Programs

- Doctor of Nursing Practice — DNP (p. 1714)
- Doctor of Philosophy in Nursing — PhD (p. 1716)
- Nursing Education — Graduate Certificate (post MSN) (p. 1720)
- One Health — Graduate Certificate (p. 1729)
- Post-Masters Healthcare Simulation — Graduate Certificate (p. 1797)
- Primary Care Nurse Practitioner — Graduate Certificate (post MSN) (p. 1721)
- Nurse Practitioner Primary Care and Nurse Educator programs — MSN (p. 1719)

Courses

NURS 1010 NURSING SUCCESS (1) LEC. 1. SU. This elective course is designed to help students explore the nursing profession and the skills necessary to provide a pathway to academic success.

NURS 2020 DOSAGE CALCULATION AND MEDICAL TERMINOLOGY FOR HEALTHCARE PROFESSIONALS (1) DSL/LEC. Provides fundamental dosage calculation and medical terminology concepts essential for professional nursing and/or healthcare practice. Course may be repeated for a maximum of 2 credit hours.

NURS 2030 FOUNDATIONS OF PROFESSIONAL NURSING (3) LEC. Coreq. NURS 2040. Examines the principles of professional nursing and theoretical underpinnings of nursing care.

NURS 2040 PROFESSIONAL NURSING ACROSS THE LIFESPAN (3) LEC. Coreq. NURS 2030. Explores professional nursing care of clients across all stages of human development employing a holistic approach.

NURS 2120 CONTEMPORARY TOPICS IN WOMEN'S HEALTH (3) LEC. 3. This course will provide an overview of health issues affecting women. Topics will include sexually transmitted infections, contraception, childbearing, mental health, domestic violence, human trafficking, and menopause.

NURS 3010 PATHOPHARMACOLOGY FOR SIMPLE AND STABLE CONDITIONS (2) LEC. Pr. NURS 2020 and NURS 2030 and NURS 2040. Coreq. NURS 3510 and NURS 3410. Explores pathophysiological and pharmacological concepts that guide nursing professionals in providing person-centered care. Course content will focus on foundational pathophysiological and pharmacological concepts and their application for managing clients with simple and stable conditions.

NURS 3020 PATHOPHARMACOLOGY FOR ACUTE AND MENTAL HEALTH CONDITIONS (2) LEC. Pr. NURS 3010 and NURS 3410 and NURS 3510. Coreq. NURS 3530 and NURS 3520. Explores pathophysiological and pharmacological concepts that guide nursing professionals in providing person-centered care. Course content will focus on pathophysiological and pharmacological concepts and their application for managing clients with health exacerbations, complications, urgent and critical medical conditions, and mental health conditions.

NURS 3110 THEORETICAL CONCEPTS OF PROFESSIONAL NURSING PRACTICE (3) LEC. 3. Coreq. NURS 3141 and NURS 3130. Exploration of essential professional nursing concepts.

NURS 3120 NURSING PATHOPHYSIOLOGY (3) LEC. 3. Coreq. NURS 3141 and NURS 3130. Admission to the School of Nursing Upper Division. Pathophysiological concepts that guide nursing professionals in the assessment, planning, implementation and evaluation of care for patients across the lifespan.

NURS 3130 EVIDENCE BASED SKILLS, ASSESSMENT, AND HEALTH PROMOTION (4) LEC. 4. Coreq. NURS 3110 and NURS 3141. Integration of current evidence to guide nursing skills, assessment, and health promotion.

NURS 3140 INTERDISCIPLINARY APPROACHES TO CARING FOR CHILDREN IN THE COMMUNITY (2) LEC. 2. The course introduces students to community-dwelling children (birth through teens) who have special needs and/or chronic health conditions. Students will develop skills in communication and practical skills for relating to and interacting with this population. Students will explore community resources and participate in providing outreach projects serving children and their families, and health information to the public.

NURS 3141 CONCEPTS AND EVIDENCE BASED SKILLS FOR PROFESSIONAL CLINICAL PRACTICE (3) LAB. 9. SU. Coreq. NURS 3110 and NURS 3130. Application of foundational nursing concepts, skills, and assessment across the lifespan in diverse settings with emphasis on health promotion.

NURS 3210 CLINICAL PHARMACOLOGY (3) LEC. 3. Pr. (NURS 3120 or NURS 3123) and NURS 3130. Nurse's role in therapeutic pharmacology.

NURS 3230 PROFESSIONAL NURSING CONCEPTS: ACUTE CARE ACROSS THE LIFESPAN (6) LEC. 6. Pr. (NURS 3120 or NURS 3123) and NURS 3110 and NURS 3130 and NURS 3141. Coreq. NURS 3231 and NURS 3210. Concepts inherent in the delivery of nursing care for acutely ill individuals and their families.

NURS 3231 PROFESSIONAL NURSING CONCEPTS: ACUTE CARE ACROSS THE LIFESPAN - CLINICAL (4) LAB. 12. SU. Pr. NURS 3123 or NURS 3120. Coreq. NURS 3210 and NURS 3230. Application of concepts inherent in the delivery of nursing care for acutely ill individuals and their families.

NURS 3330 PROFESSIONAL NURSING CONCEPTS IN THE CHILDBEARING FAMILY AND REPRODUCTIVE HEALTH (4) LEC. 4. Pr. NURS 3120. Coreq. NURS 3331. Concepts inherent in reproductive health and nursing care for childbearing families.

NURS 3331 PROFESSIONAL NURSING CONCEPTS IN THE CHILDBEARING FAMILY AND REPRODUCTIVE HEALTH - CLINICAL (2) LAB. 6. SU. Pr. NURS 3120. Coreq. NURS 3330. Concepts inherent in reproductive health and nursing care for childbearing families applied in clinical settings.

NURS 3410 HEALTH ASSESSMENT (2) LEC. 1. LAB. 1. Pr. NURS 2020 and NURS 2030 and NURS 2040. Coreq. NURS 3510 and NURS 3010. Focuses on holistic assessment across the lifespan.

NURS 3420 PROFESSIONAL COMMUNITY AND PUBLIC HEALTH NURSING (3) LEC. 2. LAB. 3. Pr. NURS 2020 and NURS 2030 and NURS 2040. Coreq. NURS 3410. Explores concepts inherent in the delivery of equitable, just, safe, and person-centered care for individuals, families, and communities in diverse settings.

NURS 3510 CLINICAL JUDGMENT IN NURSING FOR SIMPLE AND STABLE CONDITIONS (5) LEC. 3. LAB. 6. Pr. NURS 2020 and NURS 2030 and NURS 2040. Coreq. NURS 3010 and NURS 3410 and NURS 3420. Prepares students to provide professional nursing care for adult clients experiencing simple and/or stable conditions through didactic, lab, and clinical experiences. Course content will focus on health promotion, wellness, and management of medical conditions.

NURS 3520 CLINICAL JUDGMENT IN NURSING FOR ACUTE CONDITIONS (8) LEC. 4. LAB. 12. Pr. NURS 3010 and NURS 3410 and NURS 3510. Coreq. NURS 3020. Prepares students to provide professional nursing care for adult clients experiencing acute and/or unstable conditions through didactic, lab, and clinical experiences. Course content will focus on health exacerbations, complications, and management of urgent and unstable medical conditions.

NURS 3530 CLINICAL JUDGMENT IN NURSING FOR MENTAL HEALTH (5) LEC. 3. LAB. 6. Pr. NURS 3010 and NURS 3410 and NURS 3510. Coreq. NURS 3020. Prepares students to provide professional nursing care for clients experiencing developmental, behavioral, and mental health disorders through didactic, lab, and clinical experiences. Course content will focus on addressing mental health and well-being across the lifespan.

NURS 3630 PROFESSIONAL NURSING LEADERSHIP IN MICROSYSTEMS (2) LEC. 2. Pr. NURS 3230 and NURS 3231. The study of leadership and management concepts for direct patient care. Nursing Science only

NURS 3700 COMPETENCY RETENTION COURSE FOR NON-CLINICAL CONCEPTS (3) LEC. 3. This course is designed for students who are out of sequence in the professional nursing curriculum. Topics and activities will assist the student in retaining competencies in completed non-clinical courses.

NURS 3701 COMPETENCY RETENTION COURSE FOR CLINICAL CONCEPTS (3) LEC. 2. LAB. 1. This course is designed for students who are out of sequence in the professional nursing curriculum. Topics and activities will assist the student in retaining competencies in completed clinical courses.

NURS 3730 PROFESSIONAL NURSING CONCEPTS: MENTAL HEALTH ACROSS THE LIFESPAN (2) LEC. 2. Pr. NURS 3110 and NURS 3130 and NURS 3141. Coreq. NURS 3330 and NURS 3731. Concepts inherent in the delivery of nursing care for mentally ill individuals, families, and communities across the lifespan.

NURS 3731 PROFESSIONAL NURSING CONCEPTS: MENTAL HEALTH ACROSS THE LIFESPAN CLINICAL (2) LAB. 2. SU. Pr. NURS 3110 and NURS 3130 and NURS 3141. Coreq. NURS 3730. Clinical application of concepts inherent in the delivery of nursing care for mentally ill individuals, families, and communities across the lifespan.

NURS 3810 HOLISTIC NURSING PATHOPHYSIOLOGY & HEALTH ASSESSMENT (5) LEC. 5. Pathophysiological concepts that guide professional nurses in assessment, planning, implementation and evaluation of holistic care for patients across the lifespan.

NURS 3830 EVIDENCE BASED PRACTICE (5) LEC. 5. Pr. (NURS 3813 or NURS 3810) and (NURS 3843 or NURS 3840). Admission into Online RN-to-BSN Program. Utilization of evidence-based practice to promote delivery of quality patient care.

NURS 3840 FORMATION OF PROFESSIONAL NURSING PRACTICE (5) DSL/LEC. 5. Admission to the School of Nursing RN to BSN Program. Examines concepts, theories, and competencies fundamental to the formation of professional nursing practice.

NURS 3940 HEALTHCARE IN THE GLOBAL ARENA (2-3) LEC. 45. LAB. 0. Pr. NURS 3520 and NURS 3530. Study abroad learning opportunity to explore healthcare delivery and cost, licensure and certification, and culture in the global arena. Course may be repeated for a maximum of 6 credit hours.

NURS 3970 SPECIAL TOPICS IN NURSING (3) LEC. 3. Focused study plan designed for students who are out of sequence in the professional nursing curriculum. Course may be repeated for a maximum of 6 credit hours.

NURS 4030 PATHOPHARMACOLOGY FOR PRECONCEPTION THROUGH ADOLESCENCE (2) LEC. Pr. NURS 3020 and NURS 3520 and NURS 3530. Coreq. NURS 4540. Explores pathophysiological and pharmacological concepts that guide nursing professionals in providing person-centered care. Course content will focus on caring for women, childbearing families, and pediatric clients from birth through adolescence.

NURS 4040 PATHOPHARMACOLOGY FOR COMPLEX CONDITIONS (1) LEC. Pr. NURS 4030 and NURS 4410 and NURS 4420 and NURS 4540. Coreq. NURS 4940 and NURS 4550. Explores pathophysiological and pharmacological concepts that guide nursing professionals in providing person-centered care. Course content will focus on pathophysiological and pharmacological concepts and their application for managing clients with critical and multisystem conditions.

NURS 4110 ADVANCED CONCEPTS OF PEDIATRIC NURSING (2) LEC. 2. Pr. NURS 3520 and NURS 3530. Departmental approval. Prepares students to provide professional nursing care for pediatric clients experiencing critical conditions through didactic, lab, and simulation experiences. Course content will focus on concepts of the critical pediatric client's airway, breathing, and circulation.

NURS 4120 HEALTH SCIENCE CAMP EXPERIENCE (2) LAB. 0. Clinical experience in the care of children with chronic conditions in a camp setting.

NURS 4130 WELLNESS IN AGING (2) LEC. 2. Pr. NURS 3520 and NURS 3530. Provides undergraduate nursing students with a specialized focus on geriatric care, equipping them with knowledge, skills, and hands-on simulation experiences to improve the quality of care for older adults in various clinical settings.

NURS 4140 VULNERABLE POPULATIONS (2) LEC. 2. Pr. NURS 3520 and NURS 3530. Explores healthcare challenges faced by vulnerable populations, emphasizing unique healthcare needs, barriers to care, and the importance of culturally competent and compassionate approaches.

NURS 4180 TRAUMA NURSING (2) LEC. 2. Pr. NURS 3520 and NURS 3530. A broad overview of the specialty of trauma nursing and the multiple factors that affect patient care in an emergency or trauma situation.

NURS 4230 PROFESSIONAL NURSING CONCEPTS: CHRONIC AND COMPLEX CONDITIONS (5) LEC. 5. Pr. (NURS 3330 and NURS 3331 and NURS 3730 and NURS 3731 and NURS 3231) and P/C NURS 4231. Concepts inherent in the delivery of nursing care for individuals, families, and populations with chronic and/or complex conditions.

NURS 4231 PROFESSIONAL NURSING CONCEPTS: CHRONIC AND COMPLEX CONDITIONS - CLINICAL (5) LAB. 15. SU. Pr. (NURS 3230 and NURS 3330 and NURS 3331 and NURS 3730 and NURS 3731) and P/C NURS 4230. Applications of concepts inherent in the delivery of nursing care for individuals, families, and populations with chronic and/or complex conditions.

NURS 4240 CULTURAL EXPEDITIONS IN HEALTH CARE (2) LEC. 2. Pr., Senior-level student in Nursing. Hands-on experience with different aspects of culture including an overnight stay in a replica of a third world global village.

NURS 4270 PERIOPERATIVE NURSING (2) LEC. 1. LAB. 1. Pr. NURS 3520 and NURS 3530. This course is designed to give the student a broad knowledge base for the specialty of perioperative nursing and the multiple factors that will impact patient care from the preoperative phase through the recovery phase. The course will cover concepts of care that span all ages and types of surgical procedures.

NURS 4280 ANIMAL-ASSISTED THERAPY (2) LEC. 2. Theoretical foundations and guidelines for practice of animal-assisted therapy.

NURS 4290 EVIDENCE BASED PRACTICE (2) LEC. 2. Pr. NURS 3230. Application of appropriate research findings and other evidence to influence nursing practice.

NURS 4410 PROFESSIONAL NURSING LEADERSHIP (3) LEC. Pr. NURS 3010 and NURS 3410 and NURS 3510 and NURS 3420. Coreq. NURS 4420. Explores knowledge, skills, and attitudes necessary to enhance leadership in nursing practice.

NURS 4420 EVIDENCE BASED PRACTICE (2) LEC. Pr. NURS 3010 and NURS 3410 and NURS 3510 and NURS 3420. Coreq. NURS 4410. Develops students' knowledge and skills to address clinical questions through appraisal of evidence and recommendations for nursing practice.

NURS 4540 CLINICAL JUDGMENT IN NURSING FOR PRECONCEPTION THROUGH ADOLESCENCE (6) LEC. 3. LAB. 9. Pr. NURS 3020 and NURS 3520 and NURS 3530. Coreq. NURS 4030. Prepares students to provide professional nursing care for women, childbearing families, and children experiencing a variety of acute and chronic health conditions through didactic, lab, and clinical experiences. Course content will focus on developmentally appropriate nursing care for women, childbearing families, and children from conception through adolescence.

NURS 4550 CLINICAL JUDGMENT IN NURSING FOR COMPLEX CONDITIONS (5) LEC. 3. LAB. 6. Pr. NURS 4030 and NURS 4410 and NURS 4420 and NURS 4540. Coreq. NURS 4940 and NURS 4040. Prepares students to provide professional nursing care for clients experiencing complex health conditions through didactic, lab, and clinical experiences. Course content will focus on the management of critical and multisystem medical conditions.

NURS 4830 LEADERSHIP AND MANAGEMENT IN PROFESSIONAL NURSING (3) LEC. 3. Pr. (NURS 3813 or NURS 3810) and (NURS 3843 or NURS 3840). Admission into Online RN-to-BSN Program. Addresses evidence-based leadership/management competencies for the professional nurse working with interprofessional team.

NURS 4840 TRANSITION TO PROFESSIONAL NURSING PRACTICE (5) LEC. 5. Pr. (NURS 4833 or NURS 4830) and (NURS 3830 or NURS 3833). Admission into Online RN-to-BSN Program. Integrate past nursing practice and acquired knowledge, skills, and attitudes for transition to the professional nursing role.

NURS 4850 CLINICAL PREVENTION AND POPULATION HEALTH (4) LEC. 4. Pr. (NURS 3833 or NURS 3830) and (NURS 4833 or NURS 4830). Admission into Online RN-to-BSN Program. Concepts inherent in the delivery of nursing care for individuals, families and populations in the global community.

NURS 4900 INDEPENDENT STUDY IN NURSING (1-6) IND. Directed readings and/or clinical study in student-selected areas related to nursing. Course may be repeated for a maximum of 6 credit hours.

NURS 4920 TRANSITION TO PROFESSIONAL NURSING PRACTICE (4) LEC. 4. Pr. NURS 4230 and NURS 4231. Coreq. NURS 4921. Provides the content and learning experiences designed to help students synthesize the essential concepts for successful transition into professional nursing. Course may be repeated for a maximum of 8 credit hours.

NURS 4921 TRANSITION TO NURSING PRACTICE (7) LAB. 7. SU. Pr. NURS 4230 and NURS 4231. Coreq. NURS 4920. Application of essential concepts for transition into professional nursing practice.

NURS 4930 COMMUNITY ASSESSMENT PROJECT (1) LEC. 1. LAB. 14. Pr. (NURS 4230 and NURS 4231) and NURS 4290. Capstone course for a community assessment project completed throughout the nursing program.

NURS 4940 PROFESSIONAL NURSING LICENSURE (1) LEC. Pr. NURS 4030 and NURS 4410 and NURS 4420 and NURS 4540. Coreq. NURS 4941. Facilitates synthesis of essential concepts for success on the NCLEX-RN examination.

NURS 4941 PROFESSIONAL NURSING PRECEPTORSHIP (5) LAB. 15. SU. Pr. NURS 4030 and NURS 4410 and NURS 4420 and NURS 4540. Coreq. NURS 4940. Synthesizes the knowledge, skills, attitudes, and values developed throughout the BSN curriculum with patients and families in an acute care setting.

NURS 4970 SPECIAL TOPICS IN NURSING (1-4) STU. SU. Focused study plan designed for students who have not met an identified curricular benchmark. Course may be repeated for a maximum of 4 credit hours.

NURS 4997 HONORS THESIS (1-3) IND. Pr. Honors College. Course may be repeated for a maximum of 3 credit hours.

NURS 5420 POPULATION HEALTH OUTCOMES (3) DSL. This course provides the student with knowledge and skills to examine population health issues across the lifespan, globally, and regionally. Students will learn and connect with populations while identifying how to measure the health within populations. The course includes a focus on improving health equity and reducing health disparities.

NURS 6420 POPULATION HEALTH OUTCOMES (3) DSL. This course provides the student with knowledge and skills to examine population health issues across the lifespan, globally, and regionally. Students will learn and connect with populations while identifying how to measure the health within populations. The course includes a focus on improving health equity and reducing health disparities.

NURS 7000 FOUNDATIONAL CONCEPTS IN HEALTHCARE SIMULATION (3) DSL/LEC. This course is the first in the Healthcare Simulation Certificate program series of courses. The course provides the learner with a foundation for use of simulation as a teaching methodology in professional healthcare education. Evidence-based standards and theoretical frameworks will be discussed and applied.

NURS 7010 EVIDENCE-BASED APPLICATION OF TECHNOLOGY AND IPE IN HEALTHCARE SIMULATION (3) DSL. Pr. NURS 7000. This is the second course in the Healthcare Simulation Certificate program. The course builds upon foundational knowledge to provide a basic understanding of simulation technology and attributes of effective simulation-enhanced interprofessional learning experiences and provide a review of basic research methods and their application to ensuring evidence-based simulation design. Learners will apply knowledge of simulation best practices, technology, and interprofessional considerations to design a simulation-based activity.

NURS 7020 HEALTHCARE SIMULATION CAPSTONE (4) DSL. Pr. NURS 7000 and NURS 7010. This is the final course in the Healthcare Simulation Certificate program. Students will integrate prior coursework to develop a capstone simulation-based experience utilizing best practices of adult experiential learning, curriculum design, evidence- based practice, research, evaluation, and project management.

NURS 7100 FOUNDATIONS OF RURAL AND UNDERSERVED HEALTH (3) LEC. 3. This course explores the unique challenges and opportunities associated with healthcare delivery in rural and underserved communities. Learners will examine foundational concepts such as social determinants of health, health disparities, health policy, and cultural norms, and their collective impact on community health. The course also emphasizes evidence-based strategies and innovative approaches to address the barriers to healthcare access and improve health outcomes in these settings. Must be currently enrolled in a health or health related.

NURS 7110 ADVANCED HEALTH AND PHYSICAL ASSESSMENT (3-4) DSL/LLB. Focus is on assessment, knowledge and techniques required for master's level prepared nurses in a clinical setting. Course may be repeated for a maximum of 4 credit hours.

NURS 7120 LEARNER DEVELOPMENT & SOCIALIZATION (1) DSL/LEC. Coreq. NURS 7210. Provides an overview of theoretical formulations and instructional technologies that support learner development and socialization.

NURS 7200 POPULATION HEALTH IN RURAL COMMUNITIES (3) DSL. This course will examine challenges with special populations in rural communities. Learners will apply knowledge through a team-based approach to address a specific rural health challenge in special populations. NURS 7200 may be taken as an elective course by any student enrolled in health or health related graduate program of study (Nursing, Psychology, Physical Therapy, Medical Doctors, Veterinarians etc.)

NURS 7210 EVIDENCE-BASED TEACHING STRATEGIES (2) LEC. 2. Coreq. NURS 7120. Provides an overview of evidence-based teaching strategies and instructional technology.

NURS 7220 ROLES AND ISSUES OF THE PRIMARY CARE PRACTITIONER (3) LEC. 3. Pr. (NURS 7340 or NURS 7346) and (NURS 7350 or NURS 7356) and (NURS 7310 or NURS 7316) and (NURS 7230 or NURS 7236) and (NURS 7250 or NURS 7256) and (NURS 7430 or NURS 7436) and (NURS 7240 or NURS 7246) and (NURS 7110 or NURS 7116) and (NURS 7540 or NURS 7546). This course explores the complex process of role development for the advanced practice nurse within current health care systems. Competencies and role development issues of advanced nursing practice are included. Role transition and strategies for facilitating role acquisition and implementation including social, legal and ethical issues governing advanced practice in primary health care are addressed. Admission to the MSN Program.

NURS 7230 ADVANCED PATHOPHYSIOLOGY (3) LEC. 3. This course incorporates the application of advanced pathophysiology concepts across the lifespan. It broadens the concepts of assessment findings and diagnostic testing for specific health issues, utilizing clinical judgment for expected variations in disease presentations.

NURS 7240 ADVANCED PHARMACOLOGY (3) LEC. 3. Pr. (NURS 7230). This course provides an in-depth understanding of pharmacology and pharmacotherapeutics, emphasizing their application in patient-centered care. The primary goal is to deepen comprehension of these principles, focusing on how to safely and effectively integrate these principles into advanced practice nursing.

NURS 7250 HEALTHCARE POLICY AND ETHICS FOR THE NURSE LEADER (3) LEC. 3. Departmental approval. This course addresses the U.S. health care delivery system at micro and macro levels, problems, principles and the alternatives for managing problems in a systematic manner. Health policy, economic, and ethical principles and the relationship of these concepts to advocacy and leadership roles are explored. Admission to the MSN Program

NURS 7260 TRANSITION FROM CLINICIAN TO NURSE EDUCATOR (2) LEC. 2. This course provides the nurse educator student with a basic understanding regarding the nature of the nurse educator role. The student will explore dynamics influencing the development of the students' role and attaining success in higher education, different career paths, and issues shaping their perception of higher education.

NURS 7280 PROFESSIONALISM AND LEADERSHIP (3) LEC. 3. This course is designed to prepare graduate nursing students for advanced practice leadership roles and to foster professionalism in diverse healthcare environments.

NURS 7300 RURAL HEALTH COMMUNITY IMMERSION AND PROJECT (3) DSL. Pr. (NURS 7100 and NURS 7200). This course includes an immersive educational experience in the rural setting to develop a community-based health initiative project to improve health outcomes.

NURS 7310 TRANSITION TO ADVANCED PRACTICE NURSING (2) LEC. 2. This course is designed to introduce the Masters student to scholarly writing and inquiry for evidence-based practice. The principles of synthesis in writing and understanding of research are addressed. Admission to AU MSN Program.

NURS 7320 CURRICULUM DEVELOPMENT AND EVALUATION (3-4) DSL/LEC. Pr. (NURS 7340 or NURS 7346) and (NURS 7210 or NURS 7216). Analysis and evaluation of curriculum construction, selection of teaching strategies for diverse groups and individuals, and evaluation of learning outcomes in education of patients, health providers, and nursing students. Admission to the MSN Program. Course may be repeated for a maximum of 4 credit hours.

NURS 7330 DIAGNOSTIC REASONING AND CLINICAL MANAGEMENT (3-7) DSL/LLB. Pr. NURS 7230 and NURS 7430 and NURS 7340 and NURS 7240 and NURS 7350 and NURS 7110. Focus is on the process of collecting data and arriving at diagnostic and therapeutic conclusions to guide clinical management for patients. Course may be repeated for a maximum of 7 credit hours.

NURS 7340 ADVANCED THEORETICAL FOUNDATIONS OF NURSING (3) LEC. 3. Students will analyze and apply theoretical principles to guide practice in healthcare delivery for individuals, families, and populations. Admission to the MSN or DNP Program.

NURS 7350 QUALITY AND SAFETY IN HEALTHCARE (3) LEC. 3. Students examine and analyze approaches to promote quality and safety in healthcare.

NURS 7420 ASSESSMENT & EVALUATION (3) DSL/LEC. Pr. (NURS 7320). Develop methods to assess learning outcomes and evaluate programs for compliance with accreditation standards.

NURS 7430 ADVANCED EVIDENCE-BASED PRACTICE (3) LEC. 3. Students will explore approaches for identifying and applying relevant evidence to improve practice and health outcomes.

NURS 7440 PRIMARY CARE PRACTICUM OF WOMEN AND CHILDREN (3-7) DSL/LLB. Pr. NURS 7230 and NURS 7430 and NURS 7340 and NURS 7240 and NURS 7350 and NURS 7110 and NURS 7330. Focus is on the primary care nurse practitioner's role in managing common acute and chronic healthcare problems in women and pediatric patients in a variety of primary care settings. Course may be repeated for a maximum of 7 credit hours.

NURS 7540 IMPLEMENTATION AND EVALUATION OF EVIDENCE-BASED NURSING PRACTICE (2) LEC. 2. Pr. NURS 7430 or NURS 7436. This course focuses on the concepts necessary for implementation and evaluation of an evidence-based practice project. Data collection tools, data analyses, and interpretation of data analysis will be explored. Students will discuss change strategies, development of measurable outcomes and dissemination of any results. Admission to MSN Program. Course may be repeated for a maximum of 4 credit hours.

NURS 7550 PRIMARY CARE II: ADULTS AND ELDERLY (3) LEC. 1. Pr. (NURS 7220 or NURS 7226) and (NURS 7330 or NURS 7336). Admission to the MSN Program and completion of pre-requisites. Focus is on the primary care nurse practitioner's role in managing common acute and chronic health problems in the adult and geriatric population in a variety of primary care settings.

NURS 7800 NURSE EDUCATOR PRACTICUM I (2) DSL/PRA. 2. Pr. (NURS 7420). Synthesis and application of theories, research, and strategies in healthcare delivery settings. (120 direct patient care hours)

NURS 7810 NURSING EDUCATION PRACTICUM (3) DSL/PRA. 3. Pr. (NURS 7340 or NURS 7346) and (NURS 7350 or NURS 7356) and (NURS 7310 or NURS 7316) and (NURS 7260 or NURS 7266) and (NURS 7210 or NURS 7216) and (NURS 7230 or NURS 7236) and (NURS 7250 or NURS 7256) and (NURS 7430 or NURS 7436) and (NURS 7320 or NURS 7326) and (P/C NURS 7240 or P/C NURS 7246) and (P/C NURS 7110 or P/C NURS 7116) and (P/C NURS 7540 or P/C NURS 7546). Synthesis of educational theories, research, and strategies in applying the roles of the educator in teaching clients, students, or healthcare providers. Selected educational settings provide opportunities to practice the roles of educator under guidance of a qualified preceptor. The practicum includes 120 academic clinical and 60 healthcare facility clinical based direct care hours. Admission to MSN Program and completion of all pre-requisites.

NURS 7820 CERTIFIED NURSE EDUCATOR PREP (1) DSL/LEC. Pr. (NURS 7800). Coreq. NURS 7810. Provides a comprehensive review of the competency areas for the Certified Nurse Educator and Academic Clinical Certified Nurse Educator exams.

NURS 7920 PRIMARY CARE PRACTICUM (7-8) LEC/PRA. Pr. NURS 7230 and NURS 7430 and NURS 7340 and NURS 7240 and NURS 7350 and NURS 7110 and NURS 7330 and NURS 7440. Focus is on the application of knowledge and skills in the transition to the role of the primary care nurse practitioner. Course may be repeated for a maximum of 8 credit hours.

NURS 8010 DOCTORAL SEMINAR I (1) SEM. This course is designed to foster scientific communication skills of new doctoral students, and to advance dissertation work through development of dissertation research ideas.

NURS 8020 DOCTORAL SEMINAR II (1) SEM. Pr. (NURS 8010). This course is designed to advance dissertation work by fostering data analytics skills and the use of secondary datasets to provide meaningful insights that support decision-making, formation of hypotheses, and making the case for the proposed research.

NURS 8030 DOCTORAL SEMINAR III (1) SEM. Pr. (NURS 8020). This course is designed to advance dissertation work by focusing on the creation of a complete draft of the first manuscript, presenting the scholarly work to peers and faculty, and providing critical reviews of peers' scholarship.

NURS 8040 DOCTORAL SEMINAR IV (1) SEM. Pr. (NURS 8030). This course is designed to advance dissertation work by focusing on approvals needed for the protection of human subjects and permissions for access to research data and/or subjects, and to promote successful career planning and transition.

NURS 8210 RESEARCH PRACTICUM (1-3) RES. Pr. (NURS 8340 and NURS 8350). This course provides the PhD student with practical experiences in conducting research prior to undertaking the dissertation. Course may be repeated for a maximum of 3 credit hours.

NURS 8320 INFORMATICS AND TECHNOLOGY IN HEALTHCARE (3) LEC. 3. Students gain competency to leverage information and technology to improve health outcomes.

NURS 8330 QUANTITATIVE METHODS FOR EVIDENCE-BASED PRACTICE (3) LEC. 3. Admission to DNP Program. Provides the DNP student with clinical data management and outcome skills with an essential component of any EBP.

NURS 8340 DEVELOPMENT OF THE ROLE OF SCIENTIST (2) DSL/LLB. The course is designed to socialize the student into the roles, activities, and responsibilities of a PhD prepared nurse scientist, and is foundational to preparation for a career in research in academia or other research-intensive environments. The content addresses the responsibilities and activities of a scientist in the health professions, including ethical issues, scientific freedom and social responsibility, collaboration and negotiation, interdisciplinary research peer review, development of a research plan, program of research and research career, research funding, presentations, and publications.

NURS 8350 NURSING PHILOSOPHY, SCIENCE, AND THEORY (3) DSL/LEC. This course is a foundational theory course that explores the philosophy of science, development of nursing knowledge, and evaluation and application of theory to nursing research, practice, and education.

NURS 8410 THEORY APPLICATION FOR ADVANCED PRACTICE (3) LEC. 3. Admission to DNP Program. The course is the basis for the Doctor of Nursing Practice (DNP) project by identifying and investigating the various phenomena of interest in student's practice area.

NURS 8420 POPULATION HEALTH OUTCOMES (3) LEC. 3. Provides the student with knowledge and skills to examine population health issues across the lifespan, globally and regionally.

NURS 8430 FINANCIAL MANAGEMENT FOR ADVANCED PRACTICE (3) LEC. 3. This course provides the DNP student with the knowledge and skills necessary to identify, evaluate, and consider costs associated with implementing and sustaining change.

NURS 8440 LEADERSHIP FOR ADVANCED HEALTH POLICY (3) LEC. 3. Admission to DNP Program. Provides the DNP student with the knowledge and skills to be a leader in health care and to influence health policies at multiple levels.

NURS 8450 QUALITATIVE RESEARCH METHODS IN NURSING (3) DSL/LLB. Pr. (NURS 8770). Explores the qualitative research method, including the philosophical, historical, and theoretical foundations of this approach. Learners will examine the ethical issues related to qualitative research and gain understanding of data collection, management, analysis and interpretation.

NURS 8460 QUANTITATIVE RESEARCH DESIGN AND METHODS (3) DSL/LLB. Pr. (STAT 7000 or STAT 7006). Coreq. STAT 7010. The focus of this course is on quantitative research methods and study designs appropriate for investigating health care phenomena and problems of importance to nursing and health care. The interrelationship among clinical problems, literature reviews, research questions, study designs, and methods of inquiry and analysis is emphasized. Through a combination of theoretical discussion and applied practical experience, students develop skills and knowledge that is foundational to the dissertation process. Students will apply knowledge by participating in class discussions, critiquing published research, and exploring possible designs for their research focus.

NURS 8510 FOUNDATION FOR EVIDENCE-BASED PRACTICE (3) LEC. 3. Admission to DNP Program. Provides the DNP student with the methodological basis for translating evidence into practice systems in a variety of health care environments.

NURS 8540 ADVANCED PRACTICE PRACTICUM (2) LEC. 2. Provides the DNP student with opportunity to synthesize advanced practice knowledge and role behaviors in an advanced practice role. Course may be repeated for a maximum of 6 credit hours.

NURS 8550 GRANT WRITING AND MANAGEMENT (3) DSL/LLB. Pr. (NURS 8770 and NURS 8750 and STAT 7010). This course is designed to prepare the student for the fundamental processes and essential skills in developing and writing a grant proposal, seeking and securing project funding, and managing a grant.

NURS 8560 SYSTEMATIC REVIEWS FOR MEDICAL AND BEHAVIORAL INTERVENTIONS (2) DSL/LEC. This course will enable students to conduct systematic and scoping reviews in biomedical and behavioral sciences, and introduce meta-analysis. Students will collaboratively use the PRISMA framework, PROSPERO registry, and Covidence tool to conduct a systematic review relevant to their research.

NURS 8710 TRANSITIONAL SKILLS FOR DNP PRACTICE (2) DSL/LEC. 2. Admission to DNP Program. Provides the DNP student with the knowledge and skills to develop their DNP role as a leader in health care improvement efforts.

NURS 8720 HEALTH INNOVATIONS AND CLINICAL OUTCOMES IMPROVEMENTS (3) LEC. 3. Pr. (NURS 8510 and NURS 8710). Admission to DNP Program. Provides the DNP student with knowledge and skills to develop, implement, and evaluate programs that improve health.

NURS 8740 DISSERTATION DEVELOPMENT SEMINAR (2) DSL/LLB. Pr. (NURS 8460 and NURS 8750 and NURS 8450 and NURS 8560). This seminar will provide students with in-depth exposure to the steps and process of developing, completing, and writing a dissertation.

NURS 8750 MEASUREMENT IN HEALTHCARE RESEARCH AND USE OF DATA (3) DSL/LLB. This course provides the foundation and information for designing sampling plans, measurement and instrumentation, measurement procedures or scoring, and appropriate data analysis for measurement.

NURS 8760 HEALTH POLICY (3) DSL/LLB. Pr. NURS 8460 and STAT 7000 and STAT 7010. This course immerses the student in analysis of health policy and the social determinants of health from ethical and political contexts. The focus of this course is on the research methods and other processes of identifying, evaluating, comparing, and selecting policy options to address problems and issues in health care, as well as evaluating the performance of implemented policy. Students develop a policy research and modeling skillset in considering complex, real-world social and healthcare issues.

NURS 8770 CONCEPTUAL DESIGN & CRITICAL REVIEW OF THE LITERATURE (3) DSL/LLB. This course provides the student with the conceptual foundation for research and development of questions. The course delivers an in-depth analysis of the literature related to concept analysis to support development and critique of conceptual models. Students will apply writing, research, and critical thinking skills in concept analysis. Students will also develop and integrate knowledge within a literature review. Admission to the PhD in Nursing Program required.

NURS 8920 DOCTOR OF NURSING PRACTICE SEMINAR (1) DSL. Pr. (NURS 7280 and NURS 7100 and NURS 7430 and NURS 7340 and P/C NURS 7350 and P/C NURS 8320). This course provides the foundational knowledge and skills necessary to develop and implement a DNP project.

NURS 8930 DNP PROJECT PRACTICUM I: DEVELOPMENT (3) DSL/LEC. Pr. (NURS 8330 and NURS 8920 and P/C NURS 8420). First in a three-course sequence which provides the DNP student with the tools and direction needed to develop a comprehensive project proposal. Student must be admitted to DNP Program.

NURS 8940 DNP PROJECT PRACTICUM II : IMPLEMENTATION (4) LEC. 4. Pr. (NURS 8930 or NURS 8936). Second in a three-course sequence for the DNP student to execute the project plan in collaboration with the agency site.

NURS 8950 DNP PROJECT PRACTICUM III : EVALUATION AND PRESENTATIONS (4) LEC. 4. Pr. NURS 8940 or NURS 8946. Third in a three-course sequence for the DNP student finalize, evaluate, and disseminate their DNP project.

NURS 8990 RESEARCH AND DISSERTATION (1-10) DSR. Pr. (NURS 8350 and NURS 8340) and (STAT 7000 or STAT 7006) and (NURS 8460 and STAT 7010 and NURS 8770 and NURS 8450 and NURS 8750 and NURS 8760 and NURS 8550). Individualized support and direction for students writing their dissertations. Course may be repeated with change in topics. Course may be repeated for a maximum of 10 credit hours.

Nursing — Traditional (NURS)

Freshman eligibility is determined by the Office of Enrollment Services. Admission requirements are stated elsewhere in this *Bulletin*. High school mathematics, chemistry and biology courses are strongly recommended, along with other college preparatory courses in social science, history, literature, and English composition. Students are strongly encouraged to see an academic advisor in the College of Nursing on a regular basis. Transfers from other institutions must apply through the Office of Enrollment Services. Review of transcripts by the College of Nursing will determine the amount of credit allowed for the pre-nursing requirements. Students planning to transfer from other universities are encouraged to contact the College of Nursing as soon as possible for advisement on transfer of credits.

Professional Program

Pre-nursing students must formally apply for admission to the professional program, typically during the sophomore year, and meet the deadlines and requirements for the admission cycle. Auburn Nursing uses a holistic review to assess applicants for admission. Student experiences, transcripts, and traditional and situational interviews are included in the admission process to provide a holistic viewpoint. Students are encouraged to learn more about this process by reading the applicant workbook found on the College of Nursing website. Applicant interviews will be conducted once per year in Fall semester. Due to limited enrollment, all students who meet minimum requirements may not be interviewed or admitted. Students will be notified of admission decisions before the end of fall semester. Those applicants admitted must successfully complete all pre-nursing courses with a C or higher before entering the upper division. Admission to the professional program occurs in spring semester. After successful completion of spring semester, students will progress to the clinical courses beginning either summer or fall semester.

Total Hours: 66

Must have History sequence and one Literature course OR a Literature sequence and one History course.

- Option for courses labeled CORE are in the Auburn University Bulletin (www.auburn.edu/bulletin) under Core Curriculum.
- Students who choose to do a literature sequence should see their advisor for guidance.
- Students must complete all PNUR requirements with a “C” or better prior to beginning the upper division nursing program.
- Students must choose between PSYC 2010 OR SOCY 1000 for at least 3 hours of their social science credit.
- Courses marked with ** are used to calculate your academic attainment score for nursing admission.
- Curriculum guides for the junior and senior years vary according to semester of admission to professional program.

Upper Division

Beginning in the first semester of the program, students participate in required clinical (including some night & weekend clinicals) and classroom experiences which prepare them to function in a multifaceted healthcare arena.

Current Nursing Specialty Course Options:

- NURS 3140 Interdisciplinary Approaches to Caring for Children in the Community (3)
- NURS 4120 Health Science Camp Experience (3)

- NURS 4240 Cultural Expeditions in Health Care (2)
- NURS 4270 Perioperative Nursing (2)

Expenses

Students accepted into the professional program should expect to incur additional expenses including a professional fee associated with the clinical courses. Uniforms, equipment, expenses related to travel to clinical sites, smart phone devices with the capability of retrieving required information, laptop with designated specifications, standardized exams and software, NCLEX reviews, a health examination, and liability and health insurance coverage are among the requirements. Students are required to have a current drug screen and background check. The costs of such requirements will be the responsibility of the student. An updated *Detailed Expenses by Semester* sheet can be located on the College of Nursing website.

Academic Regulations

Advanced placement credit in pre-nursing courses is granted according to university policies stated elsewhere in the *Bulletin*. Proficiency examinations or Advanced Placement (CEEB), with accepted score, may be used for advanced placement.

A minimum grade of C is required in pre-nursing courses. Transfer credit will not be granted for courses in which a grade less than C is earned.

In the professional program, a minimum grade of C, or Satisfactory in all courses, must be achieved. An overall GPA of 2.0 must be maintained for progression through the professional program. Because the professional nursing curriculum is designed for progressive development of nursing knowledge and skills, students who earn an Unsatisfactory or grade less than C in a professional program course are not allowed to progress to the next clinical course. The course in which the student earns a grade less than C or Unsatisfactory may be repeated one time only. Students who earn a grade less than C or Unsatisfactory in two or more professional program courses or whose GPA falls below a 2.0 will be dropped from the professional program and are not eligible for readmission. Transfer credit is not generally allowed for courses in the professional program.

Application for RN Licensure

Following successful completion of the traditional Bachelor of Science in Nursing program, the graduate will apply for RN Licensure in Alabama or another state and follow all procedures as stipulated by the state board of nursing.

Nursing, RN to BSN (NURS)

RN to BSN Track

The RN to BSN track is designed for associate degree nurses. Applicants to the RN to BSN track must apply to Auburn University, have a minimum GPA of 2.5 and a C or higher in all required prerequisite courses, have no more than two outstanding prerequisite classes, have completed the statistics prerequisite course, and maintain a current unencumbered RN license throughout the program. Students who have successfully completed NURS 3840, Formation of Professional Nursing Practice, completed the requirements for licensure in nursing, and are currently licensed as an RN will receive 38 credits as documentation of competency (contingent upon review of documentation) toward the BSN degree. These escrow credits count toward the upper division BSN course requirements and residency credit requirements. The RN to BSN track offers admission each semester and is designed to be completed in three semesters.

Concurrent BSN Track

The Concurrent BSN track is designed for students who are admitted to an associate degree in nursing (ADN) program and are entirely prerequisite complete. In partnership with community colleges, the track offers admission each semester and is designed to be completed in six semesters. Applicants to the Concurrent BSN track must apply to Auburn University, have a minimum GPA of 2.5 and a C or higher in all required prerequisite courses. Students will take BSN courses concurrently with ADN courses. Following ADN graduation and licensure, students complete the final semester of the BSN program.

Academic Regulations

Advanced placement credit in pre-nursing courses is granted according to university policies stated elsewhere in the *Bulletin*. Proficiency examinations or Advanced Placement (CEEB), with accepted score, may be used for advanced placement. A minimum grade of C is required in pre-nursing courses. Transfer credit will not be granted for courses in which a grade less than C is earned.

In the professional program, a minimum grade of C, or Satisfactory in all courses, must be achieved. An overall GPA of 2.0 must be maintained for progression through the professional program.

Because the professional nursing curriculum is designed for progressive development of nursing knowledge and skills, students who earn an Unsatisfactory or grade less than C in a professional program course are not allowed to progress to the next course. The

course in which the student earns a grade less than C or Unsatisfactory may be repeated one time only. Students who earn a grade less than C or Unsatisfactory in two or more professional program courses or whose GPA falls below a 2.0 will be dropped from the professional program and are not eligible for readmission. Transfer credit is not generally allowed for courses in the professional program.

James Harrison College of Pharmacy

LEIGH ANN ROSS, *Dean*
KIMBERLY BRAXTON-LLOYD, *Associate Dean for Clinical Affairs and Outreach*
KAREN MARLOWE, *Associate Dean for Academic Programs*
TIMOTHY MOORE, *Associate Dean for Research*
DANIEL SURRY, *Associate Dean for Faculty Affairs*
EMILY MCCOY, *Interim Assistant Dean for Mobile and Student Success*

THE AUBURN Doctor of Pharmacy (PharmD) degree program is a four-year course of study that requires the completion of the pre-pharmacy curriculum prior to enrollment. The curriculum is designed to facilitate the development of those abilities necessary for entry-level practitioners in various practice settings. Consistent with accreditation standards and guidelines, the College's fully integrated curriculum provides an appropriate balance of course work in the following areas: biomedical sciences (basic and clinical); pharmaceutical sciences; behavioral, social, and administrative pharmacy sciences; pharmacy practice; and pharmacy practice experience. The goal of the curriculum is to prepare students who are ready to enter practice at the time of graduation and are life-long learners. To help accomplish this, the curriculum involves students in sequenced patient care responsibilities beginning in the first professional year. Students also participate as active, self-directed learners in interprofessional teaching models. Team-based learning is extensively utilized.

Admission Requirements

Course requirements for admission to the James Harrison College of Pharmacy may be satisfied by completing the Pre-Professional Curricula in either the College of Sciences and Mathematics or the College of Human Sciences (Nutrition Sciences Option). Any or all of these requirements may also be met by transfer of appropriate credit from other institutions.

Admission is limited and is contingent upon available facilities and faculty. To be considered for admission the applicant must have a satisfactory academic record. A grade of D in any prerequisite course will not be accepted. Students are matriculated into the James Harrison College of Pharmacy only during Fall Semester. All pre-pharmacy course work must be completed by the end of the summer term before the professional program begins at the start of Fall Semester.

Applicants must apply to the James Harrison College of Pharmacy through the Pharmacy College Application Service (PharmCAS). The James Harrison College of Pharmacy admits students using a rolling admissions process and student applications are prioritized in the order in which they are received. The final deadline for receipt of all application materials is posted on the PharmCAS Website. Students who are successful in meeting the college’s initial screening criteria are required to complete an in-person or virtual interview in order to be further considered for admission.

The James Harrison College of Pharmacy's Doctor of Pharmacy Program admits students to two campuses: the main Auburn Campus and the Mobile Campus located at the University of South Alabama. Students may express a preference for a specific campus, but assignments are made based on available space. Admitted students are notified of their campus assignment at the time an offer of admission is made.

Prospective students may obtain application information, which further outlines policies and procedures, from the College's website at www.pharmacy.auburn.edu or by contacting the Office of Academic Programs, 2316 Walker Building, Auburn, AL 36849-5501, 334-844-8348. Applications through PharmCAS are submitted online at http://www.pharmcas.org/.

The James Harrison College of Pharmacy offers an Early Admission Program to highly qualified individuals admitted as undergraduate students to Auburn University or the University of South Alabama. Further information may be obtained from the College's Website or Office of Academic Programs.

Prerequisite Requirements

Prerequisite requirements for the Doctor of Pharmacy Program [1]

The prerequisite academic work required for entry into the Harrison College of Pharmacy's (HCOP) Doctor of Pharmacy (Pharm.D.) program consists of a minimum of **62-66 semester hours** distributed as follows.

Humanities and Social Sciences (24 hours)*

- English Composition (6 hours)
- Additional Courses (18 hours) – Courses that are acceptable for meeting this requirement include, but are not limited to, History, Literature, Fine Arts, Philosophy, Religion, Foreign Languages, Ethics, Speech, Communications, and Additional Social Sciences.

Science and Math Core (38-42 hours)

- General Biology (4 hours)
- General Chemistry with Laboratory (8 hours)
- Organic Chemistry with Laboratory (8 hours)
- Human Anatomy and Physiology (8 hours) OR Upper Division Physiology (4 hours)**
- Microbiology (4 hours)
- Calculus (4 hours)
- Statistics (3 hours)
- Biochemistry (3 hours)

***Applicants that will enter the HCOP with a baccalaureate degree are required to complete English Composition (6 hours), but may be waived from additional Humanities and Social Science requirements.**

****Acceptable courses include Mammalian, Vertebrate, Human, or Animal Physiology.**

Doctor of Pharmacy Curriculum

First Year			
Fall	**Hours**	**Spring**	**Hours**
PYPD 9000 Orientation	1	PYPD 9220 Integrated Learning Experience III	6
PYPD 9200 Integrated Learning Experience I	6	PYPD 9230 Integrated Learning Experience IV	6
PYPD 9210 Integrated Learning Experience II	6	PYPD 9330 Longitudinal Experience II	3
PYPD 9320 Longitudinal Experience I	3	PYPD 9410 Workshop II	1
PYPD 9400 Workshop I	1		
Second Year			
Fall	**Hours**	**Spring**	**Hours**
PYPD 9240 Integrated Learning Experience V	6	PYPD 9260 Integrated Learning Experience VII	6
PYPD 9250 Integrated Learning Experience VI	6	PYPD 9270 Integrated Learning Experience VIII	6

PYPD 9340 Longitudinal Experience III	3	PYPD 9350 Longitudinal Experience IV	3
PYPD 9420 Workshop III	1	PYPD 9430 Workshop IV	1
PYPD 9160 Community Pharmacy IPPE	2	PYPD 9080 Population Health IPPE	2
PYPD 9190 Health and Wellness Introductory Pharmacy Practice Experience	1	PROFESSIONAL ELECTIVES	0-2
PROFESSIONAL ELECTIVES	0-2		

Third Year

Fall	Hours	Spring	Hours
PYPD 9280 Integrated Learning Experience IX	6	PYPD 9300 Integrated Learning Experience XI	6
PYPD 9290 Integrated Learning Experience X	6	PYPD 9310 Integrated Learning Experience XII	6
PYPD 9360 Longitudinal Experience V	3	PYPD 9370 Longitudinal Experience VI	3
PYPD 9440 Workshop V	1	PYPD 9450 Workshop VI	1
PYPD 9170 Health System Pharmacy IPPE	2	PROFESSIONAL ELECTIVES	0-2
PYPD 9180 Clinical Pharmacy IPPE	1		
PROFESSIONAL ELECTIVES	0-2		

Students are required to complete 6 hours of professional elective courses in the second and third professional years.

Fourth Year

PYPD 9600 Advanced Pharmacy Practice Experiences 40 total hours

(students complete 40 weeks of Practice Experiences during Summer Term, Fall Semester and Spring Semester, plus a Summative Experience Sequence.)

PYPD 9700 Summative Experience I 3

PYPD 9800 Summative Experience II 3

TOTAL PROGRAM HOURS = 157

Academic Performance Standards

The implementation of all guidelines will be in addition to those existing policies and standards of the University.

To remain in good standing, students are required to achieve a James Harrison College of Pharmacy GPA of at least 2.25. GPAs will be calculated only from professional course work, which is defined as core pharmacy courses approved by the faculty and listed in the Doctor of Pharmacy curriculum.

James Harrison College of Pharmacy students with semester or cumulative GPAs below 2.25, or who receive Ds and Fs in required courses, may be dismissed from the James Harrison College of Pharmacy or required to undergo a remedial plan of study as directed by the Committee on Academic Requirements, Professionalism and Student Success. The remedial plan of study may require students to retake courses in which they received grades of less than C. Policies concerning academic progression, probation, and dismissal are specified in the James Harrison College of Pharmacy's Academic Performance Standards, and other Standards and Policies. Copies of Standards and Policies may be obtained from the James Harrison College of Pharmacy's Office of Academic Programs or from the College's website.

Students must observe pre-requisites and co-requisites stated in the current *Auburn University Bulletin*.

Notes

- Students are required to file an application with the Alabama State Board of Pharmacy for registration as an intern at the time they are enrolled in the James Harrison College of Pharmacy. Information and intern registration forms may be obtained from the Alabama State Board of Pharmacy, 111 Village Street, Hoover, AL 35242, or at www.albop.com. Students must maintain a valid Alabama Internship License as a condition of continued enrollment in the James Harrison College of Pharmacy.

- Upon entering the James Harrison College of Pharmacy, and at the beginning of each academic year, students are required to furnish documentation of professional liability insurance, current CPR and First Aid certification, personal medical insurance, and up-to-date immunizations. Students who fail to maintain documentation will be dis-enrolled and will not be allowed to re-enroll until current documentation has been provided.
- Students are required to undergo criminal background checks prior to matriculation in the James Harrison College of Pharmacy which are updated annually.
- Pharmacy students are required to complete specified co-curricular activities.
- Students in the Doctor of Pharmacy program are required to own a laptop computer that meets the College's specifications. Questions about computer specifications should be directed to the College's Office of Information Technology. Computer literacy must be demonstrated upon entry to pharmacy school.
- Students are required to adhere to all of the James Harrison College of Pharmacy's codes, policies, and professional requirements. The college will take disciplinary action against those students who violate such codes, policies, and professional requirements.
- Students will be required to periodically take examinations and other assessments to assess their ability to integrate the knowledge, skills, and attitudes learned to date. Students may be required to complete remedial work should their performance be unsatisfactory.
- Consistent with the policies of Auburn University, The James Harrison College of Pharmacy reserves the right to make changes at any time in its academic programs, codes, policies, and professional requirements.
- Students will be notified of their site assignments for Introductory and Advanced Practice Experiences at the earliest feasible time, to enable them to make housing arrangements. Rotation sites are located throughout Alabama, western Georgia, the Mississippi Gulf Coast, and the Florida panhandle. Although students may request specific sites, each site has a limited enrollment and students may be assigned to sites they do not request. Students are responsible for procuring housing, including the assessment of its safety and living conditions. Students are also responsible for housing and other living expenses incurred when assigned to rotation sites away from the Auburn and Mobile campuses.

Majors

- Drug and Biopharmaceutical Sciences

Graduate Degrees

- Pharmaceutical Sciences: Health Outcomes Research and Policy Option — MS (p. 1730)
- Pharmaceutical Sciences: Health Outcomes Research and Policy Option (Non-Thesis) — MS (p. 1731)
- Pharmaceutical Sciences: Health Outcomes Research and Policy Option — PhD (p. 1734)
- Pharmaceutical Sciences: Medicinal Chemistry Option - Graduate Certificate (p. 1709)
- Pharmaceutical Sciences: Medicinal Chemistry Option — MS (p. 1709)
- Pharmaceutical Sciences: Medicinal Chemistry Option (Non-Thesis) — MS (p. 1710)
- Pharmaceutical Sciences: Medicinal Chemistry Option — PhD (p. 1710)
- Pharmaceutical Sciences: Pharmaceutics Option — MS (p. 1734)
- Pharmaceutical Sciences: Pharmaceutics Option — PhD (p. 1734)
- Pharmaceutical Sciences: Pharmaceutics Option (Non-Thesis) — MS (p. 1735)
- Pharmaceutical Sciences: Pharmacology Option — MS (p. 1736)
- Pharmaceutical Sciences: Pharmacology Option (Non-Thesis) — MS (p. 1736)
- Pharmaceutical Sciences: Pharmacology Option — PhD (p. 1737)

Graduate Certificates

- Medicinal Chemistry (p. 1709)
- Neuroscience (p. 1714)

Drug Discovery and Development Courses

DRDD 5800 SURVEY OF MULTI-MODALITY MOLECULAR IMAGING (2) LEC. 2. Departmental approval. State-of-the-art survey of molecular imaging techniques that are available and their use to monitor the progression of various human diseases.

DRDD 6800 SURVEY OF MULTI-MODALITY MOLECULAR IMAGING (2) LEC. 2. Departmental approval. State-of-the-art survey of molecular imaging techniques that are available and their use to monitor the progression of various human diseases.

DRDD 7000 INTRODUCTION TO GRANT WRITING (3) LEC. 3. Course will train students to prepare NIH RO1 grant applications. Students will prepare mock applications on topics of their choosing.

DRDD 7010 PHARMACOKINETICS (4) LEC. 4. Departmental approval. Pharmacokinetic and pharmacodynamic principles and methods used to study the absorption, distribution, metabolism and excretion of drugs.

DRDD 7020 SCIENCE AND TECHNOLOGY OF TABLETING (2) LEC. 2. Pr. (PYPS 7030 or DRDD 7030) or Departmental approval. Formulation, compression, coating and evaluation of tablets.

DRDD 7021 SCIENCE AND TECHNOLOGY OF TABLETING LAB (2) LAB. 6. Pr. (PYPS 7020 or DRDD 7020). Actual formulation, compression, coating and evaluation of tablets.

DRDD 7030 DRUG PRODUCTS AND BIOPHARM (4) LEC. 4. Departmental approval. Formulation, evaluation, and use of various pharmaceutical dosage forms including biopharmaceutical aspects.

DRDD 7040 PHYSICAL PHARMACY (4) LEC. 4. Departmental approval. Application of physical chemical principles to dosage form design and evaluation.

DRDD 7050 NOVEL DOSAGE FORMS (3) LEC. 3. Pr. PYPS 7030 or DRDD 7030 or Departmental approval. Theoretical basis and design of controlled release and site specific drug delivery systems.

DRDD 7060 FORMULATION AND DELIVERY OF PEPTIDE/PROTEIN DRUGS (3) LEC. 3. Pr. PYPS 7030 or DRDD 7030 or Departmental approval. Formulation and delivery problems unique to peptide/protein pharmaceuticals and strategies to overcome such problems.

DRDD 7070 TRANSPORT PHENOMENA IN PHARMACEUTICAL SYSTEMS (3) LEC. 3. Departmental approval. Mechanisms of drug transport in various pharmaceutical dosage forms and biological systems. Elucidation of methods to characterize drug transport phenomena. Correlation of transport phenomena with drug disposition in the body. Emphasis on peptide, protein, and oligonucleotide drugs.

DRDD 7080 ADVANCED BIOPHARMACEUTICS (3) LEC. 3. Pr. PYPS 7010 or DRDD 7010. The mathematical and pharmacokinetic relationships between physical and chemical properties of a drug and its dosage form and biological effects.

DRDD 7090 PHARMACEUTICAL SCIENCE I: TARGETS (4) LEC. 4. Departmental Approval. Study of nature and function of drug targets, advanced molecular mechanisms by which drugs interact with these targets and the basic principles of drug design.

DRDD 7100 PHARMACEUTICAL SCIENCE II: ADME (4) LEC. 4. Departmental Approval. Study of the mechanisms of drug absorption, distribution, metabolism and elimination with an advanced study of drug design strategies and methods to optimize these processes.

DRDD 7110 STABILITY KINETICS OF PHARMACUTICALS (3) LEC. 3. Pr. PYPS 7030 or DRDD 7030 or Departmental approval. Principles of chemical kinetics as applied to the unique stability problems of the various pharmaceutical dosage forms.

DRDD 7200 NATURAL PRODUCTS CHEMISTRY (3) LEC. 3. This course is designed as an introduction to the chemistry of natural products of plant origin with medicinal importance. Traditional and modern approaches to plant natural product drug discovery will be discussed. Major biosynthetic pathways of plant secondary metabolites will be covered and used to classify natural products into distinct groups (alkaloids, sesquiterpenoids, diterpenes, triterpenes, saponins, flavonoids, anthraquinones, coumarins, lignans, amino acids, and peptides) and to display the relationships between diverse structures encountered in nature.

DRDD 7230 ADVANCED MEDICINAL CHEMISTRY I (3) LEC. 3. Departmental approval. Explanation of the principles of Medicinal Chemistry progressing to qualitative and quantitative descriptions of the synthesis, influence of physical and chemical properties of chemical substances on biological activity and biodisposition.

DRDD 7240 ADVANCED MEDICINAL CHEMISTRY II (3) LEC. 3. Pr. PYPS 7230. Departmental approval. Advanced study of organic medicinal agents featuring organic synthesis, chemical and pharmacological properties and current literature topics.

DRDD 7250 DRUG ACTION AND DESIGN (3) LEC. 3. Pr. (PYPS 7230 or DRDD 7230) and (PYPS 7240 or DRDD 7240). Modern molecular modeling methods with emphasis on computer-aided drug design, quantitative structure activity relationships and combinatorial chemistry.

DRDD 7260 SEPARATION SCIENCE (4) LEC. 4. Departmental approval. A survey of modern separation science with emphasis on analytical scale techniques including gas chromatography, liquid chromatography and electrokinetic separations.

DRDD 7270 MASS SPECTROMETRY OF ORGANIC COMPOUNDS (4) LEC. 4. Departmental approval. A survey of modern techniques in mass spectrometry with emphasis on fragmentation chemistry and structure education.

DRDD 7280 NEUROSCIENCE METHODS (3) LEC. 3. This course is designed to provide a conceptual and practical understanding of several of the most common techniques in neuroscience. The interactive lectures will serve to illustrate the ways in which various experimental approaches have been used to advance specific areas of neuroscience, particularly in the context of neuropsychological diseases or processes.

DRDD 7290 NEUROPHARMACOLOGY OF DRUG ABUSE (2) LEC. 2. Departmental approval. An in-depth study of drugs of abuse, including mechanisms of action, pharmacokinetics, addiction, physical dependence and the effects of drug use during pregnancy. Substance abuse treatment strategies will also be discussed.

DRDD 7300 NEUROPHARMACOLOGY (3) LEC. 3. Neurochemical mechanisms related to the pharmacological actions of medicinal agents affecting the central nervous system.

DRDD 7310 PSYCHOPHARMACOLOGY I (3) LEC. 3. Discussions on anxiety, depression and related disorders.

DRDD 7320 PSYCHOPHARMACOLOGY II (3) LEC. 3. Discussions on schizophrenia, Alzheimer's disease, experimental methods and animal models of disorders.

DRDD 7330 PHARMACOLOGY RESEARCH METHODS (3) LEC. 1. LAB. 9. Experimental design, research methods and data analysis in pharmacology.

DRDD 7340 ORGAN SYSTEMS PHARMACOLOGY I (3) LEC. 3. The course will evaluate the basic principles and rationale for current and novel pharmacological therapeutics for various disease states.

DRDD 7350 ORGAN SYSTEMS PHARMACOLOGY II (3) LEC. 3. The course will evaluate the mechanism of action and rationale for current and novel pharmacological therapeutics for various disease states.

DRDD 7360 CELLULAR & MOLECULAR PHARMACOLOGY & TOXICOLOGY I (3) LEC. 3. Cellular biology course integrated with pharmaceutical sciences for the study of pharmacologically related mechanisms at the molecular and cellular levels.

DRDD 7370 CELLULAR & MOLECULAR PHARMACOLOGY & TOXICOLOGY II (3) LEC. 3. Pr. PYPS 7360 or DRDD 7360. Cellular biology course integrated with pharmaceutical sciences for the study of pharmacologically related mechanisms at the molecular and cellular levels. This is a continuation of PYPS 7360/DRDD 7360.

DRDD 7380 DRUG DISCOVERY (3) LEC. 3. This course is a survey of modern approaches to drug discovery. It is designed to familiarize students with different steps of drug discovery from target identification to the development of clinical candidates. (Clinical trials, and approval process will be covered in Drug Development class, which will be offered in spring 2020.) We will discuss the techniques used at the different stages of drug discovery process in the course are also widely used in basic biomedical research laboratories.

DRDD 7390 CANCER PHARMACOLOGY AND DRUG DISCOVERY (3) LEC. 3. Pr. VBMS 7970. This course is designed as an introduction to anti-cancer drugs and anti-cancer drug discovery. The course will build on the principles of cancer biology that are introduced in VBMS 7970 Cancer Biology. This course will begin with a survey of anticancer drugs. Classic cytotoxic agents will be discussed, followed by targeted chemotherapeutic agents. A discussion of strategies used to discover classic cytotoxic agents will be followed by strategies used to discover targeted chemotherapeutic agents. The discussion of targeted drug discovery will focus on target identification and validation, hit generation and optimization, and preclinical lead evaluation. Course meetings will feature the primary literature so as to enable students to translate lecture topics to application.

DRDD 7400 PHARMACOGENOMICS AND TRANSLATIONAL RESEARCH METHODS ORIENTATION (3) LLB. Departmental approval. This course consists of lectures and laboratory orientation sessions designed to introduce the basic concepts of pharmacogenomics and translational research in precision medicine.

DRDD 7500 METABOLISM AND DISPOSITION XENOBIOTICS (2) LEC. 2. Portals of entry, absorption, distribution and elimination of drugs and xenobiotics. Metabolic mechanisms relevant to chemical structure and principles of pharmacokinetics will be emphasized.

DRDD 7510 ENVIRONMENTAL TOXICOLOGY (3) LEC. 3. Mechanisms of action of agricultural and industrial chemicals, drugs, radiation, metals, gases, air particulates, food additives, plant and food poisons in the environment.

DRDD 7600 HETEROCYCLIC MEDICINAL CHEMISTRY (3) LEC. 3. Pr. CHEM 7220. Departmental approval. A survey of chemical nature of heterocyclic moieties of medicinal substances with emphasis on methods of synthesis of medicinally important compounds containing a heterocyclic ring.

DRDD 7930 DIRECTED STUDIES IN PHARMACAL SCIENCES (1-3) LEC. Departmental approval. Selected laboratory research topics in the pharmaceutical sciences. Course may be repeated for a maximum of 98 credit hours.

DRDD 7950 SEMINAR (1) SEM. 1. SU. 1 CR; may be repeated multiple times for credit. Course may be repeated for a maximum of 6 credit hours.

DRDD 7960 SPEC PROB IN PHARM SCIE (1-3) IND. At least 6 credits each with a minimum grade of B in DRDD 7000-7999 Selected study topics in the pharmaceutical sciences. Departmental approval and 6 hours of 7000-level courses. Course may be repeated for a maximum of 6 credit hours.

DRDD 7980 NON-THESIS RESEARCH (1-3) RES. Non-thesis research project, to be determined by faculty advisor and student's graduate advisory committee. Course may be repeated for a maximum of 14 credit hours.

DRDD 7990 RESEARCH AND THESIS (1-10) MST. Research And Thesis. Course may be repeated with change in topics.

DRDD 8930 DIRECTED STUDIES IN PHARMACAL SCIENCES (1-3) LEC. Departmental approval. Selected laboratory research topics in the pharmaceutical sciences. Course may be repeated for a maximum of 6 credit hours.

DRDD 8950 SEMINAR (1) SEM. 1. SU. 1 CR; may be repeated multiple times for credit. Course may be repeated for a maximum of 10 credit hours.

DRDD 8960 DIRECTED READINGS IN PHARMACAL SCIENCES (1-3) IND. Pr. At least 6 credits each with a minimum grade of B in DRDD 7000-7999. Selected study topics in the pharmaceutical sciences. Course may be repeated for a maximum of 6 credit hours.

DRDD 8990 RESEARCH AND DISSERTATION (1-10) DSR. Research for doctoral students. Course may be repeated with change in topics.

Drug and Biopharmaceutical Sci Courses

DBPS 1010 INTRODUCTION TO DRUG AND BIOPHARMACEUTICAL SCIENCES I (1) LEC. 1. Departmental approval. This course explores the development of the field of drug and biopharmaceutical sciences and its' relationship to disease treatment from ancient to medieval to current day. This historical prospective provides the foundation for appreciation of human creativity in the advancement of health care and the treatment of human diseases.

DBPS 1020 INTRODUCTION TO DRUG AND BIOPHARMACEUTICAL SCIENCES II (1) LEC. 1. Pr. DBPS 1010. Departmental approval. This course introduces the field of drug and biopharmaceutical sciences to first-year students and provides exposure to a variety of major sub-disciplines and associated opportunities. The course will operate as a series of seminars presented by recognized authorities on subjects such as drug toxicity, drug dosages and routes, drug metabolism, drug distribution, drugs for cancer, drugs for Alzheimer's disease, monoclonal antibody-based drugs, antibiotics, forensic chemistry, drug synthesis, etc. These seminars and lectures will allow the student to recognize the breath of the field and future career opportunities. The exact set of seminars and subject matter will vary from year-to-year.

DBPS 2010 FUNDAMENTALS OF BIOMEDICINAL CHEMISTRY I (4) LEC. 4. Pr. CHEM 1030 and CHEM 1031 and CHEM 1040 and CHEM 1041 and (BIOL 1020 or BIOL 1027) and BIOL 1021 and DBPS 1010 and DBPS 1020. Departmental approval. This course explores the relationships between the structural features of drugs and biomolecules and their physicochemical properties including solubility, ionization, intermolecular interactions and reactivity. These concepts are the foundation principles for understanding the actions of drugs at their biologic targets and how the biologic environment processes drugs.

DBPS 2020 FUNDAMENTALS OF BIOMEDICINAL CHEMISTRY II (4) LEC. 4. Pr. CHEM 1030 and CHEM 1031 and CHEM 1040 and CHEM 1041 and (BIOL 1020 or BIOL 1027) and BIOL 1021 and DBPS 1010 and DBPS 1020 and DBPS 2010 and DBPS 2030. Departmental approval. This course explores the relationships between the structural features of biomolecules and their physicochemical properties including solubility, ionization, intermolecular interactions and reactivity. These concepts are the foundation principles for understanding the properties of biologic targets and how drugs interact with targets to produce their therapeutic effects.

DBPS 2030 DRUG TARGETS I (4) LEC. 4. Pr. (BIOL 1020 or BIOL 1027) and BIOL 1021 and DBPS 1010 and DBPS 1020. Departmental approval. This is the first of a two-course survey sequence designed to explore various biological targets (cells, tissues, organs, micro-biomolecules, and macro-biomolecules) present in the central nervous system (brain and spinal cord), eye, ears, respiratory tract, and gastrointestinal tract for a drug to interact and to impose/enforce its effect in the body. This course will further explain the natural substances (ligands) that interacts with the above targets. These basic concepts are the fundamental principles for understanding the actions of drugs in the body (centrally or peripherally).

DBPS 2040 DRUG TARGETS II (4) LEC. 4. Pr. (BIOL 1020 or BIOL 1027) and BIOL 1021 and DBPS 1010 and DBPS 1020 and DBPS 2030. Departmental approval. This course explores various biological targets (cells, tissues, organs, micro-biomolecules, and macro-biomolecules) present in the cardiovascular, renal system, skin, endocrine system, sexual organs, and bones for a drug to interact and to impose/enforce its effect in the body. This course will further explain the natural substances (ligands) that interacts with the above targets. The above basic concepts are the fundamental principles for understanding the actions of drugs in the body (centrally or peripherally).

DBPS 2050 BIOPHARMACEUTICAL DATA ANALYSIS I (1) LEC. 1. Pr. DBPS 1010 and DBPS 1020. Departmental approval. This course introduces the methods and mathematical concepts of analysis and sampling, as specifically applied to drug and biopharmaceutical sciences. Topics include descriptive measures, probability and distributions, estimation, tests of hypotheses, types of error, significance, confidence levels, sample size and power.

DBPS 2060 BIOPHARMACEUTICAL DATA ANALYSIS II (1) LEC. 1. Pr. DBPS 1010 and DBPS 1020 and DBPS 2050. Departmental approval. This course is a continuation of Biopharmaceutical Calculations & Statistics I and focuses on mathematical concepts of analysis and sampling in biopharmaceutical sciences research and production. Topics include estimation, tests of hypotheses, types of error, significance, confidence levels, sample size and power.

DBPS 3010 MEDICINAL CHEMISTRY I (4) LEC. 4. Pr. DBPS 2020 and DBPS 2040 and DBPS 2060. Departmental approval. This course will combine a discussion of the nature and function of drug targets (including enzymes, receptors, ion channels, pumps, RNA and DNA) with study of molecular mechanisms by which drugs interact with these targets and the basic principles of drug design. The course will use currently relevant examples for each target class and is not intended to provide a comprehensive review of all drug classes at all targets. Course materials will include class lecture notes and assigned readings from the current literature. With this knowledge, the student will be better equipped to understand the molecular basis of drug action and the challenges of drug design in a wide variety of therapeutic situations.

DBPS 3020 MEDICINAL CHEMISTRY II (3) LEC. 3. Pr. DBPS 3010 and DBPS 3050. Departmental approval. This course will provide a comprehensive description and analysis of the relationships between drug/dosage form properties and biodisposition, including absorption, distribution, metabolism and elimination. Methods of drug design to optimize drug biodisposition and pharmacokinetics also will be summarized in overview. This course will serve as a foundational instructional unit for all students interested in pursuing advanced study in the areas of drug discovery and development.

DBPS 3030 DRUG ACTION I (4) LEC. 4. Pr. DBPS 2020 and DBPS 2040 and DBPS 2060. Departmental approval. This is the first of a two-course sequence focused on the mechanism of drug action, adverse drug reactions, and drug-interactions as a drug interacts with its' biological target sites. This course will identify the etiology, understand the disease state effects on target sites, and symptoms of major diseases related to the central nervous system (brain and spinal cord), eye, ears, respiratory tract, and gastrointestinal tract.

DBPS 3040 DRUG ACTION II (4) LEC. 4. Pr. DBPS 3030. Departmental approval. This course will identify the etiology, understand the various pathophysiology, and symptoms of major disease states related to the renal system, endocrine system, cardiovascular system, infection, tumor/cancer, bones, integumentary system, sexual organs, for a drug to exert its prophylactic and therapeutic actions. This course will further explain the mechanism of drug action, adverse drug reactions, and drug-interactions.

DBPS 3050 DRUG FORMULATIONS (3) LEC. 3. Pr. DBPS 2020 and DBPS 2060. Departmental approval. Physical-chemical principles and technologies used in the formulation, manufacture and compounding of solid and oral liquid (solution) pharmaceutical dosage forms and novel drug delivery systems.

DBPS 3060 DRUG PHARMACOKINETICS (4) LEC. 4. Pr. DBPS 3010 and DBPS 3030 and DBPS 3050. Departmental approval. The course deals with absorption, plasma protein binding, tissue distribution and elimination of drugs by liver and kidneys and how these processes determine the overall disposition of the drug in the organism. In addition, the relationships between dose and plasma concentration and of plasma concentration and effect are described, both for a given drug and its metabolites. A brief introduction to the use of pharmacokinetic methods for drug development is given. The course also deals with calculation and evaluation of mathematical parameters that describe pharmacokinetic and pharmacodynamic processes, both regarding single dose and repeated dose administration. Finally, it describes the theoretical basis for clinical drug dosing, reasons for and rational handling of inter-individual variation (genomics) in drug disposition as well as drug-drug interactions.

DBPS 3070 DRUG RESEARCH SEMINAR I (1) LEC. 1. SU. Pr. DBPS 2020 and DBPS 2040. Departmental approval. This research seminar course will feature weekly presentations by graduate students, postdoctoral fellows, faculty and visiting scholars. The presentations will introduce DBPS students to current drug discovery and development research advancements in the fields of medicinal chemistry, pharmacology and pharmaceutics.

DBPS 3080 DRUG RESEARCH SEMINAR II (1) LEC. 1. SU. Pr. DBPS 2020 and DBPS 2040. Departmental approval. This research seminar course will feature weekly presentations by graduate students, postdoctoral fellows, faculty and visiting scholars. The presentations will introduce DBPS students to current drug discovery and development research advancements in the fields of medicinal chemistry, pharmacology and pharmaceutics.

DBPS 4980 RESEARCH (5) LAB. 15. Pr. DBPS 3020 and DBPS 3040 and DBPS 3060 and DBPS 3080. Departmental approval. Course Description for each discipline of DBPS Program: Pharmacological/Biomedical Sciences research areas include molecular and cellular disease mechanisms, physiological and pathological processes of disease development, identification of new therapeutic targets, therapeutic and toxicological mechanisms of drug action, and novel approaches to therapeutics, including tissue engineering, genomics, and immunotherapy. Pharmaceutics and Drug Delivery research areas include formulation science, biomaterials, biopharmaceutics, pharmaceutical compounding, nanotechnology, and pharmacokinetics. Medicinal Chemistry and Drug Development research areas include the synthesis of new drug molecules, structure-activity relationship of drug classes, the use of modern methods of drug design and analysis and the development of assays to test drug candidates. Course may be repeated for a maximum of 10 credit hours.

Health Outcomes Research Pol Courses

HORP 7510 HEALTH SERVICES DELIVERY AND EVALUATION (3) LEC. 3. Enrollment in the MS or PhD Program in Pharmaceutical Science with Health Outcomes Research and Policy Option or Departmental approval. Introduction to basic methods and frameworks for undertaking research and program evaluation within health services organizations and systems.

HORP 7520 SOCIAL AND BEHAVIORAL THEORY IN HEALTH (3) LEC. 3. Enrollment in the MS or PhD Program in Pharmaceutical Science with Health Outcomes Research and Policy Option Introduction to the basic theories of behavior and intervention used in practice and research to evaluate changes in health, humanistic, and economic outcomes among patients.

HORP 7530 PHARMACEUTICAL ECONOMICS, OUTCOMES, AND POLICY (3) LEC. 3. Enrollment in the MS or PhD Program in Pharmaceutical Science with Health Outcomes Research and Policy Option or Departmental approval. The graduate-level course is intended to introduce students to concepts relevant to pharmaceutical outcomes, economics, and policy. The course provides foundational knowledge surrounding healthcare.

HORP 7540 PHARMACOEPIDEMIOLOGY: METHODS AND APPLICATIONS (3) LEC. 3. Enrollment in the MS or PhD Program in Pharmaceutical Science with Health Outcomes Research and Policy Option or Departmental approval. STAT 6110 or equivalent SAS training. The course covers topics in pharmacoepidemiology focusing on the methods and applications of analyzing large healthcare claims databases and electronic medical records.

HORP 7720 MOTIVATIONAL INTERVIEWING FOR HEALTH BEHAVIORS (3) LEC. 2, IND/LEC. 1. Enrollment in the MS or PhD Program in Pharmaceutical Science with Health Outcomes Research and Policy Option or Departmental approval. Concepts, current research applications, and intervention development training in motivational interviewing for health behavior change interventions.

HORP 7820 RESEARCH METHODS AND DESIGN HEALTH SCIENCE I (2) LEC. 2. Departmental approval. Application of scientific methods in health care.

HORP 7830 RESEARCH METHODS IN THE HEALTH SCIENCES (3) LEC. 3. Pr. PYPC 7820 or HORP 7820. Application of the principles and concepts obtained in PYPC 7820/HORP 7820.

HORP 7840 MEDICATION INFORMATION SYSTEMS (3) LEC. 3. Health system informatics theories and methodologies. Demonstration of how information reduces uncertainty in health-care decision-making.

HORP 7860 THE PHARMACIST'S ROLE IN IMPROVING PATIENT ADHERENCE (3) LEC. 3. Pr. PYPC 7820. Theories and methodologies involved in adherence to medication regimens.

HORP 7870 SOCIAL, BEHAVIORAL, AND ADMINISTRATIVE ASPECTS OF PHARMACY PRACTICE (3) LEC. 3. Theories and applications in social, behavioral, and administrative aspects of pharmacy practice and medication use systems.

HORP 7950 SEMINAR (1) SEM. 1. SU. 1 CR; may be repeated multiple times for credit. Required of all Pharmaceutical Science MS students with Health Outcomes Research and Policy Option. Course may be repeated for a maximum of 6 credit hours.

HORP 7960 SPECIAL PROBLEMS IN HEALTH OUTCOMES RESEARCH (2-3) LEC. Departmental approval. Special problems. Course may be repeated for a maximum of 6 credit hours.

HORP 7980 NON-THESIS RESEARCH (1-3) RES. SU. Pharmaceutical Sciences Non-Thesis MS Graduate Student and approval from the Graduate Program Coordinator. The specific research topic and its credit hour(s) will be decided by the student's research advisor, in collaboration with the student and the student's research advisory committee. Course may be repeated for a maximum of 4 credit hours.

HORP 7990 RESEARCH AND THESIS (1-10) MST. Credit hours to be arranged. Course may be repeated with change in topics.

HORP 8950 SEMINAR (1) SEM. 1. SU. 1 CR; may be repeated multiple times for credit. Required of all Pharmaceutical Science PhD students with Health Outcomes Research and Policy Option. Course may be repeated for a maximum of 10 credit hours.

HORP 8960 SPECIAL PROBLEMS IN HEALTH OUTCOMES RESEARCH (1-3) LEC. Departmental approval. Credit hours to be arranged. Course may be repeated for a maximum of 6 credit hours.

HORP 8990 RESEARCH AND DISSERTATION (1-10) DSR. Credit hours to be arranged. Course may be repeated with change in topics.

Interdept Pharmacy Courses

PYDI 4980 INTRODUCTION TO UNDERGRADUATE RESEARCH IN PHARMACY (1-3) IND. SU. Departmental approval. Individual problems course. Students will work under the direction of a faculty member on some problem of mutual interest. Course may be repeated for a maximum of 6 credit hours.

PYDI 9030 MENTAL ILLNESS I: SERIOUS MENTAL ILLNESS (1) LEC. 2. To expose pharmacy students to psychiatry and to develop a working knowledge of both basic and advanced issues related to psychiatric illnesses. Must be enrolled in Doctor of Pharmacy program.

PYDI 9040 MENTAL ILLNESS II: ANXIETY, ALZHEIMERS AND AUTISM (1) LEC. 2. To expose pharmacy students to psychiatry and to develop a working knowledge of both basic and advanced issues related to psychiatric illnesses. Continuation of PYDI 9030. Must be enrolled in Doctor of Pharmacy program.

PYDI 9050 AMBULATORY CARE PHARMACY PRACTICE (1) LEC. 2. The Ambulatory Care Pharmacy elective will expose the students to this practice setting and the unique patient and practice issues associated with developing an ambulatory care practice. Must be enrolled in Doctor of Pharmacy program.

PYDI 9060 CURRENT ISSUES IN PHARMACY (1) LAB. 4. The Current Issues in Pharmacy elective will expose the students to current topics affecting pharmacy in multiple practice settings and provide students the chance to explore the issues and consider the opportunities presented to the profession by these topics. Students will engage in discussion and application with each other. Must be enrolled in Doctor of Pharmacy program.

PYDI 9070 THE ART OF WELLBEING (1) LEC. 2. This course will explore the following aspects of wellbeing: career, social, financial, physical and community. Additionally, students will gain insight into their own well-being through identifying areas they are thriving in, and areas they can improve. Ultimately, strategies to improve wellbeing in a particular area will be created and implemented. Must be enrolled in Doctor of Pharmacy program.

PYDI 9150 PROVIDING PHARMACY CARE FOR THE LGBTQ COMMUNITY (1) LEC. 2. This course focuses on addressing the health disparities and discrimination members of the LGBTQ community face. The course will discuss healthcare policy, societal barriers to care, and health conditions and disease states which affect the LGBTQ community, including HIV/AIDS, STIs, mental health, and hormone therapy for transgendered patients. Must be enrolled in the Doctor of Pharmacy Program.

PYDI 9160 DEVELOPMENT AND IMPLEMENTATION OF MTM SERVICES (1) LEC. 2. The course focuses on the development and implementation of Medication Therapy Management (MTM) services. Topics discussed include a review of the MTM process, development of MTM services, billing opportunities, case-based approaches to performing MTM, and different technology platforms to assist with the delivery and documentation of MTM services. Must be enrolled in Doctor of Pharmacy Program.

PYDI 9170 MENTAL HEALTH FIRST AID (1) LEC. 1. Pr. PYPD 9230. This course will provide health professional students the skills they need to reach out and provide the initial help and support to someone who may be developing a mental health or substance use problem, or experiencing a crisis.

PYDI 9180 IMMERSIVE TECHNOLOGIES IN HEALTHCARE (1) LEC. 1. Pr. PYPD 9230. Immersive technologies are defined as those that blur the lines between the real world and a virtual world, creating a sense of immersion. This course will introduce HCOP students to these technologies and review examples of both patient-facing and learner-facing applications. HCOP students will also learn the basics of health behavior theories that inform the use of these technologies and the process of development of immersive applications, in very basic, accessible terms.

PYDI 9800 SURVEY OF MULTI-MODALITY MOLECULAR IMAGING FOR PHARM.D. (2) LEC. 2. State-of-the-art survey of molecular imaging techniques and clinical imaging modalities that are available and their use to monitor the progression of various human diseases.

PYDI 9960 SPECIAL PROBLEMS IN PHARMACY (1-3) IND. Independent study of problems related to pharmacy under the direction of a faculty member. Departmental approval. Fall. Spring. Course may be repeated for a maximum of 6 credit hours.

PYDI 9970 SPECIAL TOPICS IN PHARMACY (1-3) LEC. 1-3. Instruction and discussion in a selected current topic in Pharmacy. Fall, Spring. Course may be repeated for a maximum of 3 credit hours.

Pharmacy PharmD Courses

PYPD 9000 ORIENTATION (1) WSP. 12.5. This one week course introduces the expectations for a student in the Harrison School of Pharmacy's Practice Ready Curriculum. The course introduces aspects of the role of the pharmacist in healthcare including team member, interprofessional practice, and continual professional development.

PYPD 9010 DRUGS IN PREGNANCY AND LACTATION (1) LEC. 1. The purpose of this course is to introduce pharmacy students to the concepts of teratogenicity, pregnancy and lactation. Non-pharmacological and pharmacological therapy is focused to common pregnancy disease states and lactation issues.

PYPD 9020 FOUNDATIONS OF LEADERSHIP WITHIN THE PHARMACY PROFESSION (1) LEC. 1. This course will allow students to identify leadership skills, traits and values. Leadership tools and resources will be discussed. Students will be exposed to leadership within the practice of pharmacy as well as pharmacy organizations.

PYPD 9030 INTRODUCTION TO PEDIATRICS (1) LEC. 1. The purpose of this course is to introduce students to the basic concepts regarding pediatric development and care including but not limited to normal growth and development, pediatric calculations, community based care, counseling skills, and common disease states.

PYPD 9040 KIDNEYS, DRUGS AND ELIMINATION: WHAT PHARMACISTS NEED TO KNOW (1) LEC. 1. Students will gain in-depth knowledge of how declining kidney function and renal replacement modalities affect biopharmaceutics and develop experience in evaluating drug information related to renal dosing.

PYPD 9050 ONCOLOGY CARE (1) LEC. 1. This course will provide student pharmacists with a working knowledge of cancer as a disease state, as well as the pharmacotherapeutics of chemotherapy, targeted therapy, and biologic therapy. Additionally, students will explore aspects of supportive care, ADR and drug interaction management, chemotherapy administration, and drug monitoring. The structure of the course is highly collaborative and interactive. Students are expected to participate in group activities with a professional and collegial spirit.

PYPD 9060 SELF-CARE AND NONPRESCRIPTION PHARMACOTHERAPY (1) LEC. 1. This course will introduce students to nonprescription pharmacotherapy and other self-care measures used in the outpatient setting to treat minor medical problems. As the most accessible health care professionals, pharmacists are often approached by members of the community to recommend treatments for common ailments. It is important for pharmacists to quickly and accurately assess patients to determine if they are an appropriate self-care candidate or if referral to another health care provider is warranted. This course will expand upon self-care and nonprescription pharmacotherapy topics introduced in the required curriculum, introduce students to self-care issues specific to various special populations, and allow students to learn from one another through group presentations and case discussions.

PYPD 9080 POPULATION HEALTH IPPE (2) CLN. 2. SU. This course is a longitudinal introductory pharmacy practice experience (IPPE) that students will complete during the P2 year. During this course, practical concepts related to pharmaceutical care and the pharmacists' patient care process are re-enforced through the provision of basic care to community based patients. Students will earn 10 IPPE hours from the successful completion of the course. Earning of IPPE hours will be done through multiple formats including traditional in-home patient encounters, patient care simulations, as well as other practical experiences in collaboration with community partners.

PYPD 9160 COMMUNITY PHARMACY IPPE (2) LEC. 2. SU. Students will be exposed to a community pharmacy setting in which they will gain experience in the drug distribution process, patient counseling, and interprofessional collaboration. Students will have opportunities to apply concepts and clinical knowledge learned during their P1 year. Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic Programs.

PYPD 9170 HEALTH SYSTEM PHARMACY IPPE (2) CLN. SU. Students will have opportunities to apply concepts and clinical knowledge previously learned to patient care in the setting of a functioning institutional pharmacy. They will participate in patient care through the drug distribution process, prospective drug review, drug monitoring, and interprofessional interactions. Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic Programs.

PYPD 9180 CLINICAL PHARMACY IPPE (1) LEC. 1. SU. This is an introductory pharmacy practice experience (IPPE) course focused on providing pharmaceutical care to patients in a primary/ambulatory care or acute care setting. Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic Programs.

PYPD 9190 HEALTH AND WELLNESS INTRODUCTORY PHARMACY PRACTICE EXPERIENCE (1) CLN. 1. SU. This is an Introductory Pharmacy Practice Experience (IPPE) that students will complete during a one-week block in their P2 year. Students will receive 40 IPPE hours upon completing the course. Students will build upon their initial exposure to the community pharmacy setting that occurred during their three-week Community Pharmacy IPPE in the Summer after their P1 year and focused on the medication distribution process. The focus of the Health and Wellness rotation experience is providing clinical services to patients within in the community pharmacy setting. Students have opportunities to apply concepts and clinical knowledge learned during their P1 and P2 years to the community pharmacy setting. Students will be engaged in determining patients' immunization status and making appropriate recommendations. Students will educate patients on immunizations and administer immunizations under the supervision of their licensed pharmacist preceptor. Another area of emphasis during this experience will be screening patients for hypertension and diabetes by performing blood pressure and blood glucose measurements. Students will interpret and explain results of health screenings to patients and educate them on the importance of self-monitoring. Admission into the Doctor of Pharmacy Program or approval of the Associate Dean for Academic Affairs.

PYPD 9200 INTEGRATED LEARNING EXPERIENCE I (6) LEC. 6. Students will acquire foundational knowledge of Hypertension, Diabetes Mellitus, Obesity Management, Diarrhea and Constipation, Fluid and Electrolytes, and Hypersensitivity. These disease states will provide context for students to develop knowledge and skills of various aspects of the Patient Care Process.

PYPD 9210 INTEGRATED LEARNING EXPERIENCE II (6) LEC. 6. Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic and Student Affairs. Students will acquire foundational knowledge of Lipids, Depression, Alzheimer's/Dementia, Hypothyroid, Asthma, Chronic obstructive pulmonary disease (COPD), and Smoking Cessation. These disease states will provide context for students to develop knowledge and skills of various aspects of the PPCP.

PYPD 9220 INTEGRATED LEARNING EXPERIENCE III (6) LEC. 6. Pr. (PYPD 9200 or PYPD 9206) and (PYPD 9210 or PYPD 9216). Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic and Student Affairs. This six-week course integrates biomedical sciences, pharmaceutical sciences, social/behavioral/administrative sciences, and clinical sciences. Students will acquire foundational knowledge related to Pain, Osteoarthritis (OA), Seizures, Gastroesophageal reflux disease (GERD), Stable ischemic heart disease (SIHD), Stroke, Thromboembolism, and Heart Failure.

PYPD 9230 INTEGRATED LEARNING EXPERIENCE IV (6) LEC. 6. Pr. (PYPD 9200 or PYPD 9206) and (PYPD 9210 or PYPD 9216). This six-week course will focus on knowledge and skills related to various aspects of the Pharmacists' Patient Care Process such as collecting information, conducting assessments, developing and implementing a plan including patient counseling, and documenting patient information. The course includes an introduction to pharmaceutical compounding and foundational knowledge related to over-the-counter treatment of cough, cold, and various dermatologic conditions.

PYPD 9240 INTEGRATED LEARNING EXPERIENCE V (6) LEC. 6. Pr. (PYPD 9220 or PYPD 9226) and (PYPD 9230 or PYPD 9236). This six-week course integrates biomedical sciences, pharmaceutical sciences, social/behavioral/administrative sciences, and clinical sciences to provide students with the knowledge, skills, behaviors, and attitudes necessary for developing into a practice ready pharmacist. During this ILE, students will acquire foundational knowledge related to generalized anxiety disorder; bipolar disorder/ schizophrenia; dementia; Parkinson's disease, attention-deficit/hyperactivity disorder (ADHD); sleep disorders; hepatitis and cirrhosis; pancreatitis; and hyperthyroidism.

PYPD 9250 INTEGRATED LEARNING EXPERIENCE VI (6) LEC. 6. Pr. (PYPD 9220 or PYPD 9226) and (PYPD 9230 or PYPD 9236). This six-week course integrates biomedical sciences, pharmaceutical sciences, social/behavioral/administrative sciences, and clinical sciences to provide students with the knowledge, skills, behaviors, and attitudes necessary for developing into a practice ready pharmacist. During this ILE, students will acquire foundational knowledge related to diabetic ketoacidosis (DKA)/ hyperosmolar hyperglycemic state (HHS); acid-base disturbances; nausea and vomiting; dehydration; chronic kidney disease (CKD) and secondary complications; acute kidney injury (AKI); nutrients/nutrition; and iron deficiency.

PYPD 9260 INTEGRATED LEARNING EXPERIENCE VII (6) LEC. 6. Pr. (PYPD 9240 or PYPD 9246) and (PYPD 9250 or PYPD 9256). Students will acquire foundational knowledge related to HIV/AIDS, fungal and opportunistic infections, upper respiratory tract infections, allergic rhinitis, viral infections, meningitis, and sepsis. Students will increase the depth of disease states and medications encountered in ILE 4 including: skin and soft-tissue infections, pneumonia, urinary tract infections, sexually transmitted diseases, cough and cold, and dermatologic conditions. The disease states will be integrated to allow student understanding of the relationship between the disease states and medications used to treat these disorders. These disease states will provide context for students to apply knowledge and skills of various aspects of the Pharmacists' Patient Care Process such as collecting information, conducting assessments, developing and implementing a plan including patient counseling, and documenting patient care plans in the SOAP format and/or in the electronic health record (EHR). Students will explore the relationship between medicinal chemistry and the physical and chemical properties which affect ADME, as well as how these relate to differences within and between drugs and drug classes. ILE 7 will reinforce previous competencies introduced in ILEs 1-6, allowing students to apply what was learned in a different context (varying disease states and/or more complex situations).

PYPD 9270 INTEGRATED LEARNING EXPERIENCE VIII (6) LEC. 6. Pr. (PYPD 9240 or PYPD 9246) and (PYPD 9250 or PYPD 9256). During this learning experience, students will acquire foundational knowledge related to cardiology, rheumatology, men's and women's health, and neurology. Students will increase the depth of disease states and medications encountered earlier in the program including: stable ischemic heart disease, venous thromboembolism, stroke, heart failure, osteoarthritis, pain, and epilepsy. Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic and Student Affairs

PYPD 9280 INTEGRATED LEARNING EXPERIENCE IX (6) LEC. 6. Pr. (PYPD 9260 or PYPD 9266) and (PYPD 9270 or PYPD 9276). In this course, students will acquire and/or reinforce knowledge related to inflammatory bowel disease, fluids and electrolytes, nutrition support services, hematology, oncology, sepsis, endocarditis, fungal infections, sedation, delirium of critical illness, glomerulonephritis, diabetic ketoacidosis, acid-base disturbances, and type 1 diabetes. This course reinforces competencies related to using subjective and objective information to determine patient-specific healthcare needs and the formulation of an assessment. The content will reinforce organizing and prioritizing information gathered, assessing the appropriateness of therapy based on efficacy and safety, determining the relevance of medication allergies and interactions, and preventing hospital admissions. The development and implementation of an evidence-based, patientcentered care plan that incorporates the assessment of patient-specific factors and medications will be emphasized throughout. Professional communication, focusing on communicating with patients or healthcare providers when there is an educational need, will be reinforced. Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic and Student Affairs.

PYPD 9290 INTEGRATED LEARNING EXPERIENCE X (6) LEC. 6. Pr. (PYPD 9260 or PYPD 9266) and (PYPD 9270 or PYPD 9276). This course reinforces competencies related to collecting and using subjective and objective information to determine patient specific healthcare needs and the formulation of an assessment and plan. The content will reinforce organizing and prioritizing information gathered, assessing appropriateness of therapy based on efficacy and safety, determining the relevance of medication allergies and interactions, preventing hospital admissions, and knowing when self-treatment is appropriate versus conditions that need a referral. The development and implementation of an evidence-based, patient-centered care plan that incorporates the assessment of patient-specific factors and medications will be emphasized throughout. Professional communication, focusing on communicating with patients or healthcare providers will be reinforced with emphasis on cultural awareness and barriers in education.

PYPD 9300 INTEGRATED LEARNING EXPERIENCE XI (6) LEC. 6. Pr. (PYPD 9280 or PYPD 9286) and (PYPD 9290 or PYPD 9296). This course reinforces competencies related to collecting and using subjective and objective information to determine patient specific healthcare needs and the formulation of an assessment and plan. The content will reinforce organizing and prioritizing information gathered, conducting medication reconciliation, assessing appropriateness of therapy based on efficacy and safety, determining the relevance of medication allergies, and knowing when self-treatment is appropriate versus conditions that need a referral. The development and implementation of an evidence-based, patient-centered care plan that incorporates the assessment of patient-specific factors and medications will be emphasized throughout. The legal requirements for medication distribution will be emphasized for processing medication orders as well as medication safety reporting and documentation.

PYPD 9310 INTEGRATED LEARNING EXPERIENCE XII (6) LEC. 6. Pr. (PYPD 9280 or PYPD 9286) and (PYPD 9290 or PYPD 9296). This course reinforces competencies related to collecting and using subjective and objective information to determine patient specific healthcare needs and the formulation of an assessment and plan. The content will reinforce the interpretation, verification, processing, and labeling of medications orders in different healthcare settings with increasing complexity, complying with all federal, state, and local laws; collecting, reviewing, and assessing subjective and objective information; identifying and correcting drug-related problems; utilizing appropriate medical and medication informational resources and applying the knowledge of study design and literature analysis; performing calculations; communicating with and educating patients, caregivers and stakeholders; and identifying resources for patient's healthcare needs. The students will further develop an understanding of the relationship between patient-specific factors, including pharmacogenomics, on drug selection and monitoring. Drug interactions will be explored more in-depth as students understand how to predict and resolve drug-drug and drug-disease interactions based on drug-specific and patient-specific factors. Cases will emphasize various patient populations, such as adolescent, pregnancy, and older adult. Immunization assessment and plan will be incorporated in each patient case. Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic Programs.

PYPD 9320 LONGITUDINAL EXPERIENCE I (3) LEC. 3. This semester-long course focuses on navigating the health care system. Learners will explore key issues related to patient education/public health, communication, assessment, advocacy, and management.

PYPD 9330 LONGITUDINAL EXPERIENCE II (3) LEC. 3. Pr. (PYPD 9320 or PYPD 9326). Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic and Student Affairs. This semester long course integrates multiple disciplines, including social/behavioral/administrative sciences and clinical sciences to introduce students to issues related to public health, population health, and individual health and wellness.

PYPD 9340 LONGITUDINAL EXPERIENCE III (3) LEC. 2.5. Pr. (PYPD 9330 or PYPD 9336). This longitudinal experience will introduce students to topics related to strategic marketing strategies for pharmacists' services and will expose students to different types of innovative pharmacy services in different practice settings. The overall goal of this longitudinal experience is to teach students the pertinent skills and decision-making tools needed to establish a new non-dispensing pharmacy service and justify its existence through both financial and intangible values, as well as to design systems and processes that will foster effective and appropriate communication between the pharmacist and patients, other healthcare providers, and stakeholders.

PYPD 9350 LONGITUDINAL EXPERIENCE IV (3) LEC. 2.5. Pr. PYPD 9340 or PYPD 9346. This Longitudinal experience will build on prior courses with a focus on incorporating and improving a given service within a pharmacy, within the context of services and products. Thus, the Longitudinal will have a Pharmacy Operations Management and Continuous Quality Improvement (CQI) emphasis. Students will be introduced to the CQI process and principles to enable them to 'improve' existing operations and clinical services. The use of a variety of examples will provide opportunities to apply principles to support recommendations regarding pharmacy operations. This will involve data collection and creation of an improvement plan. To complete the exploration of operations and CQI topics, financial considerations will be incorporated, focusing on the entire pharmacy program, including the role of payers. Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic and Student Affairs

PYPD 9360 LONGITUDINAL EXPERIENCE V (3) LEC. 2.5. Pr. PYPD 9350 or PYPD 9356. This course will focus on the planning and sustainability of pharmacy services through billing, contract, and inventory management along with personnel and formulary management. The emphasis on formulary management will be to assist the Pharmacy and Therapeutics (P&T) committee's decision making regarding which drugs to put on the formulary. The medication use process will also be discussed and applied. The Longitudinal will also prepare students to meet future needs of the pharmacy profession by engaging students in thinking about non-traditional services and ideas.

PYPD 9370 LONGITUDINAL EXPERIENCE VI (3) LEC. 2.5. Pr. PYPD 9360 or PYPD 9366. This semester-long course focuses on providing learners with learning opportunities related to their personal and professional goals. Learners will explore key issues related to drug information / evidence-based medicine, leadership, professionalism, and professional development.

PYPD 9380 GERIATRIC CARE I (1) LEC. 1. This study of geriatric health focuses on geriatric patient assessment and interprofessional care of the older adult patient. Students will be required to evaluate how pharmacists can impact these sequelae through interprofessional care teams while optimizing patient's health-related quality of life. This course focuses on those environmental, psychological, and physiological characteristics that are unique to, or more prevalent among, geriatric patients. Admission into the Doctor of Pharmacy program or permission of the Associate Dean for Academic Programs.

PYPD 9390 GERIATRIC CARE II (1) LEC. 1. This study of geriatric health focuses on geriatric patient assessment and management of common pharmacotherapy issues in the older adult patient. Students will be required to evaluate how pharmacists can impact these sequelae through pharmacotherapy management while optimizing patient's health-related quality of life. This course focuses on those pharmacodynamic and pharmacokinetic characteristics that are unique to, or more prevalent among, geriatric patients. Admission into the Doctor of Pharmacy program or permission of the Associate Dean for Academic Programs.

PYPD 9400 WORKSHOP I (1) LEC. 1. In this workshop, will explore the use of drug information resources and related to the use of drug information resources and population levels.

PYPD 9410 WORKSHOP II (1) LEC. 12.5. Pr. PYPD 9400 or PYPD 9406. Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic and Student Affairs. This is a focused, intensive, one week workshop where students will acquire theoretical and practical knowledge related to the Pharmacists' Patient Care Process.

PYPD 9420 WORKSHOP III (1) LEC. 12.5. Pr. PYPD 9410 or PYPD 9416. This is a focused, intensive, one-week workshop where students will acquire theoretical and practical knowledge related to a contemporary issue in the field of pharmacy. In this workshop, students will explore the provision of pharmacy-based immunization services utilizing the APhA Pharmacy-Based Immunization Delivery course materials and additional supplemental instructional materials. At the end of this workshop students will have the knowledge and skills related to the development and provision of pharmacy-based immunization services, will know how to serve as a vaccine advocate, and will receive a certificate of completion for the APhA Pharmacy-Based Immunization Delivery course.

PYPD 9430 WORKSHOP IV (1) LEC. 1. Pr. PYPD 9420 or PYPD 9426. This workshop builds upon concepts taught across the first two years in the ILE's and will utilize information the students have developed from a series of self paced videos designed to teach the basic science concepts of pharmacokinetics. The students will also be expected to incorporate knowledge related to previously covered diseases and medications. The focus of the workshop will be to show the students the application of pharmacokinetic knowledge related to A, D, M, and E in multiple settings (retail, hospital, long term care) of pharmacy practice in a case based setting. Admission into the Doctor of Pharmacy Program or Permission of the Associate Dean for Academic and Student Affairs.

PYPD 9440 WORKSHOP V (1) LEC. 12.5. Pr. PYPD 9430 or PYPD 9436. This is a focused, intensive, one week workshop where students will acquire theoretical and practical knowledge related to pharmacoeconomics and its application to the economic evaluation of pharmaceuticals and the overall healthcare system.

PYPD 9450 WORKSHOP VI (1) DSL/LEC. 12.5. Pr. PYPD 9440 or PYPD 9446. In this focused, intensive, one week workshop students will review and update their patient care skills, determine their own long term career goals, and develop a plan for achieving those goals.

PYPD 9460 FINANCES FOR THE PHARMACIST (1) LEC. 1. Pharmacy students need specific advice to prepare for life after pharmacy school in relation to financial planning including managing debt, credit, budgeting, and banking. After graduation from pharmacy school, the majority of students have high amounts of debt and enter the workforce with a higher income that they are likely unaware of how to manage. Equipping students with skills and knowledge to manage their finances will help them be more productive and avoid pitfalls and anxiety related to finances. Admission into the Doctor of Pharmacy Program or permission of the Associate Dean for Academic Programs.

PYPD 9470 PRINCIPLES OF FUNCTIONAL MEDICINE – A PATIENT CENTERED APPROACH (1) LEC. 1. Students will be introduced to the concept of Functional Medicine and the pharmacist's role in chronic disease state management using Functional Medicine principles. Students will also examine the impact of holistic healing as a path to overall health and wellness through investigation of their own health and wellness. Students will utilize evidence-based medicine as a framework for these principles and will apply the information learned in this course to patient care. Admission into the Doctor of Pharmacy Program or permission of the Associate Dean for Academic Programs.

PYPD 9480 ADVANCED PHARMACOKINETICS I (1) LEC. 1. SU. Pr. PYPD 9430 or PYPD 9436. The purpose of this course is to build upon basic pharmacokinetic concepts introduced earlier in the curriculum to develop the skills and expertise necessary to create an individualized plan for dosing and monitoring vancomycin and aminoglycoside antibiotics.

PYPD 9490 INTRODUCTION TO PHARMACOGENOMICS (1) LEC. 1. Pr. (PYPD 9230). This College of Pharmacy elective course will introduce pharmacy students to genetic variation and how this impacts efficacy and adverse effects associated with pharmacotherapy within a variety of disease states.

PYPD 9500 AMBULATORY CARE ANTICOAGULATION (1) LEC. 1. Currently enrolled in the Doctor of Pharmacy program or permission of the Associate Dean for Academic and Student Affairs. This course will provide students with a working knowledge of pharmacotherapeutic issues related to anticoagulation therapy in the out-patient setting including an introduction to the various roles of pharmacists in the management of anticoagulation therapy.

PYPD 9510 EXPLORING DIABETES CARE FROM THE PATIENT PERSPECTIVE (1) LEC. 2.1. Pr. (PYPD 9200 or PYPD 9206 and PYPD 9210 or PYPD 9216) and (PYPD 9220 or PYPD 9226 and PYPD 9230 or PYPD 9236). or permission of the Associate Dean for Academic and Student Affairs. Currently enrolled in the Doctor of Pharmacy program or permission of the Associate Dean for Academic and Student Affairs. Students will learn from pharmacists who specialize in diabetes to discuss pivotal literature sources and their impact on patient care. Students will gain appreciation of Standards of Care through active participation in a weekly deconstructed "diabetes experience" documented with reflective individual writings and/or group video recordings.

PYPD 9520 DRUGS OF ABUSE AND MISUSE (1) LEC. 1. Currently enrolled in the Doctor of Pharmacy program or permission of the Associate Dean for Academic and Student Affairs. This course will provide students with a working knowledge of the current trends in drugs of abuse, the public health implications from abuse of these drugs, and the role of different community stakeholders in the fight against this epidemic.

PYPD 9530 RESEARCH METHODS IN HEALTH SERVICES I (1) LEC. 12.5. Currently enrolled in the Doctor of Pharmacy program or permission of the Associate Dean for Academic and Student Affairs. The course is designed to provide a comprehensive introduction to the primary research methods used in clinical and health services research. It will focus on an introduction to various research designs including experimental and non-experimental, as well as quantitative and qualitative research methods. This course is ideal for student pharmacists and graduate students who want to acquire research knowledge and skills enabling them to participate in clinical and translational research teams and to evaluate programs/services at their clinical/pharmacy sites. It will serve as a research resource for their future research projects.

PYPD 9540 RESEARCH METHODS IN HEALTH SERVICES II (1) LEC. 12.5. PYPD 9530 or enrolled in PYPD 9530 during the same semester. Currently enrolled in the Doctor of Pharmacy program or permission of the Associate Dean for Academic and Student Affairs. This course is ideal for student pharmacists and graduate students who want to acquire research knowledge and skills enabling them to participate in clinical and translational research teams and to evaluate programs/services at their clinical/pharmacy sites. It will serve as a research resource for their future research projects.

PYPD 9550 ACUTE CARE PHARMACOTHERAPY I (1) LEC. 1. Currently enrolled in the Doctor of Pharmacy program or permission of the Associate Dean for Academic and Student Affairs. This course is designed to orient the pharmacy student to the acute care environment and familiarize the student with patient disease states and pharmacotherapy issues associated with the acutely ill patient in an inpatient setting.

PYPD 9560 ACUTE CARE PHARMACOTHERAPY II (1) LEC. 2. This course is a continuation of PYPD 9550. The course will cover more disease states and pharmacotherapy issues related to patients in an inpatient setting. Additionally, there will be more focus on special populations along with dosing medications in organ dysfunction.

PYPD 9570 HISTORY OF PHARMACY (1) LEC. 1. Currently enrolled in the Doctor of Pharmacy program or permission of the Associate Dean for Academic and Student Affairs. History influences nearly everything we do and that is certainly the case for the profession of pharmacy. Every course taught can provide historical contexts for the information and application. A general course in pharmacy history can give a firm foundation for any student and graduate to fully embrace their chosen profession, understand its beginnings and development, and be a competent practitioner. The intent of this course is to provide that background so that the student has an appreciation for what has come before and an understanding of the many symbols and advances of the profession that surround any pharmacy practitioner. This ranges from the Rx to the patient counseling booth to the pharmacokinetic consult.

PYPD 9580 PALLIATIVE CARE AND END OF LIFE (1) LEC. 1. Students will be introduced to the pharmacist's role in hospice/palliative care and symptoms experienced by the dying with an emphasis on interdisciplinary care. Students will also examine the impact of multicultural aspects of providing care in palliative and hospice care.

PYPD 9590 ADVANCED TRAINING IN DIABETES CARE FROM THE PROVIDER'S PERSPECTIVE (1) LEC. 1. Pr. (PYPD 9200 or PYPD 9206) and (PYPD 9210 or PYPD 9216) and (PYPD 9220 or PYPD 9226) and (PYPD 9230 or PYPD 9236) and (PYPD 9240 or PYPD 9246) and (PYPD 9250 or PYPD 9256) and (PYPD 9260 or PYPD 9266) and (PYPD 9270 or PYPD 9276). Course will emphasize completion of necessary steps for achieving The Pharmacist and Patient-Centered Diabetes Care certificate by the American Pharmacists Association, which will include but is not limited to: small group exercises, class discussions, simulated patient counseling (medication, lifestyle and devices). Permission of the Associate Dean for Academic Programs may be needed.

PYPD 9600 ADVANCED PHARMACY PRACTICE EXPERIENCE (5) PRA. Pr. (PYPD 9310 or PYPD 9316). Advanced pharmacy practice experiences in Acute Care/General Medicine, Ambulatory Care/Primary Care, Community Pharmacy, Drug Information, and various other pharmacy practice settings. Course may be repeated for a maximum of 45 credit hours.

PYPD 9610 COMMUNITY PHARMACEUTICAL CARE (5) PRA. 62.5. Advanced Practice Experience in a community pharmacy practice setting that provides pharmaceutical care services such as disease management and other advanced patient care activities. Fall, Spring, Summer.

PYPD 9620 MEDICINE I (5) PRA. 62.5. Advanced practice experience in providing Inpatient Pharmaceutical Care. Fall, Spring, Summer.

PYPD 9630 MEDICINE II - SELECTIVE (5) PRA. 62.5. Advanced practice experience in providing Inpatient Pharmaceutical Care. Additional experience beyond PYDI 9620. Fall, Spring, Summer.

PYPD 9640 PRIMARY/AMBULATORY CARE I (5) PRA. 62.5. Advanced practice experience in providing care to patients as they initially access the health care system. Fall, Spring, Summer.

PYPD 9650 PRIMARY/AMBULATORY CARE II (5) IND/PR1. 62.5. This culminating course will require a comprehensive review and application of knowledge gained throughout the first 3 years of the PharmD Curriculum. Through case, problem and project based learning, learners will apply didactic and clinical knowledge/skills in a self-directed manner.

PYPD 9660 HEALTH SYSTEM PRACTICE (5) PRA. 62.5. Advanced practice experience in a health system setting that prepares the student to adapt and function within systems of integrated pharmaceutical care services. Fall, Spring, Summer.

PYPD 9670 PRACTICE ELECTIVE I (5) PRA. 62.5. Elective experience in an advanced practice experience setting in which the student establishes personal learning goals and responsibilities. Fall, Spring, Summer.

PYPD 9680 PRACTICE ELECTIVE II (5) PRA. 62.5. Elective experience in an advanced practice experience setting in which the student establishes personal learning goals and responsibilities. Fall, Spring, Summer.

PYPD 9690 DRUG INFORMATION-SELECTIVE (5) PRA. 62.5. Status of a 4th Year Doctor of Pharmacy Student (P4) or Permission of the Associate Dean for Academic and Student Affairs. Advanced practice experience in providing drug information services to health care providers. Fall, Spring, Summer.

PYPD 9700 SUMMATIVE EXPERIENCE I (3) IND. 37.5. SU. The P4 Summative Experience I is an independent study course focusing on the North American Pharmacist Licensure Examination (NAPLEX) preparation utilizing the RxPrep package. Students will work longitudinally to complete study modules based on an assigned schedule with each module culminating in a cumulative assessment. Course requirements are to be completed outside of Advanced Pharmacy Practice (APPE) rotation requirements.

PYPD 9710 COMMUNITY PHARMACY PRACTICE I (1) LEC. 12.5. Currently enrolled in the Doctor of Pharmacy program or permission of the Associate Dean for Academic and Student Affairs. This course will focus on legal and business aspects of community pharmacy practice. Students will be paired with a mentor for this course who will provide real world examples of these aspects of community pharmacy.

PYPD 9720 COMMUNITY PHARMACY PRACTICE II (1) LEC. 1. This course will focus on the development and implementation of clinical services within the community pharmacy setting. Students will receive training on concept development through implementation of medication therapy management services in this setting.

PYPD 9730 INFECTIOUS DISEASES I (1) LEC. 1. This course will provide the student with an in depth exposure to the treatment of bacterial infectious diseases, with a particular focus on antimicrobial stewardship and the treatment of multidrug-resistant organisms.

PYPD 9740 INFECTIOUS DISEASES II (1) LEC. 1. This course will provide the student with an in depth exposure to the treatment of different viral, fungal, and bacterial infectious diseases not covered in depth in other portions of the curriculum. Admission into the Doctor of Pharmacy program or permission of the Associate Dean for Academic Programs

PYPD 9750 ADVANCED MOTIVATIONAL INTERVIEWING (1) LEC. 1. Motivational interviewing (MI) is an evidence-based method for facilitating voluntary health behavior change with patients and with providers. Target behaviors for patients engaged in comprehensive disease management may include outcome enhancing behaviors like medication taking, healthy eating, monitoring, physical activity, sleep management, smoking cessation, among others. This course will 1) explore the conceptual basis for why motivational interviewing is effective in facilitating health behavior change, and 2) provide basic and advanced training and practice for using motivational interviewing to help patients with self-management of their health conditions. This course is intended and designed to support and build student self-efficacy for using MI in patient encounters within a health/disease management context. MI principles and micro skills will be applied by the instructor in the process of helping facilitate student learning. It is hoped that the student will come away from the course encouraged, not discouraged, about using MI for improved patient outcomes in future practice/research.

PYPD 9760 POST-GRADUATE TRAINING PREPARATION (1) LEC. 1. This course will review post-graduate education opportunities for pharmacists with a focus on pharmacy residency training. Students will learn about post-graduate opportunities within pharmacy and develop skills and tools necessary in securing a position after graduation.

PYPD 9770 ACUTE CARE ANTITHROMBOTIC (1) LEC. 1. This course will provide students with a working knowledge of pharmacotherapeutic issues related to antithrombotic therapy in the inpatient setting including an introduction to roles and responsibilities of pharmacists in the management of antithrombotic therapy in this setting. Admission into the Doctor of Pharmacy program or permission of the Associate Dean for Academic Programs.

PYPD 9780 TOXICOLOGY AND POISONS (1) LEC. 1. Toxicology is the science of poisons and their antidotes. Almost any substance has the ability to cause noxious effects on living beings. The Toxicology and Poisons course is designed to introduce the Doctor of Pharmacy student to the role of the pharmacist in the management of poisonous substances and intentional and unintentional drug overdoses. Admission into the Doctor of Pharmacy program or permission of the Associate Dean for Academic Program.

PYPD 9790 THERAPEUTIC USE OF OPIOIDS (1) LEC. 1. Opioids as a class of medications are a high risk class of medications. As such, it is important that pharmacists learn to be systematic in their approach to dosing these medications and to recognize common mistakes made in their dosing. This course will provide an in-depth approach to dosing these medications. Each week will focus on a different area of dosing using patient cases to allow students to practice calculations and making recommendations. Status as a 3rd year student in the Doctor of Pharmacy program or permission of the Associate Dean of Academic Programs.

PYPD 9800 SUMMATIVE EXPERIENCE II (3) IND. 3. SU. Pr. PYPD 9700. The P4 Summative Experience II contains both an independent study component focusing on North American Pharmacist Licensure Examination (NAPLEX) board exam and Multistate Pharmacy Jurisprudence Examination (MPJE) preparation utilizing the RxPrep package and supplemental materials as well as the completion of various assignments during the course of Advanced Pharmacy Practice Experiences (APPE) rotations. Course requirements are adjunctive to APPE rotation requirements. Status of a 4th Year Doctor of Pharmacy Student (P4) or permission of the Associate Dean for Academic Programs.

PYPD 9810 ADVANCED PEDIATRICS (1) LEC. 1. The purpose of this course is to expose students to advanced pediatric topics regarding disease states, therapeutics (acute and chronic therapy) and pharmacogenomics. Concepts from the Introduction to Pediatrics course will be incorporated. Admission into the Doctor of Pharmacy program or permission of the Associate Dean for Academic Programs.

PYPD 9820 INTERPROFESSIONAL PEDIATRICS (1) LEC. 1. Course will expose students to advanced pediatric topics regarding disease states, pharmacokinetics, and therapeutics. Admission into the Doctor of Pharmacy program or permission of the Associate Dean for Academic Programs.

PYPD 9830 ACUTE CARE SELECTIVE II (5) LEC. 5. Advanced practice experience in providing pharmaceutical care to patients in an additional acute care setting. General medicine (acute care) experiences provide comprehensive, evidence-based, individualized, patient-centered care to adult inpatients typically located on a general medicine floor. Pharmacists are expected to be accountable for the patient's drug therapy outcomes and practice as an integrated member of the inter-professional health care team. Typical patients present with the following medical problems: cardiac, pulmonary, renal, hepatic, neurologic, gastrointestinal, endocrine and infectious diseases. The experience incorporates all elements of care from medication reconciliation, medication therapy recommendations and monitoring, discharge counseling, and transitions of care. Doctor or Pharmacy program or permission of the Associate Dean for Academic Programs

PYPD 9840 CLINICAL ISSUES IN UNDERSERVED POPULATIONS (1) LEC. 1. This course focuses on addressing barriers patients vulnerable to health disparities face in our healthcare system. Students will expand knowledge of social determinants of health, available medication resources, and clinical strategies to reduce health disparities in the primary care setting. Enrollment in the Doctor of Pharmacy Program or approval of the Associate Dean for Academic Programs.

PYPD 9850 PRIMARY CARE SELECTIVE II (5) LEC. 5. Advanced practice experience in providing pharmaceutical care to patients as they initially access the health care system. This is an additional opportunity for students to train in a primary care care setting. Primary care experiences provide evidence-based, patient-centered collaborative care in the outpatient setting to meet the medication management needs of patients in the treatment of chronic disease. These pharmacists promote health and wellness, disease prevention and education, and medication management of chronic illnesses such as diabetes, hypertension, coronary artery disease / dyslipidemia, asthma / chronic obstructive pulmonary disease, and heart failure. Other chronic diseases encountered by the ambulatory care pharmacist may include chronic kidney disease, chronic infectious diseases, and other chronic diseases responsive to infusion therapy that do not require hospitalization. Pharmacist delivered ambulatory care occurs in institutional health system-based clinics, community-based clinics, government-funded clinics, and managed care organizations as well as the community pharmacy setting where comparable care is provided. 4th year Doctor of Pharmacy Students or the permission of the Associate Dean for Academic Programs

PYPD 9860 METABOLIC SYNDROME 1 (1) LEC. 1. Metabolic Syndrome 1 will focus on the assessment and treatment (nonpharmacologic and pharmacologic) of disease states related to metabolic syndrome, including prevention of these comorbidities. Special attention will be given to patient considerations in the management of these diseases. Enrollment in the Doctor of Pharmacy Program or Approval of the Associate Dean for Academic Programs.

PYPD 9870 METABOLIC SYNDROME 2 (1) LEC. 1. Metabolic Syndrome 2 will focus on the assessment and treatment (nonpharmacologic and pharmacologic) of disease states related to metabolic syndrome with special attention given to its management of unique patient populations. In addition, considerations for communication with other healthcare providers will be addressed. Enrollment in the Doctor of Pharmacy Program or approval of the Associate Dean for Academic Programs.

PYPD 9880 CARDIOLOGY (1) LEC. 1. Pr. PYPD 9230. This course will introduce and expand upon core cardiovascular disease states essential for the practice ready pharmacist. HCOP students will utilize evidence-based medicine to guide all pharmacotherapy discussions and gain experience in applying these principles to make patient care decisions.

PYPD 9890 CONSULTANT PHARMACY: AN EXPANDING AREA OF PRACTICE (1) LEC. 1. Pr. PYPD 9230. Consultant pharmacy is an expanding area of practice. Consultant pharmacists collaborate with the healthcare team to provide expert clinical guidance to promote safe and effective drug therapy for older adult patients and to ensure compliance with state and federal regulations. This course will introduce HCOP students to the field of consultant pharmacy.

PYPD 9900 THE NUTRITION KITCHEN, AN INTERDISCIPLINARY CULINARY MEDICINE ELECTIVE (PHARMACY) (1) LEC. 1. SU. Pr. (PYPD 9230). The Nutrition Kitchen is an interdisciplinary culinary medicine elective to prepare future healthcare professionals utilizing a food-forward approach in the care of patients with nutrition-related chronic diseases. This specific course is for Doctor of Pharmacy students in the Harrison College of Pharmacy.

PYPD 9910 ANTIMICROBIAL STEWARDSHIP (1) LEC. 1. Pr. PYPD 9230. This HCOP elective course will explore the principles of antimicrobial stewardship and avenues for pharmacists to engage in antimicrobial stewardship efforts in a variety of patient care settings. Through simulated activities, pharmacy students will gain experience learning, recommending, and communicating antimicrobial stewardship interventions.

PYPD 9920 PHARMACY-BASED POINT-OF-CARE TEST AND TREAT (1) LEC. 1. SU. Pr. PYPD 9230. This course provides pharmacy students with knowledge and skills to develop and implement collaborative point-of-care testing programs. This HCOP elective will discuss the point-of-care test and treat process, including specimen collection, legal and management issues associated with point-of-care testing and follow-up care, and assessment of patients to determine if point-of-care testing is appropriate.

PYPD 9930 PRINCIPLES OF FUNCTIONAL MEDICINE 2 – A PATIENT CENTERED APPROACH (1) LEC. 1. Pr. (PYPD 9470). HCOP students will use the principles from the Functional Medicine course and the pharmacist's role in chronic disease state management to approach patient care using nutritional and lifestyle interventions to help prevent, heal, and potentially reverse disease. Students will continue to examine the impact of holistic healing as a path to overall health and wellness through investigation of their own health and wellness.

PYPD 9940 VETERINARY PHARMACY I (1) LEC. 1. Pr. (PYPD 9230). The purpose of this course is to introduce HCOP students to the practice of veterinary pharmacy. Veterinary-specific laws and regulations will be discussed, including special requirements for veterinary prescriptions. Species differences in pharmacokinetics, pharmacodynamics, and pharmacogenomics will be discussed, along with common disease states and pharmacologic treatments.

PYPD 9950 VETERINARY PHARMACY II (1) LEC. 1. Pr. (PYPD 9940). The purpose of this course is to expand HCOP students' knowledge of the practice of veterinary pharmacy. Large and exotic animal pharmacy will be discussed, along with pharmacological treatments.

PYPD 9980 PHARMACY RESEARCH (1-3) LEC. 1-3. The student will be expected to learn to conduct independent research activity. The specific research topic will lie within the scope of the School of Pharmacy writ large and will be decided by the student's faculty research advisor. Course may be repeated for a maximum of 6 credit hours.

College of Sciences and Mathematics

EDWARD THOMAS, *Dean*
MAGGIE HAN, *Associate Dean for Academic Affairs*
MARK LILES, *Associate Dean for Research*

The College of Sciences and Mathematics (COSAM) offers a dynamic and rigorous education in the physical sciences, life sciences, and mathematics through a wide range of undergraduate and graduate programs. In addition to serving its own majors, COSAM provides essential science and mathematics courses for students across all colleges and schools at Auburn University. The college is home to five academic departments—Biological Sciences, Chemistry and Biochemistry, Geosciences, Mathematics and Statistics, and Physics—as well as the interdisciplinary Biomedical Sciences Program. COSAM also oversees several key facilities that enrich education and research, including the Davis Arboretum, the Auburn University Museum of Natural History, and the Leach Science Center.

Undergraduate Degrees

The College of Sciences and Mathematics (COSAM) offers a wide range of four-year bachelor's degree programs in life sciences, physical sciences, and mathematics. These programs support students with strong interests in scientific inquiry, quantitative reasoning, and problem-solving, and prepare them for diverse futures, including graduate study, professional school, or careers in research, healthcare, education, government, and other science-related fields.

Students can pursue the following majors offered through the academic departments in COSAM, as well as the college-level Biomedical Sciences Program:

- Applied Mathematics (p. 1325)
- Applied Mathematics — Actuarial Science Option (p. 1326)
- Applied Mathematics — Applied Discrete Mathematics Option (p. 1327)
- Biomedical Sciences — Pre-professional concentrations in:
  - Pre-Pharmacy (p. 1347)
  - Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1345)

    - Pre-Anesthesiologist Assistant (p. 1346)
    - Health Sciences, Pre-Physical Therapy, Pre-Physician Assistant (p. 1343)
- Chemistry (BA) (p. 1280)
- Chemistry (BA) — Forensics Track (p. 1282)
- Chemistry (BA) — Pre-professional concentrations in:
    - Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1283)
- Chemistry (BS) (p. 1286)
    - Biochemistry Option (p. 1284)
- Genetics (p. 1258)
- Genetics — Pre-professional concentrations in:
    - Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1348)
    - Pre-Veterinary Medicine (p. 1350)
- Geography and Environmental Studies (p. 1303)
- Geology (p. 1304)
    - Geology — Earth System Science Option (p. 1306)
- Laboratory Science (p. 1287)
- Laboratory Science - Histotechnology Track (p. 1289)
- Laboratory Science — Pre-professional concentrations in:
    - Laboratory Science — Pre-Medicine (p. 1290)
    - Laboratory Science — Pre-Physician Assistant (p. 1291)
- Marine Biology (p. 1260)
- Mathematics (p. 1329)
- Medical Laboratory Science (p. 1293)
- Microbiology — Pre-professional concentrations in:
    - Pre-Medical, Pre-Dental, Pre-Optometry (p. 1264)
    - Pre-Physical Therapy, Pre-Physician Assistant (p. 1265)
    - Pre-Veterinary Medicine (p. 1352)
- Microbial, Cellular and Molecular Biology — Microbiology Option (p. 1263)
- Microbial, Cellular and Molecular Biology — Cell & Molecular Biology Option (p. 1262)
- Organismal Biology — Conservation & Biodiversity Option (p. 1269)
- Organismal Biology — Ecology, Evolution & Behavior Option (p. 1271)
- Organismal Biology — Integrative Biology Option (p. 1272)
- Organismal Biology — Pre-professional concentrations in:
    - Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1267)
    - Pre-Physical Therapy, Pre-Physician Assistant (p. 1268)
    - Pre-Veterinary Medicine (p. 1353)
- Physics (p. 1334)
- Physics — Pre-professional concentrations in:
    - Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1335)
    - Pre-Physical Therapy, Pre-Physician Assistant (p. 1337)
- Science Teaching (p. 508) (additional major only)

Pre-Health Curricula

Across select majors in Biomedical Sciences, Biological Sciences, Chemistry and Biochemistry, and Physics, students may pursue pre-professional concentrations designed to prepare them for admission to professional schools and advanced study in healthcare and related fields. These concentrations include:

- Pre-Dentistry
- Pre-Medicine
- Pre-Optometry
- Pre-Pharmacy

- Pre-Physical Therapy
- Pre-Physician Assistant
- Pre-Veterinary Medicine
- Pre-Anesthesiologist Assistant

All COSAM degree programs incorporate the **University Core Curriculum** and are designed to offer a strong foundation in the sciences and mathematics while supporting each student's academic and professional goals.

Math Placement

All students must complete the **ALEKS Math Placement Assessment** prior to registering for a mathematics course. Students who do not place into the first math course required for their major must complete a prerequisite course based on their ALEKS score. For more details, visit aub.ie/mathplacement (http://aub.ie/mathplacement/) or consult your academic advisor.

Graduate Degrees

The College of Science and Mathematics (COSAM) offers Master of Science (MS) and Doctor of Philosophy (PhD) degrees across a variety of disciplines. Information about graduate programs can be found here (p. 1199).

Web Page

Additional information about the College of Sciences and Mathematics can be found at: https://www.auburn.edu/cosam/.

Minors

- Biological Sciences (p. 1258)
- Chemistry (p. 1287)
- Geography (p. 1304)
- Geology (p. 1306)
- Mathematics (p. 1330)
- Physics (p. 1335)
- Statistics (p. 1330)

Undergraduate Certificates

- Geographic Information Systems (GIS) (p. 1302)

Graduate Programs

- Biological Sciences — Graduate Certificate, MS, PhD (p. 1555)
- Chemistry and Biochemistry — MS, PhD (p. 1570)
- Data Science — Graduate Certificate (p. 1706)
- Data Science and Engineering — MS (p. 1582)
- Earth System Science — Interdisciplinary PhD Program (p. 1635)
- Geographic Information Science — Graduate Certificate (p. 1672)
- Geography and Environmental Studies — MS (p. 1673)
- Geology — MS (p. 1673)
- Mathematics — MAM, MS, PhD (p. 1705)
- Physics — MS, PhD (p. 1738)
- Statistics — MS (p. 1785)
- Statistics and Data Science — PhD (p. 1785)

Biochemistry Courses

BCHE 3180 NUTRITIONAL BIOCHEMISTRY (3) LEC. 3. Pr. CHEM 2030 or CHEM 2070 or CHEM 2077 or CHEM 2080 or CHEM 2087. Fundamental pathways of carbohydrate, lipid, and amino acid metabolism in human beings.

BCHE 3200 PRINCIPLES OF BIOCHEMISTRY (3) LEC. 3. Pr. (BIOL 1010 or BIOL 1020 or BIOL 1030 or BIOL 1027 or BIOL 1037) and (CHEM 2030 or CHEM 2070 or CHEM 2077 or CHEM 2080 or CHEM 2087). Structure and function of biomolecules, enzyme catalysis, processing of genetic information, bioenergetics and metabolism, and regulatory mechanisms in cellular processes.

BCHE 5180 BIOCHEMISTRY I (3) LEC. 3. Pr. CHEM 2080 or CHEM 2087. Fundamentals of metabolism, focusing on the design and regulation of the major catabolic and biosynthetic metabolic pathways. Bioenergetics.

BCHE 5181 BIOCHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C BCHE 5180 or P/C CHEM 5180. Laboratory techniques required for identification and quantification of compounds of important biochemical classes.

BCHE 5190 BIOCHEMISTRY II (3) LEC. 3. Pr. BCHE 5180 or BCHE 6180. Fundamentals of metabolism, focusing on the design and regulation of the major catabolic and biosynthetic metabolic pathways.

BCHE 5191 BIOCHEMISTRY II LABORATORY (1) LAB. 3. Pr. P/C BCHE 5190 or P/C CHEM 5190. Laboratory techniques required for partial purification, kinetic studies, and characterization of enzymes and nucleotides from various plants, animals and bacteria.

BCHE 6180 BIOCHEMISTRY I (3) LEC. 3. Pr. CHEM 2080 or CHEM 2087. Departmental approval. Fundamentals of the classification, structure, and reactions of the major constituents of living matter and evaluation of binding phenomena and bioenergetics.

BCHE 6181 BIOCHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C BCHE 6180 or P/C CHEM 6180. Laboratory techniques required for identification and quantification of compounds of important biochemical classes.

BCHE 6190 BIOCHEMISTRY II (3) LEC. 3. Pr. BCHE 6180. Departmental approval. Fundamentals of metabolism, focusing on the design and regulation of the major catabolic and biosynthetic metabolic pathways.

BCHE 6191 BIOCHEMISTRY II LABORATORY (1) LAB. 3. Pr. P/C CHEM 6190. Laboratory techniques required for partial purification, kinetic studies, and characterization of enzymes and nucleotides from various plants, animals, and bacteria.

BCHE 7200 ADVANCED BIOCHEMISTRY I (3) LEC. 3. Graduate credit will not be given for both BCHE 6190 and BCHE 7200.

BCHE 7210 ADVANCED BIOCHEMISTRY II (3) LEC. 3. Structure and function of macromolecules participating in the flow of molecular information. Graduate credit will not be given for both BCHE 6180 and BCHE 7210. Or equivalent.

BCHE 7220 PRINCIPLES OF CELLULAR AND MOLECULAR ENZYMOLOGY (3) LEC. 3. Pr. BCHE 6190 or CHEM 6190 or BCHE 7200. Departmental approval. The principles of enzyme chemistry including the physical, chemical, and catalytic properties of enzymes.

BCHE 7230 BIOCHEMISTRY OF MACROMOLECULES (3) LEC. 3. Pr. BCHE 6180 or BCHE 7200. Departmental approval. Advanced study of the structure of protein and nucleic acids: DNA replication, RNA transcription and protein synthesis.

BCHE 7260 BIOINFORMATICS (3) LEC. 3. Pr. BCHE 7210. Departmental approval. Advanced study of main concepts and tools of genomics and proteomics.

BCHE 7270 BIOCHEMICAL RESEARCH TECHNIQUES (3) LEC. 3. Pr. BCHE 6190. Modern biochemical laboratory techniques. Course may be repeated for a maximum of 6 credit hours.

BCHE 7280 TOPICS IN BIOCHEMISTRY (1-3) LEC. Pr. BCHE 7210. Departmental approval. Directed studies in biochemistry. BCHE 7210 or equivalent. Course may be repeated for a maximum of 3 credit hours.

Biology Courses

BIOL 1000 INTRODUCTION TO BIOLOGY (3) LEC. 3. Science Core. Introduction to biological principles relevant to human society. Designed for non-science majors. Credit will not be given for both BIOL 1000 and BIOL 1020 or BIOL 1027.

BIOL 1001 INTRODUCTION TO BIOLOGY LABORATORY (1) LAB. 2. Pr. P/C BIOL 1000 or P/C BIOL 1003. Laboratory course for BIOL 1000 or BIOL 1003.

BIOL 1010 A SURVEY OF LIFE (3) LEC. 3. Pr. BIOL 1000 or BIOL 1020 or BIOL 1023 or BIOL 1027 or SCMH 1010 or SCMH 1013 or SCMH 1017 or SCMH 1020 or SCMH 1023 or SCMH 1027. Science Core. Emphasis on contrasting strategies employed by organisms to meet similar biological needs. Credit will not be given for both BIOL 1010 and BIOL 1030 or BIOL 1037.

BIOL 1011 A SURVEY OF LIFE LABORATORY (1) LAB. 2. Pr. P/C BIOL 1010 or P/C BIOL 1013. Laboratory course for BIOL 1010.

BIOL 1020 PRINCIPLES OF BIOLOGY (3) LEC. 3. Science Core. Introduction to the physical, chemical, and biological principles common to all organisms. Credit will not be given for both BIOL 1020 and BIOL 1000 or BIOL 1027.

BIOL 1021 PRINCIPLES OF BIOLOGY LABORATORY (1) LAB. 2. Pr. P/C BIOL 1020 or P/C BIOL 1023 or P/C BIOL 1027. Laboratory Course for BIOL 1020.

BIOL 1027 HONORS BIOLOGY (4) LEC. 3. LAB. 2. Pr. Honors College. Science Core. Introduction to the physical, chemical, and biological principles common to all organisms. Credit will not be given for both BIOL 1027 and BIOL 1000 or BIOL 1020.

BIOL 1030 ORGANISMAL BIOLOGY (3) LEC. 3. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027. Science Core. Principles and fundamentals of biology at the organismal level. Credit will not be given for both BIOL 1030 and BIOL 1010 or BIOL 1037.

BIOL 1031 ORGANISMAL BIOLOGY LABORATORY (1) LAB. 2. Pr. P/C BIOL 1030. Laboratory Course for BIOL 1030.

BIOL 1037 HONORS ORGANISMAL BIOLOGY (4) LEC. 3. LAB. 1. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027. Science Core. Principles and fundamentals of biology at the organismal level. Credit will not be given for both BIOL 1037 and BIOL 1010 or BIOL 1030.

BIOL 2100 PROFESSIONAL DEVELOPMENT (1) LEC. 1. Introduction to career opportunities and student development options for majors in biological sciences. Students will investigate post-graduation academic and professional options, develop writing skills by creating resumes and ePortfolios, and explore course and research options with the department. Biology majors only.

BIOL 2425 MARINE BIOLOGY (4) LEC. 4. Pr. BIOL 1030 or BIOL 1037. Departmental approval. The invertebrates, vertebrates and marine plants as communities with emphasis on local examples. Taught only at Dauphin Island Sea Lab. (DISL).

BIOL 2500 HUMAN ANATOMY AND PHYSIOLOGY I (3) LEC. 3. Pr. BIOL 1000 or BIOL 1020 or BIOL 1023 or BIOL 1027. Study of the structure and function of the human body. First half of two-part sequence with BIOL 2510, concentrating on tissues, muscle, and nervous system.

BIOL 2501 HUMAN ANATOMY AND PHYSIOLOGY I LABORATORY (1) LAB. 1. Pr. (BIOL 1000 or BIOL 1020 or BIOL 1027) and (P/C BIOL 2500 or P/C BIOL 2503 or P/C BIOL 2507). Lab course for study of the structure and function of the human body. First half of two-part sequence with BIOL 2510, concentrating on tissues, muscle, and nervous system.

BIOL 2507 HONORS HUMAN ANATOMY AND PHYSIOLOGY I (3) LEC. 3. Pr. Honors College. BIOL 1000 or BIOL 1020 or BIOL 1023 or BIOL 1027. Study of the structure and function of the human body. First half of two-part sequence with BIOL 2510, concentrating on tissues, muscle, and nervous system.

BIOL 2510 HUMAN ANATOMY AND PHYSIOLOGY II (3) LEC. 3. Pr. (BIOL 2500 or BIOL 2503 or BIOL 2507) and BIOL 2501. Study of the structure and function of the human body. Second half of two-part sequence with BIOL 2500/2501, concentrating on cardiovascular, respiratory, digestive, urinary, reproductive, and endocrine systems.

BIOL 2511 HUMAN ANATOMY AND PHYSIOLOGY II LABORATORY (1) LAB. 1. Pr. (BIOL 2500 or BIOL 2503 or BIOL 2507) and BIOL 2501 and (P/C BIOL 2510 or P/C BIOL 2517). Lab course for study of the structure and function of the human body. Second half of two-part sequence with BIOL 2500, concentrating on the individual organ systems.

BIOL 2517 HONORS HUMAN ANATOMY AND PHYSIOLOGY II (3) LEC. 3. Pr. Honors College. BIOL 2501 and BIOL 2500 or BIOL 2503 or BIOL 2507. Study of the structure and function of the human body. Second half of two-part sequence with BIOL 2500/2501, concentrating on cardiovascular, respiratory, digestive, urinary, reproductive, and endocrine systems.

BIOL 3000 GENETICS (3) LEC. 3. Pr. (BIOL 1020 or BIOL 1023 or BIOL 1027). An overview of theoretical principles of transmission, cytological, molecular, and population genetics. Problem solving will be emphasized. May count either BIOL 3000 or BIOL 3003 or AGRI 3000.

BIOL 3001 GENERAL GENETICS LABORATORY (1) LAB. 2. Pr. (BIOL 1020 or BIOL 1023 or BIOL 1027) and (P/C BIOL 3000 or P/C BIOL 3003). Laboratory provides practical experience in the areas of transmission, cytological, molecular, and population genetics. Problem solving is emphasized though analysis of simulated and real genetics data sets.

BIOL 3010 COMPARATIVE ANATOMY (4) LEC. 3. LAB. 1. Pr. BIOL 1030 or BIOL 1037. We will examine evolution of anatomical structures from early chordates through vertebrates (both living and extinct). Students will learn the main vertebrate taxa and how each anatomical system appears in them. Students will also examine the linkage of these systems through all vertebrates. The phylogenetic tree (evolutionary relationships of the vertebrates) will be the backbone on which we explore the diversity of anatomy. In lab, students will use and develop their integrative skills by examining the anatomy of a wide variety of organisms.

BIOL 3011 COMPARATIVE ANATOMY LABORATORY (1) LAB. 1. Pr. P/C BIOL 1030 or BIOL 1037. Laboratory to accompany Comparative Anatomy Lecture. This lab course will explore the diverse morphologies of vertebrates.

BIOL 3020 GENOMIC BIOLOGY (4) LEC. 3. LAB. 2. Pr. BIOL 3000 or BIOL 3003 or AGRI 3000. An overview of genes, genomes, and genomic and proteomic approaches and methodology. Application of principles of biology at the genomic level. Includes an introduction to bioinformatic approaches to genomic problems in a computer laboratory setting.

BIOL 3030 EVOLUTION AND SYSTEMATICS (3) LEC. 3. Pr. BIOL 1030 or BIOL 1037. An introduction to evolutionary processes, classification, of organisms and scientific nomenclature.

BIOL 3040 BIOLOGY OF MARINE SYSTEMS (3) LEC. 3. Pr. (BIOL 1020 or BIOL 1023 or BIOL 1027) and (BIOL 1030 or BIOL 1037). Introduction to marine systems and biological investigations of coastal, near shore and open ocean organisms and processes.

BIOL 3060 ECOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 1020 or BIOL 1023 or BIOL 1027) and (BIOL 1030 or BIOL 1037). Interactions of organisms with their environments and characteristics of populations, communities, and ecosystems. 8 hours of Biology.

BIOL 3075 INTRODUCTION TO OCEANOGRAPHY (4) LEC. 4. Pr. (MATH 1150 or MATH 1153) and (CHEM 1110 or CHEM 1117 or CHEM 1030 or CHEM 1033) and PHYS 1500. Departmental approval. The physics, chemistry, biology, and geology of the oceans. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 3100 PLANT BIOLOGY (4) LEC. 4. LAB. 1. Pr. (BIOL 1030 or BIOL 1037) and (CHEM 1010 or CHEM 1030 or CHEM 1033 or CHEM 1110 or CHEM 1117). Introduction to the morphology, anatomy, physiology and classification of plants with laboratory.

BIOL 3200 GENERAL MICROBIOLOGY (3) LEC. 3. Pr. (BIOL 1020 or BIOL 1023 or BIOL 1027) and (CHEM 1030 or CHEM 1033 or CHEM 1110 or CHEM 1117) and P/C BIOL 3201. Introduction to the science of microbiology, emphasizing cell structure, systematics, growth, genetics, and the role in human affairs.

BIOL 3201 GENERAL MICROBIOLOGY LABORATORY (1) LAB. 2. Pr. (BIOL 1020 or BIOL 1023 or BIOL 1027) and (CHEM 1030 or CHEM 1033 or CHEM 1110 or CHEM 1117) and (P/C BIOL 3200 or P/C BIOL 3203 or P/C BIOL 3207). Fundamental laboratory techniques required to safely handle, enumerate, identify, and provide basic biochemical characterization of microorganisms.

BIOL 3207 HONORS GENERAL MICROBIOLOGY (3) LEC. 3. Pr. Honors College. CHEM 1030 or CHEM 1033 or CHEM 1110 or CHEM 1117 and BIOL 3201. and BIOL 1020 or BIOL 1023 or BIOL 1027. Introduction to the science of microbiology, emphasizing cell structure, systematics, growth, genetics, and the role in human affairs.

BIOL 4000 HISTOLOGY (3) LEC. 3. Pr. (BIOL 1030 or BIOL 1037) and BIOL 1031 and (BIOL 2500 or BIOL 2507 or BIOL 2510 or BIOL 2517 or BIOL 3010 or BIOL 5240). Coreq. BIOL 4001. Morphology and classification of tissues; arrangement of tissues in organs and systems of vertebrate animals.

BIOL 4001 HISTOLOGY LABORATORY (1) LAB. 3. Pr. (BIOL 1030 or BIOL 1037). Coreq. BIOL 4000. Laboratory investigation of the morphology and classification of tissues using prepared slides to reveal the arrangement of tissues in organs and organ systems of vertebrate animals.

BIOL 4010 INVERTEBRATE BIODIVERSITY (4) LEC. 3. LAB. 3. Pr. BIOL 1030 or BIOL 1037. Survey of the phyla of invertebrates with emphasis on morphology, anatomy, ecology, evolution, and systematics.

BIOL 4015 BIOLOGY AND CONSERVATION OF MARINE TURTLES (2) LEC. 15. LAB. 45. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. OR permission of Marine Biology coordinator. An introductory overview of the biology of marine turtles. Topics include: identification, distribution, nesting & migratory behavior, feeding, population biology, development, paleontology and conservation. Extensive laboratory and field studies of multiple species of turtles. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4020 VERTEBRATE BIODIVERSITY (4) LEC. 3. LAB. 3. Pr. BIOL 1030 or BIOL 1037. Ecology and evolution of living vertebrates of the world.

BIOL 4025 ECOLOGY OF THE FLORIDA EVERGLADES (2) LEC. 15. LAB. 45. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. Examines the natural history, ecology and evolution, and human impact on the Everglades. Includes intensive lectures and a more than 1-week long campsite based field trip in the Everglades. Multiple short trips to various locales within the Everglades. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4035 INTRODUCTION TO MARINE ANIMAL NEUROBIOLOGY (3) LEC. 15. LAB. 60. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037. The neuroanatomy and neurophysiology of marine invertebrates and vertebrates. Lectures and labs on neurons, glia, resting and action potentials, synapses and neurotransmitters, muscle contraction, sensorimotor integration; neurophysiological bases of behavior; labs include computer simulation of cellular neurobiology. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4045 MARINE MAMMAL BIOLOGY (4) LEC. 30. LAB. 60. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. Introduction to the evolution, taxonomy and classification, anatomy, physiology, behavior, conservation and management issues of marine mammals, including cetaceans, pinnipeds, mustelids, sirenians and the polar bear. Lab and field research methods used to study marine mammals will be covered. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4065 MARINE CONSERVATION BIOLOGY (4) LEC. 45. LAB. 30. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and (BIOL 3040 or BIOL 3060). Study of major threats to marine biodiversity as and potential solutions to the threats. Students discuss current topics in marine conservation biology and critically debate marine conservation literature. Field trips to impacted and pristine sites will demonstrate principles. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4085 HURRICANES OF THE GULF OF MEXICO (2) LEC. 30. An introductory survey with emphasis on Gulf of Mexico hurricanes. Hurricane features. Basic principles of the atmosphere, review of Gulf, Atlantic and Caribbean hurricanes, El Nino, changes in the Atlantic circulation, hurricane formation, development, features, movement, steering and forecasting. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4095 COASTAL BIRDS OF ALABAMA (2) LEC. 15. LAB. 30. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. Behavior and ecology-oriented avian field biology. Identification, banding, record/broadcast, other survey methods. Emphasis on behavioral ecology. Extensive field effort along the Gulf Coast and in the Mobile/Alabama/Tombigbee/Tensaw River Delta, other riparian environments, and salt marshes. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4100 CELL BIOLOGY (3) LEC. 3. Pr. CHEM 2030 or (CHEM 2070 or CHEM 2077) and (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and (BIOL 1030 or BIOL 1037). Introduction to cellular structure and processes, including evolution, organization, physiology, molecular biology of cells, membranes, cytoplasm, and organelles as well as energy, transport, motility, cell division, signaling, transcription, and translation.

BIOL 4101 CELL BIOLOGY LABORATORY (2) LAB. 4. Pr. P/C BIOL 4100 or P/C BIOL 4103. Light/electron microscopy, cell structure, origins of life, centrifugation, protein/nucleic acid electrophoresis, and blotting, motility, DNA purification, chromatography, pH, fluorescence microscopy.

BIOL 4135 MARINE BEHAVIORAL ECOLOGY (4) LEC. 30. LAB. 60. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. Animal behavior in the context of the marine environment. Students study the ecological and evolutionary significance of behavior in a marine setting. Topics include principles of marine behavioral ecology, techniques for observing behavior, conducting behavior experiments, and data collection. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4150 HUMAN GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or AGRI 3000 or FISH 3000 and BIOL 4100 and (CHEM 2080 or CHEM 2087). Study of the biological interaction of genes, effects of mutation and changes in gene frequency in human populations. Emphasis on molecular approach to study evolutionary changes in human gene pools.

BIOL 4410 VERTEBRATE DEVELOPMENT (5) LEC. 3. LAB. 4. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Morphogenesis and organogenesis of frog, chick, pig, and human from a descriptive and analytical viewpoint.

BIOL 4415 SHARK AND RAY BIOLOGY (2) LEC. 15. LAB. 45. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. An introduction to the biology of sharks and rays with special emphasis on regional shark fauna and field technique. Topics: chondrichthyan origin, systematics, sensory biology, trophic ecology, reproductive biology, life history, ecology, fisheries and conservation. Extensive lab and field work. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4445 SPECIAL PROBLEMS IN MARINE SCIENCE (1-6) AAB/LEC. Departmental approval. Individualized research-oriented experience. Taught at Gulf Coast Research Laboratory. Course may be repeated for a maximum of 6 credit hours.

BIOL 4455 MARINE INVERTEBRATE ZOOLOGY (6) LEC. 6. Departmental approval. Structure, classification, phyogenetics, larval development and functional processes of marine and estuarine invertebrates. Taught at Gulf Coast Research Laboratory.

BIOL 4475 MARINE ICHTHYOLOGY (6) LEC. 6. Departmental approval. Biology of the major piscine taxa in Mississippi Sound. Principles involved in classification and evolutionary relationships of these organisms. Taught at Gulf Coast Research Laboratory.

BIOL 4515 MARINE INVERTEBRATE ZOOLOGY (4) LEC. 4. Pr. At least 10 credits in BIOL 2000-8990. Departmental approval. The natural history, systematics, and morphology of marine invertebrates from the Gulf of Mexico; oriented toward a field and laboratory approach. Participation in extended field trips is part of the course. Taught at DISL.

BIOL 4525 DOLPHINS AND WHALES (2) LEC. 2. Pr. BIOL 1030 or BIOL 1037. Departmental approval. Classification, anatomy, and ecology of the cetaceans. Taught at DISL.

BIOL 4565 MARINE VERTEBRATE ZOOLOGY (4) LEC. 4. Pr. BIOL 1030 or BIOL 1037. Departmental approval. Systematics, zoogeography and ecology of marine fishes, reptiles, and mammals. Taught at DISL. May not be substituted for BIOL 4020.

BIOL 4575 MARINE ECOLOGY (4) LEC. 4. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027. Prerequisites: BIOL1020 or marine biology. Departmental approval. Experimental ecological theory and its application to interactions of marine organisms with each other and the environment. Includes laboratory, extensive field trip experience. Taught at DISL.

BIOL 4585 PLANKTON BIOLOGY (2) LEC. 15. LAB. 15. Pr. ((BIOL 1020 and BIOL 1021) or BIOL 1027) and ((BIOL 1030 and BIOL 1031) or BIOL 1037). Students will learn about the biology of all forms of plankton and the methods for their study including optical and chemical techniques. Students will understand the basic methods of study and be able to sight-identify major groups. Taught at Dauphin Island Sea Lab (DISL).

BIOL 4700 PEDAGOGY OF PEER-LED INSTRUCTION (1) LEC. 1. Departmental approval. This is the pedagogical training course designed for students serving as peer instructors who are interested in effective instructional strategies in the STEM disciplines. This course helps peer instructors integrate educational theory, pedagogy, content, and practice. Course meetings will focus on practical concerns as well as associated theoretical models. This is a seminar course where students are responsible for weekly readings, in-class discussions, reflections and projects which are coordinated with students' practice.

BIOL 4920 INTERNSHIP IN BIOLOGY (1-4) INT. SU. Application of biology concepts and skills in a professional experience. 12 credit hours in 3000-level or higher BIOL courses. Departmental approval. Student must be enrolled in a major offered by the Department of Biological Sciences. Course may be repeated for a maximum of 4 credit hours.

BIOL 4950 SENIOR SEMINAR (1) LEC. 1. Oral presentation and discussion of recent scientific publications from a selected area of biological sciences. One hour is required for all majors. Course may be repeated for a maximum of 3 credit hours.

BIOL 4967 HONORS SPECIAL PROBLEMS (1-3) DSL/LEC. Pr. Honors College. Departmental approval and membership in the Honor College. Course may be repeated for a maximum of 3 credit hours.

BIOL 4970 SPECIAL TOPICS (1-4) AAB. Departmental approval. Instruction and discussion in a selected current topic in Biological Sciences. Course may be repeated for a maximum of 8 credit hours.

BIOL 4980 UNDERGRADUATE RESEARCH (2-4) AAB/IND. Directed research in an area of specialty within the department. Course may be repeated for a maximum of 6 credit hours.

BIOL 4997 HONORS THESIS (1-3) IND. Pr. Honors College. Undergraduate research and thesis. Course may be repeated for a maximum of 3 credit hours.

BIOL 4AA0 PROFESSIONAL DEVELOPMENT II (0) PRA. SU. Students enrolled in this course will complete the ePortfolio that they began developing as Freshmen, in BIOL 2100 - Professional Development I. Successfully designing and completing a professional ePortfolio will provide students with: 1. An opportunity to create a unified, polished and coherent educational and professional history of themselves. 2. A platform to organize their thinking about skills and experiences and the opportunity to connect them to the next step in career development. 3. A place to collect, present and reflect on evidence of professional development and growth during the undergraduate experience.

BIOL 5000 HUMAN CARDIOVASCULAR PHYSIOLOGY (4) LEC. 3. LAB. 2. Pr. BIOL 2510 or BIOL 2517 or BIOL 5240 or BIOL 5600. An in-depth exploration of molecular events and mechanisms governing heart and vascular function in health and disease. Laboratory will provide hands-on experiences with ECG, local blood flow, and case study examples.

BIOL 5020 EMBRYONIC DEVELOPMENT (3) LEC. 3. Pr. (BIOL 4100 or BIOL 4103). This course is designed to teach students the evolution of the molecular mechanisms used by developing embryos to form the adult body plan with a focus on the vertebrate model systems used to understand human developmental biology. In addition, the course will expose students to current research on these processes and the techniques used to carry out these studies.

BIOL 5050 FUNDAMENTALS OF BIOPHYSICS (2) LEC. 2. Pr. PHYS 1510 or BIOL 4100. Introduction to use of theories and methods of physics in biology, illustrated by discussion of organism size, metabolism, physiology, vision, hearing, cell cellular and molecular processesern medicine, physiology and molecular biology.

BIOL 5090 CONSERVATION BIOLOGY (3) LEC. 3. Pr. BIOL 3060. This course is an overview of ethical, economic and biological aspects of conservation biology at scales ranging from local to global. Credit will not be given for both BIOL 5090 and BIOL 6090.

BIOL 5110 PARASITOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 1030 or BIOL 1037 or BIOL 2500 or BIOL 2503 or BIOL 2507. Students must have Junior or Senior standing. Development, identification, host-parasite relationships, and medical significance of parasitic protozoa, helminthes, and arthropods that infect humans, domestic animals and wildlife. May count either BIOL 5110 or LABT 4050.

BIOL 5120 SYSTEMATIC BOTANY (4) LEC. 3. LAB. 3. Pr. (BIOL 1030 or BIOL 1037). Classification, nomenclature, distribution, systematics, and evolution of vascular plants.

BIOL 5130 ADVANCED PLANT PHYSIOLOGY (3) LEC. 3. Pr. BIOL 3100 and (CHEM 2030 or CHEM 2080 or CHEM 2087). Physiological and biochemical processes affecting plant growth and development including water relations, photosynthesis, respiration, and hormones.

BIOL 5131 ADVANCED PLANT PHYSIOLOGY LABORATORY (1) LAB. 3. Pr. BIOL 3100 and (CHEM 2081 or BIOL 5130). Laboratory exercises in plant physiology. Including water relations, metabolism and growth, and development.

BIOL 5140 PLANT ECOLOGY (4) LEC. 3. LAB. 4. Pr. (BIOL 1030 or BIOL 1037) and BIOL 3060. Exploration of ecological interactions between plants and their environment. Field trips emphasize Southeastern habitats/plant examples. Includes 3-day weekend field trip.

BIOL 5150 POPULATION AND COMMUNITY ECOLOGY (3) LEC. 3. Pr. BIOL 3060. Quantitative study of natural population and ecological communities. Selected topics include density-dependent population growth, life-history theory, mark-recapture analysis, eco-evolutionary dynamics, and species interactions especially how they relate to questions of species distributions in time and space.

BIOL 5160 FIELD BIOLOGY AND ECOLOGY (3-15) LEC. 3. Prereq. 15 hours of biology. Intensive classroom and field studies of an area outside Alabama. Course may be repeated for a maximum of 15 credit hours.

BIOL 5190 CELL AND MOLECULAR SIGNAL TRANSDUCTION (3) LEC. 3. Pr. BIOL 4100 and BIOL 5220. Study of cellular communication and regulation with emphasis on integration between cellular, molecular, genetic, and biochemical approaches.

BIOL 5200 CLINICAL MICROBIOLOGY (5) LEC. 3. LAB. 4. Pr. (BIOL 3200 or BIOL 3203 or BIOL 3207) and BIOL 3201. Isolation, cultivation, identification, classification and pathogenesis of infectious agents with emphasis on bacteria; includes clinical materials, Eubacteria, Mycoplasmata, Rickettsiae and Spirochetes. May count either BIOL 5200 or BIOL 6200.

BIOL 5210 MICROBIAL PHYSIOLOGY (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3207 or BIOL 3203) and BIOL 3201 and (CHEM 2030 or CHEM 2080 or CHEM 2087). General physiology of microbial cells emphasizing fermentation, respiration, photosynthesis, nitrogen fixation, cell wall synthesis, membranes, and macromolecular synthesis.

BIOL 5220 INTRODUCTORY MOLECULAR GENETICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and (BIOL 3200 or BIOL 3207 or BIOL 3203) and BIOL 3201. Principles of gene expression including replication, transcription, and translation; structure and regulation of genes; concepts and techniques in recombinant DNA.

BIOL 5230 VIROLOGY (3) LEC. 3. Pr. (P/C BIOL 5220 or P/C BIOL 6220) or (P/C BIOL 5260 or P/C BIOL 6260). Biology of viruses, including structure, entry, replication, assembly and release, pathogenesis, and epidemiology of viral infections. May count BIOL 5230 or BIOL 6230.

BIOL 5240 ANIMAL PHYSIOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 4100 or (CHEM 2030 or CHEM 2070 or CHEM 2077). General overview of the function of the major systems in animals, including evolution and adaptation to specific environments.

BIOL 5250 MICROBIAL EVOLUTION AND DIVERSITY (4) LEC. 3. LAB. 2. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000 and (BIOL 3200 or BIOL 3207 or BIOL 3203) and BIOL 3201. Introduction to microbial evolutionary history and theory, and survey of microbial diversity. Credit will not be given for both BIOL 5250 and BIOL 6250.

BIOL 5260 PROKARYOTIC MOLECULAR GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000 and (BIOL 3200 or BIOL 3207 or BIOL 3203) and BIOL 3201. Molecular principles of bacterial genetics including gene structure, genetic organization, regulation of gene expression, acquisition and loss of genes leading to microbial evolution. Credit will not be given for both BIOL 5260 and BIOL 6260.

BIOL 5270 HOST-MICROBE INTERACTIONS (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3207 or BIOL 3203) and (BIOL 3201) and (BIOL 5220 or BIOL 5260). This course will explore interactions between microbes and their hosts including plants, insects and animals. Credit will not be given for both BIOL 5270 and 6270.

BIOL 5280 GENETHICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Twenty-first century biotechnology and related ethical issues, including human cloning, stem cells, neuroenhancement, age retardation, genetic enhancement, and nanobiology. May count BIOL 5280 or 6280.

BIOL 5290 CASE STUDIES IN INFECTION AND IMMUNITY (3) LEC. 3. Pr. BIOL 5500. This course is designed to enrich student understanding of infection and immunity in the context of clinical presentations. Students will learn to use deductive reasoning to narrow down potential causes of symptoms and then use scientific literature to gain a detailed understanding of the mechanisms underlying disease. Cases covered will include infectious disease, immunodeficiency, neoplasms and/or autoimmunity.

BIOL 5300 PLANT ANATOMY AND DEVELOPMENT (4) LEC. 3. LAB. 4. Pr. BIOL 3100. Investigation of the various levels of plant organization from subcellular to organ through use of light and scanning electron microscopes.

BIOL 5320 PLANT GENE EXPRESSION (3) LEC. 3. Pr. BIOL 3100. Departmental approval. Genetic expression of genetic elements in plants from the recent literature.

BIOL 5330 DEVELOPMENTAL GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or AGRI 3000 or FISH 3000. Study of the genetics and genetic mechanisms behind developmental processes occurring in a range of species. May count either BIOL 5330 or BIOL 6330.

BIOL 5340 PROTOZOOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Life history, identification, cell biology, and evolution of free-living and parasitic protozoa of the major groups. Laboratory includes techniques for microscopy.

BIOL 5350 BEHAVIORAL ECOLOGY (3) LEC. 3. Pr. (BIOL 3030 or BIOL 3033) and BIOL 3060. Evolution of behaviors via natural, sexual, and kin selections; evolutionary influences on social groups, mating systems, cooperative breeding, and other interactions.

BIOL 5370 MOLECULAR ECOLOGY (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and BIOL 3060. General overview of the concepts and techniques regarding the application of molecular variation in answering questions pertaining to populations and communities of organisms. Credit will not be given for both BIOL 5370 and BIOL 6370.

BIOL 5380 GENERAL ICHTHYOLOGY (4) LEC. 3. LAB. 4. Pr. BIOL 1030 or BIOL 1037. Survey of the biodiversity of world and local fishes with an overview of ecology, behavior, biology, and conservation of fishes.

BIOL 5425 MARINE BOTANY (4) LEC. 4. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027. Departmental approval. Pr. BIOL 1020 or equiv. Survey of microscopic and macroscopic algae, salt marsh vegetation, sea grasses, mangroves and maritime forests with regard to identification, distribution, structure, ecology and physiology. Field trips and laboratory work. Taught at DISL.

BIOL 5440 CLIMATE CHANGE PHYSIOLOGY AND EVOLUTION (3) LEC. 3. LAB. 0. This class investigates on the basic mechanisms of climate change and its impact on living organisms, focusing on their physiological, evolutionary, behavioral and molecular responses. Special interest is given to plants and marine organisms.

BIOL 5500 IMMUNOLOGY (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3203 or BIOL 3207) and BIOL 3201 and (BIOL 3000 or BIOL 3003 or BIOL 3020). The cellular and molecular basis of the immune response, including antigen presentation, immunogenetics, effector mechanisms, and medical immunology. May count either BIOL 3500 or BIOL 5500.

BIOL 5501 IMMUNOLOGY LAB (2) LAB. 2. Pr. P/C BIOL 5500 or P/C BIOL 3500. Techniques illustrating principles of antigen-antibody interactions and their application in immunoassays, identification of leukocytes, cellular interactions, and antibody production.

BIOL 5521 GENE EXPRESSION AND RECOMBINANT DNA LABORATORY (2) LEC. 2. LAB. 4. Pr. P/C BIOL 5220 or P/C BIOL 5260. Laboratory experiences demonstrating concepts and techniques in recombinant DNA.

BIOL 5550 NANOMEDICINE (2) LEC. 2. Pr. PHYS 1510 and CHEM 2080 and (P/C BCHE 5180 or P/C BIOL 4100). Nanomedicine is a branch of medicine that applies the knowledge and tools of nanotechnology to the prevention and treatment of disease. It involves the use of nanoscale materials, such as biocompatible nanoparticles, nanorobots and nanosensors, for diagnosis, drug delivery, and sensing in living organisms.

BIOL 5560 RNA IN BIOMEDICINE (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003. This course introduces the basic and novel types and functions of RNAs, as well as the integration of these molecules in biomedical contexts. Students will learn about the 'RNA World' theory, the diverse roles of RNA in cellular processes, and pathogenesis. Technological approaches to RNA research will be covered, as well as the application of this research to the diagnosis and therapy of genetic diseases.

BIOL 5600 BIOMEDICAL PHYSIOLOGY (5) LEC. 4. LAB. 3. Pr. ((BIOL 1030 or BIOL 1037) or ((BIOL 2500 or BIOL 2507) and BIOL 2501)) and (CHEM 2030 or CHEM 2070 or CHEM 2077). An in-depth investigation into the physiology of major mammalian organ systems, with a special focus on their biomedical functions and applications.

BIOL 5650 ANIMAL BEHAVIOR (3) LEC. 3. Pr. (BIOL 1030 or BIOL 1037) and BIOL 3060. Animal behaviors, analysis of their adaptive value, development, and evolution.

BIOL 5660 FOOD MICROBIOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 3200 or BIOL 3207 or BIOL 3203) and BIOL 3201. Introduction to basic and applied microbiology in food, including how bacteria, viruses, parasites, yeasts and mold affect and in turn are affected by foods both positively and negatively. May count either FDSC 5660, BIOL 5660, FDSC 6600, or BIOL 6600.

BIOL 5700 APPLIED AND ENVIRONMENTAL MICROBIOLOGY (4) LEC. 3. LAB. 2. Pr. (BIOL 3200 or BIOL 3207 or BIOL 3203) and BIOL 3201. Introduction to the ecology, systematics, interrelationships, and role of micro-organisms in geochemical cycles, bioremediation and pharmaceutical production.

BIOL 5740 HERPETOLOGY (4) LEC. 3. LAB. 3. Ecology and evolution of living amphibians and reptiles of the world.

BIOL 5750 ORNITHOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 3030 or BIOL 3033) and BIOL 3060. Taxonomy, evolution, ecology, and behavior of birds.

BIOL 5760 MAMMALOGY (4) LEC. 3. LAB. 3. Characteristics, origins, ecology, behavior, reproduction, physiology, and diversity of mammals. Labs include survey or current literature, field trips, data analysis, and report preparation.

BIOL 5800 INTRODUCTION TO COMPUTATIONAL BIOLOGY (3) LEC. 2. LAB. 1. Pr. STAT 2510 or STAT 2513. Overview of computational approaches to biological data analysis. Additionally, students will learn basic statistical and graphical analysis. May count either BIOL 5800 or BIOL 6800.

BIOL 5850 FUNCTIONAL GENOMICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or BIOL 3020 or FISH 3000 or AGRI 3000) and BIOL 4100 and BIOL 5800. An active-learning course to study the functional aspects of the genome emphasizing gene regulation and functional genetic variation. May count either BIOL 5850 or BIOL 6850.

BIOL 5860 BIOINFORMATICS AND GENOME ANALYSIS (3) LEC. 2. LAB. 1. Pr. (BIOL 3000 or BIOL 3003 or BIOL 3020 or FISH 3000 or AGRI 3000) and BIOL 5800. Overview of informatic approaches to biological data analysis. Students will use the scientific method to investigate key questions in model organisms through emerging 'omics fields. May count either BIOL 5860 or BIOL 6860.

BIOL 6020 EMBRYONIC DEVELOPMENT (3) LEC. 3. Pr. BIOL 4100 or BIOL 4103. Consideration of induction, constancy of the genome, pathfinding by migrating cells, morphogenetic movements, and other developmental processes.

BIOL 6050 FUNDAMENTALS OF BIOPHYSICS (2) LEC. 2. Pr. PHYS 1510 or BIOL 4100. Introduction to use of theories and methods of physics in biology, illustrated by discussion of organism size, metabolism, physiology, vision, hearing, cell cellular and molecular processesern medicine, physiology and molecular biology.

BIOL 6090 CONSERVATION BIOLOGY (3) LEC. 3. Pr. BIOL 3060. This course is an overview of ethical, economic and biological aspects of conservation biology at scales ranging from local to global. Credit will not be given for both BIOL 5090 and BIOL 6090.

BIOL 6110 PARASITOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 1030 or BIOL 1037) or (BIOL 2500 or BIOL 2503) and BIOL 2501. Development, identification, host-parasite relationships, and medical significance of parasitic protozoa, helminthes, and arthropods that infect humans, domestic animals, and wildlife.

BIOL 6120 SYSTEMATIC BOTANY (4) LEC. 3. LAB. 3. Pr. (BIOL 1030 or BIOL 1037). Classification, nomenclature, distribution, systematics, and evolution of vascular plants.

BIOL 6130 ADVANCED PLANT PHYSIOLOGY (3) LEC. 3. Pr. BIOL 3100 and (CHEM 2030 or CHEM 2080 or CHEM 2087). Physiological and biochemical processes affecting plant growth and development including water relations, photosynthesis, respiration, and hormones.

BIOL 6131 ADV PLANT PHYSIOLOGY LAB (1) LAB. 3. Pr. BIOL 3100 and (CHEM 2081 or CHEM 2088). Laboratory exercises in plant physiology. Including water relations, metabolism, and growth and development.

BIOL 6140 PLANT ECOLOGY (4) LEC. 3. LAB. 4. Pr. (BIOL 1030 or BIOL 1037) and BIOL 3060. Departmental approval. Exploration of ecological interactions between plants and their environment. Field trips emphasize Southeastern habitats/plant examples. Includes 3-day weekend field trip.

BIOL 6150 POPULATION AND COMMUNITY ECOLOGY (3) LEC. 3. Pr. BIOL 3060. Quantitative study of natural population and ecological communities. Selected topics include density-dependent population growth, life-history theory, mark-recapture analysis, eco-evolutionary dynamics, and species interactions especially how they relate to questions of species distributions in time and space.

BIOL 6190 CELL AND MOLECULAR SIGNAL TRANSDUCTION (3) LEC. 3. Pr. BIOL 4100 and BIOL 5220 and (CHEM 2080 or CHEM 2087). Study of cellular communication and regulation with emphasis on integration between cellular, molecular, genetic, and biochemical approaches.

BIOL 6200 CLINICAL MICROBIOLOGY (5) LEC. 3. LAB. 4. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. Isolation, cultivation, identification, classification and pathogenesis of infectious agents with emphasis on bacteria; includes clinical materials, Eubacteria, Mycoplasmata, Rickettsiae and Spirochetes. May count either BIOL 5200 or BIOL 6200.

BIOL 6210 MICROBIAL PHYSIOLOGY (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201 and (CHEM 2030 or CHEM 2080 or CHEM 2087). General physiology of microbial cells emphasizing fermentation, respiration, photosynthesis, nitrogen fixation, cell wall synthesis, membranes, and macromolecular synthesis.

BIOL 6220 INTRODUCTORY MOLECULAR GENETICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or AGRI 3000) and (BIOL 3200 or BIOL 3203) and BIOL 3201. Advanced principles of gene expression including replication, transcription and translation; structure and regulation of genes; detailed concepts and techniques in recombinant DNA. Credit will not be given for both BIOL 6220 and CMBL 6220.

BIOL 6230 VIROLOGY (3) LEC. 3. Pr. (P/C BIOL 5220 or P/C BIOL 6220) or (P/C BIOL 5260 or P/C BIOL 6260). Biology of viruses, including structure, entry, replication, assembly and release, pathogenesis, and epidemiology of viral infections. May count BIOL 5230 or BIOL 6230.

BIOL 6240 ANIMAL PHYSIOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 4100 or CHEM 2030 or CHEM 2070 or CHEM 2077. General overview of the function of the major systems in animals, including evolution and adaptation to specific environments.

BIOL 6250 MICROBIAL EVOLUTION AND DIVERSITY (4) LEC. 3. LAB. 2. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and (BIOL 3200 or BIOL 3203) and BIOL 3201. Introduction to microbial evolutionary history and theory, and survey of microbial diversity. Credit will not be given for both BIOL 5250 and BIOL 6250.

BIOL 6260 PROKARYOTIC MOLECULAR GENETICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and (BIOL 3200 or BIOL 3203) and BIOL 3201. Molecular principles of bacterial genetics including gene structure, genetic organization, regulation of gene expression, acquisition and loss of genes leading to microbial evolution. Course will not be given for both BIOL 5260 and BIOL 6260.

BIOL 6270 HOST-MICROBE INTERACTIONS (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3203) and (BIOL 3201) and (BIOL 5200 or BIOL 5260). This course will explore interactions between microbes and their hosts including plants, insects and animals. Credit will not be given for both BIOL 5270 and BIOL 6270.

BIOL 6290 CASE STUDIES IN INFECTION AND IMMUNITY (3) LEC. 3. Pr. BIOL 6500. This course is designed to enrich student understanding of infection and immunity in the context of clinical presentations. Students will learn to use deductive reasoning to narrow down potential causes of symptoms and then use scientific literature to gain a detailed understanding of the mechanisms underlying disease. Cases covered will include infectious disease, immunodeficiency, neoplasms and/or autoimmunity.

BIOL 6300 PLANT ANATOMY AND DEVELOPMENT (4) LEC. 2. LAB. 4. Pr. BIOL 6130. The study of the structure and ontogeny of plant cells, tissues, and organs. Fall.

BIOL 6320 PLANT GENE EXPRESSION (3) LEC. 3. Departmental approval. Genetic expression of genetic elements in plants from the recent literature. Credit will not be given for both BIOL 6320 and CMBL 6320.

BIOL 6330 DEVELOPMENTAL GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Study of the genetics and genetic mechanisms behind developmental processes occurring in a range of species. May count either BIOL 6330 or BIOL 5330.

BIOL 6340 PROTOZOOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Life history, identification, cell biology, and evolution of free-living and parasitic protozoa of the major groups. Laboratory includes techniques for microscopy.

BIOL 6350 BEHAVIORAL ECOLOGY (3) LEC. 3. Pr. (BIOL 3030 or BIOL 3033) and BIOL 3060. Evolution of behaviors via natural, sexual, and kin selections; evolutionary influences on social groups, mating systems, cooperative breeding, and other interactions.

BIOL 6370 MOLECULAR ECOLOGY (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and BIOL 3060 and BIOL 6800. General overview of the concepts and techniques regarding the application of molecular variation in answering questions pertaining to populations and communities of organisms. Credit will not be given for both BIOL 5370 and BIOL 6370.

BIOL 6380 GENERAL ICHTHYOLOGY (4) LEC. 3. LAB. 4. Pr. BIOL 1030 or BIOL 1037. Survey of the biodiversity of world and local fishes with an overview of ecology, behavior, biology, and conservation of fishes.

BIOL 6440 CLIMATE CHANGE PHYSIOLOGY AND EVOLUTION (3) LEC. 3. LAB. 0. Pr. BIOL 1030. This class investigates on the basic mechanisms of climate change and its impact on living organisms, focusing on their physiological, evolutionary, behavioral and molecular responses. Special interest is given to plants and marine organisms.

BIOL 6500 IMMUNOLOGY (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201 and (BIOL 3000 or BIOL 3003 or FISH 3000 or BIOL 3020) and P/C BIOL 6501. The cellular and molecular basis of the immune response, including antigen presentation, immunogenetics, effector mechanisms, and medical immunology.

BIOL 6501 IMMUNOLOGY LABORATORY (2) LAB. 4. Pr. P/C BIOL 5500 or P/C BIOL 6500. Techniques illustrating principles of antigen-antibody interactions and their application in immunoassays, identification of leukocytes, cellular interactions, and antibody production.

BIOL 6521 GENE EXPRESSION AND RECOMBINANT DNA LABORATORY (2) LEC. 2. LAB. 4. Pr. P/C BIOL 5220 or BIOL 6220 or BIOL 5260 or BIOL 6260. Laboratory experiences demonstrating concepts and techniques in recombinant DNA.

BIOL 6525 MARINE BEHAVIORAL ECOLOGY (4) LEC. 3. LAB. 3. Study of animal behavior and the influence by and interaction with the environment and the ecological and evolutionary significance of these behaviors. Vertebrate and Invertebrate Zoology required. Taught at DISL.

BIOL 6550 NANOMEDICINE (2) LEC. 2. Pr. PHYS 1510 and CHEM 2080 and BCHE 5180. Nanomedicine is a branch of medicine that applies the knowledge and tools of nanotechnology to the prevention and treatment of disease. It involves the use of nanoscale materials, such as biocompatible nanoparticles, nanorobots and nanosensors, for diagnosis, drug delivery, and sensing in living organisms.

BIOL 6560 RNA IN BIOMEDICINE (3) LEC. 3. This course introduces the basic and novel types and functions of RNAs, as well as the integration of these molecules in biomedical contexts. Students will learn about the ‘RNA World’ theory, the diverse roles of RNA in cellular processes, and pathogenesis. Technological approaches to RNA research will be covered, as well as the application of this research to the diagnosis and therapy of genetic diseases.

BIOL 6600 BIOMEDICAL PHYSIOLOGY (5) LEC. 4. LAB. 3. Pr. ((BIOL 1030 or BIOL 1037) or (BIOL 2500 and BIOL 2501)) and (CHEM 2030 or CHEM 2070 or CHEM 2077). An in-depth investigation into the physiology of major mammalian organ systems, with a special focus on their biomedical functions and applications.

BIOL 6650 ANIMAL BEHAVIOR (3) LEC. 3. Pr. (BIOL 1030 or BIOL 1037) and BIOL 3060. Animal behaviors, analysis of their adaptive value, development, and evolution.

BIOL 6660 FOOD MICROBIOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. Introduction to basic and applied microbiology in food, including how bacteria, viruses, parasites, yeasts and mold affect and in turn are affected by foods both positively and negatively. May count either FDSC 5660, BIOL 5660, FDSC 6600, or BIOL 6600.

BIOL 6700 APPLIED AND ENVIRONMENTAL MICROBIOLOGY (4) LEC. 3. LAB. 2. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. An advanced treatment of bacteria comprising the Kingdom Prokaryotae, emphasizing ecology, systematics, interrelationships, geochemical cycles, and bioremediation.

BIOL 6740 HERPETOLOGY (4) LEC. 3. LAB. 3. Ecology and evolution of living amphibians and reptiles of the world.

BIOL 6750 ORNITHOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 3030 or BIOL 3033) and BIOL 3060. Departmental approval. An intensive investigation of the current literature and relevant research dealing with birds.

BIOL 6760 MAMMALOGY (4) LEC. 3. LAB. 3. Characteristics, origins, ecology, behavior, reproduction, physiology, and diversity of mammals. Labs include survey or current literature, fieldtrips, data analysis and report preparation.

BIOL 6800 INTRODUCTION TO COMPUTATIONAL BIOLOGY (3) LEC. 2. LAB. 1. Pr. STAT 2510 or STAT 2513. Overview of computational approaches to the analysis of biological data. Students will learn basic statistical and graphical analysis. May count either BIOL 5800 or BIOL 6800.

BIOL 6850 FUNCTIONAL GENOMICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or BIOL 3020 or FISH 3000 or AGRI 3000) and BIOL 4100 and BIOL 5800. Active-learning course to study the functional aspects of the genome emphasizing gene regulation and functional genetic variation. May count either BIOL 5850 or BIOL 6850.

BIOL 6860 BIOINFORMATICS AND GENOME ANALYSIS (3) LEC. 2. LAB. 1. Pr. (BIOL 3000 or BIOL 3003 or BIOL 3020 or FISH 3000 or AGRI 3000) and BIOL 5800. Overview of informatic approaches to biological data analysis. Students will use the scientific method to investigate key questions in model organisms through emerging 'omics fields. May count either BIOL 5860 or BIOL 6860.

BIOL 7035 MARINE ANIMAL NEUROBIOLOGY (4) LEC. 30. LAB. 60. Pr. BIOL 1020 or BIOL 1023 and BIOL 1021 and BIOL 1030 and BIOL 1031 and BIOL 4100. Biophysical neurobiology of marine invertebrates and vertebrates. Lectures and labs on neurons, glia, resting and action potentials, synapses, neurotransmitters, muscle contraction, sensorimotor integration, computer simulation and extensive technical methods: extra-, intracellular, patch recording, molecular neuroimmunology, confocal fluorescence microscopy. Evening/Saturday classes.

BIOL 7075 INTRODUCTION TO OCEANOGRAPHY (4) LEC. 30. LAB. 60. Pr. MATH 1150 or MATH 1153 and CHEM 1030 or CHEM 1033 or CHEM 1110 or CHEM 1117 and PHYS 1500 and BIOL 3040. An in-depth examination of the physics, chemistry, geology and biology of the oceans. Lectures cover the interrelationships of these components to each other. Field and lab work will introduce students to research on oceanographic processes of the Gulf of Mexico. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 7170 POPULATION GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Examination of the theories relating to maintenance of variation in natural populations of plants and animals.

BIOL 7180 SCRIPTING FOR BIOLOGISTS (3) LEC. 2. LAB. 1. Pr. BIOL 6800 and STAT 7000. or Instructor approval. A hands-on course to teach students concepts, applications, and best practices of utilizing computer scripting languages in the life sciences.

BIOL 7200 EVOLUTIONARY BIOLOGY (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and (BIOL 3200 or BIOL 3203) and BIOL 3201. Topics of current interest in evolution. Readings and presentation required.

BIOL 7210 EVOLUTIONARY ECOLOGY (3) LEC. 3. The Evolutionary Ecology research paradigm is a key approach to the study of behavioral, evolutionary, and ecological processes in the context of realistic or natural environmental settings. We will investigate a number of current "hot" research topics in Evolutionary Ecology, discuss the leading hypotheses being developed and how they are cast as statistica.

BIOL 7250 PRACTICAL DATA ANALYSIS AND COMPUTATION FOR THE LIFE SCIENCES (3) LEC. 2. LAB. 3. Pr. STAT 7020 or WILD 7150. or equivalent; or permission of the instructor. Data from the life sciences and advanced statistical techniques for data analyses and computation are brought together through a cross-fertilization of graduate student students in the life sciences, statistics, and mathematics. Focus on production of publication-quality research on student-identified projects. May count either BIOL 7250 or STAT 7250.

BIOL 7290 EVOLUTIONARY GENETICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and BIOL 6170. Departmental approval. The role of population processes as mechanisms for evolution; and evolution at the molecular level. Credit will not be given for both BIOL 7290 and CMBL 7290.

BIOL 7440 ADVANCED CELL BIOLOGY (3) LEC. 3. Pr. BIOL 4100. Examination of current areas of research in cell and developmental biology by directed reading and discussion. Credit will not be given for both BIOL 7440 and CMBL 7440.

BIOL 7470 GENOME EVOLUTION (3) LEC. 3. Provides a broad evolutionary perspective on the origin, composition, and architecture of eukaryotic genomes. Students will participate in a literature-driven discussion format and will complete weekly writing assignments.

BIOL 7485 ADVANCED MARINE ECOLOGY (4) LEC. 2. LAB. 2. Pr. (BIOL 1020 or BIOL 1023) and BIOL 1021 and BIOL 1030 and BIOL 1031 and (BIOL 3060 or BIOL 3040). An advanced course open only to MS or PhD students. Interactions between marine organisms and the environment. In-depth discussion of ecological theory with emphasis on the latest research, using extensive reference to the literature. Lecture, lab and overnight field trips.

BIOL 7490 PHYSIOLOGICAL ECOLOGY (3) LEC. 3. Pr. BIOL 3060. A study of the physiological adaptations that allow animals to survive in unusual environments. A course in ecology required.

BIOL 7500 STRESS PHYSIOLOGY (2) LEC. 2. Pr. (BIOL 4100 or BIOL 5240 or BIOL 5600). This course is a discussion-based course focusing on physiological stress responses at various levels of organization and communication among them, from molecules, cells, organ, to whole organism.

BIOL 7510 NATURAL HISTORY MUSEUM PRACTICUM (1) LAB. 3. Practical methods in natural history museum curation. Students will assist in curating collections at the Auburn University Museum of Natural History. Course may be repeated for a maximum of 4 credit hours.

BIOL 7525 MARINE INVERTEBRATES (4) LEC. 2. LAB. 2. Morphology, natural history, physiology, evolution and ecology. Students examine modern literature and develop an advanced presentation on invertebrate biology involving problem solving in an area such as sensory biology, molecular evolution or management. Term paper, classroom presentation and lecture.

BIOL 7540 PROFESSIONAL ASPECTS OF BIOLOGY (3) LEC. 3. Departmental approval. Instruction on practical aspects of a career in biological sciences.

BIOL 7550 PHYSIOLOGICAL ECOLOGY OF REPRODUCTION (3) LEC. 3. This course focuses on physiological ecology of reproduction by identifying key physiological mechanisms linking the environmental change, reproductive constraints, and reproductive performance and describing how variation in reproductive performance are impacted by ecological and evolutionary processes.

BIOL 7800 COMPUTATIONAL BIOLOGY COLLOQUIUM (2) LEC. 0. LAB. 0, LEC. 0. Pr. (BIOL 7180) or (PLPA 6820). Oral presentations and discussions of recent scientific publications, challenges, and opportunities within the field of computational biology. Hands-on experience in data analysis and presentation.

BIOL 7880 MITONUCLEAR ECOLOGY (2) LEC. 2. Pr. BIOL 3030. This course will explore the implications of the necessity of mitonuclear coadaptation for the evolution of quintessential eukaryotic characteristics, including sex and two sexes, a sequestered germ line, senescence, discrete species, mate choice, and adaptation. Permission of instructor may be needed.

BIOL 7950 MASTERS THESIS SEMINAR (1) LEC. 1. SU. Departmental approval. Oral presentation and discussion of research in the field of specialization. Course may be repeated for a maximum of 2 credit hours.

BIOL 7960 SPECIAL PROBLEMS (1-4) DSL/LEC. Pr. P/C BIOL 6220. Oral presentation and discussion of recent scientific publications from a selected area molecular biology. Credit will not be given for both BIOL 7960 and CMBL 7960. Course may be repeated for a maximum of 4 credit hours.

BIOL 7970 SPECIAL TOPICS (1-4) AAB. Departmental approval. Instruction and discussion in a selected current topic in botany, microbiology, molecular biology, or zoology. A different topic for advanced study will be selected each semester this course is offered. Course may be repeated for a maximum of 8 credit hours.

BIOL 7990 RESEARCH AND THESIS (1-10) MST. Course may be repeated with change in topic.

BIOL 8950 DOCTORAL SEMINAR (1) SEM. 1. SU. Oral presentation and discussion of research in the field of specialization. Course may be repeated for a maximum of 3 credit hours.

BIOL 8990 RESEARCH AND DISSERTATION (1-10) DSR. Course may be repeated with change in topic.

Chemistry Courses

CHEM 1010 SURVEY OF CHEMISTRY I (3) LEC. 3. Science Core. Survey of important topics from general and organic chemistry. Atomic and bonding theory, chemical reactions and stoichiometry, gas laws, solutions, acids and bases, hydrocarbons, alcohols, ethers and amines.

CHEM 1011 SURVEY OF CHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C CHEM 1010. Science Core. Laboratory experiments emphasizing course material in CHEM 1010.

CHEM 1020 SURVEY OF CHEMISTRY II (3) LEC. 3. Pr. CHEM 1010. Science Core. Survey of important topics from organic and biochemistry. Aldehydes and ketones, carboxylic acids, carbohydrates, lipids, proteins, enzymes, extracellular fluids, metabolism, nucleic acids, radioactivity.

CHEM 1021 SURVEY OF CHEMISTRY II LABORATORY (1) LAB. 3. Pr. P/C CHEM 1020 and CHEM 1011. Science Core. Laboratory experiments emphasizing course material in CHEM 1020.

CHEM 1030 FUNDAMENTALS CHEMISTRY I (3) DSL/LEC. Science Core. Atomic and molecular theory, chemical equations, stoichiometry, gas laws, thermochemistry, bonding, electronic structure, molecular geometries, solids, liquids, properties of solutions, problem-solving techniques. Credit will not be given for both CHEM 1030 and CHEM 1110 or CHEM 1117.

CHEM 1031 FUNDAMENTAL CHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C CHEM 1030 or P/C CHEM 1033. Science Core. Laboratory experiments emphasizing course material in CHEM 1030. Credit will not be given for both CHEM 1031 and CHEM 1111 or CHEM 1118.

CHEM 1040 FUNDAMENTAL CHEMISTRY II (3) LEC. 3. Pr. CHEM 1030 or CHEM 1033 or CHEM 1110 or CHEM 1117. Science Core. Chemical kinetics; chemical equilibrium; acids and bases; calculations of pH; equilibrium constants and thermodynamical properties; electrochemistry; descriptive chemistry. Credit will not be given for both CHEM 1040 and CHEM 1120 or CHEM 1127.

CHEM 1041 FUNDAMENTAL CHEMISTRY II LABORATORY (1) LAB. 3. Pr. (P/C CHEM 1040 or P/C CHEM 1043) and (CHEM 1031 or CHEM 1111 or CHEM 1118). Science Core. Laboratory experiments emphasizing course material in CHEM 1040. Credit will not be given for both CHEM 1041 and CHEM 1121 or CHEM 1128.

CHEM 1110 GENERAL CHEMISTRY I (3) LEC. 3. Pr. P/C MATH 1610 or P/C MATH 1613 or P/C MATH 1617. Science Core. Chemical principles for chemistry and related majors. Atomic and molecular theory, periodicity, chemical reactions, Stoichiometry, gases, thermochemistry, bonding, molecular geometries, liquids, solids, and solutions. Credit will not be given for both CHEM 1110 and CHEM 1030 or CHEM 1117.

CHEM 1111 GENERAL CHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C CHEM 1110 or P/C CHEM 1117. Science Core. Laboratory experiments emphasizing course material in CHEM 1110. Credit will not be given for both CHEM 1111 and CHEM 1031 or CHEM 1118.

CHEM 1117 HONORS GENERAL CHEMISTRY I (3) LEC. 3. Pr. Honors College. Science Core. General chemistry for students in the honors program. Topics similar to CHEM 1110, but covered in more depth. Credit will not be given for both CHEM 1117 and CHEM 1030 or CHEM 1110.

CHEM 1118 HONORS GENERAL CHEMISTRY I LABORATORY (1) LAB. 3. Pr. Honors College. CHEM 1117. Science Core. Laboratory experiments emphasizing course material in CHEM 1117. Credit will not be given for both CHEM 1118 and CHEM 1031 or CHEM 1111.

CHEM 1120 GENERAL CHEMISTRY FOR SCIENTISTS AND ENGINEERS II (3) LEC. 3. Pr. CHEM 1110 or CHEM 1117. Science Core. Continuation of CHEM 1110. Chemical kinetics, chemical equilibrium, acids and bases, thermodynamics, electrochemistry, representative element and transition metal chemistry. Credit will not be given for both CHEM 1120 and CHEM 1040 or CHEM 1127.

CHEM 1121 GENERAL CHEMISTRY II LABORATORY (1) LAB. 3. Pr. (P/C CHEM 1120 or P/C CHEM 1127) and (CHEM 1111 or CHEM 1118). Science Core. Laboratory experiments emphasizing course material in CHEM 1120. Credit will not be given for both CHEM 1121 and CHEM 1041 or CHEM 1128.

CHEM 1127 HONORS GENERAL CHEMISTRY II (3) LEC. 3. Pr. Honors College. CHEM 1117. Science Core. General chemistry for students in the honors program. Topics similar to CHEM 1120, but covered in more depth. Credit will not be given for both CHEM 1127 and CHEM 1040 or CHEM 1120.

CHEM 1128 HONORS GENERAL CHEMISTRY II LABORATORY (1) LAB. 3. Pr. Honors College. Science Core. Laboratory experiments emphasizing course material in CHEM 1127. Credit will not be given for both CHEM 1128 and CHEM 1041 or CHEM 1121.

CHEM 2030 SURVEY OF ORGANIC CHEMISTRY (3) LEC. 3. Pr. CHEM 1040 or CHEM 1120 or CHEM 1127. Structure, nomenclature and reactions of the functional group classes of organic compounds polymers, and molecules of biological interest. Credit will not be given for both CHEM 2030 and CHEM 2070.

CHEM 2070 ORGANIC CHEMISTRY I (3) LEC. 3. Pr. CHEM 1040 or CHEM 1043 or CHEM 1120 or CHEM 1127. In-depth study of organic chemistry including structure, nomenclature, reactions, reaction mechanisms, stereochemistry, synthesis and spectroscopic structure determination organized by the functional group approach. Considers alkanes, alkenes, alkynes, alkyl halides, alcohols, ethers, and aromatic compounds. Credit will not be given for both CHEM 2070 and CHEM 2030.

CHEM 2071 ORGANIC CHEMISTRY I LABORATORY (1) LAB. 3. Pr. (P/C CHEM 2070 or P/C CHEM 2077) and (CHEM 1041 or CHEM 1128 or CHEM 1121). Laboratory for CHEM 2070.

CHEM 2077 HONORS ORGANIC CHEMISTRY I (3) LEC. 3. Pr. Honors College. Organic chemistry for students in the honors program and Chemistry & Biochemistry majors. Topics similar to CHEM 2070, but covered in more depth. Additional credit will not be given for CHEM 2070. Member of the Honors College or CHEM 1110 with grade of A or B or CHEM 1040 with grade of A.

CHEM 2078 HONORS ORGANIC CHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C CHEM 2070 or P/C CHEM 2077. Laboratory experiments emphasizing course material in CHEM 2077. Additional credit will not be given for CHEM 2071. Course may be repeated for a maximum of 3 credit hours.

CHEM 2080 ORGANIC CHEMISTRY II (3) LEC. 3. Pr. CHEM 2070 or CHEM 2077. Continuation of CHEM 2070. Aldehydes, ketones, amines, carboxylic acids, esters, amides, anhydrides, polymers, carbohydrates and amino acids.

CHEM 2081 ORGANIC CHEMISTRY II LABORATORY (1) LAB. 1. Pr. (CHEM 2070 or CHEM 2077) and (CHEM 2071 or CHEM 2078) and (P/C CHEM 2080 or P/C CHEM 2087). Laboratory for CHEM 2080.

CHEM 2087 HONORS ORGANIC CHEMISTRY II (3) LEC. 3. Pr. Honors College or departmental approval. Organic chemistry for students in the honors program and Chemistry & Biochemistry majors. Topics similar to CHEM 2080, but covered in more depth. Additional credit will not be given for CHEM 2080. Member of the Honors College or CHEM 2077

CHEM 2088 HONORS ORGANIC CHEMISTRY II LABORATORY (1) LAB. 3. Pr. P/C CHEM 2080 or P/C CHEM 2087. Laboratory experiments emphasizing course material in CHEM 2087. Additional credit will not be given for CHEM 2081. May count either CHEM 2081 or CHEM 2088. Course may be repeated for a maximum of 3 credit hours.

CHEM 2100 PROFESSIONAL DEVELOPMENT (1) LEC. 1. This course is designed to introduce students to the many opportunities available in chemistry, both as a career choice and while as a student. Students will have the opportunity to investigate available options, will reflect on what career success means to the student, and will chart a pathway to student professional success.

CHEM 2980 INTRODUCTION TO UNDERGRADUATE RESEARCH IN CHEMISTRY (1-3) LAB. SU. Individual problems course. Students will work under the direction of a staff member on some problem of mutual interest. Departmental approval required. Only Freshman or Sophomore. Course may be repeated for a maximum of 6 credit hours.

CHEM 3000 CHEMICAL LITERATURE (1) LEC. 1. Pr. CHEM 2080 or CHEM 2087. Chemical literature with emphasis on primary and secondary sources and the various computer data bases available.

CHEM 3050 ANALYTICAL CHEMISTRY (3) LEC. 3. Pr. CHEM 1040 or CHEM 1120 or CHEM 1127. Theory and application of volumetric, potentiometric and photometric chemical analysis.

CHEM 3051 ANALYTICAL CHEMISTRY LABORATORY (1) LAB. 3. Pr. P/C CHEM 3050. Analytical techniques applied to chemical analysis.

CHEM 3160 SURVEY OF PHYSICAL CHEMISTRY (3) LEC. 3. Pr. CHEM 1040 or (CHEM 1120 or CHEM 1127). The principles of physical chemistry.

CHEM 4070 PHYSICAL CHEMISTRY I (3) LEC. 3. Pr. (CHEM 1040 or CHEM 1120 or CHEM 1127) and (MATH 2630 or MATH 2637) and (MATH 2650 or PHYS 2400) and (PHYS 1610 or PHYS 1617). Principles of chemical thermodynamics, principles of application to problems of chemical interest.

CHEM 4071 PHYSICAL CHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C CHEM 4070.

CHEM 4080 PHYSICAL CHEMISTRY II (3) LEC. 3. Pr. (CHEM 1040 or CHEM 1120 or CHEM 1127) and (MATH 2630 or MATH 2637) and (MATH 2650 or PHYS 2400) and (PHYS 1610 or PHYS 1617). Principles of quantum mechanics and spectroscopy; application in molecular structure and in statistical thermodynamics.

CHEM 4081 PHYSICAL CHEMISTRY II LABORATORY (1) LAB. 3. Pr. P/C CHEM 4080. Laboratory for CHEM 4080.

CHEM 4100 INORGANIC CHEMISTRY (3) LEC. 3. Pr. CHEM 4080 or CHEM 3160. Principles of inorganic chemistry emphasizing periodic properties, bonding, structure and symmetry, the solid state, acid-base theory and coordination chemistry.

CHEM 4101 INORGANIC CHEMISTRY LABORATORY (1) LAB. 3. Pr. P/C CHEM 4100. Synthesis and characterization of a variety of inorganic compounds.

CHEM 4110 ORGANOMETALLICS AND CATALYSIS (3) LEC. 3. Pr. CHEM 4100. Departmental approval. Survey of organometallic chemistry and catalysis with main group, transition metal, and f-block elements.

CHEM 4130 INSTRUMENTAL ANALYSIS (3) LEC. 3. Pr. P/C CHEM 3050. Fundamental concepts used in instrumental analytical chemistry emphasizing spectrophotometric, electroanalytical and chromatographic analysis.

CHEM 4131 INSTRUMENTAL ANALYSIS LABORATORY (1) LAB. 3. Pr. P/C CHEM 4130. Laboratory for CHEM 4130.

CHEM 4920 CHEMISTRY INTERNSHIP (3) INT. 12. Departmental approval. Application of chemistry concepts and skills in a professional setting. The course may be repeated for a maximum of 6 credit hours.

CHEM 4950 UNDERGRADUATE SEMINAR (1) LEC. 1. Oral presentation and discussion of research in the area of specialization.

CHEM 4980 UNDERGRADUATE RESEARCH IN CHEMISTRY (3) LAB. 9. Departmental approval. This is an individual problem course. Each student will work under the direction of a staff member on some problem of mutual interest. Course may be repeated for a maximum of 9 credit hours.

CHEM 4997 HONORS THESIS (1-3) LEC. 3. Pr. Honors College. Departmental approval. Honors College Members Only; Course may be repeated for a maximum of 6 credit hours.

CHEM 5200 PYTHON PROGRAMMING IN CHEMISTRY (3) LEC. 3. Pr. CHEM 3160 or CHEM 4080. Computer programming in the Python language using specific examples relevant to different branches of chemistry. Emphasizes best practices for collaborative writing, documenting, and validating the program so that it is readable and maintainable.

CHEM 5280 COMPUTATIONAL CHEMISTRY (4) LEC. 3. LAB. 3. Pr. (CHEM 2080 or CHEM 2087) and CHEM 4080. Modern computational chemistry including molecular mechanics and quantum mechanical calculations.

CHEM 5450 FOUNDATIONS OF R FOR DBER (3) LEC. 3. R is an open-source statistical software that allows nearly limitless data manipulation, statistical analysis, and advance data visualizations for both the social and physical sciences required for quality research in discipline-based education research (DBER). This course will dedicate approximately one half to learning the basics of coding in R for many common tasks found in DBER (focusing on how to independently find and apply new functions as only a portion of functions can possibly be discussed) and the second half on applying these principles into real data from students' thesis or dissertation (or data can be provided by instructor).

CHEM 6200 PYTHON PROGRAMMING IN CHEMISTRY (3) LEC. 3. Computer programming in the Python language using specific examples relevant to different branches of chemistry. Emphasizes best practices for collaborative writing, documenting, and validating the program so that it is readable and maintainable.

CHEM 6280 COMPUTATIONAL CHEMISTRY (4) LEC. 3. LAB. 3. Pr. (CHEM 2080 or CHEM 2087) and CHEM 4080. Modern computational chemistry including molecular mechanics and quantum mechanical calculations.

CHEM 6450 FOUNDATIONS OF R FOR DBER (3) LEC. 3. R is an open-source statistical software that allows nearly limitless data manipulation, statistical analysis, and advance data visualizations for both the social and physical sciences required for quality research in discipline-based education research (DBER). This course will dedicate approximately one half to learning the basics of coding in R for many common tasks found in DBER (focusing on how to independently find and apply new functions as only a portion of functions can possibly be discussed) and the second half on applying these principles into real data from students' thesis or dissertation (or data can be provided by instructor).

CHEM 7100 ADVANCED INORGANIC CHEMISTRY (3) LEC. 3. Departmental approval. Current concepts of inorganic chemistry with an emphasis on theory, structure, bonding and reactivity.

CHEM 7110 PHYSICAL METHODS IN INORGANIC CHEMISTRY (3) LEC. 3. Pr. CHEM 7100. Or equivalent. Theory and application of techniques for obtaining information inorganic compounds including magnetism, multinuclear nmr, mass spectrometry, x-ray diffraction, vibrational and electronic spectroscopies.

CHEM 7120 ORGANOMETALLIC CHEMISTRY (3) LEC. 3. Pr. CHEM 7100. Departmental approval. Main group and transition metal organometallic chemistry.

CHEM 7160 ADVANCED TOPICS IN INORGANIC CHEMISTRY (3) LEC. 3. Pr. CHEM 7100. Departmental approval. Currently active research areas in inorganic chemistry. Course may be repeated for a maximum of 12 credit hours.

CHEM 7200 PHYSICAL ORGANIC CHEMISTRY (3) LEC. 3. This course will combine the foundations of undergraduate organic chemistry reactions and add to this the physical properties of chemical reactions as affected by real laboratory applications.

CHEM 7210 STRUCTURE ELUCIDATION OF ORGANIC COMPOUNDS (3) LEC. 3. Pr. CHEM 7200 or CHEM 7220. The early stages of this course will focus on the identification of functional groups, saturated, unsaturated and cyclic compounds using IR and NMR spectroscopy, as well as mass spectrometry. Detailed analyses of 1H NMR spectra, i.e., chemical shift, multiplet shape, and coupling constants will demonstrate the power of these methods in ascertaining atom connectivity in simple organic molecules. More advanced two-dimensional NMR techniques such as COSY, HSQC and HMBC will be discussed and used for determining the structures of more complex organic molecules. The determination of absolute and relative stereochemistry using Mosher ester analyses and NOESY, respectively, in chiral molecules will also be covered. Most of the structures that will be discussed and analyzed will be stereochemically complex systems and polycyclic molecules that require a combination of multiple one-dimensional and two-dimensional NMR techniques.

CHEM 7220 ORGANIC REACTIONS (3) LEC. 3. Pr. (CHEM 2070 or CHEM 2073 or CHEM 2077) and (CHEM 2080 or CHEM 2083 or CHEM 2087). Organic reactions are described in the context of oxidation; reduction; C-C, C-N, C-O bond forming; olefination; aldol (and related) condensations; pericyclic, fragmentation, ring-expansion and ring-contraction reactions; and, named organic reactions and their reaction mechanisms and their application to chemical synthesis. Concurrent enrollment with CHEM 7200 is highly recommended.

CHEM 7230 COMPLEX MOLECULE SYNTHESIS (3) LEC. 3. Pr. CHEM 7220. This class is focused on target-oriented chemical synthesis of complex organic molecules. The main objective is to teach students how to use retrosynthetic analysis, a method for disconnecting a complex molecule into simpler starting materials, as well classical and modern organic reactions to plan syntheses of organic compounds that are biologically relevant and important in the development of better pharmaceuticals. During the course of the semester, students will be introduced to important classes of natural products including terpenes, terpenoids, alkaloids, macrolides, polycyclic ethers, as well as designed molecules that are biologically relevant, but not natural products themselves. Identifying key structural components (i.e., retrons), stereogenic centers, and substructures that can be derived from the chiral pool will be emphasized in synthesis planning. All lecture content will come from the current literature, with only manuscripts published in the past 12 months being discussed in class. Students will be responsible for reading Classics in Total Synthesis on their own and tested on the content of this book as well as assigned current literature in class. Emphasis will be placed on identifying economical and streamlined synthetic protocols that can employ cascade or domino reaction sequences.

CHEM 7260 SPECIAL TOPICS IN ORGANIC CHEMISTRY (1-3) LEC. Pr. CHEM 7200. Advanced course in a research area in organic chemistry which is of mutual interest to graduate students and the instructor. Course may be repeated for a maximum of 6 credit hours.

CHEM 7270 SUPRAMOLECULAR CHEMISTRY: SYNTHESIS, STRUCTURES, AND APPLICATIONS (3) ST1. 3. Pr. CHEM 2080. Supramolecular Chemistry bridges organic, inorganic, surface science, and analytical chemistries. It is a topical area that explores synthesis, spatial organization, weak bonding interactions, hydrogen bonding or covalent bonding, and is interest for numerous industrial or pharmacy applications.

CHEM 7300 ADVANCED PHYSICAL CHEMISTRY (3) LEC. 3. Topics of general and current interest; may vary from year to year.

CHEM 7330 CHEMICAL KINETICS (3) LEC. 3. Theoretical and experimental aspects of reaction rates. The mathematics and characterization of chemically reacting systems.

CHEM 7350 QUANTUM AND STATISTICAL MECHANICS (3) LEC. 3. Pr. CHEM 7300. A quantum mechanical and statistical approach to molecular structure and chemistry.

CHEM 7370 SPECIAL TOPICS IN PHYSICAL CHEMISTRY (1-3) LEC. 3. Pr. CHEM 7300. Modern topics in advanced physical chemistry. Course may be repeated for a maximum of 3 credit hours.

CHEM 7380 MOLECULAR SPECTROSCOPY (3) LEC. 3. Pr. CHEM 7300. Theory and application of optical and magnetic resonance spectroscopy.

CHEM 7410 A DBER APPROACH TO TEACHING AND LEARNING IN CHEMISTRY (3) LEC. 3. Pr. CHEM 1030 and CHEM 1040. Discipline-based education research (DBER) theory andtrends, consuming and evaluating DBER research, activelearning in advanced chemistry topics, action research,review of pedagogical tools, assessment. This coursewill be of use to chemistry graduate students aimingfor careers in academia, masters education studentslooking to take a chemistry course for the fulfillmentof their degree requirements, and other fields that wantto know more about evaluating and critiquing current DBERliterature and methods.

CHEM 7500 ADVANCED ANALYTICAL CHEMISTRY (3) LEC. 3. Analytical principles, applications and methods, mathematical interpretations and current developments.

CHEM 7510 ELECTROANALYTICAL CHEMISTRY (3) LEC. 3. Pr. CHEM 7500. Analytical applications of electrochemistry.

CHEM 7530 ADVANCES IN BIOANALYTICAL CHEMISTRY (3) LEC. 3. Pr. CHEM 7500. Analytical Chemistry of microfluidic devices and "Lab on a chip." New methods of miniaturization of separations and analysis with emphasis on bioanalytical applications.

CHEM 7540 FLUORESCENCE IN BIOANALYTICAL CHEMISTRY: SPECTROSCOPY AND IMAGING (3) LEC. 3. Pr. CHEM 7500. Modern fluorescence-based bioanalytical methods as well as an advanced study of related literature. Standard approaches such as biosensors, nucleic acid analysis will be covered, as well as modern techniques such as Fluorescence microscopy, FRET, immunoassays, ELISAs and single-molecule detection.

CHEM 7550 PHOTO AND ELECTROCHEMISTRY (3) ST1. The course offers a simultaneous and comprehensive treatment of photochemistry and electrochemistry.

CHEM 7560 MASS SPECTROMETRY: INSTRUMENTATION AND APPLICATIONS (3) LEC. 3. Departmental approval. Several notable developments in mass spectrometry instrumentation platforms have been introduced which has led to significant increase in their implementations to various research and clinical applications. Learning about the fundamental principles of these instrumentation platforms will guide the users in selecting the correct instrument for a specific application. This course is designed to offer such an approach.

CHEM 7610 BIOCHEMISTRY AND BIOPHYSICS TECHNIQUES (3) LEC. 3. Fundamental concepts in biochemistry, molecular microbiology, and principles of physics will be introduced. This will be followed by presentations on the theory and practical application of common biophysical techniques. The techniques discussed will include, but will not be limited to: Raman, NMR, and Mass Spectrometry of biological molecules, X-ray Diffraction, Ion Mobility, Fluorescence Microscopy, Single-Molecule Approaches, EM/Cryo-EM, and Nano-particle techniques.

CHEM 7750 FORMAL PRESENTATIONS IN MODERN CHEMISTRY (1) LEC. 1. Oral presentations skills will be developed with a focus on the dissemination of new discoveries in the field of Chemistry. Course may be repeated for a maximum of 6 credit hours.

CHEM 7930 DIRECTED INDIVIDUAL STUDY (1-15) IND. Credit to be arranged. Course may be repeated for a maximum of 15 credit hours.

CHEM 7950 SEMINAR (1) SEM. 1. SU. Course may be repeated for a maximum of 6 credit hours.

CHEM 7990 RESEARCH AND THESIS (1-10) MST. Course may be repeated with change in topics.

CHEM 8990 RESEARCH AND DISSERTATION (1-10) DSR. Course may be repeated with change in topics.

Geography Courses

GEOG 1000 INTRODUCTION TO GEOGRAPHY (1) LEC. 1. LAB. 0, LEC. 0. Introduction to fundamental concepts and major fields of study in geography

GEOG 1010 GLOBAL GEOGRAPHY (3) LEC. 3. Social Science I Core. Spatial and locational context for analyzing change in the contemporary world, including elements of both physical and cultural environments.

GEOG 1017 HONORS GLOBAL GEOGRAPHY (3) LEC. 3. Pr. Honors College. Spatial and locational context for analyzing change in the contemporary world, including elements of both physical and cultural environments.

GEOG 1020 GLOBAL SYSTEMS WEATHER/CLIMATE (4) DSL/LLB. The ‘Weather and Climate’ GS course will teach students the difference between weather and climate. They will evaluate the effect of weather on the food we eat, where we live, what we wear and the science behind climate change. This course will identify and describe Earth’s physical systems and make connections between them.

GEOG 1030 GLOBAL SYSTEMS LAND/WATER (4) DSL/LLB. The ‘Land and Water’ Global Systems course will compare the modification of land and water resources due to human interventions and weather anomalies over time. It will highlight the connection between temperature and precipitation, weathering of rocks, soil type and the river system, human nature interactions and ecosystems of the Earth.

GEOG 2000 PROFESSIONAL DEVELOPMENT (1) LEC. 1. Introduction to career opportunities in the Geosciences; goal selection and charting a pathway to success as a professional. Includes writing skills, research and funding opportunities, internships, creation of resumes and ePortfolios, and job applications.

GEOG 2010 HUMAN GEOGRAPHY (3) LEC. 3. Spatial perspectives on modern society such as population change, economics, politics, urban development, and local culture, and geography's approach to solving problems using case studies and issues.

GEOG 2017 HONORS HUMAN GEOGRAPHY (3) LEC. 3. Spatial perspectives on modern society such as population change, economics, politics, urban development, and local culture, and geography's approach to solving problems using case studies and issues.

GEOG 2020 PHYSICAL GEOGRAPHY (3) LEC. 3. Selected elements of the earth's physical system to include such items as landforms, basic weather elements, soils and vegetation.

GEOG 3000 SPORTS GEOGRAPHY (3) LEC. 3. Geographical basis of sports at different spatial scales, including locational strategies, sportive nationalism, and the urban political economy of sports.

GEOG 3110 UNITED STATES AND CANADA (3) LEC. 3. Survey of the region incorporating physical and cultural elements, providing a synthesis of the economic and political processes of the U.S. and Canada.

GEOG 3120 ALABAMA AND THE SOUTHEAST (3) LEC. 3. Study of the physical and cultural environments of the state.

GEOG 3130 LATIN AMERICA (3) LEC. 3. Survey of physical and human landscape of the region including historical geography, natural resources, economic development and problems and prospects affecting major countries.

GEOG 3140 AFRICA (3) LEC. 3. Analysis of the relationships among diverse population groups and the physical environments of sub-Saharan Africa.

GEOG 3150 EUROPE (3) LEC. 3. Survey of physical and human landscape of the region including historical geography, natural resources, economic development, and problems and prospects affecting several of the major countries.

GEOG 3300 INTERNATIONAL TRAVEL AND TOURISM (3) LEC. 3. Environmental and cultural patterns that characterize places attractive to tourists. Provides realistic situations for developing travel plans and programs.

GEOG 3720 STUDY ABROAD-CLIMATE CHANGE AND ENVIRONMENT (3) LEC. 10. LAB. 5. Coreq. PARK 3630 and NATR 3320 and NATR 4250. Three-week course intended to give students a general understanding of the potential impacts of climate change on the environment in the tropics via a mix of lectures, hands-on activities and field trips. Departmental approval required.

GEOG 3810 CARTOGRAPHY AND GRAPHICS (4) LEC. 2. LAB. 2. Techniques of map production including relevant computer graphics applications and related laboratory exercises.

GEOG 4740 SENIOR SEMINAR (2) SEM. 2. Individual research by geoscience undergraduates is coupled with improved written and oral communication skills along with resume and ePortfolio development. May count GEOG 4740 or GEOL 4740.

GEOG 4920 INTERNSHIP (3) LEC. 3. Opportunity to apply classroom experience to real job setting. Course may be repeated for a maximum of 6 credit hours.

GEOG 4930 DIRECTED STUDIES (1-4) AAB/IND. Departmental approval. Conferences, reading, research and/or reports may fulfill course requirement. Course may be repeated for a maximum of 4 credit hours.

GEOG 5010 URBAN GEOGRAPHY AND SUSTAINABILITY (3) LEC. 3. Senior standing or Departmental approval. An introduction to the field of urban geography and urban sustainability. Basic principles and processes that constitute the growth of urban areas, history, impact of urbanization, adaptation and mitigation towards a sustainable future.

GEOG 5210 CLIMATOLOGY (3) LEC. 3. Pr., Senior standing or departmental approval. An introduction to the field of climatology. Basic principles and process that constitute the earth's climate system (e.g. surface-atmosphere energy budge, the hydrologic cycle, and atmospheric motion) as well as climate change and sea level rise.

GEOG 5220 GEOMORPHOLOGY (3) LEC. 2. LAB. 2. Basic concepts, terms, and techniques used to identify landforms and their evolutionary processes. Study of the origin of landforms with emphasis on the eologic processes and structures that generate the landforms and applications of landform analysis. Two all-day weekend trips are required. Two one-hour classes and one two-hour laboratory per week.

GEOG 5350 ECONOMIC GEOGRAPHY (3) LEC. 3. Departmental approval. Economic Geography in a global context. Spatial aspects of resource use, agricultural development, manufacturing production and services.

GEOG 5380 POLITICAL GEOGRAPHY (3) LEC. 3. Examination of political processes over space, from local to the global levels. The course examines the development of political space, geographies of voting, the role of identity in shaping nationalism, and the geopolitical relationship between power and place.

GEOG 5400 GEOGRAPHY OF NATURAL HAZARDS (3) LEC. 3. Geography of natural hazards and their impacts on society. Credit will not be given for both GEOG 5400 and GEOG 6400.

GEOG 5510 HUMAN-ENVIRONMENT INTERACTION (3) LEC. 3. Departmental approval. Investigation of the inter-relationships between humans and their natural or physical environments.

GEOG 5550 GEOGRAPHY OF WATER RESOURCES (3) LEC. 3. Study of water use, management, law, and conflicts at local and international scales. May count either GEOG 5550 or GEOG 6550.

GEOG 5600 GLOBAL RESOURCES AND THE ENVIRONMENT (3) LEC. 3. Departmental approval. Global environmental problems such as climate change, ozone and deforestation and international public agencies and private volunteer movements protecting our global commons.

GEOG 5700 QUANTITATIVE METHODS AND SPATIAL ANALYSIS (3) LEC. 3. Pr. STAT 2510 or STAT 2513. Pr., STAT 2510 or similar statistics course. Applications of quantitative methods and spatial statistics to environmental, urban and economic systems and implementations of these techniques in GIS and statistical software. Credit will not be given for both GEOG 5710 and GEOG 6710.

GEOG 5710 GEOGRAPHIC FIELD METHODS (3) LEC. 1. LAB. 4. Geographic methods and techniques used to conduct field research investigations of human and physical characteristics of the landscape. Credit will not be given for both GEOG 5710 and GEOG 6710.

GEOG 5800 GEOGRAPHIC THOUGHT (3) LEC. 3. Departmental approval. Develops effective thinking skills, evaluates written materials in geography, reviews geographical research and produces written reports and papers related to geographic issues.

GEOG 5820 AERIAL PHOTOGRAPHY AND REMOTE SENSING (4) LEC. 3. LAB. 2. Departmental approval. Aerial photo and satellite digital interpretation, photogrammetry, remote sensing technology and photogrammetry and related laboratory exercises.

GEOG 5830 GEOGRAPHIC INFORMATION SYSTEMS (4) LEC. 3. LAB. 2. Introduction to concepts and techniques used in developing a geographic information system (GIS) for evaluating spatial distribution patterns and spatial relationships.

GEOG 5850 DRONES AND GEOSPATIAL APPLICATIONS (3) LEC. 3. LAB. 3. Pr. GEOG 5830 or GEOG 6830. This course will introduce the concepts of drone data collection, processing, and analysis and focus on how these high-resolution datasets can be used in a multitude of geospatial (including GIS and remote sensing) applications. This class will have both in-class and field components. Prerequisite: An Intro to GIS class is preferred, please contact the instructor if you have questions.

GEOG 5880 ADVANCED GEOGRAPHIC INFORMATION SYSTEMS (3) LEC. 2. LAB. 2. Pr. GEOG 5830. Advanced concepts and techniques used in the collection and analysis of data for evaluating spatial patterns and process. Credit will not be given for both GEOG 5880 and GEOG 6880.

GEOG 5890 GIS PROGRAMMING (3) LEC. 2. LAB. 2. Pr. P/C GEOG 5830. This course is an introduction to programming and scripting for intermediate Geographic Information Systems (GIS) users. Students will learn how to design and write clearly structured scripts in Python using a standalone development environment. Students will develop programs to manage geospatial data, perform geoprocessing analysis, and design custom tools that can be integrated into common GIS software packages. Intro to GIS is a prerequisite which can be met if taken during the same semester (co-requisite). Credit will not be given for both GEOG 5890 and GEOG 6890

GEOG 5970 SEMINAR IN GEOGRAPHY (3) LEC. 3. Development of modern geographic thinking with attention to applied research topics. Course may be repeated for a maximum of 6 credit hours.

GEOG 6010 URBAN GEOGRAPHY AND SUSTAINABILITY (3) LEC. 3. An introduction to the field of urban geography and urban sustainability. Basic principles and processes that constitute the growth of urban areas, history, impact of urbanization, adaptation and mitigation towards a sustainable future.

GEOG 6210 CLIMATOLOGY (3) LEC. 3. Pr., Senior standing or departmental approval. An introduction to the field of climatology. Basic principles and process that constitute the earth's climate system (e.g surface-atmosphere energy budge, the hydrologic cycle, and atmospheric motion, as well as climate change and sea level rise.

GEOG 6220 GEOMORPHOLOGY (3) LEC. 3. Basic concepts, terms, and techniques used to identify landforms and their evolutionary processes. Credit will not be given for both GEOG 5220 and GEOG 6220.

GEOG 6350 ECONOMIC GEOGRAPHY (3) LEC. 3. Departmental approval. Economic Geography in a global context. Spatial aspects of resource use, agricultural development, manufacturing production and services.

GEOG 6380 POLITICAL GEOGRAPHY (3) LEC. 3. Examination of political processes over space, from local to the global levels. The course examines the development of political space, geographies of voting, the role of identity in shaping nationalism, and the geopolitical relationship between power and place.

GEOG 6400 GEOGRAPHY OF NATURAL HAZARDS (3) LEC. 3. Geography of natural hazards and their impacts on society. Credit will not be given for both GEOG 5400 and GEOG 6400.

GEOG 6510 HUMAN-ENVIRONMENT INTERACTION (3) LEC. 3. Departmental approval. Investigation the inter-relationships between humans and their natural or physical environments.

GEOG 6550 GEOGRAPHY OF WATER RESOURCES (3) LEC. 3. Study of water use, management, law, and conflicts at local and international scales. May count either GEOG 5550 or GEOG 6550.

GEOG 6700 QUANT METH & SPATIAL ANALYSIS (3) LEC. 3. Pr. STAT 2510 or STAT 2513. or similar statistics course. Applications of quantitative methods and spatial statistics to environmental, urban and economic systems and implementations of these techniques in GIS and statistical software. Credit will not be given for both GEOG 5700 and GEOG 6700.

GEOG 6710 GEOGRAPHIC FIELD METHODS (3) LEC. 1. LAB. 4. Geographic methods and techniques used to conduct field research investigations of human and physical characteristics of the landscape. Credit will not be given for both GEOG 5710 and GEOG 6710.

GEOG 6800 GEOGRAPHIC THOUGHT (3) LEC. 3. Departmental approval. Develops effective thinking skills; evaluates written materials in geography; Reviews geographical research and produces written reports and papers related to geographic issues.

GEOG 6820 AERIAL PHOTOGRAPHY AND REMOTE SENSING (4) LEC. 3. LAB. 2. Departmental approval. Aerial photo and satellite digital interpretation, photogrammetry, remote sensing technology and photogrammetry and related laboratory exercises.

GEOG 6830 GEOGRAPHIC INFORMATION SYSTEMS (4) LEC. 3. LAB. 2. Departmental approval. Introduction to concepts and techniques used in developing a geographic information system (GIS) for evaluating spatial distribution patterns and spatial relationships.

GEOG 6850 DRONES AND GEOSPATIAL APPLICATIONS (3) LEC. 3. LAB. 3. Pr. GEOG 5830 or GEOG 6830. This course will introduce the concepts of drone data collection, processing, and analysis and focus on how these high-resolution datasets can be used in a multitude of geospatial (including GIS and remote sensing) applications. This class will have both in-class and field components. Prerequisite: An Intro to GIS class is preferred, please contact the instructor if you have questions.

GEOG 6880 ADVANCED GEOGRAPHIC INFORMATION SYSTEMS (3) LEC. 2. LAB. 2. Pr. GEOG 6830. Advanced concepts and techniques used in the collection and analysis of data for evaluating spatial patterns and processes. Credit will not be given for both GEOG 5880 and GEOG 6880.

GEOG 6890 GIS PROGRAMMING (3) LEC. 2. LAB. 2. Pr. P/C GEOG 6830. This course is an introduction to programming and scripting for intermediate Geographic Information Systems (GIS) users. This course teaches students to design and write clearly structured scripts in Python using a standalone development environment. Students will develop programs to manage geospatial data, perform geoprocessing analysis, and design custom tools that can be integrated into common GIS software packages. Intro to GIS is a prerequisite which can be met if taken during the same semester (co-requisite). Credit will not be given for both GEOG 5890 and GEOG 6890

GEOG 6970 SEMINAR IN GEOGRAPHY (3) LEC. 3. Departmental approval. Development of modern geographic thinking with attention to applied research topics. Course may be repeated for a maximum of 6 credit hours.

GEOG 7000 ESSENTIAL TEACHING SKILLS FOR GEOSCIENCE GTAS (3) LEC. 3. LAB. 0, LEC. 0. This course is designed to equip graduate teaching assistants (GTAs) in the geosciences with the foundational skills and knowledge necessary to succeed as effective educators in higher education. Participants will explore essential topics such as backwards design, active learning strategies, classroom management, effective communication, assessment design, the integration of technology in teaching, and navigating power dynamics. The course emphasizes practical application through hands-on activities, peer collaboration, and reflective teaching practices. Department approval.

GEOG 7930 DIRECTED STUDIES (1-3) AAB. Departmental approval. Individualized literature, field and/or laboratory research not available through regularly offered coursework. Subject matter and credit hours shall be determined by student and directing faculty. Course may be repeated for a maximum of 3 credit hours.

GEOG 7980 CAPSTONE RESEARCH (1-3) RES. SU. Departmental approval. enrolled as GEOG MS non-thesis student. Literature, field and/or laboratory research directed toward the completion of capstone project for non-thesis option. Course may be repeated for a maximum of 3 credit hours.

GEOG 7990 M.S. RESEARCH AND THESIS (1-10) RES. Research and Thesis. Course may be repeated with change in topics.

GEOG 8900 DIRECTED STUDIES (1-6) IND. Provides exposure to discipline-specific research procedures in Earth System Science. Students will work closely with their mentors to explore an Earth-System problem through directed readings, literature searches, field work, laboratory experimentation, and quantitative analysis. Course may be repeated for a maximum of 6 credit hours.

Geology Courses

GEOL 1100 DYNAMIC EARTH (4) LEC. 3. LAB. 2. Science Core. General physical geology. Survey of the important minerals and rocks. Origin and classification of geologic structures, earthquakes, and landforms. Study of geologic maps. Credit will not be given for both GEOL 1100 and GEOL 3150.

GEOL 1107 HONORS DYNAMIC EARTH (4) LEC. 3. LAB. 2. Pr. Honors College. General physical geology for Honors students and for Geology majors. Topics similar to GEOL 1110 but covered in greater depth. Science Core.

GEOL 1110 EARTH AND LIFE THROUGH TIME (4) LEC. 3. LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107. Science Core. Physical and biological history of the Earth, with emphasis on the interaction between life, the atmosphere, rocks, and oceans.

GEOL 1117 HONORS EARTH AND LIFE THROUGH TIME (4) LEC. 3. LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107. Physical and biological history of the Earth, with emphasis on the interaction between life, the atmosphere, rocks, and oceans. For Honors students and Geology majors. Science Core.

GEOL 2000 PROFESSIONAL DEVELOPMENT (1) LEC. 1. Introduction to career opportunities in the Geosciences; goal selection and charting a pathway to success as a professional. Includes writing skills, research and funding opportunities, internships, creation of resumes and ePortfolios, and job applications.

GEOL 2010 MINERALOGY AND OPTICAL CRYSTALLOGRAPHY (5) LEC. 4. LAB. 2. Physical and chemical properties of minerals, classification and roles with emphasis on natural systems, materials science, health, and environment. Credit will not be given for both GEOL 2010 and GEOL 2013.

GEOL 2050 IGNEOUS AND METAMORPHIC PETROLOGY (4) LEC. 3. LAB. 2. Pr. GEOL 2010 or GEOL 2013. Principles and processes of igneous and metamorphic activity in a plate tectonic and petrologic context. Description, classification and interpretation of igneous and metamorphic rocks.

GEOL 2100 ENVIRONMENTAL GEOLOGY (4) LEC. 3. LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107. Emphasis on geology as an environmental science; applied geology, geological hazards and environmental regulations as applied to geologic environmental remediation.

GEOL 3060 LUNAR AND PLANETARY GEOLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107. Departmental approval. Geology of the planets, moons, asteroids and comets. Origin of the solar system. Space exploration. Impact cratering.

GEOL 3200 INTRODUCTION TO PALEOBIOLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 1110 or GEOL 1113 or GEOL 1117. The nature of the fossil record, applications of that data to geological and biological questions with emphasis on the concepts using examples from all biotic groups.

GEOL 3300 EVOLUTION AND EXTINCTION OF THE DINOSAURIA (3) LEC. 2. LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107. Departmental approval. Survey of the dinosaurs, their evolution and extinction. Southeastern U.S. dinosaurs.

GEOL 3400 STRUCTURAL GEOLOGY (4) LEC. 3. LAB. 2. Pr. GEOL 2050. Fundamentals of rock deformation. The mechanics of rock flow, fracture, and folding. Geometric techniques of structural analysis.

GEOL 3550 FIELD GEOLOGY: METHODS AND APPLICATION (3) LEC. 2. LAB. 2, AAB/LLB. 2. Pr. GEOL 1100 and GEOL 1110. Departmental approval. Through a combination of classroom, laboratory, and field-based activities, this course develops skills of geologic data collection, observation, interpretation, and communication.

GEOL 3650 ADVANCED FIELD GEOLOGY (3) LEC. 1. LAB. 10. Pr. GEOL 3400 and GEOL 3550. Instruments and methods used in geological field mapping, interpretation of sedimentary, igneous and metamorphic rocks and deformational analysis. Summer only.

GEOL 4110 STRATIGRAPHY (3) LEC. 2. LAB. 2. Pr. GEOL 4010. Departmental approval. Description and correlation of layered earth materials. Synthesis and interpretation of stratigraphic correlations. North American Stratigraphic Code. History and theory of stratigraphy.

GEOL 4200 SEDIMENTARY PETROLOGY AND STRATIGRAPHY (4) LEC. 3. LAB. 2, LLB. 0. Pr. GEOL 2050. Description, classification, and interpretation of sediments and sedimentary rocks. Description and correlation of layered Earth materials. Stratigraphic correlation methods, and sequence stratigraphy. Department approval.

GEOL 4210 ECONOMIC GEOLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 3400. The origin, distribution and classification of mineral deposits formed by igneous, metamorphic and sedimentary processes. Introduction of methods of exploration and development.

GEOL 4260 INTRODUCTION TO GEOCHEMISTRY (3) LEC. 3. Pr. CHEM 1040 and GEOL 2050. Principles governing the distribution of major, minor and trace elements within the earth; differentiation of elements due to geologic processes and the hydrosphere.

GEOL 4300 GEODYNAMICS (3) LEC. 3. Pr. GEOL 3400 and (MATH 1620 or MATH 1623 or MATH 1627) and PHYS 1510. Structure and dynamics of the earth deduced from seismology, gravity, heat flow and magnetism.

GEOL 4740 SENIOR SEMINAR (2) SEM. 2. Geology majors with upperclass standing. Individual research by geoscience undergraduates is coupled with improved written and oral communication skills along with resume and ePortfolio development. May count either GEOL 4740 or GEOG 4740.

GEOL 4920 INTERNSHIP (1-3) INT. SU. Geology majors with upper-class standing (juniors or seniors). An opportunity to apply classroom experience to a real job setting. Course may be repeated for a maximum of 6 credit hours.

GEOL 4930 DIRECTED STUDIES IN UNDERGRADUATE RESEARCH (1-3) AAB. Departmental approval. Directed studies in areas of geology not covered by an existing course or to supplement knowledge gained from an existing course. Course may be repeated for a maximum of 3 credit hours.

GEOL 4970 SPECIAL TOPICS IN GEOLOGY (1-4) ST1. Instruction and discussion of selected topics in geosciences. Course may be repeated for a maximum of 8 credit hours.

GEOL 4980 UNDERGRADUATE RESEARCH METHODS (1-3) IND. Departmental approval. Active participation in original research under supervision of a senior investigator. Course may be repeated for a maximum of 3 credit hours.

GEOL 5060 INTRODUCTION TO MICROPALEONTOLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 3200 and (BIOL 1030 or BIOL 1037). A survey of major groups of fossils small enough to require a microscope for their study. Foraminifera, radiolaria, and ostracodes are emphasized; minor groups of interest include conodonts, diatoms, dinoflagellates, acritarchs, and chitinozoans. Includes laboratory, discussion sessions, and field work.

GEOL 5100 HYDROGEOLOGY (3) LEC. 2. LAB. 2. Pr. (GEOL 1100 or GEOL 1103 or GEOL 1107) and CHEM 1030 and (MATH 1610 or MATH 1613 or MATH 1617) and PHYS 1500. Departmental approval. Fundamentals of groundwater flow in porous media, hydrodynamic dispersion, determination of aquifer properties and geological aspects of groundwater occurrences.

GEOL 5220 GEOMORPHOLOGY (3) LEC. 2. LAB. 1. Study of the origin of landforms with emphasis on the geologic processes and structures that generate the landforms and applications of landform analysis. Two all-day weekend trips are required. Two one-hour classes and one two-hour laboratory per week.

GEOL 5300 BASIN ANALYSIS (3) LEC. 2. LAB. 2. Pr. P/C GEOL 4010. Study of analytical techniques of sedimentary basin fills, including thermal history, litho and biofacies analyses, depositional systems, subsurface logs, seismic reflection, provenance history, evolution, sedimentation and subsidence history.

GEOL 5440 ELECTRON MICROPROBE ANALYSIS (3) LEC. 2. LAB. 1. Pr. CHEM 1040 and PHYS 1510. Instruction in the theory and application of EMPA (electron microprobe analysis) and SEM (scanning electron microscopy). The course provides an understanding the EMPA as a research tool for evaluating the composition and structure of a wide range of materials.

GEOL 5500 PETROLEUM GEOLOGY (3) LEC. 3. Pr. GEOL 4010. Coverage of petroleum source rocks, migration, reservoir rock characters, and trapping mechanics. Overview of exploration methods including well-log analysis and seismic interpretation.

GEOL 5600 APPLIED GEOPHYSICS (4) LEC. 3. LAB. 2. Pr. (GEOL 1100 or GEOL 1103 or GEOL 1107 or GEOL 3150) and (MATH 1620 or MATH 1623 or MATH 1627) and PHYS 1510. Departmental approval. Overview of geophysical methods with applications to resource, tectonic and environmental analyses. Seismic refraction and reflection, gravity, magnetics, electrical and electromagnetic methods will be included.

GEOL 5700 GEOHEALTH (3) LEC. 3. Pr. GEOL 1100 and CHEM 1030. The effects of the composition of Earth materials and the local geological phenomena on human, plant, and animal health. The application of principles of geology and chemistry to predict and prevent diseases.

GEOL 5840 CLIMATE CHANGE AND SOCIETY (3) LEC. 3. The science of Earth’s changing climate, the societal influences on climate change, as well as the expected impacts based on the collected scientific evidence. Analyzes key aspects of climate science, the drivers of climate change, Earth’s climate trends, the evidence of climate change, the predicted future climate scenarios, the expected impacts, and the array of possible response options.

GEOL 6060 INTRODUCTION TO MICROPALEONTOLOGY (3) LEC. 3. LAB. 1. A survey of major groups of fossils small enough to require a microscope for their study. Foraminifera, radiolaria, and ostracodes are emphasized; minor groups of interest include conodonts, diatoms, dinoflagellates, acritarchs, and chitinozoans. Includes laboratory, discussion sessions, and field work.

GEOL 6100 HYDROGEOLOGY (3) LEC. 2. LAB. 2. Pr. (GEOL 1100 or GEOL 1103 or GEOL 1107) and CHEM 1030 and (MATH 1610 or MATH 1613 or MATH 1617) and PHYS 1500. Departmental approval. Fundamentals of groundwater flow in porous media, hydrodynamic dispersion, determination of aquifer properties and geological aspects of groundwater occurrences.

GEOL 6220 GEOMORPHOLOGY (3) LEC. 2. LAB. 1. Study of origin of landforms with emphasis on geologic processes and structures that generate landforms; includes the applications of landform analysis. May count either GEOL 6220 or GEOG 6220.

GEOL 6300 BASIN ANALYSIS (3) LEC. 2. LAB. 2. Pr. GEOL 4010. Departmental approval. Study of analytical techniques of sedimentary basin fills, including thermal history, litho and biofacies analyses, depositional systems, subsurface logs, seismic reflection, provenance history, evolution, sedimentation and subsidence history.

GEOL 6400 PRINCIPLES OF EARTH SCIENCE (3) LEC. 2. LAB. 2. Departmental approval. A special course for in-service and future teachers only. Internal and surficial geologic processes, meteorology and oceanography.

GEOL 6440 ELECTRON MICROPROBE ANALYSIS (3) LEC. 2. LAB. 1. Pr. CHEM 1040 and PHYS 1510. Instruction to theory and application of EMPA (electron microprobe analysis) and SEM (scanning electron microscopy). Provides an understanding of EMPA as a research tool for evaluating composition and structure of wide range of materials. GEOL 5440 or GEOL 6440.

GEOL 6500 PETROLEUM GEOLOGY (3) LEC. 3. Pr. P/C GEOL 4010. Geology/Geography graduate students who took GEOL 4010 ("P/C"). Coverage of petroleum source rocks, migration, reservoir rock characters, and trapping mechanics. Overview of exploration methods including well-log analysis and seismic interpretation.

GEOL 6600 APPLIED GEOPHYSICS (4) LEC. 3. LAB. 2. Pr. (GEOL 1100 or GEOL 1103 or GEOL 1107 or GEOL 3150) and (MATH 1620 or MATH 1623 or MATH 1627) and PHYS 1510. Departmental approval. Overview of geophysical methods with applications to resource, tectonic and environmental analyses. Seismic refraction and reflection, gravity, magnetics, electrical and electromagnetic methods will be included.

GEOL 6700 GEOHEALTH (3) LEC. 3. The effects of the composition of Earth materials and the local geological phenomena on human, plant, and animal health. The application of principles of geology and chemistry to predict and prevent diseases.

GEOL 6840 CLIMATE CHANGE AND SOCIETY (3) LEC. 3. The course will investigate the science of Earth’s changing climate, the societal influences on climate change, as well as the expected impacts based on the collected scientific evidence. Analysis of peer-reviewed literature on the key aspects of climate science, the drivers of climate change, Earth’s climate trends, the evidence of climate change, predicted future climate scenarios, expected impacts, and the array of possible societal response options to prevent/mitigate the consequences of anthropogenic climate change. The class will have a strong component of discussion of literature and foundational knowledge as well as reflection on what students have learned and the implications of this knowledge for their areas of interest and generally for their lives.

GEOL 7100 GEOCOMMUNICATION (3) LEC. 3. Departmental approval. Instruction and practice in written and oral communication skills necessary for a successful career in the geosciences; emphasis on preparation of scientific articles, technical reports, abstracts, and thesis; preparation and delivery of oral presentations.

GEOL 7170 IMPACT AND PLANETARY GEOLOGY (3) LEC. 3. Pr. GEOL 1100 and GEOL 1110. Study of impact craters and their formation. Identification of impact crates. Role of impacts in planetary evolution and in evolution and extinction of life on Earth. Study of rocky and icy geologic surface terrains and their geologic processes.

GEOL 7200 TECTONICS (3) LEC. 2. LAB. 2. Pr. GEOL 2050 and GEOL 4010. Departmental approval. Emphasis will be placed on plate tectonics and driving forces, evolution of collisional, transform and extensional systems, and dynamic indicators of past and current tectonic processes.

GEOL 7250 GROUNDWATER HYDROGEOLOGIC MODELING (3) LEC. 2. LAB. 2. Pr. GEOL 6100. Departmental approval. Overview of groundwater modeling techniques with environmental and geologic applications. Interaction of geology and subsurface groundwater flow. Basin hydrology modeling. Practical experience in computer simulations of subsurface hydrogeologic processes.

GEOL 7260 AQUEOUS AND ENVIRONMENTAL GEOCHEMISTRY (3) LEC. 2. LAB. 2. Pr. CHEM 1040 and GEOL 2050. Departmental approval. Study of water-rock reactions that control the chemical composition of groundwater; aqueous geochemistry of trace elements; groundwater pollution, remediation and geomic robiology.

GEOL 7300 CYCLES THROUGH EARTH HISTORY (3) LEC. 2. LAB. 2. Pr. GEOL 4100 and GEOL 4260. Discussion of the fundamental processes controlling sedimentary cycles at different physical, biotic, and temporal scales.

GEOL 7400 ADVANCED ECONOMIC GEOLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 4210. Departmental approval. The practical and theoretical aspects of economic geology as applied to exploration and development of natural resources.

GEOL 7410 GEOLOGY OF ORGANIC MATTER (3) LEC. 2. LAB. 2. Pr. GEOL 4010 and GEOL 4110. Departmental approval. The origins, classifications, taphonomy of organic matter, modern and ancient processes and environments of deposition of organic-rich strata, including hydrocarbon- source rocks and coals. Laboratory and field trips required.

GEOL 7450 MINERAL RESOURCES AND THE ENVIRONMENT (3) LEC. 2. LAB. 2. Pr. CHEM 1040 and GEOL 2050. Overview of geology and geographic distribution of mineral resources; economic aspects affecting their extraction; environmental impacts and cost of mineral resource extraction.

GEOL 7500 PALEOCLIMATOLOGY (3) LEC. 3. Explores how Earth's climate has evolved dynamically over time, varying within restricted boundaries that allowed life to exist and evolve. Explores interactions among Earth's surface abiotic and biotic components, and includes plate tectonics, atmospheric chemistry and physics, and ocean productivity.

GEOL 7550 ADVANCED GEOPHYSICAL METHODS (3) LEC. 2. LAB. 2. Pr. GEOL 6600. Departmental approval. Advanced treatment of geophysical methods, data interpretation and modeling. Applications to resource development and environmental assessments will be explored, with emphasis on seismic methods.

GEOL 7600 PETROLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 2050 and GEOL 4010. Departmental approval. The description, classification, formative processes, and petrologic interpretation of igneous, metamorphic and sedimentary rocks.

GEOL 7610 STRUCTURAL AND METAMORPHIC ANALYSIS (3) LEC. 2. LAB. 2. Pr. GEOL 2050 and GEOL 3400 and GEOL 3650. Quantitative analysis of dynamic, kinematic and chemical responses of rocks and minerals to crustal movements and dynamo thermal metamorphism.

GEOL 7650 FACIES ANALYSIS AND SEQUENCE STRATIGRAPHY (3) LEC. 2. LAB. 2. Pr. GEOL 4010 and GEOL 4110. Departmental approval. Systematic analysis of modern and ancient deposition facies, and their interpretation in a sequence stratigrahic context. Laboratory and field trips required.

GEOL 7700 ANALYTICAL ISOTOPE GEOCHEMISTRY (3) LEC. 2. LAB. 1. Pr. CHEM 1040 or PHYS 1510 or MATH 1620. Biweekly lectures will teach the theory and principles of isotope geochemistry and mass spectrometry, leading to applications in geoscience research. Lab sessions and problem sets will support lectures and emphasize work with various mass spectrometers in the Department of Geosciences.

GEOL 7930 DIRECTED STUDIES (1-3) LEC. 3. Departmental approval. Directed studies. May incorporate literature, field and/or laboratory research in any proportion. Subject matter and credit hours shall be determined by student and directing faculty. Course may be repeated for a maximum of 3 credit hours.

GEOL 7980 CAPSTONE PROJECT (1-3) LEC. SU. Literature, field and/or laboratory research directed towards completion of capstone project required for non-thesis option. Course may be repeated for a maximum of 3 credit hours.

GEOL 7990 RESEARCH AND THESIS (1-10) MST. Departmental Approval. Course may be repeated with change in topics.

GEOL 8900 DIRECTED STUDY (1-6) IND. 3. Provides exposure to discipline-specific research procedures in Earth System Science. Students will work closely with their mentors to explore an Earth-system problem through directed readings, literature searches, field work, laboratory experimentation, and quantitative analysis. Course may be repeated for a maximum of 6 credit hours.

Laboratory Science Courses

LBSC 2010 BASICS IN LABORATORY SCIENCE (2) LEC. 1. LAB. 1. Basic laboratory skills, quality control and assurance, standard precautions for biohazard testing; requirements for careers in medical and laboratory science.

LBSC 4010 HEMATOLOGY (3) LEC. 3. Pr. CHEM 2070 or CHEM 2077. Origin, maturation, morphology, and function of normal blood cells and abnormalities in diseased blood with clinical correlation to disease processes.

LBSC 4011 HEMATOLOGY LAB (2) LAB. 6. Pr. (CHEM 2070 or CHEM 2077) and P/C LBSC 4010 and P/C LBSC 2010. Lab portion of course covering origin, maturation, morphology, and function of normal blood cells and abnormalities in disease blood with clinical correlation to disease processes.

LBSC 4050 CLINICAL IMMUNOHEMATOLOGY/PARASITOLOGY (5) LEC. 3. LAB. 6. Pr. (CHEM 2070 or CHEM 2077) and (BIOL 1020 or BIOL 1027). Immunogenetics, clinical significance of blood group antigens and antibodies, theory and techniques of serological study of human blood groups. Human parasites, life cycles and disease processes.

LBSC 4250 CLINICAL BIOCHEMISTRY/INSTRUMENTATION (4) LEC. 3. LAB. 3. Pr. P/C BCHE 5180 or P/C BCHE 3200. Biochemistry/physiology of systems in the body of elements in body fluids during the normal and abnormal processes. Theoretical and practical application of Lab techniques, atomic absorption, gaschromatograph-FID, HPLC, spectroscopy, spectrophotometry, ion selective electrodes and RIA used in analysis of body fluids.

LBSC 4910 CLINICAL PRACTICUM (0) PRA.

LBSC 4920 CLINICAL INTERNSHIP (0) INT/PRA.

Mathematics Courses

MATH 1000 COLLEGE ALGEBRA (3) LEC. 3. Pr. ALEK score of 1. Fundamental concepts of algebra, equations and inequalities, functions and graphs, polynomial and rational functions. Does not satisfy the core requirement in mathematics. Students who have previous credit in any higher-numbered math course may not also receive credit for this course.

MATH 1100 FINITE MATH AND APPLICATIONS (3) LEC. 3. Pr. ALEK score of 50 or MATH 1000 or MATH 1003. ALEKS Math Placement Assessment score of at least a 50 or MATH 1000. Mathematics Core. Overview of finite mathematics and its applications. Graph theory, matrices, finite and conditional probability; descriptive and inferential statistics, voting methods, game theory.

MATH 1120 PRE-CALCULUS ALGEBRA (3) LEC. 3. Pr. ALEK score of 50 or MATH 1000 or MATH 1003. ALEKS Math Placement Assessment score of at least a 50 or MATH 1000. Mathematics Core. Preparatory course for calculus. This course emphasizes the algebra of functions – including polynomial, rational, exponential, and logarithmic functions. In addition, the course covers non-linear inequalities as well as systems of linear and non-linear equations and inequalities. The course also includes an introduction to sequences and series. No credit is given to students with higher-numbered math course.

MATH 1121 PRE-CALCULUS ALGEBRA WORKSHOP (1) LAB. 2. SU. Pr. P/C MATH 1000 or P/C MATH 1003 or P/C MATH 1120 or P/C MATH 1123. Workshop for College Algebra and Pre-Calculus Algebra.

MATH 1130 PRE-CALCULUS TRIGONOMETRY (3) LEC. 3. Pr. ALEK score of 64 or MATH 1120 or MATH 1123. ALEKS Math Placement Assessment score of at least a 64 or MATH 1120. Mathematics Core. Preparatory course for the calculus sequence. Basic analytic and geometric properties of the trigonometric functions. Complex numbers, De Moivre' Theorem, polar coordinates. Students who have previous credit in any higher-numbered math course may not also receive credit for this course.

MATH 1150 PRE-CALCULUS ALGEBRA AND TRIGONOMETRY (4) LEC. 4. Pr. ALEK score of 64 or MATH 1000 or MATH 1003. ALEKS Math Placement Assessment score of at least a 64 or "C" or better in MATH 1000. Mathematics Core. Algebraic functions, Exponential Logarithmic functions. Analytic and geometric properties of trigonometric functions.

MATH 1151 MATHEXCEL PRECALCULUS WORKSHOP (2) LEC. 2. SU. Coreq. MATH 1150. Appropriate score on the mathematics placement exam or grade of "C" or better in MATH 1000. Workshop for MATH 1150. Two 2-hour sessions per week.

MATH 1610 CALCULUS I (4) LEC. 4. Pr. MATH 1130 or MATH 1133 or MATH 1150 or MATH 1153 or ALEK score of 78. ALEKS Math Placement Assessment score of at least a 78 or "C" or better in MATH 1130 or in MATH 1150. Mathematics Core. Limits, the derivative of algebraic, trigonometric, exponential, logarithmic functions. Applications of the derivative, antiderivatives, the definite integral and applications to area problems, the fundamental theorem of calculus. Students may receive credit for only one of MATH 1610/1617.

MATH 1617 HONORS CALCULUS I (4) LEC. 4. Pr. Honors College. MATH 1130 or MATH 1150 or ALEK minimum score of 78 or MATH 1133 or MATH 1153. ALEKS Math Placement Assessment score of at least a 78 or "C" or better in MATH 1130 or in MATH 1150. Mathematics Core. Honors version of MATH 1610. Membership in the Honors College or Departmental approval required. Recommended for all Mathematics majors: Applied Math-Actuarial Sci (ACTU), Applied Math-Discrete (APDM), Applied Mathematics (AMTH), and Mathematics (MATH). This course covers the same material as MATH 1610 but in a greater depth appropriate for Honors students and Mathematics majors. Students may receive credit for only one of MATH 1610, MATH 1617 or MATH 1680.

MATH 1620 CALCULUS II (4) LEC. 4. Pr. MATH 1610 or MATH 1613 or MATH 1617. "C" or better in MATH 1610 or in MATH 1617. Techniques of integration, applications of the integral, parametric equations, polar coordinates. Vectors, lines and planes in space. Infinite sequences and series. Students may receive credit for only one of MATH 1620 or MATH 1627.

MATH 1627 HONORS CALCULUS II (4) LEC. 4. Pr. Honors College. MATH 1610 or MATH 1613 or MATH 1617. "C" or better in MATH 1610 or in MATH 1617. Honors version of MATH 1620. Membership in the Honors College or Departmental approval required. Recommended for all Mathematics majors: Applied Math-Actuarial Sci (ACTU), Applied Math-Discrete (APDM), Applied Mathematics (AMTH), and Mathematics (MATH). The same material as MATH 1620, but in greater depth appropriate for honors students and Mathematics majors. Students may receive credit for only one of MATH 1620 or MATH 1627.

MATH 1680 CALCULUS WITH BUSINESS APPLICATIONS I (4) LEC. 4. Pr. MATH 1120 or MATH 1123 or MATH 1130 or MATH 1133 or MATH 1150 or MATH 1153 or ALEK score of 68. ALEKS Math Placement Assessment score of at least a 68 or MATH 1120 or MATH 1130 or MATH 1150. Students in College of Business. Mathematics Core. Differentiation and integration of exponential and logarithmic functions, applications to business. Functions of several variables, partial derivatives, multiple integrals.

MATH 1690 CALCULUS WITH BUSINESS APPS II (3) LEC. 3. Pr. MATH 1680 or MATH 1683 or MATH 1610 or MATH 1617 or MATH 1613. Probability, random variables, probability distributions. Further topics in calculus: integration, functions of several variables, applications to probability. Applications to business and related areas. Credit will not be given to majors in Engineering or Math or Physics.

MATH 1950 FIRST YEAR MATHEMATICS SEMINAR (1) SEM. 1. This seminar will provide a shared intellectual experience for incoming freshmen mathematics majors. It will serve as a focused and interactive forum to provide a glimpse into the world of mathematics that lies beyond elementary calculus. Each semester's symposium will be devoted to a specific mathematical topic. Writing about mathematics and explaining mathematical ideas to both “math people” and “non-math people” will be emphasized. Only offered to incoming first-year students (though transfer students and higher rank students may be allowed to enroll on an approval basis). May not be repeated for credit. High School Math will be required.

MATH 2630 CALCULUS III (4) LEC. 4. Pr. MATH 1620 or MATH 1623 or MATH 1627. "C" or better in MATH 1620, MATH 1623 or MATH 1627. Multivariate calculus: vector-valued functions, partial derivatives, multiple integration, vector calculus. Credit will be given for only MATH 2630 or MATH 2637.

MATH 2637 HONORS CALCULUS III (4) LEC. 4. Pr. MATH 1620 or MATH 1623 or MATH 1627. Must have earned a "C" or better in MATH 1620, MATH 1623 or MATH 1627. Honors version of MATH 2630. Membership in the Honors College or Departmental approval required. Recommended for all Mathematics majors: Applied Math-Actuarial Sci(ACTU), Applied Math-Discrete(DISC), Applied Mathematics(AMTH), and Mathematics(MATH). The same material as MATH 2630, but in greater depth appropriate for honors students and Mathematics majors. Credit will be given for only one of MATH 2630 or MATH 2633 or MATH 2637.

MATH 2650 LINEAR DIFFERENTIAL EQUATIONS (3) LEC. 3. Pr. P/C MATH 2630 or P/C MATH 2633 or P/C MATH 2637. Introduction to ordinary differential equations, specifically linear equations of first and second order, and applications.

MATH 2660 TOPICS IN LINEAR ALGEBRA (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627. Matrices, row-reduction, systems of linear equations, (finite-dimensional) vector spaces, subspaces, bases, dimension, change of basis, linear transformations, kernels, orthogonality, Gram-Schmidt.

MATH 2667 HONORS TOPICS IN LINEAR ALGEBRA (3) LEC. 3. Pr. Honors College. MATH 1620 or MATH 1623 or MATH 1627. Must have earned a "C" or better in MATH 1620 or MATH 1623 or MATH 1627. Honors version of MATH 2660. Membership in the Honors College or Departmental approval required. Recommended for all Mathematics majors: (Applied Math-Actuarial Sci(ACTU), Applied Math-Discrete(DISC), Applied Mathematics(AMTH), and Mathematics(MATH). Topics include: matrices, row-reduction, systems of linear equations, (finite-dimensional) vector spaces, subspaces, bases, dimension, change of basis, linear transformations, kernels, orthogonality, Gram-Schmidt. The same material as MATH 2660, but in greater depth appropriate for honors students and Mathematics majors, with possible additional topics as determined by the instructor. Credit will be given for only one of MATH 2660 or MATH 2667.

MATH 2670 INTRODUCTION TO DIFFERENTIAL EQUATIONS (3) LEC. 3. Pr. MATH 1620. Rigorous introduction to ordinary differential equations with emphasis on mathematical justification of solution methods and qualitative analysis of equations and low dimensional systems. The existence and uniqueness theorems. Separable equations, exact equations and integrating factors. Second order linear equations, the Wronskian, method of undetermined coefficients, variation of parameters. Laplace transform. Higher order equations. Systems of first order equations, fundamental matrix.

MATH 2790 MATHEMATICS OF INTEREST THEORY (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627. Mathematical foundations of the theory of interest necessary as preparation for the Society of Actuaries examination on the theory of interest.

MATH 2850 MATHEMATICS FOR ELEMENTARY EDUCATION I (3) LEC. 3. For Elementary Education major or departmental approval. Mathematical insights for elementary school teachers. Sets, the structure of the number system (integers, fraction, decimals).

MATH 2860 MATHEMATICS FOR ELEMENTARY EDUCATION II (3) LEC. 3. Pr. MATH 2850. For Elementary Education majors or departmental approval. Mathematical insights into measurement and geometry for elementary school teachers. Shapes in two and three dimensions. Similarities, congruences and transformations.

MATH 2870 MATHEMATICS FOR ELEMENTARY EDUCATION III (3) LEC. 3. For Elementary Education majors or departmental approval. Mathematical insights into probability, data analysis and functions for elementary school teachers. Uncertainty, probability spaces and an introduction to statistics. Relationships, functions and change.

MATH 3010 HISTORY OF MATHEMATICS (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627. The evolution of modern mathematics from its motivational roots in the physical sciences; the lives and contributions of outstanding mathematicians; the parallel development of mathematics and western culture.

MATH 3100 INTRODUCTION TO ADVANCED MATHEMATICS (3) LEC. 3. Pr. MATH 2630 or MATH 2637. Teaching of the fundamental abilities necessary for the pursuance of mathematical studies. Logic and set theory, mathematical induction, basic number theory, basic analysis. Credit will not be given for both MATH 3100 and Math 3710.

MATH 3710 DISCRETE MATHEMATICS (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Methods of proof, induction, counting, inclusion-exclusion, discrete probability, relations, partial orders, graphs, trees, languages, grammars, finite state machines, automata. Credit will not be given for both MATH 3710 and Math 3100.

MATH 4110 ADVANCED LOGIC (3) LEC. 3. Pr. MATH 3100 or PHIL 3110. Advanced topics in logic. For example: soundness, completeness, incompleteness, set theory, proof theory, model theory, non-standard logics. May count either MATH 4110 or PHIL 4110.

MATH 4790 ACTUARIAL SEMINAR IN THE MATHEMATICS OF FINANCE (3) LEC. 3. Pr. MATH 2790. Intensive seminar in the mathematical aspects of finance, and the theory of interest primarily intended as preparation for the Society of Actuaries Course 2 examination.

MATH 4800 INTRODUCTION TO ACTUARIAL MATHEMATICS (3) LEC. 3. Pr. STAT 3600 and MATH 2790. An introduction to important actuarial methods in modeling and foundational principles of ratemaking and reserving for short-term coverages primarily intended as preparation for part of the Society of Actuaries Exam FAM.

MATH 4820 ACTUARIAL SEMINAR IN PROBABILITY (3) LEC. 3. Pr. STAT 3600. or equivalent. Intensive seminar in calculus, probability, and risk theory primarily intended as preparation for the Society of Actuaries Course 1 examination.

MATH 4930 DIRECTED STUDIES (1-3) IND. Study of individual problems or topics of interest to students. Course may be repeated for a maximum of 3 credit hours.

MATH 4970 SPECIAL TOPICS (1-4) IND. Departmental approval. An individual problems course. Each student will work under the direction of a staff member on a problem of mutual interest. Course may be repeated for a maximum of 4 credit hours.

MATH 4980 UNDERGRADUATE RESEARCH (1-3) IND. Departmental approval. Directed research in the area of specialty under faculty supervison. Course may be repeated for a maximum of 3 credit hours.

MATH 4997 HONORS THESIS (1-6) IND. Pr. Honors College. Course may be repeated for a maximum of 6 credit hours. Membership in Honors College.

MATH 5000 MATH MODELING (3) LEC. 3. Pr. (MATH 2650 or MATH 2670) and (MATH 2660 or MATH 2667). Introduction to mathematical models and related techniques. Includes general principles involving continuous deterministic problems and a detailed, specific term project. Programming ability.

MATH 5010 VECTOR CALCULUS (3) LEC. 3. Pr. (MATH 2630 or MATH 2637 or MATH 2730) and (MATH 2660 or MATH 2667). Departmental approval. Vector-valued functions, vector fields. Gradient, divergence, curl. Integral theorems: Green's Theorem, Stoke's Theorem, Gauss' Theorem. Tensors and differential forms. Applications.

MATH 5030 COMPLEX VARIABLES WITH APPLICATIONS I (3) LEC. 3. Pr. MATH 2650 or MATH 2670. Complex functions and their elementary mapping properties; contour integration and residues; Laurent series; applications to real integrals. MATH 5030-5040 are appropriate for students of engineering or science.

MATH 5040 COMPLEX VARIABLES WITH APPLICATIONS II (3) LEC. 3. Pr. MATH 5030. Linear fractional transformations; conformal mappings; harmonic functions; applications to boundary value problems; analytic continuation; entire functions. MATH 5030-5040 are appropriate for students of engineering or science.

MATH 5050 MATRIX THEORY AND APPLICATIONS (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Canonical forms, determinants, linear equations, eigenvalue problems.

MATH 5060 ELEMENTARY PARTIAL DIFFERENTIAL EQUATIONS (3) LEC. 3. Pr. MATH 2650 or MATH 2670. First and second order linear partial differential equations with emphasis on the method of eigenfunction expansions.

MATH 5110 NUMBER THEORY (3) LEC. 3. Pr. MATH 3100. Greatest common divisor, unique factorization, linear Diophantine equations. Modular arithmetic, Chinese remainder theorem, polynomial congruences. Quadratic residues, Legendre/Jacoby symbols, quadratic reciprocity. Primes. Moebius inversion. Sums of squares. Units and the integers mod n.

MATH 5120 INFORMATION THEORY (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Information and entropy, information rate optimization and channel capacity, variable-length codes, data compression (Kraft-McMillan inequality, Huffman's algorithm), maximum likelihood decoding, Shannon's Noisy Channel Theorem.

MATH 5130 CALCULUS OF VARIATION (3) LEC. 3. Pr. MATH 2650 or MATH 2670. Fundamental concepts of extrema of functions and functionals; first and second variations; generalizations; sufficient conditions; constrained functionals; the general Lagrange Problem; optimal control.

MATH 5140 DATA COMPRESSION (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627 or MATH 1720. Lossless compression methods, including static, dynamic, and higher order Huffman and arithmetic encoding, interval and recency rank encoding, and dictionary methods; lossy transform methods (JPEG).

MATH 5150 ALGEBRAIC CODING THEORY (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Linear codes, Hamming and Golay codes, BCH codes, cyclic codes. Random error detection and correction. Burst-error correction. Decoding algorithms. Credit will not be given for both MATH 5150 and MATH 6150/6156.

MATH 5170 FINITE EXTREMAL SET THEORY (3) LEC. 3. Pr. (MATH 2660 or MATH 2667) and (MATH 3100 or MATH 3710). Finite posets and their Hasse diagrams. Sequences and the Erdos-Szekeres Theorem. Chains and antichains, Dilworth's Theorem. Set systems in the hypercube, Sperner's Lemma and the LYM inequality. Intersecting families, the Erdos-Ko-Rado Theorem. Isoperimetric inequalities in the hypercube. Additional topics related to recent research. Includes paper reading and presentation component.

MATH 5180 CRYPTOGRAPHY (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Classical cryptosystems, the Data Encryption Standard, one-way functions and relevant number theoretic problems (factoring, primality testing, discrete logarithm problem), RSA and other public key cryptosystems.

MATH 5200 ANALYSIS I (3) LEC. 3. Pr. MATH 3100. "C" or better in MATH 3100. Real numbers, infima and suprema; sequences and series of real numbers, convergence and limits, Cauchy sequences and completeness; topology of the real line, Bolzano-Weierstrass and Heine-Borel theorems; real-valued functions of a real variable, continuity and uniform continuity. Emphasis on proofs.

MATH 5210 ANALYSIS II (3) LEC. 3. Pr. MATH 5200. Sequences and series of functions, modes of convergence, power series, elementary functions; derivatives and antiderivatives, the mean-value theorem; Riemann integration and the Fundamental Theorem of Calculus; R^n and abstract spaces, functions of several variables. Emphasis on proofs.

MATH 5280 SYSTEMS OF DIFFERENTIAL EQUATIONS AND APPLICATIONS (3) LEC. 3. Pr. (MATH 2650 or MATH 2670) and (MATH 2660 or MATH 2667). Linear systems of differential equations, stability, phase portraits; non-linear systems, linearization, qualitative properties of orbits, Poincare-Bendixson Theorem; numerical methods; applications.

MATH 5300 THEORY OF DIFFERENCE EQUATIONS (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Linear difference equations, initial value problems, Green's functions, boundary value problems, systems, periodic solutions, nonlinear difference equations, models.

MATH 5310 INTRODUCTION TO ABSTRACT ALGEBRA I (3) LEC. 3. Pr. MATH 3100. "C" or better in MATH 3100. Groups, Groups of Permutations, isomorphisms and homomorphisms; Cyclic Groups, Quotient Groups, The Fundamental Homomorphism Theorem.

MATH 5320 INTRODUCTION TO ABSTRACT ALGEBRA II (3) LEC. 3. Pr. MATH 5310. Theory of rings and fields, Ideals and Homomorphisms, Quotient Rings, Rings of Polynomials, Extensions of Fields, Galois Theory.

MATH 5330 COMPUTATIONAL ALGEBRA (3) LEC. 3. Pr. MATH 5310. Introduction to computation in multivariate polynomial rings and finite fields. Topics include Groebner bases, Buchberger's Algorithm, kinematic/robotics problems, symbolic manipulation software.

MATH 5350 INTRODUCTION TO ALGEBRAIC GEOMETRY (3) LEC. 3. Pr. MATH 5320. LEC. 3. Pr. "C" or better in Math 5320. Affine varieties, Hilbert's Nullstellensatz, the Ideal-Variety Correspondence, irreducibility, polynomial and rational functions, projective varieties, Bezout's Theorem, dimension theory.

MATH 5370 LINEAR ALGEBRA (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Introduction to the theoretical foundations of Linear Algebra including vector spaces, basis, dimension, linear transformations, fundamental subspaces, matrix representations, eigenvalues, eigenspaces.

MATH 5380 INTERMEDIATE EUCLIDEAN GEOMETRY I (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Fundamental concepts and theorems of Euclidean geometry, introduction to higher dimensions. Regular polygons and polyhedra, symmetry groups, convexity, geometric extremum problems. Geometric transformations and their invariants.

MATH 5390 INTERMEDIATE EUCLIDEAN GEOMETRY II (3) LEC. 3. Pr. MATH 5380. Planar graphs and Euler's theorem. The symmetry group of a set, homotheties and similitudes, path, arcs and length of curves, advanced theorems on the circle.

MATH 5460 PERTURBATION METHODS (3) LEC. 3. Pr. MATH 2650 or MATH 2670. Analytical solutions of nonlinear problems, ODEs, PDEs, multiple scales, and transcendental equations in engineering, mathematics, and physics using both regular and singular perturbation methods.

MATH 5500 INTRODUCTION TO TOPOLOGY (3) LEC. 3. Pr. MATH 3100. C or better in MATH 3100. Metric spaces, topological spaces, continuity, compactness, connectedness, product and quotient spaces and local properties.

MATH 5630 INTRODUCTION TO NUMERICAL ANALYSIS I (3) LEC. 3. Pr. MATH 2650 or MATH 2670. Programming ability. Numerical solution of equations, polynomial approximation, numerical differentiation and integration, numerical solutions of ordinary differential equations, error analysis. Written programs using algorithms. Programming ability.

MATH 5640 INTRODUCTION TO NUMERICAL ANALYSIS II (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Programming ability. Numerical solutions of systems of linear equations, numerical computation of eigenvalues and eigen vectors, error analysis. Written programs using the algorithms.

MATH 5650 THEORY OF NONLINEAR OPTIMIZATION (3) LEC. 3. Pr. (MATH 2650 or MATH 2670) and (MATH 2660 or MATH 2667). Kuhn-Tucker conditions, quadratic programming, search methods and gradient methods, Lagrangean and penalty function methods.

MATH 5670 PROBABILITY AND STOCHASTIC PROCESSES I (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Random variables, discrete and absolutely continuous distributions. Poisson process, expectation and conditional expectation. Moment generating functions, limit distributions. Emphasis on probabilistic reasoning and problem solving. Credit will not be given for both MATH 5670 and STAT 5670.

MATH 5680 PROBABILITY AND STOCHASTIC PROCESSES II (3) LEC. 3. Pr. MATH 5670 or STAT 5670. Multivariate distributions. Central Limit Theorem, Laplace transforms, convolutions, simulation, renewal processes, Continuous-time Markov Chains, Markov renewal and semi-regenerative processes, Brownian motion and diffusion. Credit will not be given for both MATH 5680 and STAT 5680.

MATH 5710 LINEAR OPTIMIZATION (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Theory and algorithms for standard linear optimization problems. Simplex algorithm and duality, shortest paths, network flows, min-cost flows and circulations, out-of-kilter method, assignments and matchings.

MATH 5730 ENUMERATION (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Using generating functions and Polya theory to do sophisticated counting. Permutations and combinations, inclusion-exclusion, partitions, recurrence relations, group actions, Polya theory with applications.

MATH 5740 SOCIAL NETWORK ANALYSIS (3) LEC. 3. Pr. (MATH 3100 or COMP 2240) and (P/C COMP 1220 or P/C COMP 1230). Introduction to Social Network Analysis and Python, graph properties and network visualization, Network Metrics, Cascading Behavior in Networks, 2-Mode network, Large-scale structure of networks and corresponding Algorithms, Clustering, Ego analysis and Bipartite networks, Exponential random graph modeling, and Network evolution.

MATH 5750 INTRODUCTION TO GRAPH THEORY (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Algorithmic and theoretical aspects of graph theory: matchings, colorings, scheduling problems, Hamilton cycles. Euler tours, spanning trees, network reliability, connectivity, extremal graphs, planar graphs, disjoint paths.

MATH 5770 COMBINATORIAL DESIGNS (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627 or MATH 1720. Latin squares, mutually orthogonal latin squares, orthogonal and perpendicular arrays, Steiner triple systems, block designs, difference sets and finite geometries.

MATH 5800 ACTUARIAL MATHEMATICS I (3) LEC. 3. Pr. MATH 2790 and STAT 3600. A development of theoretical basis of survival models, life table, life insurance benefits, annuities, premium calculation and policy values primarily intended as preparation for part of the Society of Actuaries Exam FAM.

MATH 5810 ACTUARIAL MATHEMATICS II (4) LEC. 4. Pr. MATH 5800. This course develops the knowledge of theoretical basis to traditional and modern contingent payment models and the application of those models to insurance and other financial risks. It is primarily intended as preparation for the Society of Actuaries Exam ALTAM.

MATH 5840 FOUNDATIONS OF NUMBER THEORY FOR SECONDARY SCHOOL TEACHERS (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Divisibility, Diophantine equations, congruencies.

MATH 5850 NUMERICAL ANALYSIS FOR SECONDARY TEACHERS (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. The numerical solutions of selected problems arising in calculus and algebra along with the programming techniques. Computer familiarity.

MATH 5860 FOUNDATIONS OF NON-EUCLIDEAN GEOMETRY FOR SECONDARY SCHOOL TEACHERS (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. B.L. geometry, hyperbolic geometry, absolute geometry, parallel postulates.

MATH 5870 FINANCIAL MATHEMATICS (3) LEC. 3. Pr. (MATH 1610 or MATH 1617) and (MATH 1620 or MATH 1627) and (MATH 2650 or MATH 2670) and STAT 3600. Options and spreads, pricing of such options in accordance with the Black-Scholes Equation, and the binomial pricing model.

MATH 5970 SPECIAL TOPICS (1-3) IND. Departmental approval. Topics may vary as needed. Course may be repeated for a maximum of 3 credit hours.

MATH 6000 MATHEMATICAL MODELING: CONTINUOUS (3) LEC. 3. Introduction to mathematical models and related techniques. Includes general principles involving continuous deterministic problems and a detailed, specific term-project. Programming ability.

MATH 6010 VECTOR CALCULUS (3) LEC. 3. Pr. (MATH 2630 or MATH 2637) and (MATH 2660 or MATH 2667). Departmental approval. Vector-valued functions, vector fields. Gradient, divergence, curl. Integral theorems: Green's Theorem, Stoke's Theorem, Gauss' Theorem. Tensors and differential forms. Applications.

MATH 6030 COMPLEX VARIABLES WITH APPLICATIONS I (3) LEC. 3. Complex functions and their elementary mapping properties; contour integration and residues; Laurent series; applications to real integrals. MATH 6030-6040 are appropriate for students of engineering or science.

MATH 6050 MATRIX THEORY AND APPLICATIONS (3) LEC. 3. Canonical forms, determinants, linear equations, eigenvalue problems.

MATH 6060 ELEMENTARY PARTIAL DIFFERENTIAL EQUATIONS (3) LEC. 3. First and second order linear partial differential equations with emphasis on the method of eigenfunction expansions.

MATH 6110 NUMBER THEORY (3) LEC. 3. Greatest common divisor, unique factorization, linear Diophantine equations. Modular arithmetic, Chinese remainder theorem, polynomial congruences. Quadratic residues, Legendre/Jacoby symbols, quadratic reciprocity. Primes. Moebius inversion. Sums of squares. Units and the integers mod n.

MATH 6120 INFORMATION THEORY (3) LEC. 3. Information and entropy, information rate optimization and channel capacity, variable-length codes, data compression (Kraft-McMillan inequality, Huffman's algorithm), maximum likelihood decoding, Shannon's Noisy Channel Theorem.

MATH 6140 DATA COMPRESSION (3) LEC. 3. Lossless compression methods, including static, dynamic, and higher order Huffman and arithmetic encoding, interval and recency rank encoding, and dictionary methods; lossy transform methods (JPEG).

MATH 6150 ALGEBRAIC CODING THEORY (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Linear codes, Hamming and Golay codes, BCH codes, cyclic codes. Random error detection and correction. Burst-error correction. Decoding algorithms. Credit will not be given for both MATH 5150 and MATH 6150/6156.

MATH 6170 FINITE EXTREMAL SET THEORY (3) LEC. 3. Pr. (MATH 2660 or MATH 2667) and (MATH 3100 or MATH 3710). Finite posets and their Hasse diagrams. Sequences and the Erdos-Szekeres Theorem. Chains and antichains, Dilworth's Theorem. Set systems in the hypercube, Sperner's Lemma and the LYM inequality. Intersecting families, the Erdos-Ko-Rado Theorem. Isoperimetric inequalities in the hypercube. Additional topics related to recent research. Includes paper reading and presentation component. Graduate version of MATH 5170.

MATH 6180 CRYPTOGRAPHY (3) LEC. 3. Classical cryptosystems, the Data Encryption Standard, one-way functions and relevant number theoretic problems (factoring, primality testing, discrete logarithm problem), RSA and other public key cryptosystems.

MATH 6200 ANALYSIS I (3) LEC. 3. or equivalent course, subject to departmental approval. Real numbers, infima and suprema; sequences and series of real numbers, convergence and limits, Cauchy sequences and completeness; topology of the real line, Bolzano-Weierstrass and Heine-Borel theorems; real-valued functions of a real variable, continuity and uniform continuity; intermediate#value and extreme-value theorems. Emphasis on proofs.

MATH 6210 ANALYSIS II (3) LEC. 3. Pr. MATH 6200. Sequences and series of functions, modes of convergence, power series, elementary functions; derivatives and power series, elementary functions; derivatives and antiderivatives, the mean-value theorem; Riemann integration and the Fundamental Theorem of Calculus; R^n and abstract spaces, functions of several variables. Emphasis on proofs.

MATH 6310 INTRODUCTION TO ABSTRACT ALGEBRA I (3) LEC. 3. Departmental approval. Groups, Groups of Permutations, isomorphisms and homomorphisms; Cyclic Groups, Quotient Groups, The Fundamental Homomorphism Theorem.

MATH 6320 INTRODUCTION TO ABSTRACT ALGEBRA II (3) LEC. 3. Pr. MATH 6310. Theory of rings and fields, Ideals and Homomorphisms, Quotient Rings, Rings of Polynomials, Extensions of Fields, and Galois Theory.

MATH 6330 COMPUTATIONAL ALGEBRA (3) LEC. 3. Pr. MATH 6310. Introduction to computation in multivariate polynomial rings and finite fields. Topics include Groebner bases, Buchberger's Algorithm, kinematic/robotics problems, and symbolic manipulation software.

MATH 6350 INTRODUCTION TO ALGEBRAIC GEOMETRY (3) LEC. 3. Pr. MATH 5320. LEC. 3. Pr. "C" or better in Math 5320. Affine varieties, Hilbert's Nullstellensatz, the Ideal-Variety Correspondence, irreducibility, polynomial and rational functions, projective varieties, Bezout's Theorem, dimension theory.

MATH 6370 LINEAR ALGEBRA (3) LEC. 3. Introduction to the theoretical foundations of Linear Algebra Algebra including vector spaces, basis, dimension, linear transformations, fundamental subspaces matrix representations, eigenvalues, eigenspaces.

MATH 6380 INTERMEDIATE EUCLIDEAN GEOMETRY I (3) LEC. 3. Fundamental concepts and theorems of Euclidean geometry, introduction to higher dimensions. Regular polygons and polyhedra, symmetry groups, convexity, geometric extremum problems. Geometric transformations and their invariants.

MATH 6390 INTERMEDIATE EUCLIDEAN GEOMETRY II (3) LEC. 3. Pr. MATH 6380. Planar graphs and Euler's theorem. The symmetry group of a set, homotheties and similitudes, path, arcs and length of curves, and advanced theorems on the circle.

MATH 6460 PERTURBATION METHODS (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Departmental approval. Analytical solutions of nonlinear problems, ODES, PDEs, multiple scales, and transcendental equations in engineering, mathematics, and physics using both regular and singular perturbation methods. May count either AERO/MATH 5460 or AERO/MATH 6460.

MATH 6500 INTRODUCTION TO TOPOLOGY (3) LEC. 3. Departmental approval. Metric spaces, topological spaces, continuity, compactness, connectedness, product and quotient spaces and local properties.

MATH 6630 INTRODUCTION TO NUMERICAL ANALYSIS I (3) LEC. 3. Numerical solution of equations, polynomial approximation, numerical differentiation and integration, numerical solutions of ordinary differential equations, error analysis. Written programs using algorithms. Programming ability.

MATH 6640 INTRODUCTION TO NUMERICAL ANALYSIS II (3) LEC. 3. Numerical solutions of systems of linear equations, numerical computation of eigenvalues and eigenvectors, error analysis. Written programs using the algorithms. Programming ability.

MATH 6650 THEORY OF NONLINEAR OPTIMIZATION (3) LEC. 3. Kuhn-Tucker conditions, quadratic programming, search methods and gradient methods, Lagrangean and penalty function methods.

MATH 6670 PROBABILITY AND STOCHASTIC PROCESSES I (3) LEC. 3. Random variables, discrete and absolutely continuous distributions. Poisson process, expectation and conditional expectation. Moment generating functions, limit distributions. Emphasis on probabilistic reasoning and problem solving. Credit will not be given for both MATH 6670 and STAT 6670.

MATH 6680 PROBABILITY AND STOCHASTIC PROCESSES II (3) LEC. 3. Pr. MATH 6670 or MATH 6676 or STAT 6670 or STAT 6676. Multivariate distributions. Central Limit Theorem, Laplace transforms, convolutions, simulation, renewal processes, Continuous-time Markov Chains, Markov renewal and semi- regenerative processes, Brownian motion and diffusion. Credit will not be given for both MATH 6680 and STAT 6680.

MATH 6710 LINEAR OPTIMIZATION (3) LEC. 3. Theory and algorithms for standard linear optimization problems. Simplex algorithm and duality, shortest paths, network flows, min-cost flows and circulations, out-of-kilter method, assignments and matchings.

MATH 6730 ENUMERATION (3) LEC. 3. Using generating functions and Polya theory to do sophisticated counting. Permutations and combinations, inclusion-exclusion, partitions, recurrence relations, group actions, Polya theory with applications.

MATH 6740 SOCIAL NETWORK ANALYSIS (3) LEC. 3. Introduction to Social Network Analysis and Python, graph properties and network visualization, Network Metrics, Cascading Behavior in Networks, 2-Mode network, Large-scale structure of networks and corresponding Algorithms, Clustering, Ego analysis and Bipartite networks, Exponential random graph modeling, and Network evolution.

MATH 6750 INTRODUCTION TO GRAPH THEORY (3) LEC. 3. Algorithmic and theoretical aspects of graph theory: matchings, colorings, scheduling problems, Hamilton cycles. Euler tours, spanning trees, network reliability, connectivity, extremal graphs, planar graphs, disjoint paths.

MATH 6770 COMBINATORIAL DESIGNS (3) LEC. 3. Latin squares, mutually orthogonal latin squares, orthogonal and perpendicular arrays, Steiner triple systems, block designs, difference sets and finite geometries.

MATH 6800 ACTUARIAL MATHEMATICS I (3) LEC. 3. Departmental approval. A development of theoretical basis of survival models, life table, life insurance benefits, annuities, premium calculation and policy values primarily intended as preparation for part of the Society of Actuaries Exam FAM.

MATH 6810 ACTUARIAL MATHEMATICS II (4) LEC. 4. Pr. MATH 6800. This course develops the knowledge of theoretical basis to traditional and modern contingent payment models and the application of those models to insurance and other financial risks. It is primarily intended as preparation for the Society of Actuaries Exam ALTAM.

MATH 6840 NUMBER SYSTEMS AND ALGEBRA FOR TEACHERS (3) LEC. 3. Pr. MATH 3100. Connections of advanced college-level mathematics with the secondary mathematics curriculum, focusing on number systems, algebra, and functions, to develop mathematical knowledge relevant to teaching. Includes appropriate uses of technology and non-routine mathematics problem solving. Admission to a program in Secondary Mathematics Education or department approval required.

MATH 6850 FUNCTIONS AND MATHEMATICAL MODELING FOR TEACHERS (3) LEC. 3. Pr. (MATH 2650 or MATH 2670) or MATH 2660 or MATH 2667. Connections of advanced college-level mathematics with the secondary mathematics curriculum, focusing on functions and mathematical modeling, to develop mathematical knowledge relevant to teaching. Includes appropriate uses of technology and non-routine mathematics problem solving. Admission to a program in Secondary Mathematics Education or department approval required.

MATH 6860 GEOMETRY FOR TEACHERS (3) LEC. 3. Pr. MATH 2660 or MATH 2667 or MATH 3100. Connect advanced college-level mathematics with the secondary mathematics curriculum, focusing on geometry, to develop mathematical knowledge relevant to teaching. The contents include axiomatic systems of geometry, transformational geometry, and similarity. Appropriate technology and mathematics problem solving skills will be introduced. Admission to a program in Secondary Mathematics Education or department approval required.

MATH 6870 FINANCIAL MATHEMATICS (3) LEC. 3. Pr. (MATH 1610 or MATH 1617) and (MATH 1620 or MATH 1627) and (MATH 2650 or MATH 2670) and STAT 3600. Options and spreads, pricing of such options in accordance with the Black-Scholes Equation, and the binomial pricing model.

MATH 6970 SPECIAL TOPICS (1-3) DSL. Departmental approval. Topics may vary as needed. Course may be repeated for a maximum of 3 credit hours.

MATH 7000 APPLIED MATHEMATICS I (3) LEC. 3. Departmental approval. Linear spaces, matrices, eigenvalues, least squares solutions to linear systems, Hilbert spaces, orthogonal expansions, integral equations, compact operators, Green's functions for boundary value problems, eigenfunction expansions.

MATH 7010 APPLIED MATHEMATICS II (3) LEC. 3. Pr. MATH 7000 or MATH 7006. Calculus of variations, asymptotic expansions, Spectral theory, Fourier transform, Partial differential equations, transform methods and eigenfunction expansions, vibrations, diffusion processes, equilibrium states, Green's functions, boundary layer problems.

MATH 7110 DISCRETE GEOMETRY AND CONVEXITY I (3) LEC. 3. Departmental approval. Geometric objects and configurations with discrete symmetry groups. Regular polygons and polyhedra. Regular arrangements. Plane tilings and patterns.

MATH 7120 DISCRETE GEOMETRY AND CONVEXITY II (3) LEC. 3. Pr. MATH 7110. Convexity and related geometric extremum problems. Packing and covering. Arrangements of extreme density.

MATH 7140 INTRODUCTION TO MODEL THEORY (3) LEC. 3. Departmental approval. First-order languages, Satisfaction. Consequences. The completeness and compactness theorems, models constructed from constants. Elementary substructures and embeddings, Lowenheim-Skolem-Tarskj theorems. Ultraproducts and ultrapowers.

MATH 7150 AXIOMATIC SET THEORY I (3) LEC. 3. Departmental approval. Introduction to modern set theory. The axioms of ZFC, ordinals and cardinals, closed unbounded sets, the constructible universe L, Martin's Axiom.

MATH 7160 AXIOMATIC SET THEORY II (3) LEC. 3. Pr. MATH 7150. Introduction to forcing, independence results, iterated forcing, consistency of Martin's Axiom.

MATH 7180 ALGORITHMIC ALGEBRA I (3) LEC. 3. Departmental approval. Fundamental aspects of algorithmic algebra. Noetherian rings. Theory of Groebner bases. Hilbert Nullstellensatz. Elimination theory. Applications to graph theory and algebraic geometry.

MATH 7190 ALGORITHMIC ALGEBRA II (3) LEC. 3. Pr. MATH 7180. Modules. Groebner bases for modules and syzygy computations. Improved Buchberger's algorithm. Computation of Ext. Groebner bases over rings. Primary decomposition of ideals. Dimension theory.

MATH 7200 REAL ANALYSIS I (3) LEC. 3. Departmental approval. Sigma algebras, measures, measurable functions, integratability, properties of Lebesgue measure, density, Lusin's theorem, Egeroff's theorem, product measures, Fubini's theorem. Limit theorems involving pointwise convergence and integration.

MATH 7210 REAL ANALYSIS II (3) LEC. 3. Pr. MATH 7200. L-p spaces, completeness, duals. Weak convergence, norm convergence, pointwise convergence, convergence in measure. Signed and complex measures. Absolute continuity, Lebesgue decomposition. Measure theory, Lebesgue integration, introductory functional analysis.

MATH 7230 FUNCTIONS OF A COMPLEX VARIABLE I (3) LEC. 3. Departmental approval. Complex numbers, analytic functions, derivatives, Cauchy integral theorem and formulae, Taylor and Laurent series, analytic continuation, residues, maximum principles, Riemann surfaces.

MATH 7240 FUNCTIONS OF A COMPLEX VARIABLE II (3) LEC. 3. Pr. MATH 7230. Conformal mappings, families of analytic functions and harmonic analysis.

MATH 7280 ADVANCED THEORY OF ORDINARY DIFFERENTIAL EQUATIONS I (3) LEC. 3. Departmental approval. Existence and continuation theorems for ordinary differential equations, continuity and differentiability with respect to initial conditions, linear systems, differential inequalities, Sturm theory.

MATH 7290 ADVANCED THEORY OF ORDINARY DIFFERENTIAL EQUATIONS II (3) LEC. 3. Pr. MATH 7280. Stability theory, periodic solutions, boundary value problems, disconjugacy of linear equations, Green's functions, upper and lower solutions, a priori bounds methods, current research.

MATH 7310 ALGEBRA I (3) LEC. 3. Departmental approval. Groups, Lagrange's Theorem, normal subgroups, factor groups, Isomorphism and Correspondence Theorems. Symmetric groups, alternating groups, free groups, torsion groups. Introduction to rings, correspondence theorems.

MATH 7320 ALGEBRA II (3) LEC. 3. Pr. MATH 7310. Rings, modules, vector spaces, and semi-simple modules. Commutative rings; prime and primary ideals, PIDs are UFD, factorizations in integral domains, field extensions, the Galois Correspondence Theorem.

MATH 7340 RING THEORY (3) LEC. 3. Pr. MATH 7320. Topics on: commutative rings (Cohen-Seidenberg theorems, Krull Intersection Theorem, Dedekind domains), or noncommutative rings (projective modules over Artinian algebras, representation type, Noether-Skolem Theorem, division algebras).

MATH 7350 ALGEBRAIC GEOMETRY (3) LEC. 3. Pr. MATH 7320 and P/C MATH 7500. Pr. ``C" or better in Math 7320 and Math 7500. Affine and projective varieties, the Ideal-Variety Correspondence, morphisms and rational maps of varieties, Bezout's Theorem, sheaves, schemes, divisors, sheaf cohomology.

MATH 7360 LIE ALGEBRA (3) LEC. 3. General introduction of Lie algebras including their structures and classifications of semisimple Lie algebras.

MATH 7370 MATRICES I (3) LEC. 3. Departmental approval. Jordan form, functions of a matrix, spectral theorem, singular values, norms, quadratic forms, field of values, inertia; topics of current interest.

MATH 7380 MATRICES II (3) LEC. 3. Pr. MATH 7370. Matrix stability and inertia, inequalities for matrix eigenvalues and singular values, The Kronecker and Hadamard matrix products, the exponential and logarithm matrix map; topics of current interest.

MATH 7390 MULTILINEAR ALGEBRA (3) LEC. 3. Pr. MATH 5370 or MATH 6370. Multilinear algebra, symmetry class of tensors, induced operators, generalized matrix functions, and current research topics.

MATH 7400 FUNCTIONAL ANALYSIS I (3) LEC. 3. Pr. MATH 7210. Departmental approval. Bounded linear transformations and functionals on Banach and Hilbert spaces, weak topologies, linear operators, adjoints, compact operators. Banach algebras, spectral theory, Gelfand transform.

MATH 7410 FUNCTIONAL ANALYSIS II (3) LEC. 3. Pr. MATH 7400. C*-algebras, Hermitian, self adjoint elements, functional calculus for commutative algebras. Normal operators on Hilbert space, spectral theorem, applications, symmetric and self-adjoint operators, normal operators, the spectral theorem.

MATH 7440 PARTIAL DIFFERENTIAL EQUATIONS I (3) LEC. 3. Departmental approval. Second order linear elliptic and hyperbolic equations stressing non-linear and numerical problems, characteristic domains of dependence, energy integrals, finite difference schemes, Sobolev spaces, maximum principle.

MATH 7450 PARTIAL DIFFERENTIAL EQUATIONS II (3) LEC. 3. Pr. MATH 7440. Parabolic and hyperbolic equations, stressing numerical problems, characteristics, domains of dependence, energy integrals, reaction-diffusion problems, Navier-Stokes equations, fixed-point and Galerkin methods.

MATH 7460 ADVANCED PERTURBATION METHODS (3) LEC. 3. Departmental approval. Solutions of nonlinear problems and integrals using WKB, Rayleigh-Janzen, Generalized Scales, Latta, van der Pol, Watson, Laplace, Adomian, homotopy, Pade, Liouville-Green and Burmann transformations. May count either AERO 7460/7466 or MATH 7460/7466.

MATH 7500 TOPOLOGY I (3) LEC. 3. Departmental approval. Separation and countability axioms, covering properties, completeness, connectedness, metric spaces and metrizability, product and quotient spaces, function spaces.

MATH 7510 TOPOLOGY II (3) LEC. 3. Pr. MATH 7500. Homotopy, elementary properties of retracts, fundamental groups, covering spaces, computations of fundamental groups.

MATH 7530 CONTINUUM THEORY I (3) LEC. 3. Pr. MATH 7510. Departmental approval. Topics such as inverse limits, decompositions, hyperspaces, special mappings, topological structures from the pathological (indecomposable continua), to the straightforward (Peano continua).

MATH 7540 CONTINUUM THEORY II (3) LEC. 3. Pr. MATH 7530. Topics in continuum theory such as confluent mappings, epsilon mappings, chains, to-the-boundary theorems, relationship to inverse limits, advanced topics.

MATH 7550 SET THEORETIC TOPOLOGY I (3) LEC. 3. Pr. MATH 7510. Departmental approval. Compactifications, covering properties, metrization theorems and generalized metrizable spaces, topological groups.

MATH 7560 SET THEORETIC TOPOLOGY II (3) LEC. 3. Pr. MATH 7550. Topological Groups, Cardinal invariants, use of set-theoretic axioms such as Martin's Axiom, independence results, advanced topics.

MATH 7600 ADVANCED NUMERICAL MATRIX ANALYSIS (3) LEC. 3. Departmental approval. Topics selected from: discretization matrices, sparse matrices, QR-algorithm, symmetric eigenvalue problems, singular value decomposition, pseudo-inverses, simplex method, matrix algorithms for vector computers.

MATH 7610 NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS I (3) LEC. 3. Pr. (MATH 2650 or MATH 2670) and (MATH 2660 or MATH 2667) and (MATH 5630 or MATH 6630) and (MATH 5640 or MATH 6640). Finite difference methods for ordinary and partial differential equations.

MATH 7630 NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS II (3) LEC. 3. Pr. MATH 7610. Finite element methods for partial differential equations.

MATH 7700 GRAPH THEORY (3) LEC. 3. Algorithmic, enumerative and theoretical aspects of graph theory: matchings and factors, colorings, Hamiltonicity, connectivity, trees, extremal graphs, planarity. May count either MATH 6750 or MATH 7700.

MATH 7710 COMPUTATIONAL GEOMETRY (3) LEC. 3. Departmental approval. Design and time-complexity of computer algorithms for geometry problems studying the geometric ideas needed for computer-aided design, computer graphics and robotics.

MATH 7720 INTRODUCTION TO CODING THEORY (3) LEC. 3. Introduction to methods and algorithms for reliable communications through error control coding. BCH, Reed- Solomon, Reed-muller codes, convolutional codes, Berlekamp-Massey, Viterbi, and iterated decoding algorithms.

MATH 7730 ADVANCED TOPICS IN CODING THEORY (3) LEC. 3. Pr. MATH 7720. Departmental approval. Structure and theoretical properties of codes and related algorithms. Relations to other combinatorial and algebraic objects stressed.

MATH 7740 ADVANCED COMBINATORIAL DESIGNS (3) LEC. 3. Topics of current interest and research in combinatorial design theory. Areas included: latin squares, embeddings, Wilson's constructions, quadruple systems, Hadamard designs, graph designs, orthogonal arrays.

MATH 7750 ADVANCED TOPICS IN GRAPH THEORY (3) LEC. 3. Pr. MATH 6750 or MATH 7700. Topics of current interest and recent research in graph theory. May include edge colorings, algebraic graph theory, network flows, factor theory.

MATH 7760 INTRODUCTION TO ALGEBRAIC TOPOLOGY I (3) LEC. 3. Pr. MATH 7510. Departmental approval. Homology of chain complexes, the axioms of homology and their verification, computations of homology groups.

MATH 7770 INTRODUCTION TO ALGEBRAIC TOPOLOGY II (3) LEC. 3. Pr. MATH 7760. Homology with coefficients and universal coefficient theorem theorems, Cohomology and universal coefficient theorems, homology of products of spaces, cup and cap products, duality in manifolds.

MATH 7780 ADVANCED ALGEBRAIC TOPOLOGY I (3) LEC. 3. Departmental approval. Advanced topics in homology, cohomology, and duality with relations to and further study of homotopy theory. Applications to and further study of manifolds and geometric topology.

MATH 7790 ADVANCED ALGEBRAIC TOPOLOGY II (3) LEC. 3. Pr. MATH 7780. Continuation of MATH 7780; advanced topics in homology, cohomology, and duality with relations to and further study of homotopy theory. Applications to and further study of manifolds and geometric topology.

MATH 7800 PROBABILITY I (3) LEC. 3. Pr., a full year of undergraduate mathematical analysis at a level commensurate with MATH 5200/5210. Measure-theoretic foundations, independence, conditioning, martingales, Markov property, stationarity, random walks, Markov chains, Poisson processes.

MATH 7810 PROBABILITY II (3) LEC. 3. Pr. MATH 7800. Classical and modern topics in stochastic processes (Markov chains, Poisson process, Brownian motion). Applications and stochastic models (queues, stationary processes, population dynamics, finances). Credit will not be given for both MATH 7810 and STAT 7810.

MATH 7820 APPLIED STOCHASTIC PROCESSES I (3) LEC. 3. Classical and modern topics in stochastic processes (Markov processes, Random Walks, Martingales, Brownian motion). Introduction to stochastic integrals and differential equations. Applications (queues, population dynamics, chaos, finances). Credit will not be given for both MATH 7820 and STAT 7820.

MATH 7830 APPLIED STOCHASTIC PROCESSES II (3) LEC. 3. Classical and modern topics in stochastic processes (Markov processes, Random Walks, Martingales, Brownian motion). Introduction to stochastic integrals and differential equations. Applications (queues, population dynamics, chaos finances).

MATH 7870 REAL FUNCTIONS AND DESCRIPTIVE SET THEORY I (3) LEC. 3. Pr. MATH 7210 or MATH 7500. Borel classification of sets, the Baire classification of real functions. Derivatives and approximately continuous functions. The Lebesegue density topology.

MATH 7880 REAL FUNCTIONS AND DESCRIPTIVE SET THEORY II (3) LEC. 3. Pr. MATH 7870. Analytic and coanalytic sets. Lebesegue measurable, universally measurable and Marczewski measurable sets and functions. Baire properties. Singular sets. Category analogs to real analysis.

MATH 7950 SEMINAR (1-3) AAB. SU. Course may be repeated for a maximum of 6 credit hours.

MATH 7960 SPECIAL PROBLEMS (1-10) IND. Departmental approval. Topics may vary as needed. Course may be repeated for a maximum of 10 credit hours.

MATH 7970 SPECIAL TOPICS (1-10) IND. Departmental approval. Topics may vary as needed. Course may be repeated with change in topics.

MATH 7980 RESEARCH AND SPECIAL PROJECT IN APPLIED MATHEMATICS (1-10) RES. SU. Departmental approval. For students working on the Master of Applied Mathematics degree with concentration in numerical analysis. Course may be repeated for a maximum of 10 credit hours.

MATH 7990 RESEARCH AND THESIS (1-10) MST. Course may be repeated with change in topics.

MATH 8310 HOMOLOGICAL ALGEBRA I (3) LEC. 3. Pr. MATH 7320. Departmental approval. Homology and cohomology. Hom and Tensor functors; the adjoint isomorphisms, injective/projective modules, flat modules, the classification of certain rings using homological tools.

MATH 8330 INTRODUCTION TO LIE GROUPS (3) LEC. 3. Pr. MATH 7310 or MATH 7370. Introduce Lie groups via matrix groups. Topics include exponential map, Lie algebras, classical groups, structures and classifications, manifolds, representations.

MATH 8960 SPECIAL PROBLEMS (1-10) IND. Departmental approval. Topics may vary as needed. Course may be repeated for a maximum of 15 credit hours.

MATH 8970 SPECIAL TOPICS (1-10) IND. Departmental approval. Topics may vary as needed. Course may be repeated for a maximum of 15 credit hours.

MATH 8990 RESEARCH AND DISSERTATION (1-10) DSR. Course may be repeated with change in topics.

Physics Courses

PHYS 1000 FOUNDATIONS OF PHYSICS (4) LEC. 3. LAB. 2. Science Core. Newton's Laws, momentum and energy, solids, liquids, gases, plasma, thermodynamics, electricity, magnetism, light, atomic and nuclear physics. Students who have previous credit in any higher-numbered physics course may not receive credit.

PHYS 1001 FOUNDATIONS OF PHYSICS LABORATORY (1) LAB. 2. Coreq. PHYS 1003. Core-curriculum laboratory course in physics focusing on practical applications and hands-on experience. Topics include: Newton's Laws, momentum and energy, solids, liquids, gases, plasma, thermodynamics, electricity, magnetism, light, atomic and nuclear physics.

PHYS 1100 PHYSICS ORIENTATION (1) LEC/SEM. SU. The course will provide incoming Physics majors with an orientation to the Physics program and will develop critical thinking and professional skills that complement academic and research training. Students will be exposed to aspects of physics research through a broad range of topical discussions with the instructor, other faculty and/or outside speakers.

PHYS 1150 ASTRONOMY (4) LEC. 3. LAB. 3. Science Core. Open to non-science majors. Earth, the solar system, stars, neutron stars, black holes, supernova, galaxies, the expanding universe, and modern cosmological theories.

PHYS 1400 PHYSICS FOR AVIATORS (4) LEC. 3. LAB. 3. Pr. (MATH 1130 or MATH 1150 or MATH 1610 or MATH 1617) and SCMH 1010. Departmental approval. The course provides students with an overview of introductory physics topics such as kinematics, laws of motion, conservation laws, thermodynamics, waves, basic electrical circuits, magnetic fields, and optics essential as a foundation of aviation. The course will specifically utilize examples and problems related to aviation.

PHYS 1500 GENERAL PHYSICS I (4) LEC. 3. LAB. 3. Pr. MATH 1130 or MATH 1133 or MATH 1150 or MATH 1153 or P/C MATH 1610 or P/C MATH 1613 or P/C MATH 1617 or P/C MATH 1620 or P/C MATH 1623 or P/C MATH 1627 or P/C MATH 1710 or P/C MATH 1720 or P/C MATH 2630 or P/C MATH 2637. Science Core. Introduction to Newton's Laws, gravitation and cosmology, concept of conservation laws, solids and fluids, thermodynamics. Math at level of MATH 1130 or higher is expected. Credit will not be given for both PHYS 1500 and PHYS 1600 or PHYS 1607.

PHYS 1510 GENERAL PHYSICS II (4) LEC. 3. LAB. 3. Pr. PHYS 1500 or PHYS 1600 or PHYS 1607. Science Core. Electricity and magnetism, AC circuits, waves, nuclear physics, radioactivity and particle physics. Physics at the level of PHYS 1500 or higher is expected. Credit will not be given for both PHYS 1510 and PHYS 1610 or PHYS 1617.

PHYS 1600 ENGINEERING PHYSICS I (4) LEC. 3. LAB. 3. Pr. MATH 1610 or MATH 1613 or MATH 1617 or P/C MATH 1620 or P/C MATH 1623 or P/C MATH 1627 or P/C MATH 2630 or P/C MATH 2637. Science Core. Introduction to Newton's Laws, gravitation, cosmology, conservation of energy, momentum and angular momentum, special relativity, and fluids using introductory calculus. Math at the level of MATH 1610 or higher is required as a prerequisite. Credit will not be given for both PHYS 1500 and PHYS 1600 or PHYS 1607.

PHYS 1607 HONORS PHYSICS I (4) LEC. 3. LAB. 3. Pr. Honors College. Science Core. Honors version of PHYS 1600. Membership in the Honors College or Departmental approval required. Recommended for Physics majors. Math at the level of MATH 1610 or higher is required as a prerequisite. Credit will not be given for both PHYS 1500 and PHYS 1600 or PHYS 1607.

PHYS 1610 ENGINEERING PHYSICS II (4) LEC. 3. LAB. 3. Pr. (PHYS 1600 or PHYS 1607) and (MATH 1620 or MATH 1623 or MATH 1627). Science Core. Thermodynamics, electricity and magnetism, simple AC circuits, waves, and geometric optics. Physics at the level of PHYS 1600 or higher is expected. Math at the level of MATH 1620 or higher is required as a prerequisite. Credit will not be given for both PHYS 1510 and PHYS 1610 or PHYS 1617.

PHYS 1617 HONORS PHYSICS II (4) LEC. 3. LAB. 3. Pr. Honors College. MATH 1620 and PHYS 1600 or PHYS 1607. Science Core. Honors version of PHYS 1610. Membership in the Honors College or Departmental approval required. Recommended for Physics majors. Math at the level of MATH 1620 or higher is required as a prerequisite. Physics at the level of PHYS 1600 or higher is expected. Credit will not be given for both PHYS 1510 and PHYS 1610 or PHYS 1617.

PHYS 2100 INTERMEDIATE MECHANICS (3) LEC. 3. Pr. (PHYS 1610 or PHYS 1617) and (P/C MATH 2630 or P/C MATH 2637 or P/C MATH 2633). Principles and applications of Newtonian mechanics, noninertial reference frames, harmonic motion, central forces, rigid bodies, introduction to Lagrangian and Hamiltonian mechanics.

PHYS 2200 INTRODUCTORY QUANTUM PHYSICS AND RELATIVITY (3) LEC. 3. Pr. PHYS 1617 or PHYS 1610. Observational foundations of quantum physics, relativity and developments of several branches of physics up to their present frontiers.

PHYS 2300 PHYSICS LABORATORY SKILLS (3) LEC. 1. LAB. 5. Pr. PHYS 1617 or PHYS 1610. The measurement process and its unavoidable uncertainties; standard laboratory instruments; data analysis techniques and tools.

PHYS 2400 MATHEMATICAL AND COMPUTATIONAL METHODS OF PHYSICS (3) LEC. 3. Pr. (MATH 2630 or MATH 2637) and (PHYS 1610 or PHYS 1617). This course introduces students of physics and related fields to mathematical tools and techniques that are needed later in the physics curriculum. Topics include complex numbers, linear algebra, linear and partial differential equations, Fourier series and integrals, and vector calculus with physical application. Students will be introduced to the Python-based computational toolkits to aid in their problem solving.

PHYS 3100 INTERMEDIATE ELECTRICITY AND MAGNETISM (3) LEC. 3. Pr. (PHYS 1617 or PHYS 1610) and (MATH 2630 or MATH 2637 or MATH 2730). Electrostatics, Magnetostatics, Laplace's equation, boundary-value problems, multipole expansions, dielectric and magnetic materials. Faraday's law, AC circuits, and Maxwell's equations.

PHYS 3200 STATISTICAL THERMODYNAMICS (3) LEC. 3. Pr. PHYS 2200. The basic laws of thermodynamics, kinetic theory, and statistical mechanics including entropy, the partition function, free energy, and the quantum statistics of Fermions and Bosons.

PHYS 3500 PHYSICS OF THE WORLD AROUND US (3) LEC. 3. Interdisciplinary topic e.g. Biophysics, Astrophysics, Physics of Weather, Physics of Music, or Environmental Physics. Course may be repeated for a maximum of 12 credit hours.

PHYS 3610 APPLICATIONS OF MODERN PHYSICS (3) LEC. 3. Pr. PHYS 2200. Survey of contemporary subdisciplines in physics and technology that are based on the principles of quantum mechanics such as atomic/molecular physics, statistical mechanics, condensed matter/material science, astrophysics, nuclear physics, and elementary particle physics.

PHYS 3620 OBSERVATIONAL ASTRONOMY (3) LEC. 3. Pr. PHYS 1600 and (MATH 1620 or MATH 1627). This course will introduce students to astronomy from an observational perspective. Students will first learn about astronomical images and data analysis and discuss the physics of the solar system, stars, galaxies, and the universe. As part of the course, students will collect and analyze astronomical data using departmental telescopes and access publicly available data from facilities to demonstrate astrophysical principles.

PHYS 4100 FUNDAMENTALS OF QUANTUM MECHANICS (3) LEC. 3. Pr. PHYS 2200 and MATH 2650. Schrodinger equation, stationary and time-dependent solutions, spin and the exclusion principle, perturbation theory, scattering and resonances, the interpretation of quantum mechanics.

PHYS 4200 FUNDAMENTAL EXPERIMENTS IN PHYSICS (3) LEC. 1. LAB. 5. Pr. PHYS 2300. Experiments that demonstrate the fundamental ideas and facts of physics. Data will be collected, analyzed, interpreted and reported in comprehensive lab reports.

PHYS 4930 DIRECTED STUDIES IN PHYSICS (1-5) IND. Departmental approval. Student will study a topic of interest under the direction of a faculty member. Course may be repeated for a maximum of 10 credit hours.

PHYS 4967 HONORS SPECIAL PROBLEMS (1-3) IND. Pr. Honors College. Departmental approval.. Course may be repeated for a maximum of 6 credit hours.

PHYS 4980 UNDERGRADUATE RESEARCH IN PHYSICS (1-5) IND. Departmental approval. Student will work under the direction of a faculty member on a problem of mutual interest. Course may be repeated for a maximum of 10 credit hours.

PHYS 4997 HONORS THESIS (1-6) IND. Pr. Honors College. Departmental approval.. Course may be repeated for a maximum of 6 credit hours.

PHYS 5100 APPLICATIONS OF QUANTUM MECHANICS (3) LEC. 3. Pr. PHYS 4100. Quantum mechanics applied to atomic physics, solid state physics, nuclear physics, particle physics, electrodynamics, and cosmology.

PHYS 5200 TEACHING AND LEARNING OF STEM (3) LEC. 3. This course will provide students with a basic knowledge of the relevant research in cognitive psychology and learning science and the ability to apply that knowledge to enhance their ability to learn and teach science, particularly at the undergraduate level. This course will involve readings, discussion, and application of the ideas through the creation of learning activities. It is suitable for advanced undergraduates and graduate students with some science background.

PHYS 5300 OPTICS (3) LEC. 2. LAB. 2. Pr. PHYS 1617 or PHYS 1610. An overview of optics to include geometrical optics, electromagnetic waves, interference of light, diffraction of light, optical detectors, instrumentation and displays.

PHYS 5500 FUNDAMENTALS OF PHYSICS (3) LEC. 3. A subject such as Wave Mechanics, Mathematical Physics, Nonlinear Dynamics, Optics, Nuclear Physics, Elementary Particles, Relativity, or Electrodynamics. Course may be repeated for a maximum of 9 credit hours.

PHYS 5600 FRONTIERS OF PHYSICS (3) LEC. 3. A subject from the research areas in the Department such as Solid State, Atomic, Plasma, Space, or Computational Physics will be selected by the lecturer. Course may be repeated for a maximum of 9 credit hours.

PHYS 5610 INTRODUCTION TO SOLID STATE PHYSICS (3) LEC. 3. Lattice vibrations, band description of electronic states in metals, semiconductors and insulators, and magnetic, superconducting and defect properties of solids.

PHYS 5620 SURVEY OF PLASMA PHYSICS (3) LEC. 3. Pr. PHYS 3100. Single particle motions: fluid description of a plasma; plasma waves and oscillations; kinetic description, diffusion, and resistivity; non-linear effects.

PHYS 5900 PHYSICS TEACHING SEMINAR (1) LEC. 1. LAB. 0. SU. Introduction to issues, resources and best practices related to the teaching of physics. Physics undergraduate student or instructor approval required.

PHYS 6100 APPLICATIONS OF QUANTUM MECHANICS (3) LEC. 3. Quantum mechanics applied to atomic physics, solid state physics, nuclear physics, particle physics, electrodynamics, and cosmology.

PHYS 6200 TEACHING AND LEARNING OF STEM (3) LEC. 3. This course will provide students with a basic knowledge of the relevant research in cognitive psychology and science education and the ability to apply that knowledge to enhance their ability to learn and teach science, particularly at the undergraduate level. The course will involve readings, discussion, and application of the ideas through the creation of learning activities. It is suitable for advanced undergraduates and graduate students with some science background. Prerequisite: B.S. in a STEM discipline or 20+ credit hours of STEM coursework.

PHYS 6300 OPTICS (3) LEC. 2. LAB. 2. An overview of optics to include geometrical optics, electromagnetic waves, interference of light, diffraction of light, optical detectors, instrumentation and displays.

PHYS 6500 FUNDAMENTALS OF PHYSICS (3) LEC. 3. A subject such as Wave Mechanics, Mathematical Physics, Nonlinear Dynamics, Optics, Nuclear Physics, Elementary Particles, Relativity, or Electrodynamics. Course may be repeated for a maximum of 9 credit hours.

PHYS 6600 FRONTIERS OF PHYSICS (3) LEC. 3. A subject from the research areas in the Department such as Solid State, Atomic, Plasma, Space, or Computational Physics will be selected by the lecturer. Course may be repeated for a maximum of 9 credit hours.

PHYS 6610 INTRODUCTION TO SOLID STATE PHYSICS (3) LEC. 3. Lattice vibrations, band description of electronic states in metals, semiconductors and insulators, and magnetic, superconducting and defect properties of solids.

PHYS 6620 SURVEY OF PLASMA PHYSICS (3) LEC. 3. Single particle motions: fluid description of a plasma; plasma waves and oscillations; kinetic description, diffusion, and resistivity; non-linear effects.

PHYS 6900 PHYSICS TEACHING SEMINAR (1) LEC. 1. LAB. 0. SU. Graduate Students in Physics or Departmental Approval. Introduction to issues, resources and best practices related to the teaching of physics.

PHYS 7100 CLASSICAL MECHANICS (3) LEC. 3. Lagrangian and Hamiltonian formulations of mechanics, canonical transforms. Hamilton-Jacobi theories, action angle variables, rigid rotators, normal modes, and mechanics of continuous media.

PHYS 7200 ELECTRICITY AND MAGNETISM I (3) LEC. 3. Electrostatics, special function expansions, magnetostatics, linear media and Maxwell's equations.

PHYS 7250 ELECTRICITY AND MAGNETISM II (3) LEC. 3. Time dependent Maxwell theory, wave propagation and dispersion, diffraction, scattering, radiation, relativistic covariance and applications.

PHYS 7300 QUANTUM MECHANICS I (3) LEC. 3. Schrodinger wave equation, discrete and continuous spectra, matrix formulation, perturbation theory.

PHYS 7350 QUANTUM MECHANICS II (3) LEC. 3. Time-dependent approximation methods, relativistic wave equations, and second quantization.

PHYS 7400 STATISTICAL PHYSICS (3) LEC. 3. Thermodynamic quantities, equilibrium ensembles for classical and quantum systems, fluctuations, phase transitions and critical phenomena.

PHYS 7850 GRADUATE PHYSICS RESEARCH SEMINAR (1) LEC. 1. LAB. 0. SU. This course is designed to develop and expand incoming graduate student's knowledge and experience with state-of-the-art research as it is done in the Auburn University Department of Physics.

PHYS 7900 DIRECTED STUDIES (1-5) IND. SU. Student will work with a faculty member to study a topic of interest. Course may be repeated for a maximum of 6 credit hours.

PHYS 7930 DIRECTED STUDIES (1-5) IND. Student will work with a faculty member to study a topic of interest. Course may be repeated for a maximum of 6 credit hours.

PHYS 7950 PHYSICS COLLOQUIUM (1) SEM. SU. Offers a series of talks presented by invited speakers on broad fields of physics. Check with graduate advisor for credit allowed. Course may be repeated for a maximum of 6 credit hours.

PHYS 7970 SPECIAL TOPICS IN PHYSICS (1-5) SEM. Seminar or lecture series in a rapidly advancing specialty of physics. Course may be repeated for a maximum of 6 credit hours.

PHYS 7990 RESEARCH AND THESIS (1-10) MST. May be repeated as often as is appropriate. Course may be repeated with change in topics.

PHYS 8100 RELATIVISTIC QUANTUM MECHANICS (3) LEC. 3. Dirac equation, 1D barrier scattering, 3D central potentials, S-matrix theory, Feynman diagrams, quantum electrodynamics, renormalization, tree and loop level problems.

PHYS 8200 INTRODUCTION TO ATOMIC PHYSICS (3) LEC. 3. Hydrogen atom, Hartree-Fock theory, radiative transitions, photoionization, autoionization, electron-atom scattering.

PHYS 8600 PLASMA PHYSICS (3) LEC. 3. A detailed study of plasma physics including particle orbit theory, magnetohydrodynamics, plasma waves and transport phenomena.

PHYS 8700 SOLID STATE PHYSICS (3) LEC. 3. Atomic and electronic structures of solids and the associated electical, optical and transport properties.

PHYS 8900 DIRECTED STUDIES (1-5) IND. SU. Students will work with a faculty member to study a topic of interest. Course may be repeated for a maximum of 10 credit hours.

PHYS 8930 DIRECTED STUDIES IN ADVANCED PHYSICS (1-5) IND. Student will work with a faculty member to study a topic of interest. Course may be repeated for a maximum of 10 credit hours.

PHYS 8970 SPECIAL TOPICS IN ADVANCED PHYSICS (1-5) LEC. Departmental approval. Topic at the forefront of physics research will be chosen by the lecturer. Course may be repeated for a maximum of 10 credit hours.

PHYS 8990 RESEARCH AND DISSERTATION (1-10) DSR. May be repeated as often as is appropriate. Course may be repeated with change in topics.

Sciences Math Courses

SCMH 1010 CONCEPTS OF SCIENCE (4) LEC. 3. LAB. 2. Interdisciplinary course which presents major scientific concepts in physical and biological sciences. After taking SCMH 1010, students can complete core science requirement series by taking BIOL 1010, CHEM 1010, GEOL 1100, PHYS 1000, or PHYS 1150. Science Core. May count either SCMH 1010 or SCHM 1013 or SCHM 1017.

SCMH 1017 HONORS CONCEPTS OF SCIENCE (4) LEC. 3. LAB. 2. Pr. Honors College. Interdisciplinary course for Honors students which presents major scientific concepts in physical and biological sciences. After taking SCMH 1017, students can complete core science requirement series by taking BIOL 1010, CHEM 1010, GEOL 1100, GEOL 1107, PHYS 1000, or PHYS 1150. Science core. Credit will not be given for both SCMH 1017 and SCMH 1010.

SCMH 1100 COSAM ORIENTATION (1) LEC. 1. Introduction to the College of Sciences and Mathematics and its resources, exploration of STEM careers, orientation to campus resources and facilities, and assistance with academics and transition to Auburn.

SCMH 1890 PRE-HEALTH PROFESSIONS ORIENTATION (1) LEC. 1. SU. Orientation and guidance tailored for non-freshmen and transfer students planning to seek admission into health professions schools and programs such as dentistry, medicine, optometry, pharmacy, physician assistant, and physical therapy.

SCMH 1897 HONORS PRE-HEALTH PROFESSIONS ORIENTATION (1) LEC. 1. SU. Pr. Honors College. Orientation and guidance tailored for non-freshmen and transfer students planning to seek admission into health professions schools and programs such as dentistry, medicine, optometry, pharmacy, physician assistant, and physical therapy.

SCMH 1950 COSAM MAJOR AND CAREER EXPLORATION (1) LEC. 1. Introduction to majors offered by the College of Sciences and Mathematics, motivation and skills for academic success, departmental resources and facilities, and exploration of careers in Sciences and Mathematics.

SCMH 3010 INQUIRY EXPERIENCES FOR SCIENCE TEACHERS (3) LEC. 2. LAB. 2, LLB. 0. This course introduces students to the nature and process of science through project-based instruction. It highlights experimental design, data analysis, and presenting scientific work both orally and in writing. This is a writing enriched course in the required AUTeach course sequence.

SCMH 3050 SERVICE-LEARNING EXPERIENCES IN UNDERSERVED POPULATIONS (3) LEC/PRA. 2. Service learning with a focus on underserved populations. Students engage in experiential learning to meet community needs, enhancing their cultural competence and civic responsibility. Ideal for those in helping professions, STEM, and Pre-Health, it strengthens community partnerships and understanding of complex social issues. Departmental approval required.

SCMH 3810 PRE-PHYSICAL THERAPY PRACTICUM (1) PRA. 2. SU. Departmental approval. Direct observation of physical therapists at an approved facility in the Auburn-Opelika area.

SCMH 3890 PRE-MEDICAL PRECEPTORSHIP (1) LAB. 2. SU. Departmental approval. Direct observation and interaction with physicians at East Medical Center and in individual medical offices.

SCMH 3950 SEMINAR ON MCAT AND DAT SCIENTIFIC FOUNDATIONS (2) LEC. 2. SU. Pr. SCMH 1890 and BIOL 1030 and CHEM 2070. A deep dive into the foundational scientific concepts required for the Medical College Admission Test (MCAT) and the Dental Admission Test (DAT). The course emphasizes interactive discussions and practice of the core science subjects pertinent to the tests, supplemented by problem-solving sessions and mock exams to ensure comprehensive preparation. Department approval.

SCMH 4700 PEDAGOGY OF PEER-LED INSTRUCTION (1) LEC. 1. Pedagogical training course on effective instructional strategies in the STEM disciplines integrating educational theory, pedagogy, content, and practice. Departmental approval required.

SCMH 4920 SCIENCES AND MATHEMATICS INTERNSHIP (1-4) DSL. 8-16. SU. Practical on-the-job training in some area related to Sciences and Mathematics. Course may be repeated for a maximum of 6 credit hours.

SCMH 4970 UNDERGRADUATE SPECIAL TOPICS IN SCIENCES AND MATHEMATICS (1-4) LEC. 1-4. Undergraduate study of specialized topics related to Sciences and Mathematics. Departmental approval required. Course may be repeated for a maximum of 8 credit hours.

SCMH 4980 SCIENCES AND MATHEMATICS UNDERGRADUATE RESEARCH (1-5) IND/RES. Departmental approval. Directed research in an area of specialty within Sciences and Mathematics and interdisciplinary fields. Course may be repeated for a maximum of 6 credit hours.

SCMH 5010 CLINICAL APPLICATIONS I (3) LEC. 2. A study of the clinical/personal issues facing primary care physicians in the rural community. Must be enrolled in the Rural Medicine Program.

SCMH 5020 CLINICAL APPLICATIONS II (3) LEC. 2, CLN/LEC. 1. Pr. SCMH 5010. A continuation of SCMH 5010.

SCMH 5050 PHYSICAL EXAMINATION TECHNIQUES FOR CLINICAL APPLICATIONS (1) LEC. 1. Undergraduate-level course focused on mastering physical examination techniques for medical clinic applications; enhances students' understanding of anatomy and physiology through hands-on patient interactions; develops critical professionalism and communication skills necessary for effective patient care. Departmental approval required.

SCMH 5940 GLOBAL STUDY/TRAVEL IN SCIENCES AND MATHEMATICS (1-12) AAB. Departmental approval. Application required. Students international study travel on topics relevant to Sciences and Mathematics. Course may be repeated for a maximum of 12 credit hours.

SCMH 5970 ADVANCED SPECIAL TOPICS IN SCIENCES AND MATHEMATICS (1-3) LEC. 1-3. Advanced study of specialized topics related to Sciences and Mathematics. Departmental approval required. Course may be repeated for a maximum of 6 credit hours.

SCMH 6010 CLINICAL APPLICATIONS I (3) LEC. 2, CLN/LEC. 2. Departmental approval. A study of the clinical/personal issues facing primary care physicians in the rural community. Must be enrolled in the Rural Medicine Program.

SCMH 6020 CLINICAL APPLICATIONS II (3) LEC. 2, CLN/LEC. 2. Pr. SCMH 6010. Departmental approval. A study of the clinical/ societal issues facing primary care physicians in the rural community. Must be enrolled in the Rural Medicine Program.

SCMH 6050 PHYSICAL EXAMINATION TECHNIQUES FOR CLINICAL APPLICATIONS (1) LEC. 1. Graduate-level course focused on mastering physical examination techniques for medical clinic applications; enhances students' understanding of anatomy and physiology through hands-on patient interactions; develops critical professionalism and communication skills necessary for effective patient care. Departmental approval required.

SCMH 6970 ADVANCED SPECIAL TOPICS IN SCIENCES AND MATHEMATICS (1-3) LEC. 1-3. Departmental approval. Advanced study of specialized topics related to Sciences and Mathematics. Course may be repeated for a maximum of 6 credit hours.

SCMH 8150 DOCTORAL SEMINAR ON CURRENT TOPICS IN SCM RESEARCH (3) LEC. 3. The class is a rigorous, seminar style course on Current Topics in SCM Research. Each class will familiarize you with the key insights in a current research topic (i.e., the “hot topics”) in the SCM area. The instructor has chosen to cover a broad range of active research to give you an overview of topics that people are working on currently and are likely to work on in the future.

Statistics Courses

STAT 1010 DATA EPISTEMOLOGY (3) LEC. 3. This course will provide the basic tools to understand, interpret and reason with data in order to critically think about data-driven knowledge. Acquiring notions of logical reasoning and data literacy, the students will know how to analyze and ask the correct questions regarding data collection, representation and interpretation.

STAT 2010 STATISTICS FOR SOCIAL AND BEHAVIOR SCIENCES (4) LEC. 3. LAB. 2. Pr. MATH 1100 or MATH 1120 or MATH 1123 or MATH 1130 or MATH 1133 or MATH 1150 or MATH 1153 or MATH 1610 or MATH 1613 or MATH 1617. Introduction to basic principles of statistical reasoning and statistical procedures used in data analysis in the social and behavioral sciences.

STAT 2017 HONORS STATISTICS FOR SOCIAL AND BEHAVIORAL SCIENCES (4) LEC. 3. LAB. 2. Pr. Honors College. Introduction to statistical data analysis, statistical packages, and APA-style statistical reporting use in research in Psychology and other social and behavioral sciences.

STAT 2510 STATISTICS FOR BIOLOGICAL AND HEALTH SCIENCES (3) LEC. 3. Pr. MATH 1100 or MATH 1120 or MATH 1123 or MATH 1130 or MATH 1133 or MATH 1150 or MATH 1153 or MATH 1610 or MATH 1613 or MATH 1617 or MATH 1680 or MATH 1683. Introduction to statistical concepts, reasoning and methods used in data analysis, descriptive statistics, sampling distributions, statistical inference, confidence intervals, regression or correlation, contingency tables. Students who have previous credit in any higher-numbered math course may not receive credit.

STAT 2600 BUSINESS ANALYTICS I (3) LEC. 3. Pr. MATH 1680 or MATH 1683 or P/C COMP 1000 or COMP 1003. Introduction to analytics in business including use of data to make business decisions, basic predictive business modeling, and communication of analytical results. Minimum 2.0 overall cumulative undergraduate GPA.

STAT 2610 STATISTICS FOR BUSINESS AND ECONOMICS (3) LEC. 3. Pr. MATH 1690. Introduction to statistical analysis, theory, and interpretation used in business and economics.

STAT 2710 STATISTICAL COMPUTING (1) LEC. 1. Pr. (P/C STAT 2010 or P/C STAT 2017) and (P/C STAT 2510 or STAT 2513) and P/C STAT 2610 and P/C STAT 3010. Introduction to basic statistical computing programs and methods..

STAT 3010 STATISTICS FOR ENGINEERS AND SCIENTISTS (3) LEC. 3. Pr. MATH 1610 or MATH 1613 or MATH 1617 or MATH 1710. Introduction to statistical methods and analysis used in engineering and science.

STAT 3600 PROBABILITY AND STATISTICS I (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627 or MATH 1720. Calculus-based introduction to probability and statistics with an emphasis on practical problem-solving.

STAT 3610 PROBABILITY AND STATISTICS II (3) LEC. 3. Pr. STAT 3600. Departmental approval. Continuation of STAT 3600.

STAT 3611 PROBABILITY AND STATISTICS II LABORATORY (1) LAB. 2. Departmental approval. Coreq. STAT 3610. The application of statistical techniques from STAT 3610.

STAT 4000 INTRODUCTION TO DATA SCIENCE (3) LEC. 3. Pr. STAT 2010 or STAT 2017 or STAT 2510 or STAT 2513 or STAT 2600 or STAT 3010 or STAT 3600 or STAT 3603. Departmental approval. This course will provide an entry level introduction to the field of data science. The course will cover the essential statistical and computational tools including programming and analytical models, as well as teamwork, communication, and critical thinking.

STAT 4610 APPLIED REGRESSION ANALYSIS (3) LEC. 3. Pr. STAT 3610 or STAT 3010. Least squares estimation, hypothesis testing and confidence interval estimation in regression; simple, polynomial and multiple linear regression; residual and lack-of-fit analysis; use of dummy variables; multiple and partial correlation analysis; model building algorithms and model comparisons; transformations.

STAT 4620 APPLIED NONPARAMETRIC STATISTICS (3) LEC. 3. Review of elementary probability; goodness-of-fit tests; for singles and several location parameters; tests for scale parameters; distribution tests; measures of association; bootstrap and permutation tests.

STAT 4630 APPLIED TIME-SERIES ANALYSIS (3) LEC. 3. ARIMA models: the autoregressive process, the moving average process, and the ARMA process; forecasting, errors and confidence intervals, updating forecast models; estimation; model building and assessment; applications in econometrics.

STAT 4650 INTRODUCTION TO BAYESIAN STATISTICS (3) LEC. 3. LAB. 0. Pr. STAT 3610. This course will develop an introduction to the Bayesian thinking and the Fundamental Concepts in Bayesian Statistics.

STAT 4970 SPECIAL TOPICS IN STATISTICS (1-3) LEC. Departmental approval. Special topics designed to meet the needs and interest of students. Course may be repeated for a maximum of 6 credit hours.

STAT 4980 UNDERGRADUATE RESEARCH IN STATISTICS AND DATA SCIENCE (1-3) IND/RES. Directed research in Statistics and Data Science. Departmental Approval. Course may be repeated for a maximum of 3 credit hours.

STAT 5000 INTERMEDIATE STATISTICAL METHODS FOR DATA SCIENCE (3) LEC. 3. Pr. STAT 3610 or STAT 3010. C Grade or better in STAT3610 or STAT3010 or equivalent. Principles of probability and statistics, multiple testing and bootstrapping, parametric and nonparametric regression, generalized linear models, time dependent data with a focus on Data Science.

STAT 5110 SAS PROGRAMMING AND APPLICATIONS (3) LEC. 3. Pr. STAT 3010 or STAT 3610. Emphasis is placed on using SAS routines to obtain statistical analyses for common statistical methods and interpreting output.

STAT 5210 R PROGRAMMING FOR DATA SCIENCE (3) LEC. 3, LEC. 3. Pr. STAT 2510 or STAT 3010 or STAT 3610. Fundamental concepts on R programming language and popular R packages. Topics include basic syntax, R objects, control flow, file input and output, building R packages, data manipulation, visualization, interface to C, parallel computing, building web apps.

STAT 5330 DATA BASED DECISION MAKING USING SIX SIGMA (3) LEC. 3. Pr. STAT 3610 and INSY 4330. Departmental approval. Covers statistical tools needed for implementation of "Six Sigma", "Learn Six Sigma" and "Design for Six Sigma". Credit will not be given for both STAT 5330 and STAT 6330/ 6336.

STAT 5600 PROBABILITY AND STATISTICS FOR DATA SCIENCE (3) LEC. 3. Pr. STAT 3610 or (STAT 3010 and MATH 1620) or (STAT 3010 and MATH 1627). Grade of C or better in STAT 3610 or STAT 3010 and Grade of C or better in MATH 1620 or equivalent. Basic probability theory, random variables, multivariate random variables, expectation, random processes, times series, convergence of random processes, Markov chains, maximum likelihood estimation, Bayesian statistics, hypothesis testing, prediction, sampling and resampling methods, multivariate statistics.

STAT 5610 FUNDAMENTALS OF STATISTICAL INFERENCE I (3) LEC. 3. Pr. STAT 3600 and STAT 3610. Probability and independence; discrete and continuous distributions, random variable, moments; joint, marginal, conditional distributions; exponential families; bivariate transformations, covariance and correlation; multivariate distributions, sums of random variables, sampling distributions for normal data, order statistics; convergence of random variables, principles of data reduction; the likelihood principle.

STAT 5620 FUNDAMENTALS OF STATISTICAL INFERENCE II (3) LEC. 3. Pr. STAT 5610. Properties of random samples; generating a random sample; point and interval estimation; hypothesis testing; Analysis of Variance: one-way ANOVA, multi-way ANOVA and ANCOVA; linear regression, multiple regression and GLM methods, logistic regression.

STAT 5630 SAMPLE SURVEY, DESIGN AND ANALYSIS (3) LEC. 3. Pr. STAT 3600. Departmental approval. Estimation of means, proportions, finite populations, stratified sampling, systematic sampling ratio estimations.

STAT 5650 STATISTICAL LEARNING (3) LEC. 3. Pr. STAT 5000. or equivalent. Introduction to modern methods and algorithms in Statistics. Topics include common supervised and unsupervised learning methods such as linear regression, logistic regression, regularization, non-parametric regression, model assessment and selection, neural network, support vector machines, principal components analysis.

STAT 5670 PROBABILITY AND STOCHASTIC PROCESSES I (3) LEC. 3. Pr. MATH 2630 or MATH 2637. Random variables, discrete and absolutely continuous distributions. Poisson process, expectation and conditional expectation. Moment generating functions, limit distributions. Emphasis on probabilistic reasoning and problem solving. Credit will not be given for both STAT 5670 and MATH 5670.

STAT 5680 PROBABILITY AND STOCHASTIC PROCESSES II (3) LEC. 3. Pr. STAT 5670 or MATH 5670. Multivariate distributions, Central Limit Theorem, Laplace transforms, convolutions, simulations, renewal processes Continuous-time Markov chains, Markov renewal and semi-regenerative processes, Brownian motion and diffusion. Credit will not be given for both STAT 5680 and MATH 5680.

STAT 5690 CHAOTIC AND RANDOM PHENOMENA (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627. Statistics and modeling of random phenomena in connection to computational complexity, data analysis, processes of chance and chaotic nonlinear systems. Credit will not be given for both STAT 5690 and MATH 5690.

STAT 6000 INTERMEDIATE STATISTICAL METHODS FOR DATA SCIENCE (3) LEC. 3. Pr. STAT 3610 or STAT 3010. C Grade or better in STAT 3610 or STAT 3010 or equivalent. Principles of probability and statistics, multiple testing and bootstrapping, parametric and nonparametric regression, generalized linear models, time-dependent data.

STAT 6110 SAS PROGRAMMING AND APPLICATIONS (3) LEC. 3. Pr. STAT 3010 or STAT 3610 or P/C STAT 7000. Emphasis is placed on using SAS routines to obtain statistical analyses for common statistical methods and interpreting output.

STAT 6210 R PROGRAMMING FOR DATA SCIENCE (3) LEC. 3. Pr. STAT 2510 or STAT 3010 or STAT 3610. Fundamental concepts on R programming language and popular R packages. Topics include basic syntax, R objects, control flow, file input and output, building R packages, data manipulation, visualization, interface to C, parallel computing, building web apps.

STAT 6330 DATA BASED DECISION MAKING USING SIX SIGMA (3) LEC. 3. Pr. STAT 3610 and INSY 4330. Departmental approval. Covers statistical tools needed for implementation of "Six Sigma", "Learn Six Sigma" and "Design for Six Sigma". Credit will not be given for both STAT 5330 and STAT 6330/ 6336.

STAT 6600 PROBABILITY AND STATISTICS FOR DATA SCIENCE (3) LEC. 3. Pr. STAT 3610 or (STAT 3010 and MATH 1620) or (STAT 3010 and MATH 1627). Grade of C or better in STAT 3610 or STAT 3010 and Grade of C or better in MATH 1620 or equivalent. Basic probability theory, random variables, multivariate random variables, expectation, random processes, times series, convergence of random processes, Markov chains, Maximum Likelihood Estimation, Bayesian statistics, hypothesis testing, prediction, Sampling and Resampling methods, multivariate statistics.

STAT 6610 FUNDAMENTALS OF STATISTICAL INFERENCE I (3) LEC. 3. Pr. STAT 3600 and STAT 3610. This class is first of a two-semester sequence in probability and statistics taught at a calculus-based level. Students should gain an understanding of probability and random variables in order to have the foundation to conduct statistical inference in STAT 5620/6620.

STAT 6620 FUNDAMENTALS OF STATISTICAL INFERENCE II (3) LEC. 3. Pr. STAT 6610. This class is second of a two-semester sequence in probability and statistics taught at a calculus-based level. Students should gain an understanding of inference for the practice of statistics.

STAT 6630 SAMPLE SURVEY, DESIGN AND ANALYSIS (3) LEC. 3. Pr. STAT 3600. Departmental approval. Estimation of means, proportions, finite populations, stratified sampling systematic sampling ratio estimations.

STAT 6650 STATISTICAL LEARNING (3) LEC. 3. Pr. STAT 6000. or equivalent. Introduction to modern methods and algorithms in Statistics. Topics include common supervised and unsupervised learning methods such as linear regression, logistic regression, regularization, non-parametric regression, model assessment and selection, neural network, support vector machines, principal components analysis.

STAT 6670 PROBABILITY AND STOCHASTIC PROCESSES I (3) LEC. 3. Pr. MATH 2630 or MATH 2637. Random variables, discrete and absolutely continuous distributions. Poisson process, expectation and conditional expectation. Moment generating functions, limit distributions. Emphasis on probabilistic reasoning and problem solving. Credit will not be given for both STAT and MATH 6670.

STAT 6680 PROBABILITY AND STOCHASTIC PROCESSES II (3) LEC. 3. Pr. MATH 6670 or MATH 6676 or STAT 6670 or STAT 6676. Multivariate distributions, Central Limit Theorem, Laplace transforms, convolutions, simulations, renewal processes Continuous-time Markov chains, Markov renewal and semi-regenerative processes, Brownian motion and diffusion. Credit will not be given for both STAT 6680 and MATH 6680.

STAT 6690 CHAOTIC AND RANDOM PHENOMENA (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627. Statistics and modeling of random phenomena in connection to computational complexity, data analysis, processes of chance and chaotic nonlinear systems. Credit will not be given for both STAT 6690 and MATH 6690.

STAT 6830 STATISTICS AND PROBABILITY FOR TEACHERS (3) LEC. 3. Pr. STAT 3010 or STAT 3600 or STAT 3603. Connections of advanced college-level mathematics with the secondary mathematics curriculum, focusing on statistics and probability, to develop mathematical knowledge relevant to teaching. Includes appropriate uses of technology and non-routine mathematics problem solving. Admission to a program in Secondary Mathematics Education or department approval required.

STAT 7000 EXPERIMENTAL STATISTICS I (4) LEC. 4. Departmental approval. Paired and independent sample t-tests, ANOVA, F-tests, contrasts, tests for trends, multiple comparisons, CR and RCB designs of experiments, regression.

STAT 7010 EXPERIMENTAL STATISTICS II (3) LEC. 3. Pr. STAT 7000. Advanced topics in experimental design: writing linear models for experiment-expected mean squares, variance components, nested designs, Latin Square Designs, split plot designs, ANOVA and multiple regression.

STAT 7020 REGRESSION ANALYSIS (3) LEC. 3. Pr. STAT 7000. Departmental approval. Introduction to the method of least squares as it applies to regression and analysis of variance. Simple linear regression, multiple regression, model selection and diagnostics.

STAT 7030 CATEGORICAL DATA ANALYSIS (3) LEC. 3. Pr. STAT 3600 or MATH 3600 or STAT 7000. Departmental approval. Methods for analysis or categorical response data. Topics include Chi-square tests, Likelihood Ratio tests, Logistic Regression, and Loglinear Modeling.

STAT 7040 BIOSTATISTICS (3) LEC. 3. Pr. STAT 7000. Departmental approval. Epidemiology, biometry, methods of survival analysis.

STAT 7100 STATISTICAL ANALYSIS OF SURVEY, AGGREGATE AND LARGE DATA SOURCES (3) LEC. 3. Pr. STAT 2010 or STAT 2017. Departmental approval. Techniques commonly used in multivariate statistical analysis of data sources such as surveys, archival records, and other large data sets. Credit will not be given for STAT 7100 and SOCY 7100.

STAT 7250 PRACTICAL DATA ANALYSIS AND COMPUTATION FOR THE LIFE SCIENCES (3) LEC. 2. LAB. 1. Pr. STAT 7020 or WILD 7150. Data from the life sciences and advanced statistical techniques for data analyses and computaMon are brought together through a cross-fertilization of graduate students in the life sciences, statistics, and mathematics. Focus on production of publication-quality research on student-identified projects.

STAT 7270 EXPERIMENTAL DESIGN IN PSYCHOLOGY (4) LEC. 4. Pr. STAT 7000 and STAT 7020. Introduction to the analysis of data collected under differential experimental designs. Credit will not be given for both STAT 7270 and PSYC 7270.

STAT 7300 ADVANCED ENGINEERING STATISTICS I (3) LEC. 3. Pr. STAT 3610. Departmental approval. Advanced concepts of experimental design including blocking, regression approach to analysis of variance, fractional factorials in base-2, and base-3 designs. Emphasis throughout is on improving industrial products and processes. Credit will not be given for both STAT 7300 and INSY 7300.

STAT 7310 ADVANCED ENGINEERING STATISTICS II (3) LEC. 3. Pr. STAT 7300 or STAT 7306 or INSY 7300 or INSY 7306. Fractional factorial experimentation applied for the purpose of process and quality improvement and optimization, introduction to analysis of covariance, multiple regression analysis, and response surface analysis. Credit will not be given for both STAT 7310 and INSY 7310.

STAT 7600 STATISTICAL THEORY AND METHODS I (3) LEC. 3. Pr. STAT 3600. Departmental approval. Random variables, probability theory, random variables, probability distributions, sampling distributions, convergence.

STAT 7610 STATISTICAL THEORY AND METHODS II (3) LEC. 3. Pr. STAT 7600. Likelihood ratio, regression, ANOVA, categorical data, non-parametric methods, decision theory.

STAT 7620 NONPARAMETRIC STATISTICS (3) LEC. 3. Pr. STAT 3600. Departmental approval. Distribution-free methods of statistical inference. Sign, Wilcoxon signed-rank, and Mann-Whitney tests for location, the Chi-Square and Kolmogorov-Smirnov tests for goodness-of-fit. Measures of association.

STAT 7630 BAYESIAN STATISTICS (3) LEC. 3. LAB. 0. Pr. STAT 6620 or STAT 7610. This course will develop an understanding of Bayesian principles and methodologies and cover the modeling and computation required to perform advanced data analysis from the Bayesian perspective.

STAT 7650 COMPUTATIONAL STATISTICS (3) LEC. 3. Pr. STAT 7020 and STAT 7610. This course covers the theory and practice of common algorithms used for simulation, computing, and optimization in Statistics.

STAT 7670 APPLIED LONGITUDINAL DATA ANALYSIS (3) LEC. 3. To introduce students to statistical models and methods for the analysis of longitudinal date, i.e. data collected repeatedly on individuals (humans, animals, etc) over time (or other conditions).

STAT 7700 GENERALIZED LINEAR MODELS (3) LEC. 3. Pr. STAT 7600. Departmental approval. Exponential families and links functions, model fitting, likelihood methods, residual diagnostics, count data, estimating equations.

STAT 7780 SURVIVAL ANALYSIS (3) LEC. 3. Pr. STAT 7000. Departmental approval. Kaplan-Meier estimator, log-rank tests, Cox proportional hazard model, fully parametric models.

STAT 7800 LINEAR MODELS (3) LEC. 3. Pr. STAT 7610 and MATH 2660. Departmental approval. A rigorous development of some of the important topics of applied statistics: the multivariate normal distribution analysis of variance, regression, aspects of experimental design.

STAT 7810 MODERN STOCHASTIC PROCESSES I (3) LEC. 3. Pr. (MATH 6670 or MATH 6676 or STAT 6670 or STAT 6676) and MATH 6210. Classical and Modern Topics in stochastic processes (Markov chains, Poisson process, Brownian motion). Applications and stochastic models (queues, stationary processes, population dynamics, finances). Credit will not be given for both STAT 7810 and MATH 7810.

STAT 7820 APPLIED STOCHASTIC PROCESSES I (3) LEC. 3. Pr. MATH 7810 or MATH 7816 or STAT 7810 or STAT 7816. Classical and modern topics in stochastic processes (Markov processes, Random Walks, Martingales, Brownian motion.) Introduction to stochastic integrals and differential equations. Applications (queues, population dynamics, chaos finances). Credit will not be given for both STAT 7820 and MATH 7820.

STAT 7830 APPLIED STOCHASTIC PROCESSES II (3) LEC. 3. Pr. STAT 7810 or STAT 7816.

STAT 7840 APPLIED MULTIVARIATE STATISTICAL ANALYSIS (3) LEC. 3. Pr. STAT 7000. Multivariate normal distribution, Hotelling's T2, MANOVA, discriminate analysis, principal components.

STAT 7850 THEORY OF STATISTICAL INFERENCE (3) LEC. 3. Pr. STAT 7610. Central limit theorem, Convergence, M-estimate, Statistical functional, U-statistics

STAT 7860 APPLIED TIME SERIES ANALYSIS (3) LEC. 3. Pr. STAT 3610. Departmental approval. Autoregressive and moving average models, differencing, estimation and forecasting, spectral theory.

STAT 7930 STATISTICAL CONSULTING PRACTICUM (3) PRA. 3. Pr. STAT 7000 and STAT 7010 and STAT 7020. This is a course in applied statistics, providing training in statistical consulting. Applications of commonly encountered statistical methods are explored in the consulting environment. Written and oral communication skills are emphasized, and ethical aspects of consulting are introduced. This course provides students with an opportunity to gain practical experience in consulting through various projects with clients, through the AU Statistical Consulting Center.

STAT 7940 CAPSTONE PROJECT (3) LEC. 3. Discuss various topics while working on an industry-level project. Students will complete a semester-long project under the supervision of instructors.

STAT 7950 SEMINAR (1) SEM. SU. Exploration of statistical concepts, fostering active learning through presentations, guest lectures, discussions, and student-led research presentations. Course may be repeated for a maximum of 2 credit hours.

STAT 7960 SPECIAL PROBLEMS IN STATISTICS (1-10) RES. Credit will not be given for both MATH 7960 and STAT 7960. Course may be repeated for a maximum of 10 credit hours.

STAT 7970 SPECIAL TOPICS (1-3) LEC. Departmental approval. Special topics designed to meet the needs and interests of students. Course may be repeated for a maximum of 6 credit hours.

STAT 7980 SPECIAL PROJECT (3) LEC. 3. SU. Departmental approval. Non-thesis project in Statistics for Master's degree in Statistics (non-thesis option).

STAT 7990 RESEARCH AND THESIS (1-10) DSR. Research for Master's thesis in Statistics. Course may be repeated with change in topic.

STAT 8400 ADVANCED QUANTITATIVE METHODS FOR MANAGEMENT I (3) LEC. 3. Pr. STAT 7000. or approved equivalent. Study of the application of linear regression analysis to business research. First advanced course in applied linear statistics models.

STAT 8410 ADVANCED QUANTITATIVE METHODS MANAGEMENT II (3) LEC. 3. or approved equivalent. Introduction to multivariate techniques in business research. Study of the theory and applications of ANOVA, ANCOVA, MANOVA, MANCOVE, Discriminate Analysis & Polytomous Logistic Regression.

STAT 8420 ADVANCED QUANTITATIVE METHODS FOR MANAGEMENT III (3) LEC. 3. Pr. STAT 7100 and STAT 8400 and STAT 8410. or approved equivalent. Third course in statistical modeling. Emphasis on applications of Principal Components Analysis, and Structural Equation Modeling to management research.

STAT 8990 RESEARCH AND DISSERTATION (1-10) LEC. 1-10. Individual doctoral dissertation research. May be repeated for credit. Course may be repeated with change in topics. Course may be repeated for a maximum of 30 credit hours.

Department of Biological Sciences

Marine Biology

The Marine Biology major provides students with a strong foundation in basic biological concepts such as genetics, ecology, cell biology and marine systems as well as chemistry and mathematics. The plan of study provides the opportunity to choose elective courses from a wide variety of courses offered at Auburn University. In addition, students are required to take summer courses offered at marine labs around the United States, including Dauphin Island Sea Lab and Gulf Coast Research Lab. Students are also encouraged to consider internships and undergraduate research. Marine Biology graduates are well-prepared for advanced study in any marine science area or employment with marine labs, various governmental and nongovernmental agencies involved with coastal management and conservation, and tourism.

Microbial, Cellular and Molecular Biology

The Microbial, Cellular and Molecular Biology major provides students with an excellent foundation in the areas of microbiology, cellular and molecular biology that emphasizes the understanding of life at the cellular and molecular level. The choice of a formal option within the major allows students to concentrate on a particular area of interest. Each option provides a wide variety of courses and opportunities for undergraduate research. Students selecting the Microbiology option will be well prepared for postgraduate work or career advancement in a number of areas including food, environmental and medical microbiology. Students selecting the Cell and Molecular Biology option would also be well prepared for postgraduate study or career advancement in any area of eukaryotic cell or molecular biology. Both options provide excellent preparation for students interested in biotechnology or professional programs in the health sciences.

Organismal Biology

The Organismal Biology major provides students with a solid foundation in basic biological concepts, such as evolution, ecology, genetics and cell biology and also provides a foundation in physics, chemistry and mathematics. The three formal options within the major allow students to specialize in various ways, while focusing on the study of plants or animals through the choice of elective courses. The major provides a solid foundation for pursuing graduate degrees (M.S. or Ph.D.) in biological fields, but also prepares students for a wide range of laboratory and field-based research positions in environmental resource assessment, management and conservation within federal, state and private agencies or organizations.

Majors

- Genetics (p. 1258)
- Genetics — Pre-professional concentrations in:

  - Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1348)
  - Pre-Veterinary Medicine (p. 1350)
- Marine Biology (p. 1260)
- Microbiology — Pre-professional concentrations in:
- - Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1264)
  - Pre-Physical Therapy, Pre-Physician Assistant (p. 1265)
  - Pre-Veterinary (p. 1352)
- Microbial, Cellular and Molecular Biology — Microbiology Option (MCMB) (p. 1263)
- Microbial, Cellular and Molecular Biology — Cell & Molecular Biology Option (MCCM) (p. 1262)
- Organismal Biology — Conservation & Biodiversity Option (p. 1269)
- Organismal Biology — Ecology, Evolution & Behavior Option (p. 1271)
- Organismal Biology — Integrative Biology Option (p. 1272)
- Organismal Biology — Pre-professional concentrations in:
  - Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1267)
  - Pre-Physcal Therapy, Pre-Physician Assistant (p. 1268)
  - Pre-Veterinary (p. 1353)

Minors

- Biological Sciences (p. 1258)

Courses

BIOL 1000 INTRODUCTION TO BIOLOGY (3) LEC. 3. Science Core. Introduction to biological principles relevant to human society. Designed for non-science majors. Credit will not be given for both BIOL 1000 and BIOL 1020 or BIOL 1027.

BIOL 1001 INTRODUCTION TO BIOLOGY LABORATORY (1) LAB. 2. Pr. P/C BIOL 1000 or P/C BIOL 1003. Laboratory course for BIOL 1000 or BIOL 1003.

BIOL 1010 A SURVEY OF LIFE (3) LEC. 3. Pr. BIOL 1000 or BIOL 1020 or BIOL 1023 or BIOL 1027 or SCMH 1010 or SCMH 1013 or SCMH 1017 or SCMH 1020 or SCMH 1023 or SCMH 1027. Science Core. Emphasis on contrasting strategies employed by organisms to meet similar biological needs. Credit will not be given for both BIOL 1010 and BIOL 1030 or BIOL 1037.

BIOL 1011 A SURVEY OF LIFE LABORATORY (1) LAB. 2. Pr. P/C BIOL 1010 or P/C BIOL 1013. Laboratory course for BIOL 1010.

BIOL 1020 PRINCIPLES OF BIOLOGY (3) LEC. 3. Science Core. Introduction to the physical, chemical, and biological principles common to all organisms. Credit will not be given for both BIOL 1020 and BIOL 1000 or BIOL 1027.

BIOL 1021 PRINCIPLES OF BIOLOGY LABORATORY (1) LAB. 2. Pr. P/C BIOL 1020 or P/C BIOL 1023 or P/C BIOL 1027. Laboratory Course for BIOL 1020.

BIOL 1027 HONORS BIOLOGY (4) LEC. 3. LAB. 2. Pr. Honors College. Science Core. Introduction to the physical, chemical, and biological principles common to all organisms. Credit will not be given for both BIOL 1027 and BIOL 1000 or BIOL 1020.

BIOL 1030 ORGANISMAL BIOLOGY (3) LEC. 3. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027. Science Core. Principles and fundamentals of biology at the organismal level. Credit will not be given for both BIOL 1030 and BIOL 1010 or BIOL 1037.

BIOL 1031 ORGANISMAL BIOLOGY LABORATORY (1) LAB. 2. Pr. P/C BIOL 1030. Laboratory Course for BIOL 1030.

BIOL 1037 HONORS ORGANISMAL BIOLOGY (4) LEC. 3. LAB. 1. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027. Science Core. Principles and fundamentals of biology at the organismal level. Credit will not be given for both BIOL 1037 and BIOL 1010 or BIOL 1030.

BIOL 2100 PROFESSIONAL DEVELOPMENT (1) LEC. 1. Introduction to career opportunities and student development options for majors in biological sciences. Students will investigate post-graduation academic and professional options, develop writing skills by creating resumes and ePortfolios, and explore course and research options with the department. Biology majors only.

BIOL 2425 MARINE BIOLOGY (4) LEC. 4. Pr. BIOL 1030 or BIOL 1037. Departmental approval. The invertebrates, vertebrates and marine plants as communities with emphasis on local examples. Taught only at Dauphin Island Sea Lab. (DISL).

BIOL 2500 HUMAN ANATOMY AND PHYSIOLOGY I (3) LEC. 3. Pr. BIOL 1000 or BIOL 1020 or BIOL 1023 or BIOL 1027. Study of the structure and function of the human body. First half of two-part sequence with BIOL 2510, concentrating on tissues, muscle, and nervous system.

BIOL 2501 HUMAN ANATOMY AND PHYSIOLOGY I LABORATORY (1) LAB. 1. Pr. (BIOL 1000 or BIOL 1020 or BIOL 1027) and (P/C BIOL 2500 or P/C BIOL 2503 or P/C BIOL 2507). Lab course for study of the structure and function of the human body. First half of two-part sequence with BIOL 2510, concentrating on tissues, muscle, and nervous system.

BIOL 2507 HONORS HUMAN ANATOMY AND PHYSIOLOGY I (3) LEC. 3. Pr. Honors College. BIOL 1000 or BIOL 1020 or BIOL 1023 or BIOL 1027. Study of the structure and function of the human body. First half of two-part sequence with BIOL 2510, concentrating on tissues, muscle, and nervous system.

BIOL 2510 HUMAN ANATOMY AND PHYSIOLOGY II (3) LEC. 3. Pr. (BIOL 2500 or BIOL 2503 or BIOL 2507) and BIOL 2501. Study of the structure and function of the human body. Second half of two-part sequence with BIOL 2500/2501, concentrating on cardiovascular, respiratory, digestive, urinary, reproductive, and endocrine systems.

BIOL 2511 HUMAN ANATOMY AND PHYSIOLOGY II LABORATORY (1) LAB. 1. Pr. (BIOL 2500 or BIOL 2503 or BIOL 2507) and BIOL 2501 and (P/C BIOL 2510 or P/C BIOL 2517). Lab course for study of the structure and function of the human body. Second half of two-part sequence with BIOL 2500, concentrating on the individual organ systems.

BIOL 2517 HONORS HUMAN ANATOMY AND PHYSIOLOGY II (3) LEC. 3. Pr. Honors College. BIOL 2501 and BIOL 2500 or BIOL 2503 or BIOL 2507. Study of the structure and function of the human body. Second half of two-part sequence with BIOL 2500/2501, concentrating on cardiovascular, respiratory, digestive, urinary, reproductive, and endocrine systems.

BIOL 3000 GENETICS (3) LEC. 3. Pr. (BIOL 1020 or BIOL 1023 or BIOL 1027). An overview of theoretical principles of transmission, cytological, molecular, and population genetics. Problem solving will be emphasized. May count either BIOL 3000 or BIOL 3003 or AGRI 3000.

BIOL 3001 GENERAL GENETICS LABORATORY (1) LAB. 2. Pr. (BIOL 1020 or BIOL 1023 or BIOL 1027) and (P/C BIOL 3000 or P/C BIOL 3003). Laboratory provides practical experience in the areas of transmission, cytological, molecular, and population genetics. Problem solving is emphasized though analysis of simulated and real genetics data sets.

BIOL 3010 COMPARATIVE ANATOMY (4) LEC. 3. LAB. 1. Pr. BIOL 1030 or BIOL 1037. We will examine evolution of anatomical structures from early chordates through vertebrates (both living and extinct). Students will learn the main vertebrate taxa and how each anatomical system appears in them. Students will also examine the linkage of these systems through all vertebrates. The phylogenetic tree (evolutionary relationships of the vertebrates) will be the backbone on which we explore the diversity of anatomy. In lab, students will use and develop their integrative skills by examining the anatomy of a wide variety of organisms.

BIOL 3011 COMPARATIVE ANATOMY LABORATORY (1) LAB. 1. Pr. P/C BIOL 1030 or BIOL 1037. Laboratory to accompany Comparative Anatomy Lecture. This lab course will explore the diverse morphologies of vertebrates.

BIOL 3020 GENOMIC BIOLOGY (4) LEC. 3. LAB. 2. Pr. BIOL 3000 or BIOL 3003 or AGRI 3000. An overview of genes, genomes, and genomic and proteomic approaches and methodology. Application of principles of biology at the genomic level. Includes an introduction to bioinformatic approaches to genomic problems in a computer laboratory setting.

BIOL 3030 EVOLUTION AND SYSTEMATICS (3) LEC. 3. Pr. BIOL 1030 or BIOL 1037. An introduction to evolutionary processes, classification, of organisms and scientific nomenclature.

BIOL 3040 BIOLOGY OF MARINE SYSTEMS (3) LEC. 3. Pr. (BIOL 1020 or BIOL 1023 or BIOL 1027) and (BIOL 1030 or BIOL 1037). Introduction to marine systems and biological investigations of coastal, near shore and open ocean organisms and processes.

BIOL 3060 ECOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 1020 or BIOL 1023 or BIOL 1027) and (BIOL 1030 or BIOL 1037). Interactions of organisms with their environments and characteristics of populations, communities, and ecosystems. 8 hours of Biology.

BIOL 3075 INTRODUCTION TO OCEANOGRAPHY (4) LEC. 4. Pr. (MATH 1150 or MATH 1153) and (CHEM 1110 or CHEM 1117 or CHEM 1030 or CHEM 1033) and PHYS 1500. Departmental approval. The physics, chemistry, biology, and geology of the oceans. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 3100 PLANT BIOLOGY (4) LEC. 4. LAB. 1. Pr. (BIOL 1030 or BIOL 1037) and (CHEM 1010 or CHEM 1030 or CHEM 1033 or CHEM 1110 or CHEM 1117). Introduction to the morphology, anatomy, physiology and classification of plants with laboratory.

BIOL 3200 GENERAL MICROBIOLOGY (3) LEC. 3. Pr. (BIOL 1020 or BIOL 1023 or BIOL 1027) and (CHEM 1030 or CHEM 1033 or CHEM 1110 or CHEM 1117) and P/C BIOL 3201. Introduction to the science of microbiology, emphasizing cell structure, systematics, growth, genetics, and the role in human affairs.

BIOL 3201 GENERAL MICROBIOLOGY LABORATORY (1) LAB. 2. Pr. (BIOL 1020 or BIOL 1023 or BIOL 1027) and (CHEM 1030 or CHEM 1033 or CHEM 1110 or CHEM 1117) and (P/C BIOL 3200 or P/C BIOL 3203 or P/C BIOL 3207). Fundamental laboratory techniques required to safely handle, enumerate, identify, and provide basic biochemical characterization of microorganisms.

BIOL 3207 HONORS GENERAL MICROBIOLOGY (3) LEC. 3. Pr. Honors College. CHEM 1030 or CHEM 1033 or CHEM 1110 or CHEM 1117 and BIOL 3201. and BIOL 1020 or BIOL 1023 or BIOL 1027. Introduction to the science of microbiology, emphasizing cell structure, systematics, growth, genetics, and the role in human affairs.

BIOL 4000 HISTOLOGY (3) LEC. 3. Pr. (BIOL 1030 or BIOL 1037) and BIOL 1031 and (BIOL 2500 or BIOL 2507 or BIOL 2510 or BIOL 2517 or BIOL 3010 or BIOL 5240). Coreq. BIOL 4001. Morphology and classification of tissues; arrangement of tissues in organs and systems of vertebrate animals.

BIOL 4001 HISTOLOGY LABORATORY (1) LAB. 3. Pr. (BIOL 1030 or BIOL 1037). Coreq. BIOL 4000. Laboratory investigation of the morphology and classification of tissues using prepared slides to reveal the arrangement of tissues in organs and organ systems of vertebrate animals.

BIOL 4010 INVERTEBRATE BIODIVERSITY (4) LEC. 3. LAB. 3. Pr. BIOL 1030 or BIOL 1037. Survey of the phyla of invertebrates with emphasis on morphology, anatomy, ecology, evolution, and systematics.

BIOL 4015 BIOLOGY AND CONSERVATION OF MARINE TURTLES (2) LEC. 15. LAB. 45. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. OR permission of Marine Biology coordinator. An introductory overview of the biology of marine turtles. Topics include: identification, distribution, nesting & migratory behavior, feeding, population biology, development, paleontology and conservation. Extensive laboratory and field studies of multiple species of turtles. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4020 VERTEBRATE BIODIVERSITY (4) LEC. 3. LAB. 3. Pr. BIOL 1030 or BIOL 1037. Ecology and evolution of living vertebrates of the world.

BIOL 4025 ECOLOGY OF THE FLORIDA EVERGLADES (2) LEC. 15. LAB. 45. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. Examines the natural history, ecology and evolution, and human impact on the Everglades. Includes intensive lectures and a more than 1-week long campsite based field trip in the Everglades. Multiple short trips to various locales within the Everglades. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4035 INTRODUCTION TO MARINE ANIMAL NEUROBIOLOGY (3) LEC. 15. LAB. 60. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037. The neuroanatomy and neurophysiology of marine invertebrates and vertebrates. Lectures and labs on neurons, glia, resting and action potentials, synapses and neurotransmitters, muscle contraction, sensorimotor integration; neurophysiological bases of behavior; labs include computer simulation of cellular neurobiology. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4045 MARINE MAMMAL BIOLOGY (4) LEC. 30. LAB. 60. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. Introduction to the evolution, taxonomy and classification, anatomy, physiology, behavior, conservation and management issues of marine mammals, including cetaceans, pinnipeds, mustelids, sirenians and the polar bear. Lab and field research methods used to study marine mammals will be covered. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4065 MARINE CONSERVATION BIOLOGY (4) LEC. 45. LAB. 30. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and (BIOL 3040 or BIOL 3060). Study of major threats to marine biodiversity as and potential solutions to the threats. Students discuss current topics in marine conservation biology and critically debate marine conservation literature. Field trips to impacted and pristine sites will demonstrate principles. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4085 HURRICANES OF THE GULF OF MEXICO (2) LEC. 30. An introductory survey with emphasis on Gulf of Mexico hurricanes. Hurricane features. Basic principles of the atmosphere, review of Gulf, Atlantic and Caribbean hurricanes, El Nino, changes in the Atlantic circulation, hurricane formation, development, features, movement, steering and forecasting. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4095 COASTAL BIRDS OF ALABAMA (2) LEC. 15. LAB. 30. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. Behavior and ecology-oriented avian field biology. Identification, banding, record/broadcast, other survey methods. Emphasis on behavioral ecology. Extensive field effort along the Gulf Coast and in the Mobile/Alabama/Tombigbee/Tensaw River Delta, other riparian environments, and salt marshes. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4100 CELL BIOLOGY (3) LEC. 3. Pr. CHEM 2030 or (CHEM 2070 or CHEM 2077) and (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and (BIOL 1030 or BIOL 1037). Introduction to cellular structure and processes, including evolution, organization, physiology, molecular biology of cells, membranes, cytoplasm, and organelles as well as energy, transport, motility, cell division, signaling, transcription, and translation.

BIOL 4101 CELL BIOLOGY LABORATORY (2) LAB. 4. Pr. P/C BIOL 4100 or P/C BIOL 4103. Light/electron microscopy, cell structure, origins of life, centrifugation, protein/nucleic acid electrophoresis, and blotting, motility, DNA purification, chromatography, pH, fluorescence microscopy.

BIOL 4135 MARINE BEHAVIORAL ECOLOGY (4) LEC. 30. LAB. 60. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. Animal behavior in the context of the marine environment. Students study the ecological and evolutionary significance of behavior in a marine setting. Topics include principles of marine behavioral ecology, techniques for observing behavior, conducting behavior experiments, and data collection. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4150 HUMAN GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or AGRI 3000 or FISH 3000 and BIOL 4100 and (CHEM 2080 or CHEM 2087). Study of the biological interaction of genes, effects of mutation and changes in gene frequency in human populations. Emphasis on molecular approach to study evolutionary changes in human gene pools.

BIOL 4410 VERTEBRATE DEVELOPMENT (5) LEC. 3. LAB. 4. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Morphogenesis and organogenesis of frog, chick, pig, and human from a descriptive and analytical viewpoint.

BIOL 4415 SHARK AND RAY BIOLOGY (2) LEC. 15. LAB. 45. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027 and BIOL 1030 or BIOL 1037 and BIOL 3040. An introduction to the biology of sharks and rays with special emphasis on regional shark fauna and field technique. Topics: chondrichthyan origin, systematics, sensory biology, trophic ecology, reproductive biology, life history, ecology, fisheries and conservation. Extensive lab and field work. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 4445 SPECIAL PROBLEMS IN MARINE SCIENCE (1-6) AAB/LEC. Departmental approval. Individualized research-oriented experience. Taught at Gulf Coast Research Laboratory. Course may be repeated for a maximum of 6 credit hours.

BIOL 4455 MARINE INVERTEBRATE ZOOLOGY (6) LEC. 6. Departmental approval. Structure, classification, phyogenetics, larval development and functional processes of marine and estuarine invertebrates. Taught at Gulf Coast Research Laboratory.

BIOL 4475 MARINE ICHTHYOLOGY (6) LEC. 6. Departmental approval. Biology of the major piscine taxa in Mississippi Sound. Principles involved in classification and evolutionary relationships of these organisms. Taught at Gulf Coast Research Laboratory.

BIOL 4515 MARINE INVERTEBRATE ZOOLOGY (4) LEC. 4. Pr. At least 10 credits in BIOL 2000-8990. Departmental approval. The natural history, systematics, and morphology of marine invertebrates from the Gulf of Mexico; oriented toward a field and laboratory approach. Participation in extended field trips is part of the course. Taught at DISL.

BIOL 4525 DOLPHINS AND WHALES (2) LEC. 2. Pr. BIOL 1030 or BIOL 1037. Departmental approval. Classification, anatomy, and ecology of the cetaceans. Taught at DISL.

BIOL 4565 MARINE VERTEBRATE ZOOLOGY (4) LEC. 4. Pr. BIOL 1030 or BIOL 1037. Departmental approval. Systematics, zoogeography and ecology of marine fishes, reptiles, and mammals. Taught at DISL. May not be substituted for BIOL 4020.

BIOL 4575 MARINE ECOLOGY (4) LEC. 4. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027. Prerequisites: BIOL1020 or marine biology. Departmental approval. Experimental ecological theory and its application to interactions of marine organisms with each other and the environment. Includes laboratory, extensive field trip experience. Taught at DISL.

BIOL 4585 PLANKTON BIOLOGY (2) LEC. 15. LAB. 15. Pr. ((BIOL 1020 and BIOL 1021) or BIOL 1027) and ((BIOL 1030 and BIOL 1031) or BIOL 1037). Students will learn about the biology of all forms of plankton and the methods for their study including optical and chemical techniques. Students will understand the basic methods of study and be able to sight-identify major groups. Taught at Dauphin Island Sea Lab (DISL).

BIOL 4700 PEDAGOGY OF PEER-LED INSTRUCTION (1) LEC. 1. Departmental approval. This is the pedagogical training course designed for students serving as peer instructors who are interested in effective instructional strategies in the STEM disciplines. This course helps peer instructors integrate educational theory, pedagogy, content, and practice. Course meetings will focus on practical concerns as well as associated theoretical models. This is a seminar course where students are responsible for weekly readings, in-class discussions, reflections and projects which are coordinated with students' practice.

BIOL 4920 INTERNSHIP IN BIOLOGY (1-4) INT. SU. Application of biology concepts and skills in a professional experience. 12 credit hours in 3000-level or higher BIOL courses. Departmental approval. Student must be enrolled in a major offered by the Department of Biological Sciences. Course may be repeated for a maximum of 4 credit hours.

BIOL 4950 SENIOR SEMINAR (1) LEC. 1. Oral presentation and discussion of recent scientific publications from a selected area of biological sciences. One hour is required for all majors. Course may be repeated for a maximum of 3 credit hours.

BIOL 4967 HONORS SPECIAL PROBLEMS (1-3) DSL/LEC. Pr. Honors College. Departmental approval and membership in the Honor College. Course may be repeated for a maximum of 3 credit hours.

BIOL 4970 SPECIAL TOPICS (1-4) AAB. Departmental approval. Instruction and discussion in a selected current topic in Biological Sciences. Course may be repeated for a maximum of 8 credit hours.

BIOL 4980 UNDERGRADUATE RESEARCH (2-4) AAB/IND. Directed research in an area of specialty within the department. Course may be repeated for a maximum of 6 credit hours.

BIOL 4997 HONORS THESIS (1-3) IND. Pr. Honors College. Undergraduate research and thesis. Course may be repeated for a maximum of 3 credit hours.

BIOL 4AA0 PROFESSIONAL DEVELOPMENT II (0) PRA. SU. Students enrolled in this course will complete the ePortfolio that they began developing as Freshmen, in BIOL 2100 - Professional Development I. Successfully designing and completing a professional ePortfolio will provide students with: 1. An opportunity to create a unified, polished and coherent educational and professional history of themselves. 2. A platform to organize their thinking about skills and experiences and the opportunity to connect them to the next step in career development. 3. A place to collect, present and reflect on evidence of professional development and growth during the undergraduate experience.

BIOL 5000 HUMAN CARDIOVASCULAR PHYSIOLOGY (4) LEC. 3. LAB. 2. Pr. BIOL 2510 or BIOL 2517 or BIOL 5240 or BIOL 5600. An in-depth exploration of molecular events and mechanisms governing heart and vascular function in health and disease. Laboratory will provide hands-on experiences with ECG, local blood flow, and case study examples.

BIOL 5020 EMBRYONIC DEVELOPMENT (3) LEC. 3. Pr. (BIOL 4100 or BIOL 4103). This course is designed to teach students the evolution of the molecular mechanisms used by developing embryos to form the adult body plan with a focus on the vertebrate model systems used to understand human developmental biology. In addition, the course will expose students to current research on these processes and the techniques used to carry out these studies.

BIOL 5050 FUNDAMENTALS OF BIOPHYSICS (2) LEC. 2. Pr. PHYS 1510 or BIOL 4100. Introduction to use of theories and methods of physics in biology, illustrated by discussion of organism size, metabolism, physiology, vision, hearing, cell cellular and molecular processesern medicine, physiology and molecular biology.

BIOL 5090 CONSERVATION BIOLOGY (3) LEC. 3. Pr. BIOL 3060. This course is an overview of ethical, economic and biological aspects of conservation biology at scales ranging from local to global. Credit will not be given for both BIOL 5090 and BIOL 6090.

BIOL 5110 PARASITOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 1030 or BIOL 1037 or BIOL 2500 or BIOL 2503 or BIOL 2507. Students must have Junior or Senior standing. Development, identification, host-parasite relationships, and medical significance of parasitic protozoa, helminthes, and arthropods that infect humans, domestic animals and wildlife. May count either BIOL 5110 or LABT 4050.

BIOL 5120 SYSTEMATIC BOTANY (4) LEC. 3. LAB. 3. Pr. (BIOL 1030 or BIOL 1037). Classification, nomenclature, distribution, systematics, and evolution of vascular plants.

BIOL 5130 ADVANCED PLANT PHYSIOLOGY (3) LEC. 3. Pr. BIOL 3100 and (CHEM 2030 or CHEM 2080 or CHEM 2087). Physiological and biochemical processes affecting plant growth and development including water relations, photosynthesis, respiration, and hormones.

BIOL 5131 ADVANCED PLANT PHYSIOLOGY LABORATORY (1) LAB. 3. Pr. BIOL 3100 and (CHEM 2081 or BIOL 5130). Laboratory exercises in plant physiology. Including water relations, metabolism and growth, and development.

BIOL 5140 PLANT ECOLOGY (4) LEC. 3. LAB. 4. Pr. (BIOL 1030 or BIOL 1037) and BIOL 3060. Exploration of ecological interactions between plants and their environment. Field trips emphasize Southeastern habitats/plant examples. Includes 3-day weekend field trip.

BIOL 5150 POPULATION AND COMMUNITY ECOLOGY (3) LEC. 3. Pr. BIOL 3060. Quantitative study of natural population and ecological communities. Selected topics include density-dependent population growth, life-history theory, mark-recapture analysis, eco-evolutionary dynamics, and species interactions especially how they relate to questions of species distributions in time and space.

BIOL 5160 FIELD BIOLOGY AND ECOLOGY (3-15) LEC. 3. Prereq. 15 hours of biology. Intensive classroom and field studies of an area outside Alabama. Course may be repeated for a maximum of 15 credit hours.

BIOL 5190 CELL AND MOLECULAR SIGNAL TRANSDUCTION (3) LEC. 3. Pr. BIOL 4100 and BIOL 5220. Study of cellular communication and regulation with emphasis on integration between cellular, molecular, genetic, and biochemical approaches.

BIOL 5200 CLINICAL MICROBIOLOGY (5) LEC. 3. LAB. 4. Pr. (BIOL 3200 or BIOL 3203 or BIOL 3207) and BIOL 3201. Isolation, cultivation, identification, classification and pathogenesis of infectious agents with emphasis on bacteria; includes clinical materials, Eubacteria, Mycoplasmata, Rickettsiae and Spirochetes. May count either BIOL 5200 or BIOL 6200.

BIOL 5210 MICROBIAL PHYSIOLOGY (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3207 or BIOL 3203) and BIOL 3201 and (CHEM 2030 or CHEM 2080 or CHEM 2087). General physiology of microbial cells emphasizing fermentation, respiration, photosynthesis, nitrogen fixation, cell wall synthesis, membranes, and macromolecular synthesis.

BIOL 5220 INTRODUCTORY MOLECULAR GENETICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and (BIOL 3200 or BIOL 3207 or BIOL 3203) and BIOL 3201. Principles of gene expression including replication, transcription, and translation; structure and regulation of genes; concepts and techniques in recombinant DNA.

BIOL 5230 VIROLOGY (3) LEC. 3. Pr. (P/C BIOL 5220 or P/C BIOL 6220) or (P/C BIOL 5260 or P/C BIOL 6260). Biology of viruses, including structure, entry, replication, assembly and release, pathogenesis, and epidemiology of viral infections. May count BIOL 5230 or BIOL 6230.

BIOL 5240 ANIMAL PHYSIOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 4100 or (CHEM 2030 or CHEM 2070 or CHEM 2077). General overview of the function of the major systems in animals, including evolution and adaptation to specific environments.

BIOL 5250 MICROBIAL EVOLUTION AND DIVERSITY (4) LEC. 3. LAB. 2. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000 and (BIOL 3200 or BIOL 3207 or BIOL 3203) and BIOL 3201. Introduction to microbial evolutionary history and theory, and survey of microbial diversity. Credit will not be given for both BIOL 5250 and BIOL 6250.

BIOL 5260 PROKARYOTIC MOLECULAR GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000 and (BIOL 3200 or BIOL 3207 or BIOL 3203) and BIOL 3201. Molecular principles of bacterial genetics including gene structure, genetic organization, regulation of gene expression, acquisition and loss of genes leading to microbial evolution. Credit will not be given for both BIOL 5260 and BIOL 6260.

BIOL 5270 HOST-MICROBE INTERACTIONS (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3207 or BIOL 3203) and (BIOL 3201) and (BIOL 5220 or BIOL 5260). This course will explore interactions between microbes and their hosts including plants, insects and animals. Credit will not be given for both BIOL 5270 and 6270.

BIOL 5280 GENETHICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Twenty-first century biotechnology and related ethical issues, including human cloning, stem cells, neuroenhancement, age retardation, genetic enhancement, and nanobiology. May count BIOL 5280 or 6280.

BIOL 5290 CASE STUDIES IN INFECTION AND IMMUNITY (3) LEC. 3. Pr. BIOL 5500. This course is designed to enrich student understanding of infection and immunity in the context of clinical presentations. Students will learn to use deductive reasoning to narrow down potential causes of symptoms and then use scientific literature to gain a detailed understanding of the mechanisms underlying disease. Cases covered will include infectious disease, immunodeficiency, neoplasms and/or autoimmunity.

BIOL 5300 PLANT ANATOMY AND DEVELOPMENT (4) LEC. 3. LAB. 4. Pr. BIOL 3100. Investigation of the various levels of plant organization from subcellular to organ through use of light and scanning electron microscopes.

BIOL 5320 PLANT GENE EXPRESSION (3) LEC. 3. Pr. BIOL 3100. Departmental approval. Genetic expression of genetic elements in plants from the recent literature.

BIOL 5330 DEVELOPMENTAL GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or AGRI 3000 or FISH 3000. Study of the genetics and genetic mechanisms behind developmental processes occurring in a range of species. May count either BIOL 5330 or BIOL 6330.

BIOL 5340 PROTOZOOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Life history, identification, cell biology, and evolution of free-living and parasitic protozoa of the major groups. Laboratory includes techniques for microscopy.

BIOL 5350 BEHAVIORAL ECOLOGY (3) LEC. 3. Pr. (BIOL 3030 or BIOL 3033) and BIOL 3060. Evolution of behaviors via natural, sexual, and kin selections; evolutionary influences on social groups, mating systems, cooperative breeding, and other interactions.

BIOL 5370 MOLECULAR ECOLOGY (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and BIOL 3060. General overview of the concepts and techniques regarding the application of molecular variation in answering questions pertaining to populations and communities of organisms. Credit will not be given for both BIOL 5370 and BIOL 6370.

BIOL 5380 GENERAL ICHTHYOLOGY (4) LEC. 3. LAB. 4. Pr. BIOL 1030 or BIOL 1037. Survey of the biodiversity of world and local fishes with an overview of ecology, behavior, biology, and conservation of fishes.

BIOL 5425 MARINE BOTANY (4) LEC. 4. Pr. BIOL 1020 or BIOL 1023 or BIOL 1027. Departmental approval. Pr. BIOL 1020 or equiv. Survey of microscopic and macroscopic algae, salt marsh vegetation, sea grasses, mangroves and maritime forests with regard to identification, distribution, structure, ecology and physiology. Field trips and laboratory work. Taught at DISL.

BIOL 5440 CLIMATE CHANGE PHYSIOLOGY AND EVOLUTION (3) LEC. 3. LAB. 0. This class investigates on the basic mechanisms of climate change and its impact on living organisms, focusing on their physiological, evolutionary, behavioral and molecular responses. Special interest is given to plants and marine organisms.

BIOL 5500 IMMUNOLOGY (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3203 or BIOL 3207) and BIOL 3201 and (BIOL 3000 or BIOL 3003 or BIOL 3020). The cellular and molecular basis of the immune response, including antigen presentation, immunogenetics, effector mechanisms, and medical immunology. May count either BIOL 3500 or BIOL 5500.

BIOL 5501 IMMUNOLOGY LAB (2) LAB. 2. Pr. P/C BIOL 5500 or P/C BIOL 3500. Techniques illustrating principles of antigen-antibody interactions and their application in immunoassays, identification of leukocytes, cellular interactions, and antibody production.

BIOL 5521 GENE EXPRESSION AND RECOMBINANT DNA LABORATORY (2) LEC. 2. LAB. 4. Pr. P/C BIOL 5220 or P/C BIOL 5260. Laboratory experiences demonstrating concepts and techniques in recombinant DNA.

BIOL 5550 NANOMEDICINE (2) LEC. 2. Pr. PHYS 1510 and CHEM 2080 and (P/C BCHE 5180 or P/C BIOL 4100). Nanomedicine is a branch of medicine that applies the knowledge and tools of nanotechnology to the prevention and treatment of disease. It involves the use of nanoscale materials, such as biocompatible nanoparticles, nanorobots and nanosensors, for diagnosis, drug delivery, and sensing in living organisms.

BIOL 5560 RNA IN BIOMEDICINE (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003. This course introduces the basic and novel types and functions of RNAs, as well as the integration of these molecules in biomedical contexts. Students will learn about the ‘RNA World’ theory, the diverse roles of RNA in cellular processes, and pathogenesis. Technological approaches to RNA research will be covered, as well as the application of this research to the diagnosis and therapy of genetic diseases.

BIOL 5600 BIOMEDICAL PHYSIOLOGY (5) LEC. 4. LAB. 3. Pr. ((BIOL 1030 or BIOL 1037) or ((BIOL 2500 or BIOL 2507) and BIOL 2501)) and (CHEM 2030 or CHEM 2070 or CHEM 2077). An in-depth investigation into the physiology of major mammalian organ systems, with a special focus on their biomedical functions and applications.

BIOL 5650 ANIMAL BEHAVIOR (3) LEC. 3. Pr. (BIOL 1030 or BIOL 1037) and BIOL 3060. Animal behaviors, analysis of their adaptive value, development, and evolution.

BIOL 5660 FOOD MICROBIOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 3200 or BIOL 3207 or BIOL 3203) and BIOL 3201. Introduction to basic and applied microbiology in food, including how bacteria, viruses, parasites, yeasts and mold affect and in turn are affected by foods both positively and negatively. May count either FDSC 5660, BIOL 5660, FDSC 6600, or BIOL 6600.

BIOL 5700 APPLIED AND ENVIRONMENTAL MICROBIOLOGY (4) LEC. 3. LAB. 2. Pr. (BIOL 3200 or BIOL 3207 or BIOL 3203) and BIOL 3201. Introduction to the ecology, systematics, interrelationships, and role of micro-organisms in geochemical cycles, bioremediation and pharmaceutical production.

BIOL 5740 HERPETOLOGY (4) LEC. 3. LAB. 3. Ecology and evolution of living amphibians and reptiles of the world.

BIOL 5750 ORNITHOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 3030 or BIOL 3033) and BIOL 3060. Taxonomy, evolution, ecology, and behavior of birds.

BIOL 5760 MAMMALOGY (4) LEC. 3. LAB. 3. Characteristics, origins, ecology, behavior, reproduction, physiology, and diversity of mammals. Labs include survey or current literature, field trips, data analysis, and report preparation.

BIOL 5800 INTRODUCTION TO COMPUTATIONAL BIOLOGY (3) LEC. 2. LAB. 1. Pr. STAT 2510 or STAT 2513. Overview of computational approaches to biological data analysis. Additionally, students will learn basic statistical and graphical analysis. May count either BIOL 5800 or BIOL 6800.

BIOL 5850 FUNCTIONAL GENOMICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or BIOL 3020 or FISH 3000 or AGRI 3000) and BIOL 4100 and BIOL 5800. An active-learning course to study the functional aspects of the genome emphasizing gene regulation and functional genetic variation. May count either BIOL 5850 or BIOL 6850.

BIOL 5860 BIOINFORMATICS AND GENOME ANALYSIS (3) LEC. 2. LAB. 1. Pr. (BIOL 3000 or BIOL 3003 or BIOL 3020 or FISH 3000 or AGRI 3000) and BIOL 5800. Overview of informatic approaches to biological data analysis. Students will use the scientific method to investigate key questions in model organisms through emerging 'omics fields. May count either BIOL 5860 or BIOL 6860.

BIOL 6020 EMBRYONIC DEVELOPMENT (3) LEC. 3. Pr. BIOL 4100 or BIOL 4103. Consideration of induction, constancy of the genome, pathfinding by migrating cells, morphogenetic movements, and other developmental processes.

BIOL 6050 FUNDAMENTALS OF BIOPHYSICS (2) LEC. 2. Pr. PHYS 1510 or BIOL 4100. Introduction to use of theories and methods of physics in biology, illustrated by discussion of organism size, metabolism, physiology, vision, hearing, cell cellular and molecular processesern medicine, physiology and molecular biology.

BIOL 6090 CONSERVATION BIOLOGY (3) LEC. 3. Pr. BIOL 3060. This course is an overview of ethical, economic and biological aspects of conservation biology at scales ranging from local to global. Credit will not be given for both BIOL 5090 and BIOL 6090.

BIOL 6110 PARASITOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 1030 or BIOL 1037) or (BIOL 2500 or BIOL 2503) and BIOL 2501. Development, identification, host-parasite relationships, and medical significance of parasitic protozoa, helminthes, and arthropods that infect humans, domestic animals, and wildlife.

BIOL 6120 SYSTEMATIC BOTANY (4) LEC. 3. LAB. 3. Pr. (BIOL 1030 or BIOL 1037). Classification, nomenclature, distribution, systematics, and evolution of vascular plants.

BIOL 6130 ADVANCED PLANT PHYSIOLOGY (3) LEC. 3. Pr. BIOL 3100 and (CHEM 2030 or CHEM 2080 or CHEM 2087). Physiological and biochemical processes affecting plant growth and development including water relations, photosynthesis, respiration, and hormones.

BIOL 6131 ADV PLANT PHYSIOLOGY LAB (1) LAB. 3. Pr. BIOL 3100 and (CHEM 2081 or CHEM 2088). Laboratory exercises in plant physiology. Including water relations, metabolism, and growth and development.

BIOL 6140 PLANT ECOLOGY (4) LEC. 3. LAB. 4. Pr. (BIOL 1030 or BIOL 1037) and BIOL 3060. Departmental approval. Exploration of ecological interactions between plants and their environment. Field trips emphasize Southeastern habitats/plant examples. Includes 3-day weekend field trip.

BIOL 6150 POPULATION AND COMMUNITY ECOLOGY (3) LEC. 3. Pr. BIOL 3060. Quantitative study of natural population and ecological communities. Selected topics include density-dependent population growth, life-history theory, mark-recapture analysis, eco-evolutionary dynamics, and species interactions especially how they relate to questions of species distributions in time and space.

BIOL 6190 CELL AND MOLECULAR SIGNAL TRANSDUCTION (3) LEC. 3. Pr. BIOL 4100 and BIOL 5220 and (CHEM 2080 or CHEM 2087). Study of cellular communication and regulation with emphasis on integration between cellular, molecular, genetic, and biochemical approaches.

BIOL 6200 CLINICAL MICROBIOLOGY (5) LEC. 3. LAB. 4. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. Isolation, cultivation, identification, classification and pathogenesis of infectious agents with emphasis on bacteria; includes clinical materials, Eubacteria, Mycoplasmata, Rickettsiae and Spirochetes. May count either BIOL 5200 or BIOL 6200.

BIOL 6210 MICROBIAL PHYSIOLOGY (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201 and (CHEM 2030 or CHEM 2080 or CHEM 2087). General physiology of microbial cells emphasizing fermentation, respiration, photosynthesis, nitrogen fixation, cell wall synthesis, membranes, and macromolecular synthesis.

BIOL 6220 INTRODUCTORY MOLECULAR GENETICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or AGRI 3000) and (BIOL 3200 or BIOL 3203) and BIOL 3201. Advanced principles of gene expression including replication, transcription and translation; structure and regulation of genes; detailed concepts and techniques in recombinant DNA. Credit will not be given for both BIOL 6220 and CMBL 6220.

BIOL 6230 VIROLOGY (3) LEC. 3. Pr. (P/C BIOL 5220 or P/C BIOL 6220) or (P/C BIOL 5260 or P/C BIOL 6260). Biology of viruses, including structure, entry, replication, assembly and release, pathogenesis, and epidemiology of viral infections. May count BIOL 5230 or BIOL 6230.

BIOL 6240 ANIMAL PHYSIOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 4100 or CHEM 2030 or CHEM 2070 or CHEM 2077. General overview of the function of the major systems in animals, including evolution and adaptation to specific environments.

BIOL 6250 MICROBIAL EVOLUTION AND DIVERSITY (4) LEC. 3. LAB. 2. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and (BIOL 3200 or BIOL 3203) and BIOL 3201. Introduction to microbial evolutionary history and theory, and survey of microbial diversity. Credit will not be given for both BIOL 5250 and BIOL 6250.

BIOL 6260 PROKARYOTIC MOLECULAR GENETICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and (BIOL 3200 or BIOL 3203) and BIOL 3201. Molecular principles of bacterial genetics including gene structure, genetic organization, regulation of gene expression, acquisition and loss of genes leading to microbial evolution. Course will not be given for both BIOL 5260 and BIOL 6260.

BIOL 6270 HOST-MICROBE INTERACTIONS (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3203) and (BIOL 3201) and (BIOL 5200 or BIOL 5260). This course will explore interactions between microbes and their hosts including plants, insects and animals. Credit will not be given for both BIOL 5270 and BIOL 6270.

BIOL 6290 CASE STUDIES IN INFECTION AND IMMUNITY (3) LEC. 3. Pr. BIOL 6500. This course is designed to enrich student understanding of infection and immunity in the context of clinical presentations. Students will learn to use deductive reasoning to narrow down potential causes of symptoms and then use scientific literature to gain a detailed understanding of the mechanisms underlying disease. Cases covered will include infectious disease, immunodeficiency, neoplasms and/or autoimmunity.

BIOL 6300 PLANT ANATOMY AND DEVELOPMENT (4) LEC. 2. LAB. 4. Pr. BIOL 6130. The study of the structure and ontogeny of plant cells, tissues, and organs. Fall.

BIOL 6320 PLANT GENE EXPRESSION (3) LEC. 3. Departmental approval. Genetic expression of genetic elements in plants from the recent literature. Credit will not be given for both BIOL 6320 and CMBL 6320.

BIOL 6330 DEVELOPMENTAL GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Study of the genetics and genetic mechanisms behind developmental processes occurring in a range of species. May count either BIOL 6330 or BIOL 5330.

BIOL 6340 PROTOZOOLOGY (4) LEC. 3. LAB. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Life history, identification, cell biology, and evolution of free-living and parasitic protozoa of the major groups. Laboratory includes techniques for microscopy.

BIOL 6350 BEHAVIORAL ECOLOGY (3) LEC. 3. Pr. (BIOL 3030 or BIOL 3033) and BIOL 3060. Evolution of behaviors via natural, sexual, and kin selections; evolutionary influences on social groups, mating systems, cooperative breeding, and other interactions.

BIOL 6370 MOLECULAR ECOLOGY (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and BIOL 3060 and BIOL 6800. General overview of the concepts and techniques regarding the application of molecular variation in answering questions pertaining to populations and communities of organisms. Credit will not be given for both BIOL 5370 and BIOL 6370.

BIOL 6380 GENERAL ICHTHYOLOGY (4) LEC. 3. LAB. 4. Pr. BIOL 1030 or BIOL 1037. Survey of the biodiversity of world and local fishes with an overview of ecology, behavior, biology, and conservation of fishes.

BIOL 6440 CLIMATE CHANGE PHYSIOLOGY AND EVOLUTION (3) LEC. 3. LAB. 0. Pr. BIOL 1030. This class investigates on the basic mechanisms of climate change and its impact on living organisms, focusing on their physiological, evolutionary, behavioral and molecular responses. Special interest is given to plants and marine organisms.

BIOL 6500 IMMUNOLOGY (3) LEC. 3. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201 and (BIOL 3000 or BIOL 3003 or FISH 3000 or BIOL 3020) and P/C BIOL 6501. The cellular and molecular basis of the immune response, including antigen presentation, immunogenetics, effector mechanisms, and medical immunology.

BIOL 6501 IMMUNOLOGY LABORATORY (2) LAB. 4. Pr. P/C BIOL 5500 or P/C BIOL 6500. Techniques illustrating principles of antigen-antibody interactions and their application in immunoassays, identification of leukocytes, cellular interactions, and antibody production.

BIOL 6521 GENE EXPRESSION AND RECOMBINANT DNA LABORATORY (2) LEC. 2. LAB. 4. Pr. P/C BIOL 5220 or BIOL 6220 or BIOL 5260 or BIOL 6260. Laboratory experiences demonstrating concepts and techniques in recombinant DNA.

BIOL 6525 MARINE BEHAVIORAL ECOLOGY (4) LEC. 3. LAB. 3. Study of animal behavior and the influence by and interaction with the environment and the ecological and evolutionary significance of these behaviors. Vertebrate and Invertebrate Zoology required. Taught at DISL.

BIOL 6550 NANOMEDICINE (2) LEC. 2. Pr. PHYS 1510 and CHEM 2080 and BCHE 5180. Nanomedicine is a branch of medicine that applies the knowledge and tools of nanotechnology to the prevention and treatment of disease. It involves the use of nanoscale materials, such as biocompatible nanoparticles, nanorobots and nanosensors, for diagnosis, drug delivery, and sensing in living organisms.

BIOL 6560 RNA IN BIOMEDICINE (3) LEC. 3. This course introduces the basic and novel types and functions of RNAs, as well as the integration of these molecules in biomedical contexts. Students will learn about the ‘RNA World’ theory, the diverse roles of RNA in cellular processes, and pathogenesis. Technological approaches to RNA research will be covered, as well as the application of this research to the diagnosis and therapy of genetic diseases.

BIOL 6600 BIOMEDICAL PHYSIOLOGY (5) LEC. 4. LAB. 3. Pr. ((BIOL 1030 or BIOL 1037) or (BIOL 2500 and BIOL 2501)) and (CHEM 2030 or CHEM 2070 or CHEM 2077). An in-depth investigation into the physiology of major mammalian organ systems, with a special focus on their biomedical functions and applications.

BIOL 6650 ANIMAL BEHAVIOR (3) LEC. 3. Pr. (BIOL 1030 or BIOL 1037) and BIOL 3060. Animal behaviors, analysis of their adaptive value, development, and evolution.

BIOL 6660 FOOD MICROBIOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. Introduction to basic and applied microbiology in food, including how bacteria, viruses, parasites, yeasts and mold affect and in turn are affected by foods both positively and negatively. May count either FDSC 5660, BIOL 5660, FDSC 6600, or BIOL 6600.

BIOL 6700 APPLIED AND ENVIRONMENTAL MICROBIOLOGY (4) LEC. 3. LAB. 2. Pr. (BIOL 3200 or BIOL 3203) and BIOL 3201. An advanced treatment of bacteria comprising the Kingdom Prokaryotae, emphasizing ecology, systematics, interrelationships, geochemical cycles, and bioremediation.

BIOL 6740 HERPETOLOGY (4) LEC. 3. LAB. 3. Ecology and evolution of living amphibians and reptiles of the world.

BIOL 6750 ORNITHOLOGY (4) LEC. 3. LAB. 3. Pr. (BIOL 3030 or BIOL 3033) and BIOL 3060. Departmental approval. An intensive investigation of the current literature and relevant research dealing with birds.

BIOL 6760 MAMMALOGY (4) LEC. 3. LAB. 3. Characteristics, origins, ecology, behavior, reproduction, physiology, and diversity of mammals. Labs include survey or current literature, fieldtrips, data analysis and report preparation.

BIOL 6800 INTRODUCTION TO COMPUTATIONAL BIOLOGY (3) LEC. 2. LAB. 1. Pr. STAT 2510 or STAT 2513. Overview of computational approaches to the analysis of biological data. Students will learn basic statistical and graphical analysis. May count either BIOL 5800 or BIOL 6800.

BIOL 6850 FUNCTIONAL GENOMICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or BIOL 3020 or FISH 3000 or AGRI 3000) and BIOL 4100 and BIOL 5800. Active-learning course to study the functional aspects of the genome emphasizing gene regulation and functional genetic variation. May count either BIOL 5850 or BIOL 6850.

BIOL 6860 BIOINFORMATICS AND GENOME ANALYSIS (3) LEC. 2. LAB. 1. Pr. (BIOL 3000 or BIOL 3003 or BIOL 3020 or FISH 3000 or AGRI 3000) and BIOL 5800. Overview of informatic approaches to biological data analysis. Students will use the scientific method to investigate key questions in model organisms through emerging 'omics fields. May count either BIOL 5860 or BIOL 6860.

BIOL 7035 MARINE ANIMAL NEUROBIOLOGY (4) LEC. 30. LAB. 60. Pr. BIOL 1020 or BIOL 1023 and BIOL 1021 and BIOL 1030 and BIOL 1031 and BIOL 4100. Biophysical neurobiology of marine invertebrates and vertebrates. Lectures and labs on neurons, glia, resting and action potentials, synapses, neurotransmitters, muscle contraction, sensorimotor integration, computer simulation and extensive technical methods: extra-, intracellular, patch recording, molecular neuroimmunology, confocal fluorescence microscopy. Evening/Saturday classes.

BIOL 7075 INTRODUCTION TO OCEANOGRAPHY (4) LEC. 30. LAB. 60. Pr. MATH 1150 or MATH 1153 and CHEM 1030 or CHEM 1033 or CHEM 1110 or CHEM 1117 and PHYS 1500 and BIOL 3040. An in-depth examination of the physics, chemistry, geology and biology of the oceans. Lectures cover the interrelationships of these components to each other. Field and lab work will introduce students to research on oceanographic processes of the Gulf of Mexico. Taught only at Dauphin Island Sea Lab (DISL).

BIOL 7170 POPULATION GENETICS (3) LEC. 3. Pr. BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000. Examination of the theories relating to maintenance of variation in natural populations of plants and animals.

BIOL 7180 SCRIPTING FOR BIOLOGISTS (3) LEC. 2. LAB. 1. Pr. BIOL 6800 and STAT 7000. or Instructor approval. A hands-on course to teach students concepts, applications, and best practices of utilizing computer scripting languages in the life sciences.

BIOL 7200 EVOLUTIONARY BIOLOGY (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and (BIOL 3200 or BIOL 3203) and BIOL 3201. Topics of current interest in evolution. Readings and presentation required.

BIOL 7210 EVOLUTIONARY ECOLOGY (3) LEC. 3. The Evolutionary Ecology research paradigm is a key approach to the study of behavioral, evolutionary, and ecological processes in the context of realistic or natural environmental settings. We will investigate a number of current "hot" research topics in Evolutionary Ecology, discuss the leading hypotheses being developed and how they are cast as statistica.

BIOL 7250 PRACTICAL DATA ANALYSIS AND COMPUTATION FOR THE LIFE SCIENCES (3) LEC. 2. LAB. 3. Pr. STAT 7020 or WILD 7150. or equivalent; or permission of the instructor. Data from the life sciences and advanced statistical techniques for data analyses and computation are brought together through a cross-fertilization of graduate student students in the life sciences, statistics, and mathematics. Focus on production of publication-quality research on student-identified projects. May count either BIOL 7250 or STAT 7250.

BIOL 7290 EVOLUTIONARY GENETICS (3) LEC. 3. Pr. (BIOL 3000 or BIOL 3003 or FISH 3000 or AGRI 3000) and BIOL 6170. Departmental approval. The role of population processes as mechanisms for evolution; and evolution at the molecular level. Credit will not be given for both BIOL 7290 and CMBL 7290.

BIOL 7440 ADVANCED CELL BIOLOGY (3) LEC. 3. Pr. BIOL 4100. Examination of current areas of research in cell and developmental biology by directed reading and discussion. Credit will not be given for both BIOL 7440 and CMBL 7440.

BIOL 7470 GENOME EVOLUTION (3) LEC. 3. Provides a broad evolutionary perspective on the origin, composition, and architecture of eukaryotic genomes. Students will participate in a literature-driven discussion format and will complete weekly writing assignments.

BIOL 7485 ADVANCED MARINE ECOLOGY (4) LEC. 2. LAB. 2. Pr. (BIOL 1020 or BIOL 1023) and BIOL 1021 and BIOL 1030 and BIOL 1031 and (BIOL 3060 or BIOL 3040). An advanced course open only to MS or PhD students. Interactions between marine organisms and the environment. In-depth discussion of ecological theory with emphasis on the latest research, using extensive reference to the literature. Lecture, lab and overnight field trips.

BIOL 7490 PHYSIOLOGICAL ECOLOGY (3) LEC. 3. Pr. BIOL 3060. A study of the physiological adaptations that allow animals to survive in unusual environments. A course in ecology required.

BIOL 7500 STRESS PHYSIOLOGY (2) LEC. 2. Pr. (BIOL 4100 or BIOL 5240 or BIOL 5600). This course is a discussion-based course focusing on physiological stress responses at various levels of organization and communication among them, from molecules, cells, organ, to whole organism.

BIOL 7510 NATURAL HISTORY MUSEUM PRACTICUM (1) LAB. 3. Practical methods in natural history museum curation. Students will assist in curating collections at the Auburn University Museum of Natural History. Course may be repeated for a maximum of 4 credit hours.

BIOL 7525 MARINE INVERTEBRATES (4) LEC. 2. LAB. 2. Morphology, natural history, physiology, evolution and ecology. Students examine modern literature and develop an advanced presentation on invertebrate biology involving problem solving in an area such as sensory biology, molecular evolution or management. Term paper, classroom presentation and lecture.

BIOL 7540 PROFESSIONAL ASPECTS OF BIOLOGY (3) LEC. 3. Departmental approval. Instruction on practical aspects of a career in biological sciences.

BIOL 7550 PHYSIOLOGICAL ECOLOGY OF REPRODUCTION (3) LEC. 3. This course focuses on physiological ecology of reproduction by identifying key physiological mechanisms linking the environmental change, reproductive constraints, and reproductive performance and describing how variation in reproductive performance are impacted by ecological and evolutionary processes.

BIOL 7800 COMPUTATIONAL BIOLOGY COLLOQUIUM (2) LEC. 0. LAB. 0, LEC. 0. Pr. (BIOL 7180) or (PLPA 6820). Oral presentations and discussions of recent scientific publications, challenges, and opportunities within the field of computational biology. Hands-on experience in data analysis and presentation.

BIOL 7880 MITONUCLEAR ECOLOGY (2) LEC. 2. Pr. BIOL 3030. This course will explore the implications of the necessity of mitonuclear coadaptation for the evolution of quintessential eukaryotic characteristics, including sex and two sexes, a sequestered germ line, senescence, discrete species, mate choice, and adaptation. Permission of instructor may be needed.

BIOL 7950 MASTERS THESIS SEMINAR (1) LEC. 1. SU. Departmental approval. Oral presentation and discussion of research in the field of specialization. Course may be repeated for a maximum of 2 credit hours.

BIOL 7960 SPECIAL PROBLEMS (1-4) DSL/LEC. Pr. P/C BIOL 6220. Oral presentation and discussion of recent scientific publications from a selected area molecular biology. Credit will not be given for both BIOL 7960 and CMBL 7960. Course may be repeated for a maximum of 4 credit hours.

BIOL 7970 SPECIAL TOPICS (1-4) AAB. Departmental approval. Instruction and discussion in a selected current topic in botany, microbiology, molecular biology, or zoology. A different topic for advanced study will be selected each semester this course is offered. Course may be repeated for a maximum of 8 credit hours.

BIOL 7990 RESEARCH AND THESIS (1-10) MST. Course may be repeated with change in topic.

BIOL 8950 DOCTORAL SEMINAR (1) SEM. 1. SU. Oral presentation and discussion of research in the field of specialization. Course may be repeated for a maximum of 3 credit hours.

BIOL 8990 RESEARCH AND DISSERTATION (1-10) DSR. Course may be repeated with change in topic.

Biological Sciences Minor

Students must complete fifteen hours of coursework at the 3000 level and above. In order to enroll in these courses, students must first complete BIOL 1020, BIOL 1021, BIOL 1030, BIOL 1031, as pre-requisites for the upper level courses.

Genetics (GENE)

The genetics major provides a broad perspective on the biological and physical sciences that are fundamental to the study of heredity and evolution. Courses cover the molecular mechanisms that underpin genetic changes as well as cutting-edge analysis of genome-scale data. This flexible major is designed to serve students interested in a broad range of careers related to genetics, including basic research as well as applications in biotechnology, agriculture, and the environment. The introductory coursework provides students with a strong foundation in biology, while upper-level courses can be tailored to include invaluable computational skills. The Genetics major provides students with a strong foundation for careers in healthcare including medicine, pharmacy and genetic counseling.

The genetics major provides a broad foundation in the biological, physical, and mathematical sciences fundamental to the study of heredity and evolution. The major is flexible in order to serve students interested in genetics, either as a basic discipline or in its application in biotechnology, agriculture, environment/conservation, and medicine.

Genetics Electives

GENE CORE Electives

- BIOL 3020 Genomic Biology (4)
- BIOL 4150 Human Genetics (3)

- BIOL 5260 Prokaryotic Molecular Genetics (3)
- BIOL 5320 Plant Gene Expression (3)
- BIOL 5521 Gene Expression and Recombinant DNA Laboratory (2)
- BIOL 5850 Functional Genomics (3)
- BIOL 5860 Bioinformatics and Genome Analysis (3)

GENE SUPP Electives

Any additional GENE CORE Elective

- BIOL 3200/BIOL 3201 Microbiology (4)
- BIOL 4410 Vertebrate Development (5)
- BIOL 4920 Internship in Biology (up to 4)
- BIOL 4970 Special Topics (as appropriate: i.e., Genetics of Mammalian Disease)
- BIOL 4980 Undergraduate Research (up to 6)
- BIOL 5050 Fundamentals of Biophysics (2)
- BIOL 5230 Virology (3)
- BIOL 5500 Immunology (3)
- BIOL 5550 Nanomedicine (2)
- BIOL 5600 Biomedical Physiology (5)
- BCHE 5190 Biochemistry II (3)
- PHYS 1510 General Physics II (4)
- AGRI 3000 Agricultural Genetics (4)
- ANSC 3500 Animal Breeding (3)
- APBT 1000 Introduction to Applied Biotechnology (1)
- APBT 3100 Methods of Synthetic Biology (4)
- APBT 4100 Applied Biotechnology (4)
- CSES 5100 Plant Genetics and Crop Improvement (3)
- FORY 3200 Forest Tree Physiology (3)

Marine Biology (MARB)

The Marine Biology major provides students with a broad perspective on marine systems ranging from molecular and cellular biology to organismal and ecological systems. Introductory courses cover concepts in marine biology, ecology and evolution. These courses lay a strong foundation for more specialized coursework that takes place at the Dauphin Island Sea Lab in Mobile, AL. This major is designed to serve students interested in careers related to marine biology, including basic research as well as applications in biotechnology, agriculture, and the environment.

1 Students must complete a two-course sequence in either HIST or LIT (for example, World History 1 and 2 or American Lit 1 and 2). For complete HIST and LIT sequence options, see the *Bulletin*.

2 Students who complete a HIST sequence other than HIST 1010 and HIST 1020 should talk to an advisor about CORE SOC SCI choices.

3 If a LIT sequence is chosen, this course must be a CORE SOCIAL SCIENCE. If a HIST sequence is chosen, this course must be a CORE HUMANITIES.

4 All courses taken at a Summer Marine Lab must receive departmental approval.

Microbial, Cellular & Molecular Biology — Cell & Molecular Biology Option (MCCM)

The Microbial, Cellular and Molecular Biology major provides students with a strong foundation in coursework that emphasizes understanding life at the cellular and molecular level. Students that select the Cell and Molecular Biology concentration will focus primarily on eukaryotic life. Students in this major will be well-prepared for postgraduate work or careers in both basic and applied biology, including biotechnology, pharmaceutical discovery and biomedical research. This major can be tailored to students interested in pursuing careers in healthcare including medicine, dentistry and optometry.

Microbial, Cellular & Molecular Biology — Microbiology Option (MCMB)

The Microbial, Cellular and Molecular Biology major provides students with a strong foundation in coursework that emphasizes understanding life at the cellular and molecular level. Within this major, students can formally select the Microbiology concentration, in which upper-level coursework focuses primarily on aspects of bacterial life. Students in this major will be well-prepared for postgraduate work, careers in basic or applied microbiology (including food and environmental microbiology) or research in biomedical science. This major can be tailored to students interested in pursuing careers in healthcare including medicine, dentistry and optometry.

Total Hours: 122

Long range schedules for COSAM courses are online at http://aub.ie/cosamlrs

Courses in BOLD will be used to calculate GPA in major.

Options for courses labeled CORE are in the Auburn University Bulletin (www.auburn.edu/bulletin) under Core Curriculum.

Students should declare a major in the semester they earn 60 hours.

Students must complete all requirements for that major prior to graduation.

Students planning a Physics major should consult with the pre-health advisor.

1 The Chemistry 1110/1111-1120/1121 sequence can substitute for CHEM 1030/1031-1040/1041. See advisor for details.
2 Students who have AP or transfer credit for US History should see an advisor for CORE SOC SCI choices.
3 Total electives required may change with choice of major.

Microbiology (MCMB) — Pre-Physical Therapy (TMCB), Pre-Physician Assistant (AMCB)

The Microbiology major provides students with a strong foundation in coursework that emphasizes understanding life at the cellular and molecular level focusing on bacterial life. Students in this major will be well-prepared careers in basic or applied microbiology (including food and environmental microbiology) or research in biomedical science. This major has been tailored to meet the requirements for students interested in pursuing careers in healthcare including physical therapy and physician assistants.

Organismal Biology (IBIO) — Pre-Med (MIBO), Pre-Den (DIBO), Pre-Opt (OIBO)

The Integrative Biology option with the Organismal Biology major provides students with a broad perspective on biological sciences. Introductory courses cover concepts in biology and chemistry and lay a strong foundation for more specialized, upper-level coursework that spans the field of biology, including ecology, evolution, physiology, cell biology and microbiology. This flexible major can be fulfilled through a long list of elective courses and is designed to serve students interested in a broad range of careers related to biology, including basic research as well as applications in biotechnology, agriculture, and the environment. This major has been tailored to meet the requirements for students interested in pursuing careers in healthcare including medicine, dentistry and optometry.

Total Hours: 122

Long range schedules for COSAM courses are online at http://aub.ie/cosamlrs
Courses in BOLD will be used to calculate GPA in major.
Options for courses labeled CORE are in the Auburn University Bulletin (www.auburn.edu/bulletin) under Core Curriculum.
Students should declare a major in the semester they earn 60 hours.
Students must complete all requirements for that major prior to graduation.
Students planning a Physics major should consult with the pre-health advisor.

1 The Chemistry CHEM 1110/CHEM 1111-CHEM 1120/CHEM 1121 sequence can substitute for CHEM 1030/CHEM 1031-CHEM 1040/CHEM 1041. See advisor for details.
2 Students who have AP or transfer credit for US History should see an advisor for CORE SOC SCI choices.
3 Total electives required may change with choice of major.

Organismal Biology (IBIO) — Pre-Physical Therapy (TIBO), Pre-Physician Assistant (AIBO)

The Integrative Biology option with the Organismal Biology major provides students with a broad perspective on biological sciences. Introductory courses cover concepts in biology and chemistry and lay a strong foundation for more specialized, upper-level coursework that spans the field of biology, including ecology, evolution, physiology, cell biology and microbiology. This flexible major can be fulfilled through a long list of elective courses and is designed to serve students interested in a broad range of careers related to biology, including basic research as well as applications in biotechnology, agriculture, and the environment. This major has been tailored to meet the requirements for students interested in pursuing careers in healthcare including physical therapy and physician assistants.

2 Students who have AP or transfer credit for US History should see an advisor for CORE SOC SCI choices.
3 Students planning a major in Biomedical Sciences should take CHEM 2080/81 as their professional elective in their sophomore or junior year.

Organismal Biology — Conservation and Biodiversity Option (CONS)

The Conservation and Biodiversity option within the Organismal Biology major provides students with a broad perspective on biological sciences. Specialized, upper-level coursework spans the field of ecology, evolution, physiology, with a focus on conservation and

biodiversity. This major is designed to serve students interested in a broad range of careers related to biology, including basic research as well as naturalist, policy makers and wildlife scientists.

[1] Students must complete a two-course sequence in either HIST or LIT (for example, World History 1 and 2 or American Lit 1 and 2). For complete HIST and LIT sequence options, see the *Bulletin*.

[2] If a LIT sequence is chosen, this course must be a CORE SOC SCI. If a HIST sequence is chosen, this course must be a CORE HUMANITIES.

* This course must be taken the semester of graduation.

Organismal Biology — Ecology, Evolution, and Behavioral Option (ECEB)

The Ecology, Evolution and Behavior option within the Organismal Biology major provides students with a specialized view of how organisms interact, how natural selection acts on individuals and populations, and how organisms alter behavior in different ecosystems. This major provides students with a set of the elective courses are designed to serve students interested in basic biological research as well as applied environmental sciences.

1 Students must complete a two-course sequence in either HIST or LIT (for example, World History 1 and 2 or American Lit 1 and 2). For complete HIST and LIT sequence options, see the *Bulletin*.

2 Students who choose a HIST sequence other than HIST 1010 and HIST 1020 should talk to an advisor about CORE SOC SCI choices.

3 If a LIT sequence is chosen, this course must be a CORE SOC SCI. If a HIST sequence is chosen, this course must be a CORE HUMANITIES.

4 Any BIOL course listed on the Organismal Biology electives list may be used as a Biology elective.

5 This course must be taken the semester of graduation.

Department of Chemistry & Biochemistry

Curriculum in Chemistry – BA

This curriculum provides a strong background in chemistry while allowing students to specialize in areas of interest. It is especially well suited for students leaning towards medical sciences and allows for more flexibility in course selection than the American Chemical Society approved biochemistry curriculum. The program allows for great versatility in the junior and senior years, allowing the curriculum to be tailored to individual goals. The curriculum prepares students for professional careers in chemistry, biochemistry, or forensic chemistry and advanced degree programs in chemistry, biochemistry, and medically related fields.

Curriculum in Chemistry – BS

This American Chemical Society approved curriculum provides a rigorous background in chemistry and is well suited for students who wish to obtain a deep knowledge of all of the traditional subdisciplines of this field: analytical, inorganic, organic, and physical chemistry and biochemistry. The curriculum prepares students for professional careers in chemistry, biochemistry, or forensic chemistry and advanced degree programs in chemistry, biochemistry, and medically related fields.

Curriculum in Biochemistry – BS

This American Chemical Society approved curriculum provides a rigorous background in biochemistry and is well suited for students who wish to obtain a deep knowledge of this field. The curriculum differs from that for BS Chemistry in that it includes biology courses in place of some of the advanced chemistry courses. The curriculum prepares students for professional careers in biochemistry, chemistry, or forensic chemistry and advanced degree programs in biochemistry, chemistry, and medically related fields.

Clinical Laboratory Sciences – BS

The Division of Clinical Laboratory Sciences has two curricula leading to the degree of Bachelor of Science in Medical Laboratory Science or Bachelor of Science in Laboratory Science. Within Laboratory Science, there are 3 additional pre-professional routes for pre-physician assistant, pre-medicine, and histotechnology. These curricula prepare students for laboratory careers in fields such as clinical diagnostics, public health, bacteriology, environmental testing, industrial quality control, research and forensic science. Graduates within the medical laboratory science track will have the opportunity to become an American Society of Clinical Pathology (ASCP) certified medical laboratory scientist after successful completion of a National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) accredited clinical internship and passing the national certifying examination.

Majors

- Chemistry (BA) (p. 1280)
- Chemistry (BA) — Forensics Track (p. 1282)
- Chemistry (BA) — Pre-Professional Concentrations:
  - Pre-Medicine, Pre-Dental, Pre-Optometr (p. 1283)y
- Chemistry (BS) (p. 1286)
  - Biochemistry Option (p. 1284)
- Laboratory Science (p. 1287)
- Laboratory Science - Histotechnology Track (p. 1289)
- Laboratory Science — Pre-professional concentrations in:
  - Laboratory Science - Pre-Medicine (p. 1290)
  - Laboratory Science - Pre-Physician Assistant (p. 1291)
- Medical Laboratory Science (p. 1293)

Minors

- Chemistry (p. 1287)

Biochemistry Courses

BCHE 3180 NUTRITIONAL BIOCHEMISTRY (3) LEC. 3. Pr. CHEM 2030 or CHEM 2070 or CHEM 2077 or CHEM 2080 or CHEM 2087. Fundamental pathways of carbohydrate, lipid, and amino acid metabolism in human beings.

BCHE 3200 PRINCIPLES OF BIOCHEMISTRY (3) LEC. 3. Pr. (BIOL 1010 or BIOL 1020 or BIOL 1030 or BIOL 1027 or BIOL 1037) and (CHEM 2030 or CHEM 2070 or CHEM 2077 or CHEM 2080 or CHEM 2087). Structure and function of biomolecules, enzyme catalysis, processing of genetic information, bioenergetics and metabolism, and regulatory mechanisms in cellular processes.

BCHE 5180 BIOCHEMISTRY I (3) LEC. 3. Pr. CHEM 2080 or CHEM 2087. Fundamentals of metabolism, focusing on the design and regulation of the major catabolic and biosynthetic metabolic pathways. Bioenergetics.

BCHE 5181 BIOCHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C BCHE 5180 or P/C CHEM 5180. Laboratory techniques required for identification and quantification of compounds of important biochemical classes.

BCHE 5190 BIOCHEMISTRY II (3) LEC. 3. Pr. BCHE 5180 or BCHE 6180. Fundamentals of metabolism, focusing on the design and regulation of the major catabolic and biosynthetic metabolic pathways.

BCHE 5191 BIOCHEMISTRY II LABORATORY (1) LAB. 3. Pr. P/C BCHE 5190 or P/C CHEM 5190. Laboratory techniques required for partial purification, kinetic studies, and characterization of enzymes and nucleotides from various plants, animals and bacteria.

BCHE 6180 BIOCHEMISTRY I (3) LEC. 3. Pr. CHEM 2080 or CHEM 2087. Departmental approval. Fundamentals of the classification, structure, and reactions of the major constituents of living matter and evaluation of binding phenomena and bioenergetics.

BCHE 6181 BIOCHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C BCHE 6180 or P/C CHEM 6180. Laboratory techniques required for identification and quantification of compounds of important biochemical classes.

BCHE 6190 BIOCHEMISTRY II (3) LEC. 3. Pr. BCHE 6180. Departmental approval. Fundamentals of metabolism, focusing on the design and regulation of the major catabolic and biosynthetic metabolic pathways.

BCHE 6191 BIOCHEMISTRY II LABORATORY (1) LAB. 3. Pr. P/C CHEM 6190. Laboratory techniques required for partial purification, kinetic studies, and characterization of enzymes and nucleotides from various plants, animals, and bacteria.

BCHE 7200 ADVANCED BIOCHEMISTRY I (3) LEC. 3. Graduate credit will not be given for both BCHE 6190 and BCHE 7200.

BCHE 7210 ADVANCED BIOCHEMISTRY II (3) LEC. 3. Structure and function of macromolecules participating in the flow of molecular information. Graduate credit will not be given for both BCHE 6180 and BCHE 7210. Or equivalent.

BCHE 7220 PRINCIPLES OF CELLULAR AND MOLECULAR ENZYMOLOGY (3) LEC. 3. Pr. BCHE 6190 or CHEM 6190 or BCHE 7200. Departmental approval. The principles of enzyme chemistry including the physical, chemical, and catalytic properties of enzymes.

BCHE 7230 BIOCHEMISTRY OF MACROMOLECULES (3) LEC. 3. Pr. BCHE 6180 or BCHE 7200. Departmental approval. Advanced study of the structure of protein and nucleic acids: DNA replication, RNA transcription and protein synthesis.

BCHE 7260 BIOINFORMATICS (3) LEC. 3. Pr. BCHE 7210. Departmental approval. Advanced study of main concepts and tools of genomics and proteomics.

BCHE 7270 BIOCHEMICAL RESEARCH TECHNIQUES (3) LEC. 3. Pr. BCHE 6190. Modern biochemical laboratory techniques. Course may be repeated for a maximum of 6 credit hours.

BCHE 7280 TOPICS IN BIOCHEMISTRY (1-3) LEC. Pr. BCHE 7210. Departmental approval. Directed studies in biochemistry. BCHE 7210 or equivalent. Course may be repeated for a maximum of 3 credit hours.

Chemistry Courses

CHEM 1010 SURVEY OF CHEMISTRY I (3) LEC. 3. Science Core. Survey of important topics from general and organic chemistry. Atomic and bonding theory, chemical reactions and stoichiometry, gas laws, solutions, acids and bases, hydrocarbons, alcohols, ethers and amines.

CHEM 1011 SURVEY OF CHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C CHEM 1010. Science Core. Laboratory experiments emphasizing course material in CHEM 1010.

CHEM 1020 SURVEY OF CHEMISTRY II (3) LEC. 3. Pr. CHEM 1010. Science Core. Survey of important topics from organic and biochemistry. Aldehydes and ketones, carboxylic acids, carbohydrates, lipids, proteins, enzymes, extracellular fluids, metabolism, nucleic acids, radioactivity.

CHEM 1021 SURVEY OF CHEMISTRY II LABORATORY (1) LAB. 3. Pr. P/C CHEM 1020 and CHEM 1011. Science Core. Laboratory experiments emphasizing course material in CHEM 1020.

CHEM 1030 FUNDAMENTALS CHEMISTRY I (3) DSL/LEC. Science Core. Atomic and molecular theory, chemical equations, stoichiometry, gas laws, thermochemistry, bonding, electronic structure, molecular geometries, solids, liquids, properties of solutions, problem-solving techniques. Credit will not be given for both CHEM 1030 and CHEM 1110 or CHEM 1117.

CHEM 1031 FUNDAMENTAL CHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C CHEM 1030 or P/C CHEM 1033. Science Core. Laboratory experiments emphasizing course material in CHEM 1030. Credit will not be given for both CHEM 1031 and CHEM 1111 or CHEM 1118.

CHEM 1040 FUNDAMENTAL CHEMISTRY II (3) LEC. 3. Pr. CHEM 1030 or CHEM 1033 or CHEM 1110 or CHEM 1117. Science Core. Chemical kinetics; chemical equilibrium; acids and bases; calculations of pH; equilibrium constants and thermodynamical properties; electrochemistry; descriptive chemistry. Credit will not be given for both CHEM 1040 and CHEM 1120 or CHEM 1127.

CHEM 1041 FUNDAMENTAL CHEMISTRY II LABORATORY (1) LAB. 3. Pr. (P/C CHEM 1040 or P/C CHEM 1043) and (CHEM 1031 or CHEM 1111 or CHEM 1118). Science Core. Laboratory experiments emphasizing course material in CHEM 1040. Credit will not be given for both CHEM 1041 and CHEM 1121 or CHEM 1128.

CHEM 1110 GENERAL CHEMISTRY I (3) LEC. 3. Pr. P/C MATH 1610 or P/C MATH 1613 or P/C MATH 1617. Science Core. Chemical principles for chemistry and related majors. Atomic and molecular theory, periodicity, chemical reactions, Stoichiometry, gases, thermochemistry, bonding, molecular geometries, liquids, solids, and solutions. Credit will not be given for both CHEM 1110 and CHEM 1030 or CHEM 1117.

CHEM 1111 GENERAL CHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C CHEM 1110 or P/C CHEM 1117. Science Core. Laboratory experiments emphasizing course material in CHEM 1110. Credit will not be given for both CHEM 1111 and CHEM 1031 or CHEM 1118.

CHEM 1117 HONORS GENERAL CHEMISTRY I (3) LEC. 3. Pr. Honors College. Science Core. General chemistry for students in the honors program. Topics similar to CHEM 1110, but covered in more depth. Credit will not be given for both CHEM 1117 and CHEM 1030 or CHEM 1110.

CHEM 1118 HONORS GENERAL CHEMISTRY I LABORATORY (1) LAB. 3. Pr. Honors College. CHEM 1117. Science Core. Laboratory experiments emphasizing course material in CHEM 1117. Credit will not be given for both CHEM 1118 and CHEM 1031 or CHEM 1111.

CHEM 1120 GENERAL CHEMISTRY FOR SCIENTISTS AND ENGINEERS II (3) LEC. 3. Pr. CHEM 1110 or CHEM 1117. Science Core. Continuation of CHEM 1110. Chemical kinetics, chemical equilibrium, acids and bases, thermodynamics, electrochemistry, representative element and transition metal chemistry. Credit will not be given for both CHEM 1120 and CHEM 1040 or CHEM 1127.

CHEM 1121 GENERAL CHEMISTRY II LABORATORY (1) LAB. 3. Pr. (P/C CHEM 1120 or P/C CHEM 1127) and (CHEM 1111 or CHEM 1118). Science Core. Laboratory experiments emphasizing course material in CHEM 1120. Credit will not be given for both CHEM 1121 and CHEM 1041 or CHEM 1128.

CHEM 1127 HONORS GENERAL CHEMISTRY II (3) LEC. 3. Pr. Honors College. CHEM 1117. Science Core. General chemistry for students in the honors program. Topics similar to CHEM 1120, but covered in more depth. Credit will not be given for both CHEM 1127 and CHEM 1040 or CHEM 1120.

CHEM 1128 HONORS GENERAL CHEMISTRY II LABORATORY (1) LAB. 3. Pr. Honors College. Science Core. Laboratory experiments emphasizing course material in CHEM 1127. Credit will not be given for both CHEM 1128 and CHEM 1041 or CHEM 1121.

CHEM 2030 SURVEY OF ORGANIC CHEMISTRY (3) LEC. 3. Pr. CHEM 1040 or CHEM 1120 or CHEM 1127. Structure, nomenclature and reactions of the functional group classes of organic compounds polymers, and molecules of biological interest. Credit will not be given for both CHEM 2030 and CHEM 2070.

CHEM 2070 ORGANIC CHEMISTRY I (3) LEC. 3. Pr. CHEM 1040 or CHEM 1043 or CHEM 1120 or CHEM 1127. In-depth study of organic chemistry including structure, nomenclature, reactions, reaction mechanisms, stereochemistry, synthesis and spectroscopic structure determination organized by the functional group approach. Considers alkanes, alkenes, alkynes, alkyl halides, alcohols, ethers, and aromatic compounds. Credit will not be given for both CHEM 2070 and CHEM 2030.

CHEM 2071 ORGANIC CHEMISTRY I LABORATORY (1) LAB. 3. Pr. (P/C CHEM 2070 or P/C CHEM 2077) and (CHEM 1041 or CHEM 1128 or CHEM 1121). Laboratory for CHEM 2070.

CHEM 2077 HONORS ORGANIC CHEMISTRY I (3) LEC. 3. Pr. Honors College. Organic chemistry for students in the honors program and Chemistry & Biochemistry majors. Topics similar to CHEM 2070, but covered in more depth. Additional credit will not be given for CHEM 2070. Member of the Honors College or CHEM 1110 with grade of A or B or CHEM 1040 with grade of A.

CHEM 2078 HONORS ORGANIC CHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C CHEM 2070 or P/C CHEM 2077. Laboratory experiments emphasizing course material in CHEM 2077. Additional credit will not be given for CHEM 2071. Course may be repeated for a maximum of 3 credit hours.

CHEM 2080 ORGANIC CHEMISTRY II (3) LEC. 3. Pr. CHEM 2070 or CHEM 2077. Continuation of CHEM 2070. Aldehydes, ketones, amines, carboxylic acids, esters, amides, anhydrides, polymers, carbohydrates and amino acids.

CHEM 2081 ORGANIC CHEMISTRY II LABORATORY (1) LAB. 1. Pr. (CHEM 2070 or CHEM 2077) and (CHEM 2071 or CHEM 2078) and (P/C CHEM 2080 or P/C CHEM 2087). Laboratory for CHEM 2080.

CHEM 2087 HONORS ORGANIC CHEMISTRY II (3) LEC. 3. Pr. Honors College or departmental approval. Organic chemistry for students in the honors program and Chemistry & Biochemistry majors. Topics similar to CHEM 2080, but covered in more depth. Additional credit will not be given for CHEM 2080. Member of the Honors College or CHEM 2077

CHEM 2088 HONORS ORGANIC CHEMISTRY II LABORATORY (1) LAB. 3. Pr. P/C CHEM 2080 or P/C CHEM 2087. Laboratory experiments emphasizing course material in CHEM 2087. Additional credit will not be given for CHEM 2081. May count either CHEM 2081 or CHEM 2088. Course may be repeated for a maximum of 3 credit hours.

CHEM 2100 PROFESSIONAL DEVELOPMENT (1) LEC. 1. This course is designed to introduce students to the many opportunities available in chemistry, both as a career choice and while as a student. Students will have the opportunity to investigate available options, will reflect on what career success means to the student, and will chart a pathway to student professional success.

CHEM 2980 INTRODUCTION TO UNDERGRADUATE RESEARCH IN CHEMISTRY (1-3) LAB. SU. Individual problems course. Students will work under the direction of a staff member on some problem of mutual interest. Departmental approval required. Only Freshman or Sophomore. Course may be repeated for a maximum of 6 credit hours.

CHEM 3000 CHEMICAL LITERATURE (1) LEC. 1. Pr. CHEM 2080 or CHEM 2087. Chemical literature with emphasis on primary and secondary sources and the various computer data bases available.

CHEM 3050 ANALYTICAL CHEMISTRY (3) LEC. 3. Pr. CHEM 1040 or CHEM 1120 or CHEM 1127. Theory and application of volumetric, potentiometric and photometric chemical analysis.

CHEM 3051 ANALYTICAL CHEMISTRY LABORATORY (1) LAB. 3. Pr. P/C CHEM 3050. Analytical techniques applied to chemical analysis.

CHEM 3160 SURVEY OF PHYSICAL CHEMISTRY (3) LEC. 3. Pr. CHEM 1040 or (CHEM 1120 or CHEM 1127). The principles of physical chemistry.

CHEM 4070 PHYSICAL CHEMISTRY I (3) LEC. 3. Pr. (CHEM 1040 or CHEM 1120 or CHEM 1127) and (MATH 2630 or MATH 2637) and (MATH 2650 or PHYS 2400) and (PHYS 1610 or PHYS 1617). Principles of chemical thermodynamics, principles of application to problems of chemical interest.

CHEM 4071 PHYSICAL CHEMISTRY I LABORATORY (1) LAB. 3. Pr. P/C CHEM 4070.

CHEM 4080 PHYSICAL CHEMISTRY II (3) LEC. 3. Pr. (CHEM 1040 or CHEM 1120 or CHEM 1127) and (MATH 2630 or MATH 2637) and (MATH 2650 or PHYS 2400) and (PHYS 1610 or PHYS 1617). Principles of quantum mechanics and spectroscopy; application in molecular structure and in statistical thermodynamics.

CHEM 4081 PHYSICAL CHEMISTRY II LABORATORY (1) LAB. 3. Pr. P/C CHEM 4080. Laboratory for CHEM 4080.

CHEM 4100 INORGANIC CHEMISTRY (3) LEC. 3. Pr. CHEM 4080 or CHEM 3160. Principles of inorganic chemistry emphasizing periodic properties, bonding, structure and symmetry, the solid state, acid-base theory and coordination chemistry.

CHEM 4101 INORGANIC CHEMISTRY LABORATORY (1) LAB. 3. Pr. P/C CHEM 4100. Synthesis and characterization of a variety of inorganic compounds.

CHEM 4110 ORGANOMETALLICS AND CATALYSIS (3) LEC. 3. Pr. CHEM 4100. Departmental approval. Survey of organometallic chemistry and catalysis with main group, transition metal, and f-block elements.

CHEM 4130 INSTRUMENTAL ANALYSIS (3) LEC. 3. Pr. P/C CHEM 3050. Fundamental concepts used in instrumental analytical chemistry emphasizing spectrophotometric, electroanalytical and chromatographic analysis.

CHEM 4131 INSTRUMENTAL ANALYSIS LABORATORY (1) LAB. 3. Pr. P/C CHEM 4130. Laboratory for CHEM 4130.

CHEM 4920 CHEMISTRY INTERNSHIP (3) INT. 12. Departmental approval. Application of chemistry concepts and skills in a professional setting. The course may be repeated for a maximum of 6 credit hours.

CHEM 4950 UNDERGRADUATE SEMINAR (1) LEC. 1. Oral presentation and discussion of research in the area of specialization.

CHEM 4980 UNDERGRADUATE RESEARCH IN CHEMISTRY (3) LAB. 9. Departmental approval. This is an individual problem course. Each student will work under the direction of a staff member on some problem of mutual interest. Course may be repeated for a maximum of 9 credit hours.

CHEM 4997 HONORS THESIS (1-3) LEC. 3. Pr. Honors College. Departmental approval. Honors College Members Only; Course may be repeated for a maximum of 6 credit hours.

CHEM 5200 PYTHON PROGRAMMING IN CHEMISTRY (3) LEC. 3. Pr. CHEM 3160 or CHEM 4080. Computer programming in the Python language using specific examples relevant to different branches of chemistry. Emphasizes best practices for collaborative writing, documenting, and validating the program so that it is readable and maintainable.

CHEM 5280 COMPUTATIONAL CHEMISTRY (4) LEC. 3. LAB. 3. Pr. (CHEM 2080 or CHEM 2087) and CHEM 4080. Modern computational chemistry including molecular mechanics and quantum mechanical calculations.

CHEM 5450 FOUNDATIONS OF R FOR DBER (3) LEC. 3. R is an open-source statistical software that allows nearly limitless data manipulation, statistical analysis, and advance data visualizations for both the social and physical sciences required for quality research in discipline-based education research (DBER). This course will dedicate approximately one half to learning the basics of coding in R for many common tasks found in DBER (focusing on how to independently find and apply new functions as only a portion of functions can possibly be discussed) and the second half on applying these principles into real data from students' thesis or dissertation (or data can be provided by instructor).

CHEM 6200 PYTHON PROGRAMMING IN CHEMISTRY (3) LEC. 3. Computer programming in the Python language using specific examples relevant to different branches of chemistry. Emphasizes best practices for collaborative writing, documenting, and validating the program so that it is readable and maintainable.

CHEM 6280 COMPUTATIONAL CHEMISTRY (4) LEC. 3. LAB. 3. Pr. (CHEM 2080 or CHEM 2087) and CHEM 4080. Modern computational chemistry including molecular mechanics and quantum mechanical calculations.

CHEM 6450 FOUNDATIONS OF R FOR DBER (3) LEC. 3. R is an open-source statistical software that allows nearly limitless data manipulation, statistical analysis, and advance data visualizations for both the social and physical sciences required for quality research in discipline-based education research (DBER). This course will dedicate approximately one half to learning the basics of coding in R for many common tasks found in DBER (focusing on how to independently find and apply new functions as only a portion of functions can possibly be discussed) and the second half on applying these principles into real data from students' thesis or dissertation (or data can be provided by instructor).

CHEM 7100 ADVANCED INORGANIC CHEMISTRY (3) LEC. 3. Departmental approval. Current concepts of inorganic chemistry with an emphasis on theory, structure, bonding and reactivity.

CHEM 7110 PHYSICAL METHODS IN INORGANIC CHEMISTRY (3) LEC. 3. Pr. CHEM 7100. Or equivalent. Theory and application of techniques for obtaining information inorganic compounds including magnetism, multinuclear nmr, mass spectrometry, x-ray diffraction, vibrational and electronic spectroscopies.

CHEM 7120 ORGANOMETALLIC CHEMISTRY (3) LEC. 3. Pr. CHEM 7100. Departmental approval. Main group and transition metal organometallic chemistry.

CHEM 7160 ADVANCED TOPICS IN INORGANIC CHEMISTRY (3) LEC. 3. Pr. CHEM 7100. Departmental approval. Currently active research areas in inorganic chemistry. Course may be repeated for a maximum of 12 credit hours.

CHEM 7200 PHYSICAL ORGANIC CHEMISTRY (3) LEC. 3. This course will combine the foundations of undergraduate organic chemistry reactions and add to this the physical properties of chemical reactions as affected by real laboratory applications.

CHEM 7210 STRUCTURE ELUCIDATION OF ORGANIC COMPOUNDS (3) LEC. 3. Pr. CHEM 7200 or CHEM 7220. The early stages of this course will focus on the identification of functional groups, saturated, unsaturated and cyclic compounds using IR and NMR spectroscopy, as well as mass spectrometry. Detailed analyses of 1H NMR spectra, i.e., chemical shift, multiplet shape, and coupling constants will demonstrate the power of these methods in ascertaining atom connectivity in simple organic molecules. More advanced two-dimensional NMR techniques such as COSY, HSQC and HMBC will be discussed and used for determining the structures of more complex organic molecules. The determination of absolute and relative stereochemistry using Mosher ester analyses and NOESY, respectively, in chiral molecules will also be covered. Most of the structures that will be discussed and analyzed will be stereochemically complex systems and polycyclic molecules that require a combination of multiple one-dimensional and two-dimensional NMR techniques.

CHEM 7220 ORGANIC REACTIONS (3) LEC. 3. Pr. (CHEM 2070 or CHEM 2073 or CHEM 2077) and (CHEM 2080 or CHEM 2083 or CHEM 2087). Organic reactions are described in the context of oxidation; reduction; C-C, C-N, C-O bond forming; olefination; aldol (and related) condensations; pericyclic, fragmentation, ring-expansion and ring-contraction reactions; and, named organic reactions and their reaction mechanisms and their application to chemical synthesis. Concurrent enrollment with CHEM 7200 is highly recommended.

CHEM 7230 COMPLEX MOLECULE SYNTHESIS (3) LEC. 3. Pr. CHEM 7220. This class is focused on target-oriented chemical synthesis of complex organic molecules. The main objective is to teach students how to use retrosynthetic analysis, a method for disconnecting a complex molecule into simpler starting materials, as well classical and modern organic reactions to plan syntheses of organic compounds that are biologically relevant and important in the development of better pharmaceuticals. During the course of the semester, students will be introduced to important classes of natural products including terpenes, terpenoids, alkaloids, macrolides, polycyclic ethers, as well as designed molecules that are biologically relevant, but not natural products themselves. Identifying key structural components (i.e., retrons), stereogenic centers, and substructures that can be derived from the chiral pool will be emphasized in synthesis planning. All lecture content will come from the current literature, with only manuscripts published in the past 12 months being discussed in class. Students will be responsible for reading Classics in Total Synthesis on their own and tested on the content of this book as well as assigned current literature in class. Emphasis will be placed on identifying economical and streamlined synthetic protocols that can employ cascade or domino reaction sequences.

CHEM 7260 SPECIAL TOPICS IN ORGANIC CHEMISTRY (1-3) LEC. Pr. CHEM 7200. Advanced course in a research area in organic chemistry which is of mutual interest to graduate students and the instructor. Course may be repeated for a maximum of 6 credit hours.

CHEM 7270 SUPRAMOLECULAR CHEMISTRY: SYNTHESIS, STRUCTURES, AND APPLICATIONS (3) ST1. 3. Pr. CHEM 2080. Supramolecular Chemistry bridges organic, inorganic, surface science, and analytical chemistries. It is a topical area that explores synthesis, spatial organization, weak bonding interactions, hydrogen bonding or covalent bonding, and is interest for numerous industrial or pharmacy applications.

CHEM 7300 ADVANCED PHYSICAL CHEMISTRY (3) LEC. 3. Topics of general and current interest; may vary from year to year.

CHEM 7330 CHEMICAL KINETICS (3) LEC. 3. Theoretical and experimental aspects of reaction rates. The mathematics and characterization of chemically reacting systems.

CHEM 7350 QUANTUM AND STATISTICAL MECHANICS (3) LEC. 3. Pr. CHEM 7300. A quantum mechanical and statistical approach to molecular structure and chemistry.

CHEM 7370 SPECIAL TOPICS IN PHYSICAL CHEMISTRY (1-3) LEC. 3. Pr. CHEM 7300. Modern topics in advanced physical chemistry. Course may be repeated for a maximum of 3 credit hours.

CHEM 7380 MOLECULAR SPECTROSCOPY (3) LEC. 3. Pr. CHEM 7300. Theory and application of optical and magnetic resonance spectroscopy.

CHEM 7410 A DBER APPROACH TO TEACHING AND LEARNING IN CHEMISTRY (3) LEC. 3. Pr. CHEM 1030 and CHEM 1040. Discipline-based education research (DBER) theory andtrends, consuming and evaluating DBER research, activelearning in advanced chemistry topics, action research,review of pedagogical tools, assessment. This coursewill be of use to chemistry graduate students aimingfor careers in academia, masters education studentslooking to take a chemistry course for the fulfillmentof their degree requirements, and other fields that wantto know more about evaluating and critiquing current DBERliterature and methods.

CHEM 7500 ADVANCED ANALYTICAL CHEMISTRY (3) LEC. 3. Analytical principles, applications and methods, mathematical interpretations and current developments.

CHEM 7510 ELECTROANALYTICAL CHEMISTRY (3) LEC. 3. Pr. CHEM 7500. Analytical applications of electrochemistry.

CHEM 7530 ADVANCES IN BIOANALYTICAL CHEMISTRY (3) LEC. 3. Pr. CHEM 7500. Analytical Chemistry of microfluidic devices and "Lab on a chip." New methods of miniaturization of separations and analysis with emphasis on bioanalytical applications.

CHEM 7540 FLUORESCENCE IN BIOANALYTICAL CHEMISTRY: SPECTROSCOPY AND IMAGING (3) LEC. 3. Pr. CHEM 7500. Modern fluorescence-based bioanalytical methods as well as an advanced study of related literature. Standard approaches such as biosensors, nucleic acid analysis will be covered, as well as modern techniques such as Fluorescence microscopy, FRET, immunoassays, ELISAs and single-molecule detection.

CHEM 7550 PHOTO AND ELECTROCHEMISTRY (3) ST1. The course offers a simultaneous and comprehensive treatment of photochemistry and electrochemistry.

CHEM 7560 MASS SPECTROMETRY: INSTRUMENTATION AND APPLICATIONS (3) LEC. 3. Departmental approval. Several notable developments in mass spectrometry instrumentation platforms have been introduced which has led to significant increase in their implementations to various research and clinical applications. Learning about the fundamental principles of these instrumentation platforms will guide the users in selecting the correct instrument for a specific application. This course is designed to offer such an approach.

CHEM 7610 BIOCHEMISTRY AND BIOPHYSICS TECHNIQUES (3) LEC. 3. Fundamental concepts in biochemistry, molecular microbiology, and principles of physics will be introduced. This will be followed by presentations on the theory and practical application of common biophysical techniques. The techniques discussed will include, but will not be limited to: Raman, NMR, and Mass Spectrometry of biological molecules, X-ray Diffraction, Ion Mobility, Fluorescence Microscopy, Single-Molecule Approaches, EM/Cryo-EM, and Nano-particle techniques.

CHEM 7750 FORMAL PRESENTATIONS IN MODERN CHEMISTRY (1) LEC. 1. Oral presentations skills will be developed with a focus on the dissemination of new discoveries in the field of Chemistry. Course may be repeated for a maximum of 6 credit hours.

CHEM 7930 DIRECTED INDIVIDUAL STUDY (1-15) IND. Credit to be arranged. Course may be repeated for a maximum of 15 credit hours.

CHEM 7950 SEMINAR (1) SEM. 1. SU. Course may be repeated for a maximum of 6 credit hours.

CHEM 7990 RESEARCH AND THESIS (1-10) MST. Course may be repeated with change in topics.

CHEM 8990 RESEARCH AND DISSERTATION (1-10) DSR. Course may be repeated with change in topics.

Laboratory Science Courses

LBSC 2010 BASICS IN LABORATORY SCIENCE (2) LEC. 1. LAB. 1. Basic laboratory skills, quality control and assurance, standard precautions for biohazard testing; requirements for careers in medical and laboratory science.

LBSC 4010 HEMATOLOGY (3) LEC. 3. Pr. CHEM 2070 or CHEM 2077. Origin, maturation, morphology, and function of normal blood cells and abnormalities in diseased blood with clinical correlation to disease processes.

LBSC 4011 HEMATOLOGY LAB (2) LAB. 6. Pr. (CHEM 2070 or CHEM 2077) and P/C LBSC 4010 and P/C LBSC 2010. Lab portion of course covering origin, maturation, morphology, and function of normal blood cells and abnormalities in disease blood with clinical correlation to disease processes.

LBSC 4050 CLINICAL IMMUNOHEMATOLOGY/PARASITOLOGY (5) LEC. 3. LAB. 6. Pr. (CHEM 2070 or CHEM 2077) and (BIOL 1020 or BIOL 1027). Immunogenetics, clinical significance of blood group antigens and antibodies, theory and techniques of serological study of human blood groups. Human parasites, life cycles and disease processes.

LBSC 4250 CLINICAL BIOCHEMISTRY/INSTRUMENTATION (4) LEC. 3. LAB. 3. Pr. P/C BCHE 5180 or P/C BCHE 3200. Biochemistry/physiology of systems in the body of elements in body fluids during the normal and abnormal processes. Theoretical and practical application of Lab techniques, atomic absorption, gaschromatograph-FID, HPLC, spectroscopy, spectrophotometry, ion selective electrodes and RIA used in analysis of body fluids.

LBSC 4910 CLINICAL PRACTICUM (0) PRA.

LBSC 4920 CLINICAL INTERNSHIP (0) INT/PRA.

BA Chemistry (CHMA)

This curriculum provides a strong background in chemistry while allowing students to specialize in areas of interest. It is especially well suited for students leaning towards medical sciences while allowing more flexibility than that allowed in the American Chemical Society approved biochemistry curriculum. The program allows for great versatility in the junior and senior years, allowing the curriculum to be tailored to individual goals. The curriculum prepares students for professional careers in chemistry or biochemistry and advanced degree programs in chemistry, biochemistry and medically related fields.

1 CHEM 1030/CHEM 1031 and CHEM 1040/CHEM 1041 sequence can substitute for CHEM 1110/CHEM 1111 and CHEM 1120/CHEM 1121. See advisor for details.

2 Approved CHEM Electives include: BCHE 5190, BCHE 5191, CHEM 4100, CHEM 4101, CHEM 4110, CHEM 4130, CHEM 4131, CHEM 4920, or CHEM 4980. A maximum of 3 hours of CHEM 4920 or CHEM 4980 may be counted as a CHEM elective. Additional hours may be used as general elective.

[3] Students must complete a sequence of EITHER History or Literature to graduate. Please select the second half of EITHER the History or Literature sequence that you began.

[4] If a second LITERATURE sequence is chosen, this course must be a CORE SOCIAL SCIENCE. If a second HISTORY sequence is chosen, this course must be a CORE HUMANITIES.

[5] This course must be taken the semester of graduation.

BA Chemistry (CHMA): Forensics Track

The BA Chemistry (CHMA) curriculum provides a strong background in chemistry while allowing students to specialize in areas of interest. For the Forensics Track within CHMA, the courses prescribed emerged from discussions with professionals in the field (e.g., Alabama Department of Forensic Science [ADFS]). Within a solid background in the fundamentals of chemistry, robust knowledge of analytical chemistry, instrumental analysis, etc. are particularly valuable. The Forensic Track includes these emphases. The CHMA curriculum also affords the flexibility to choose from a wide variety of professional electives like Criminology (SOCY 3000), Judicial Process (POLI 3320), etc. Finally, the Forensic Track enables students to take Chemistry Internship (CHEM 4920) in their program of study to engage with a facility like the ADFS.

4 If a second LITERATURE sequence is chosen, this course must be a CORE SOCIAL SCIENCE. If a second HISTORY sequence is chosen, this course must be a CORE HUMANITIES.

BA Chemistry — Pre-Med (MCHA), Pre-Den (DCHA), Pre-Opt (OCHA)

The BA Chemistry (CHMA) curriculum provides a strong background in chemistry while allowing students to specialize in areas of interest. For the Pre-Medicine (MCHA), Pre-Dentistry (DCHA), and Pre-Optometry (OCHA) options, a robust curriculum in general, organic, analytical, and biochemistry is complemented with courses in microbiology, genetics, and the flexibility to choose from a wide array of electives that prepare students for entrance into health professional schools.

Long range schedules for COSAM courses are online at www.auburn.edu/cosam/students/

Courses in BOLD will be used to calculate GPA in major.

Options for courses labeled CORE are in the Auburn University Bulletin (www.auburn.edu/bulletin) under Core Curriculum.

1 CHEM 1030/1031 and 1040/1041 sequence can substitute for CHEM 1110/1111 and 1120/1121. See advisor for details.
2 CHEM Electives are defined as any CHEM course 3000-level and above. A maximum of 3 hours of CHEM 4980 may be counted as a CHEM elective. Additional hours may be used as general elective.
3 Students must complete a sequence of EITHER History or Literature to graduate. Please select the second half of EITHER the History or Literature sequence that you began.
4 If a second LITERATURE sequence is chosen, this course must be a CORE SOCIAL SCIENCE. If a second HISTORY sequence is chosen, this course must be a CORE HUMANITIES.
5 This course must be taken the semester of graduation.

Biochemistry (BCHM)

This American Chemical Society approved curriculum provides a rigorous background in biochemistry with a solid foundation in analytical, organic, and physical chemistry. It is well suited for students who wish to obtain a deep knowledge of the chemistry of life. The curriculum differs from that for BS Chemistry in that it includes biology courses in place of some of the advanced chemistry courses. The curriculum prepares students for professional careers in biochemistry, chemistry, medicinal chemistry, biotechnology, or forensic chemistry. The degree also prepares students to enter advanced degree programs in biochemistry, chemistry, molecular biology, cell biology, genetics, and medically related fields.

1 CHEM 1030/CHEM 1031 and CHEM 1040/CHEM 1041 sequence can substitute for CHEM 1110/CHEM 1111 and CHEM 1120/CHEM 1121. See advisor for details.

2 May take more CHEM 4920 or CHEM 4980 as additional elective hours.

3 Students must complete a sequence of EITHER History or Literature to graduate. Please select the second half of EITHER the History or Literature sequence that you began.

4 If a second LITERATURE sequence is chosen, this course must be a CORE SOCIAL SCIENCE. If a second HISTORY sequence is chosen, this course must be a CORE HUMANITIES.

5 This course must be taken the semester of graduation.

Chemistry (CHEM)

This American Chemical Society approved curriculum provides a rigorous background in chemistry and is well suited for students who wish to obtain a deep knowledge of all of the traditional subdisciplines of this field: analytical, inorganic, organic, and physical chemistry and biochemistry. The curriculum prepares students for professional careers in chemistry, biochemistry, or forensic chemistry and advanced degree programs in chemistry, biochemistry, and medically related fields.

1 CHEM 1030/CHEM 1031 and CHEM 1040/CHEM 1041 sequence can substitute for CHEM 1110/CHEM 1111 and CHEM 1120/CHEM 1121. See advisor for details.

2 Students must complete a sequence of EITHER History or Literature to graduate. Please select the second half of EITHER the History or Literature sequence that you began.

3 If a second LITERATURE sequence is chosen, this course must be a CORE SOCIAL SCIENCE. If a second HISTORY sequence is chosen, this course must be a CORE HUMANITIES.

4 May take more CHEM 4920 or CHEM 4980 as additional elective hours.

5 This course must be taken the semester of graduation.

Chemistry Minor

Students must complete seventeen hours of coursework, with nine of these hours at the 3000-level and above. In order to enroll in these courses, students must first complete CHEM 1030/1031 (OR CHEM 1110/1111) and CHEM 1040/1041 (OR CHEM 1120/1121), as pre-requisites for the upper level courses.

Honors coursework will be accepted (examples: CHEM 2077/2078, and contracted BCHE 6180/6190)

Code	Title	Hours
CHEM 2070	Organic Chemistry I	3
CHEM 2071	Organic Chemistry I Laboratory	1
CHEM 2080	Organic Chemistry II	3
CHEM 2081	Organic Chemistry II Laboratory	1
Nine hours of CHEM credit at the 3000-level or higher (BCHE 5180 and BCHE 5190 may count)	Maximum 3 hours of CHEM 4980 can be used	9
Total Hours		**17**

Laboratory Science (LBSC)

This curriculum prepares students for laboratory careers in fields such as public health, bacteriology, environmental testing, industrial quality control, research, non-diagnostic laboratory testing, and forensic science. This program allows for great versatility in the junior or senior years, allowing the curriculum to be tailored to individual goals. Concentration tracks are offered for Pre-Medicine, Pre-Physician Assistant, and Histotechnology. Graduates may choose to pursue an accredited clinical internship to qualify for Medical Laboratory Scientist certification.

Laboratory Science (LBSC) - Histotechnology Track

This curriculum prepares students for laboratory careers in fields such as public health, bacteriology, environmental testing, industrial quality control, research, non-diagnostic laboratory testing, and forensic science. This concentration prepares students to work in diagnostic histology labs. Upon degree conferral, graduates are able to gain employment through East Alabama Healthcare to receive clinical experience required for the Histotechnologist (HT) certification through Americal Society for Clinical Pathology (ASCP).

Department of Geosciences

The curriculum in geology provides a background in the geosciences and opportunity to specialize in an area of interest (i.e., environmental geology, paleontology) through elective major or related courses. It is designed for those interested in preparation for graduate studies or employment in the field of geology.

The curriculum in geography and environmental studies promotes geographic literacy as an indispensable element in any educational program. It focuses on spatial relationships and the view of the Earth as the home of humankind. Geography readies students for careers in public services, consulting companies, state or federal agencies, utilities and other professions, as well as for graduate studies in geography.

Majors

- Geography and Environmental Studies (p. 1303)
- Geology (p. 1304)
- Geology — Earth System Science Option (p. 1306)

Minors

- Geography (p. 1304)
- Geology (p. 1306)

Undergraduate Certificates

- Geographic Information Systems (GIS) (p. 1302)

Geography Courses

GEOG 1000 INTRODUCTION TO GEOGRAPHY (1) LEC. 1. LAB. 0, LEC. 0. Introduction to fundamental concepts and major fields of study in geography

GEOG 1010 GLOBAL GEOGRAPHY (3) LEC. 3. Social Science I Core. Spatial and locational context for analyzing change in the contemporary world, including elements of both physical and cultural environments.

GEOG 1017 HONORS GLOBAL GEOGRAPHY (3) LEC. 3. Pr. Honors College. Spatial and locational context for analyzing change in the contemporary world, including elements of both physical and cultural environments.

GEOG 1020 GLOBAL SYSTEMS WEATHER/CLIMATE (4) DSL/LLB. The ‘Weather and Climate’ GS course will teach students the difference between weather and climate. They will evaluate the effect of weather on the food we eat, where we live, what we wear and the science behind climate change. This course will identify and describe Earth’s physical systems and make connections between them.

GEOG 1030 GLOBAL SYSTEMS LAND/WATER (4) DSL/LLB. The ‘Land and Water’ Global Systems course will compare the modification of land and water resources due to human interventions and weather anomalies over time. It will highlight the connection between temperature and precipitation, weathering of rocks, soil type and the river system, human nature interactions and ecosystems of the Earth.

GEOG 2000 PROFESSIONAL DEVELOPMENT (1) LEC. 1. Introduction to career opportunities in the Geosciences; goal selection and charting a pathway to success as a professional. Includes writing skills, research and funding opportunities, internships, creation of resumes and ePortfolios, and job applications.

GEOG 2010 HUMAN GEOGRAPHY (3) LEC. 3. Spatial perspectives on modern society such as population change, economics, politics, urban development, and local culture, and geography's approach to solving problems using case studies and issues.

GEOG 2017 HONORS HUMAN GEOGRAPHY (3) LEC. 3. Spatial perspectives on modern society such as population change, economics, politics, urban development, and local culture, and geography's approach to solving problems using case studies and issues.

GEOG 2020 PHYSICAL GEOGRAPHY (3) LEC. 3. Selected elements of the earth's physical system to include such items as landforms, basic weather elements, soils and vegetation.

GEOG 3000 SPORTS GEOGRAPHY (3) LEC. 3. Geographical basis of sports at different spatial scales, including locational strategies, sportive nationalism, and the urban political economy of sports.

GEOG 3110 UNITED STATES AND CANADA (3) LEC. 3. Survey of the region incorporating physical and cultural elements, providing a synthesis of the economic and political processes of the U.S. and Canada.

GEOG 3120 ALABAMA AND THE SOUTHEAST (3) LEC. 3. Study of the physical and cultural environments of the state.

GEOG 3130 LATIN AMERICA (3) LEC. 3. Survey of physical and human landscape of the region including historical geography, natural resources, economic development and problems and prospects affecting major countries.

GEOG 3140 AFRICA (3) LEC. 3. Analysis of the relationships among diverse population groups and the physical environments of sub-Saharan Africa.

GEOG 3150 EUROPE (3) LEC. 3. Survey of physical and human landscape of the region including historical geography, natural resources, economic development, and problems and prospects affecting several of the major countries.

GEOG 3300 INTERNATIONAL TRAVEL AND TOURISM (3) LEC. 3. Environmental and cultural patterns that characterize places attractive to tourists. Provides realistic situations for developing travel plans and programs.

GEOG 3720 STUDY ABROAD-CLIMATE CHANGE AND ENVIRONMENT (3) LEC. 10. LAB. 5. Coreq. PARK 3630 and NATR 3320 and NATR 4250. Three-week course intended to give students a general understanding of the potential impacts of climate change on the environment in the tropics via a mix of lectures, hands-on activities and field trips. Departmental approval required.

GEOG 3810 CARTOGRAPHY AND GRAPHICS (4) LEC. 2. LAB. 2. Techniques of map production including relevant computer graphics applications and related laboratory exercises.

GEOG 4740 SENIOR SEMINAR (2) SEM. 2. Individual research by geoscience undergraduates is coupled with improved written and oral communication skills along with resume and ePortfolio development. May count GEOG 4740 or GEOL 4740.

GEOG 4920 INTERNSHIP (3) LEC. 3. Opportunity to apply classroom experience to real job setting. Course may be repeated for a maximum of 6 credit hours.

GEOG 4930 DIRECTED STUDIES (1-4) AAB/IND. Departmental approval. Conferences, reading, research and/or reports may fulfill course requirement. Course may be repeated for a maximum of 4 credit hours.

GEOG 5010 URBAN GEOGRAPHY AND SUSTAINABILITY (3) LEC. 3. Senior standing or Departmental approval. An introduction to the field of urban geography and urban sustainability. Basic principles and processes that constitute the growth of urban areas, history, impact of urbanization, adaptation and mitigation towards a sustainable future.

GEOG 5210 CLIMATOLOGY (3) LEC. 3. Pr., Senior standing or departmental approval. An introduction to the field of climatology. Basic principles and process that constitute the earth's climate system (e.g. surface-atmosphere energy budge, the hydrologic cycle, and atmospheric motion) as well as climate change and sea level rise.

GEOG 5220 GEOMORPHOLOGY (3) LEC. 2. LAB. 2. Basic concepts, terms, and techniques used to identify landforms and their evolutionary processes. Study of the origin of landforms with emphasis on the eologic processes and structures that generate the landforms and applications of landform analysis. Two all-day weekend trips are required. Two one-hour classes and one two-hour laboratory per week.

GEOG 5350 ECONOMIC GEOGRAPHY (3) LEC. 3. Departmental approval. Economic Geography in a global context. Spatial aspects of resource use, agricultural development, manufacturing production and services.

GEOG 5380 POLITICAL GEOGRAPHY (3) LEC. 3. Examination of political processes over space, from local to the global levels. The course examines the development of political space, geographies of voting, the role of identity in shaping nationalism, and the geopolitical relationship between power and place.

GEOG 5400 GEOGRAPHY OF NATURAL HAZARDS (3) LEC. 3. Geography of natural hazards and their impacts on society. Credit will not be given for both GEOG 5400 and GEOG 6400.

GEOG 5510 HUMAN-ENVIRONMENT INTERACTION (3) LEC. 3. Departmental approval. Investigation of the inter-relationships between humans and their natural or physical environments.

GEOG 5550 GEOGRAPHY OF WATER RESOURCES (3) LEC. 3. Study of water use, management, law, and conflicts at local and international scales. May count either GEOG 5550 or GEOG 6550.

GEOG 5600 GLOBAL RESOURCES AND THE ENVIRONMENT (3) LEC. 3. Departmental approval. Global environmental problems such as climate change, ozone and deforestation and international public agencies and private volunteer movements protecting our global commons.

GEOG 5700 QUANTITATIVE METHODS AND SPATIAL ANALYSIS (3) LEC. 3. Pr. STAT 2510 or STAT 2513. Pr., STAT 2510 or similar statistics course. Applications of quantitative methods and spatial statistics to environmental, urban and economic systems and implementations of these techniques in GIS and statistical software. Credit will not be given for both GEOG 5710 and GEOG 6710.

GEOG 5710 GEOGRAPHIC FIELD METHODS (3) LEC. 1. LAB. 4. Geographic methods and techniques used to conduct field research investigations of human and physical characteristics of the landscape. Credit will not be given for both GEOG 5710 and GEOG 6710.

GEOG 5800 GEOGRAPHIC THOUGHT (3) LEC. 3. Departmental approval. Develops effective thinking skills, evaluates written materials in geography, reviews geographical research and produces written reports and papers related to geographic issues.

GEOG 5820 AERIAL PHOTOGRAPHY AND REMOTE SENSING (4) LEC. 3. LAB. 2. Departmental approval. Aerial photo and satellite digital interpretation, photogrammetry, remote sensing technology and photogrammetry and related laboratory exercises.

GEOG 5830 GEOGRAPHIC INFORMATION SYSTEMS (4) LEC. 3. LAB. 2. Introduction to concepts and techniques used in developing a geographic information system (GIS) for evaluating spatial distribution patterns and spatial relationships.

GEOG 5850 DRONES AND GEOSPATIAL APPLICATIONS (3) LEC. 3. LAB. 3. Pr. GEOG 5830 or GEOG 6830. This course will introduce the concepts of drone data collection, processing, and analysis and focus on how these high-resolution datasets can be used in a multitude of geospatial (including GIS and remote sensing) applications. This class will have both in-class and field components. Prerequisite: An Intro to GIS class is preferred, please contact the instructor if you have questions.

GEOG 5880 ADVANCED GEOGRAPHIC INFORMATION SYSTEMS (3) LEC. 2. LAB. 2. Pr. GEOG 5830. Advanced concepts and techniques used in the collection and analysis of data for evaluating spatial patterns and process. Credit will not be given for both GEOG 5880 and GEOG 6880.

GEOG 5890 GIS PROGRAMMING (3) LEC. 2. LAB. 2. Pr. P/C GEOG 5830. This course is an introduction to programming and scripting for intermediate Geographic Information Systems (GIS) users. Students will learn how to design and write clearly structured scripts in Python using a standalone development environment. Students will develop programs to manage geospatial data, perform geoprocessing analysis, and design custom tools that can be integrated into common GIS software packages. Intro to GIS is a prerequisite which can be met if taken during the same semester (co-requisite). Credit will not be given for both GEOG 5890 and GEOG 6890

GEOG 5970 SEMINAR IN GEOGRAPHY (3) LEC. 3. Development of modern geographic thinking with attention to applied research topics. Course may be repeated for a maximum of 6 credit hours.

GEOG 6010 URBAN GEOGRAPHY AND SUSTAINABILITY (3) LEC. 3. An introduction to the field of urban geography and urban sustainability. Basic principles and processes that constitute the growth of urban areas, history, impact of urbanization, adaptation and mitigation towards a sustainable future.

GEOG 6210 CLIMATOLOGY (3) LEC. 3. Pr., Senior standing or departmental approval. An introduction to the field of climatology. Basic principles and process that constitute the earth's climate system (e.g surface-atmosphere energy budge, the hydrologic cycle, and atmospheric motion, as well as climate change and sea level rise.

GEOG 6220 GEOMORPHOLOGY (3) LEC. 3. Basic concepts, terms, and techniques used to identify landforms and their evolutionary processes. Credit will not be given for both GEOG 5220 and GEOG 6220.

GEOG 6350 ECONOMIC GEOGRAPHY (3) LEC. 3. Departmental approval. Economic Geography in a global context. Spatial aspects of resource use, agricultural development, manufacturing production and services.

GEOG 6380 POLITICAL GEOGRAPHY (3) LEC. 3. Examination of political processes over space, from local to the global levels. The course examines the development of political space, geographies of voting, the role of identity in shaping nationalism, and the geopolitical relationship between power and place.

GEOG 6400 GEOGRAPHY OF NATURAL HAZARDS (3) LEC. 3. Geography of natural hazards and their impacts on society. Credit will not be given for both GEOG 5400 and GEOG 6400.

GEOG 6510 HUMAN-ENVIRONMENT INTERACTION (3) LEC. 3. Departmental approval. Investigation the inter-relationships between humans and their natural or physical environments.

GEOG 6550 GEOGRAPHY OF WATER RESOURCES (3) LEC. 3. Study of water use, management, law, and conflicts at local and international scales. May count either GEOG 5550 or GEOG 6550.

GEOG 6700 QUANT METH & SPATIAL ANALYSIS (3) LEC. 3. Pr. STAT 2510 or STAT 2513. or similar statistics course. Applications of quantitative methods and spatial statistics to environmental, urban and economic systems and implementations of these techniques in GIS and statistical software. Credit will not be given for both GEOG 5700 and GEOG 6700.

GEOG 6710 GEOGRAPHIC FIELD METHODS (3) LEC. 1. LAB. 4. Geographic methods and techniques used to conduct field research investigations of human and physical characteristics of the landscape. Credit will not be given for both GEOG 5710 and GEOG 6710.

GEOG 6800 GEOGRAPHIC THOUGHT (3) LEC. 3. Departmental approval. Develops effective thinking skills; evaluates written materials in geography; Reviews geographical research and produces written reports and papers related to geographic issues.

GEOG 6820 AERIAL PHOTOGRAPHY AND REMOTE SENSING (4) LEC. 3. LAB. 2. Departmental approval. Aerial photo and satellite digital interpretation, photogrammetry, remote sensing technology and photogrammetry and related laboratory exercises.

GEOG 6830 GEOGRAPHIC INFORMATION SYSTEMS (4) LEC. 3. LAB. 2. Departmental approval. Introduction to concepts and techniques used in developing a geographic information system (GIS) for evaluating spatial distribution patterns and spatial relationships.

GEOG 6850 DRONES AND GEOSPATIAL APPLICATIONS (3) LEC. 3. LAB. 3. Pr. GEOG 5830 or GEOG 6830. This course will introduce the concepts of drone data collection, processing, and analysis and focus on how these high-resolution datasets can be used in a multitude of geospatial (including GIS and remote sensing) applications. This class will have both in-class and field components. Prerequisite: An Intro to GIS class is preferred, please contact the instructor if you have questions.

GEOG 6880 ADVANCED GEOGRAPHIC INFORMATION SYSTEMS (3) LEC. 2. LAB. 2. Pr. GEOG 6830. Advanced concepts and techniques used in the collection and analysis of data for evaluating spatial patterns and processes. Credit will not be given for both GEOG 5880 and GEOG 6880.

GEOG 6890 GIS PROGRAMMING (3) LEC. 2. LAB. 2. Pr. P/C GEOG 6830. This course is an introduction to programming and scripting for intermediate Geographic Information Systems (GIS) users. This course teaches students to design and write clearly structured scripts in Python using a standalone development environment. Students will develop programs to manage geospatial data, perform geoprocessing analysis, and design custom tools that can be integrated into common GIS software packages. Intro to GIS is a prerequisite which can be met if taken during the same semester (co-requisite). Credit will not be given for both GEOG 5890 and GEOG 6890

GEOG 6970 SEMINAR IN GEOGRAPHY (3) LEC. 3. Departmental approval. Development of modern geographic thinking with attention to applied research topics. Course may be repeated for a maximum of 6 credit hours.

GEOG 7000 ESSENTIAL TEACHING SKILLS FOR GEOSCIENCE GTAS (3) LEC. 3. LAB. 0, LEC. 0. This course is designed to equip graduate teaching assistants (GTAs) in the geosciences with the foundational skills and knowledge necessary to succeed as effective educators in higher education. Participants will explore essential topics such as backwards design, active learning strategies, classroom management, effective communication, assessment design, the integration of technology in teaching, and navigating power dynamics. The course emphasizes practical application through hands-on activities, peer collaboration, and reflective teaching practices. Department approval.

GEOG 7930 DIRECTED STUDIES (1-3) AAB. Departmental approval. Individualized literature, field and/or laboratory research not available through regularly offered coursework. Subject matter and credit hours shall be determined by student and directing faculty. Course may be repeated for a maximum of 3 credit hours.

GEOG 7980 CAPSTONE RESEARCH (1-3) RES. SU. Departmental approval. enrolled as GEOG MS non-thesis student. Literature, field and/or laboratory research directed toward the completion of capstone project for non-thesis option. Course may be repeated for a maximum of 3 credit hours.

GEOG 7990 M.S. RESEARCH AND THESIS (1-10) RES. Research and Thesis. Course may be repeated with change in topics.

GEOG 8900 DIRECTED STUDIES (1-6) IND. Provides exposure to discipline-specific research procedures in Earth System Science. Students will work closely with their mentors to explore an Earth-System problem through directed readings, literature searches, field work, laboratory experimentation, and quantitative analysis. Course may be repeated for a maximum of 6 credit hours.

Geology Courses

GEOL 1100 DYNAMIC EARTH (4) LEC. 3. LAB. 2. Science Core. General physical geology. Survey of the important minerals and rocks. Origin and classification of geologic structures, earthquakes, and landforms. Study of geologic maps. Credit will not be given for both GEOL 1100 and GEOL 3150.

GEOL 1107 HONORS DYNAMIC EARTH (4) LEC. 3. LAB. 2. Pr. Honors College. General physical geology for Honors students and for Geology majors. Topics similar to GEOL 1110 but covered in greater depth. Science Core.

GEOL 1110 EARTH AND LIFE THROUGH TIME (4) LEC. 3. LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107. Science Core. Physical and biological history of the Earth, with emphasis on the interaction between life, the atmosphere, rocks, and oceans.

GEOL 1117 HONORS EARTH AND LIFE THROUGH TIME (4) LEC. 3. LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107. Physical and biological history of the Earth, with emphasis on the interaction between life, the atmosphere, rocks, and oceans. For Honors students and Geology majors. Science Core.

GEOL 2000 PROFESSIONAL DEVELOPMENT (1) LEC. 1. Introduction to career opportunities in the Geosciences; goal selection and charting a pathway to success as a professional. Includes writing skills, research and funding opportunities, internships, creation of resumes and ePortfolios, and job applications.

GEOL 2010 MINERALOGY AND OPTICAL CRYSTALLOGRAPHY (5) LEC. 4. LAB. 2. Physical and chemical properties of minerals, classification and roles with emphasis on natural systems, materials science, health, and environment. Credit will not be given for both GEOL 2010 and GEOL 2013.

GEOL 2050 IGNEOUS AND METAMORPHIC PETROLOGY (4) LEC. 3. LAB. 2. Pr. GEOL 2010 or GEOL 2013. Principles and processes of igneous and metamorphic activity in a plate tectonic and petrologic context. Description, classification and interpretation of igneous and metamorphic rocks.

GEOL 2100 ENVIRONMENTAL GEOLOGY (4) LEC. 3. LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107. Emphasis on geology as an environmental science; applied geology, geological hazards and environmental regulations as applied to geologic environmental remediation.

GEOL 3060 LUNAR AND PLANETARY GEOLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107. Departmental approval. Geology of the planets, moons, asteroids and comets. Origin of the solar system. Space exploration. Impact cratering.

GEOL 3200 INTRODUCTION TO PALEOBIOLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 1110 or GEOL 1113 or GEOL 1117. The nature of the fossil record, applications of that data to geological and biological questions with emphasis on the concepts using examples from all biotic groups.

GEOL 3300 EVOLUTION AND EXTINCTION OF THE DINOSAURIA (3) LEC. 2. LAB. 2. Pr. GEOL 1100 or GEOL 1103 or GEOL 1107. Departmental approval. Survey of the dinosaurs, their evolution and extinction. Southeastern U.S. dinosaurs.

GEOL 3400 STRUCTURAL GEOLOGY (4) LEC. 3. LAB. 2. Pr. GEOL 2050. Fundamentals of rock deformation. The mechanics of rock flow, fracture, and folding. Geometric techniques of structural analysis.

GEOL 3550 FIELD GEOLOGY: METHODS AND APPLICATION (3) LEC. 2. LAB. 2, AAB/LLB. 2. Pr. GEOL 1100 and GEOL 1110. Departmental approval. Through a combination of classroom, laboratory, and field-based activities, this course develops skills of geologic data collection, observation, interpretation, and communication.

GEOL 3650 ADVANCED FIELD GEOLOGY (3) LEC. 1. LAB. 10. Pr. GEOL 3400 and GEOL 3550. Instruments and methods used in geological field mapping, interpretation of sedimentary, igneous and metamorphic rocks and deformational analysis. Summer only.

GEOL 4110 STRATIGRAPHY (3) LEC. 2. LAB. 2. Pr. GEOL 4010. Departmental approval. Description and correlation of layered earth materials. Synthesis and interpretation of stratigraphic correlations. North American Stratigraphic Code. History and theory of stratigraphy.

GEOL 4200 SEDIMENTARY PETROLOGY AND STRATIGRAPHY (4) LEC. 3. LAB. 2, LLB. 0. Pr. GEOL 2050. Description, classification, and interpretation of sediments and sedimentary rocks. Description and correlation of layered Earth materials. Stratigraphic correlation methods, and sequence stratigraphy. Department approval.

GEOL 4210 ECONOMIC GEOLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 3400. The origin, distribution and classification of mineral deposits formed by igneous, metamorphic and sedimentary processes. Introduction of methods of exploration and development.

GEOL 4260 INTRODUCTION TO GEOCHEMISTRY (3) LEC. 3. Pr. CHEM 1040 and GEOL 2050. Principles governing the distribution of major, minor and trace elements within the earth; differentiation of elements due to geologic processes and the hydrosphere.

GEOL 4300 GEODYNAMICS (3) LEC. 3. Pr. GEOL 3400 and (MATH 1620 or MATH 1623 or MATH 1627) and PHYS 1510. Structure and dynamics of the earth deduced from seismology, gravity, heat flow and magnetism.

GEOL 4740 SENIOR SEMINAR (2) SEM. 2. Geology majors with upperclass standing. Individual research by geoscience undergraduates is coupled with improved written and oral communication skills along with resume and ePortfolio development. May count either GEOL 4740 or GEOG 4740.

GEOL 4920 INTERNSHIP (1-3) INT. SU. Geology majors with upper-class standing (juniors or seniors). An opportunity to apply classroom experience to a real job setting. Course may be repeated for a maximum of 6 credit hours.

GEOL 4930 DIRECTED STUDIES IN UNDERGRADUATE RESEARCH (1-3) AAB. Departmental approval. Directed studies in areas of geology not covered by an existing course or to supplement knowledge gained from an existing course. Course may be repeated for a maximum of 3 credit hours.

GEOL 4970 SPECIAL TOPICS IN GEOLOGY (1-4) ST1. Instruction and discussion of selected topics in geosciences. Course may be repeated for a maximum of 8 credit hours.

GEOL 4980 UNDERGRADUATE RESEARCH METHODS (1-3) IND. Departmental approval. Active participation in original research under supervision of a senior investigator. Course may be repeated for a maximum of 3 credit hours.

GEOL 5060 INTRODUCTION TO MICROPALEONTOLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 3200 and (BIOL 1030 or BIOL 1037). A survey of major groups of fossils small enough to require a microscope for their study. Foraminifera, radiolaria, and ostracodes are emphasized; minor groups of interest include conodonts, diatoms, dinoflagellates, acritarchs, and chitinozoans. Includes laboratory, discussion sessions, and field work.

GEOL 5100 HYDROGEOLOGY (3) LEC. 2. LAB. 2. Pr. (GEOL 1100 or GEOL 1103 or GEOL 1107) and CHEM 1030 and (MATH 1610 or MATH 1613 or MATH 1617) and PHYS 1500. Departmental approval. Fundamentals of groundwater flow in porous media, hydrodynamic dispersion, determination of aquifer properties and geological aspects of groundwater occurrences.

GEOL 5220 GEOMORPHOLOGY (3) LEC. 2. LAB. 1. Study of the origin of landforms with emphasis on the geologic processes and structures that generate the landforms and applications of landform analysis. Two all-day weekend trips are required. Two one-hour classes and one two-hour laboratory per week.

GEOL 5300 BASIN ANALYSIS (3) LEC. 2. LAB. 2. Pr. P/C GEOL 4010. Study of analytical techniques of sedimentary basin fills, including thermal history, litho and biofacies analyses, depositional systems, subsurface logs, seismic reflection, provenance history, evolution, sedimentation and subsidence history.

GEOL 5440 ELECTRON MICROPROBE ANALYSIS (3) LEC. 2. LAB. 1. Pr. CHEM 1040 and PHYS 1510. Instruction in the theory and application of EMPA (electron microprobe analysis) and SEM (scanning electron microscopy). The course provides an understanding the EMPA as a research tool for evaluating the composition and structure of a wide range of materials.

GEOL 5500 PETROLEUM GEOLOGY (3) LEC. 3. Pr. GEOL 4010. Coverage of petroleum source rocks, migration, reservoir rock characters, and trapping mechanics. Overview of exploration methods including well-log analysis and seismic interpretation.

GEOL 5600 APPLIED GEOPHYSICS (4) LEC. 3. LAB. 2. Pr. (GEOL 1100 or GEOL 1103 or GEOL 1107 or GEOL 3150) and (MATH 1620 or MATH 1623 or MATH 1627) and PHYS 1510. Departmental approval. Overview of geophysical methods with applications to resource, tectonic and environmental analyses. Seismic refraction and reflection, gravity, magnetics, electrical and electromagnetic methods will be included.

GEOL 5700 GEOHEALTH (3) LEC. 3. Pr. GEOL 1100 and CHEM 1030. The effects of the composition of Earth materials and the local geological phenomena on human, plant, and animal health. The application of principles of geology and chemistry to predict and prevent diseases.

GEOL 5840 CLIMATE CHANGE AND SOCIETY (3) LEC. 3. The science of Earth’s changing climate, the societal influences on climate change, as well as the expected impacts based on the collected scientific evidence. Analyzes key aspects of climate science, the drivers of climate change, Earth’s climate trends, the evidence of climate change, the predicted future climate scenarios, the expected impacts, and the array of possible response options.

GEOL 6060 INTRODUCTION TO MICROPALEONTOLOGY (3) LEC. 3. LAB. 1. A survey of major groups of fossils small enough to require a microscope for their study. Foraminifera, radiolaria, and ostracodes are emphasized; minor groups of interest include conodonts, diatoms, dinoflagellates, acritarchs, and chitinozoans. Includes laboratory, discussion sessions, and field work.

GEOL 6100 HYDROGEOLOGY (3) LEC. 2. LAB. 2. Pr. (GEOL 1100 or GEOL 1103 or GEOL 1107) and CHEM 1030 and (MATH 1610 or MATH 1613 or MATH 1617) and PHYS 1500. Departmental approval. Fundamentals of groundwater flow in porous media, hydrodynamic dispersion, determination of aquifer properties and geological aspects of groundwater occurrences.

GEOL 6220 GEOMORPHOLOGY (3) LEC. 2. LAB. 1. Study of origin of landforms with emphasis on geologic processes and structures that generate landforms; includes the applications of landform analysis. May count either GEOL 6220 or GEOG 6220.

GEOL 6300 BASIN ANALYSIS (3) LEC. 2. LAB. 2. Pr. GEOL 4010. Departmental approval. Study of analytical techniques of sedimentary basin fills, including thermal history, litho and biofacies analyses, depositional systems, subsurface logs, seismic reflection, provenance history, evolution, sedimentation and subsidence history.

GEOL 6400 PRINCIPLES OF EARTH SCIENCE (3) LEC. 2. LAB. 2. Departmental approval. A special course for in-service and future teachers only. Internal and surficial geologic processes, meteorology and oceanography.

GEOL 6440 ELECTRON MICROPROBE ANALYSIS (3) LEC. 2. LAB. 1. Pr. CHEM 1040 and PHYS 1510. Instruction to theory and application of EMPA (electron microprobe analysis) and SEM (scanning electron microscopy). Provides an understanding of EMPA as a research tool for evaluating composition and structure of wide range of materials. GEOL 5440 or GEOL 6440.

GEOL 6500 PETROLEUM GEOLOGY (3) LEC. 3. Pr. P/C GEOL 4010. Geology/Geography graduate students who took GEOL 4010 ("P/C"). Coverage of petroleum source rocks, migration, reservoir rock characters, and trapping mechanics. Overview of exploration methods including well-log analysis and seismic interpretation.

GEOL 6600 APPLIED GEOPHYSICS (4) LEC. 3. LAB. 2. Pr. (GEOL 1100 or GEOL 1103 or GEOL 1107 or GEOL 3150) and (MATH 1620 or MATH 1623 or MATH 1627) and PHYS 1510. Departmental approval. Overview of geophysical methods with applications to resource, tectonic and environmental analyses. Seismic refraction and reflection, gravity, magnetics, electrical and electromagnetic methods will be included.

GEOL 6700 GEOHEALTH (3) LEC. 3. The effects of the composition of Earth materials and the local geological phenomena on human, plant, and animal health. The application of principles of geology and chemistry to predict and prevent diseases.

GEOL 6840 CLIMATE CHANGE AND SOCIETY (3) LEC. 3. The course will investigate the science of Earth’s changing climate, the societal influences on climate change, as well as the expected impacts based on the collected scientific evidence. Analysis of peer-reviewed literature on the key aspects of climate science, the drivers of climate change, Earth’s climate trends, the evidence of climate change, predicted future climate scenarios, expected impacts, and the array of possible societal response options to prevent/mitigate the consequences of anthropogenic climate change. The class will have a strong component of discussion of literature and foundational knowledge as well as reflection on what students have learned and the implications of this knowledge for their areas of interest and generally for their lives.

GEOL 7100 GEOCOMMUNICATION (3) LEC. 3. Departmental approval. Instruction and practice in written and oral communication skills necessary for a successful career in the geosciences; emphasis on preparation of scientific articles, technical reports, abstracts, and thesis; preparation and delivery of oral presentations.

GEOL 7170 IMPACT AND PLANETARY GEOLOGY (3) LEC. 3. Pr. GEOL 1100 and GEOL 1110. Study of impact craters and their formation. Identification of impact crates. Role of impacts in planetary evolution and in evolution and extinction of life on Earth. Study of rocky and icy geologic surface terrains and their geologic processes.

GEOL 7200 TECTONICS (3) LEC. 2. LAB. 2. Pr. GEOL 2050 and GEOL 4010. Departmental approval. Emphasis will be placed on plate tectonics and driving forces, evolution of collisional, transform and extensional systems, and dynamic indicators of past and current tectonic processes.

GEOL 7250 GROUNDWATER HYDROGEOLOGIC MODELING (3) LEC. 2. LAB. 2. Pr. GEOL 6100. Departmental approval. Overview of groundwater modeling techniques with environmental and geologic applications. Interaction of geology and subsurface groundwater flow. Basin hydrology modeling. Practical experience in computer simulations of subsurface hydrogeologic processes.

GEOL 7260 AQUEOUS AND ENVIRONMENTAL GEOCHEMISTRY (3) LEC. 2. LAB. 2. Pr. CHEM 1040 and GEOL 2050. Departmental approval. Study of water-rock reactions that control the chemical composition of groundwater; aqueous geochemistry of trace elements; groundwater pollution, remediation and geomic robiology.

GEOL 7300 CYCLES THROUGH EARTH HISTORY (3) LEC. 2. LAB. 2. Pr. GEOL 4100 and GEOL 4260. Discussion of the fundamental processes controlling sedimentary cycles at different physical, biotic, and temporal scales.

GEOL 7400 ADVANCED ECONOMIC GEOLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 4210. Departmental approval. The practical and theoretical aspects of economic geology as applied to exploration and development of natural resources.

GEOL 7410 GEOLOGY OF ORGANIC MATTER (3) LEC. 2. LAB. 2. Pr. GEOL 4010 and GEOL 4110. Departmental approval. The origins, classifications, taphonomy of organic matter, modern and ancient processes and environments of deposition of organic-rich strata, including hydrocarbon- source rocks and coals. Laboratory and field trips required.

GEOL 7450 MINERAL RESOURCES AND THE ENVIRONMENT (3) LEC. 2. LAB. 2. Pr. CHEM 1040 and GEOL 2050. Overview of geology and geographic distribution of mineral resources; economic aspects affecting their extraction; environmental impacts and cost of mineral resource extraction.

GEOL 7500 PALEOCLIMATOLOGY (3) LEC. 3. Explores how Earth's climate has evolved dynamically over time, varying within restricted boundaries that allowed life to exist and evolve. Explores interactions among Earth's surface abiotic and biotic components, and includes plate tectonics, atmospheric chemistry and physics, and ocean productivity.

GEOL 7550 ADVANCED GEOPHYSICAL METHODS (3) LEC. 2. LAB. 2. Pr. GEOL 6600. Departmental approval. Advanced treatment of geophysical methods, data interpretation and modeling. Applications to resource development and environmental assessments will be explored, with emphasis on seismic methods.

GEOL 7600 PETROLOGY (3) LEC. 2. LAB. 2. Pr. GEOL 2050 and GEOL 4010. Departmental approval. The description, classification, formative processes, and petrologic interpretation of igneous, metamorphic and sedimentary rocks.

GEOL 7610 STRUCTURAL AND METAMORPHIC ANALYSIS (3) LEC. 2. LAB. 2. Pr. GEOL 2050 and GEOL 3400 and GEOL 3650. Quantitative analysis of dynamic, kinematic and chemical responses of rocks and minerals to crustal movements and dynamo thermal metamorphism.

GEOL 7650 FACIES ANALYSIS AND SEQUENCE STRATIGRAPHY (3) LEC. 2. LAB. 2. Pr. GEOL 4010 and GEOL 4110. Departmental approval. Systematic analysis of modern and ancient deposition facies, and their interpretation in a sequence stratigrahic context. Laboratory and field trips required.

GEOL 7700 ANALYTICAL ISOTOPE GEOCHEMISTRY (3) LEC. 2. LAB. 1. Pr. CHEM 1040 or PHYS 1510 or MATH 1620. Biweekly lectures will teach the theory and principles of isotope geochemistry and mass spectrometry, leading to applications in geoscience research. Lab sessions and problem sets will support lectures and emphasize work with various mass spectrometers in the Department of Geosciences.

GEOL 7930 DIRECTED STUDIES (1-3) LEC. 3. Departmental approval. Directed studies. May incorporate literature, field and/or laboratory research in any proportion. Subject matter and credit hours shall be determined by student and directing faculty. Course may be repeated for a maximum of 3 credit hours.

GEOL 7980 CAPSTONE PROJECT (1-3) LEC. SU. Literature, field and/or laboratory research directed towards completion of capstone project required for non-thesis option. Course may be repeated for a maximum of 3 credit hours.

GEOL 7990 RESEARCH AND THESIS (1-10) MST. Departmental Approval. Course may be repeated with change in topics.

GEOL 8900 DIRECTED STUDY (1-6) IND. 3. Provides exposure to discipline-specific research procedures in Earth System Science. Students will work closely with their mentors to explore an Earth-system problem through directed readings, literature searches, field work, laboratory experimentation, and quantitative analysis. Course may be repeated for a maximum of 6 credit hours.

Certificate in Geographic Information Systems (GIS)

This undergraduate certificate in Geographic Information Systems (GIS) (17-18 hours) prepares individuals to explain geospatial science components and how they can assist in solving geographic problems; select the appropriate scale and map projections to use for various GIS applications; create and maintain geospatial datasets; and select the appropriate spatial dataset formats to use for various GIS applications. This certificate is designed for aspiring geospatial professionals who want to become more skillful users of GIS methods, software, and related tools.

The concentrated Curriculum has four courses required for a total of 15 hours. Students can choose from approved electives for courses that are at least 2 credit hours. Total hours for GISc Certificate is 17-18 hours.

Code	Title	Hours
Required Core Courses (15 hours)		
GEOG 5830	Geographic Information Systems	4
GEOG 5820	Aerial Photography and Remote Sensing	4
GEOG 5880	Advanced Geographic Information Systems	3
GEOG 3810	Cartography and Graphics	4
Elective Courses (2 hours minimum)		
BSEN 5220	Geospatial Technologies in Biosystems	3
FORY 5480	GIS Database Design and Analysis	2
CPLN 5460	Geographic Information Systems for Planning and Policy	3
GEOG 5850	Drones and Geospatial Applications	3
GEOG 5700	Quantitative Methods and Spatial Analysis	3
GEOL 5100	Hydrogeology	3

Geography and Environmental Studies (GEST)

The Bachelor of Arts in Geography and Environmental Studies offers students a comprehensive understanding of the dynamic relationship between Earth, Environment, and Society. This interdisciplinary program focuses on the spatial relationships inherent to Earth's geosphere, hydrosphere, atmosphere, and biosphere.

A key component of the program is training in geospatial sciences, including Geographic Information Systems (GIS), drones, and remote sensing. These in-demand technology tools prepare students to visualize and interpret geographic data in meaningful ways, fostering critical thinking and practical skills applicable to a wide range of careers.

Students in the geography and environmental studies major are prepared for in-demand and profitable career opportunities including positions as urban and regional planners, environmental consultants addressing sustainability and ecological concerns, Geographic Information Systems (GIS) analysts and data science roles, environmental and conservation positions dedicated to studying and conserving ecosystems, educators and academics, and policy advisors shaping environmental legislation and initiatives. Majors often find lucrative career options in disaster management, weather and climate research, and sustainability.

Total Hours: 120

1 Students must complete a two-course sequence in either HIST or LIT (for example, World History 1 and 2 or American Lit 1 and 2). For complete HIST and Lit sequence options, see the *Bulletin.*

2 If a LIT sequence is chosen, this course must be a CORE SOC SCI. If a HIST sequence is chosen, this course must be a CORE HUMANITIES.

3 CORE Science Sequences:
BIOL 1020/BIOL 1021, BIOL 1030/BIOL 1031, CHEM 1030/CHEM 1031, CHEM 1040/CHEM 1041,
CHEM 1110/CHEM 1111, CHEM 1120/CHEM 1121, GEOL 1100, PHYS 1500, PHYS 1510, PHYS 1600, PHYS 1610.

4 This course must be taken the semester of graduation.

Geography Minor

A minimum of fifteen semester hours including any two of the following: GEOG 1010/1013/1017 Global Geography, GEOG 1020 Weather and Climate, GEOG 1030 Land and Water, and GEOG 2010 Human Geography. In addition, 9 hours of electives consisting of any GEOG courses at the 3000 level or above, except GEOG 4920 Internship or GEOG 4930 Directed Studies. Students must earn a grade of “C” or better in all minor courses.

Geology (GEOL)

Geology focuses on the formation and subsequent evolution of the planets, emphasizing habitable planet Earth. Geologists study the Earth’s internal and surface structure and compositions, major geological events, formation of Earth’s minerals and rocks and natural resources, using the principles of chemistry, physics, mathematics, and biology. Geology provides understanding of the dynamic processes that influences the solid Earth, Earth’s surface, life, and climate. Geology frequently draws students with interests in outdoor activities, travel, energy industry, and environment. In addition to regular lectures, geology majors train in fieldwork skills and specialized laboratory skills. Recent alumni have had in-demand and profitable careers in academia, mineral resources, energy industry, environmental industry, and government.

Total Hours: 123-124

Courses in BOLD will be used to calculate GPA in major.

[1] Options for courses labeled CORE are in the Auburn University Bulletin (https://bulletin.auburn.edu/) under Core Curriculum. Take CHEM 1030/CHEM 1031, BIOL 1020/BIOL 1021, PHYS 1500, and 4th course can be either CHEM 1040/CHEM 1041, BIOL 1030/BIOL 1031, or PHYS 1510.

[2] Math Requisite can be either MATH 1620 Calculus II (4), STAT 2510 (3), or STAT 3010 (3).

[3] GEOG 1010 Global Geography is suggested for majors (as one of their Core Social Science requirements).

[4] **Geology Electives:** 18 hours required. Geology electives may be selected from the following courses with NO MORE THAN 3 hours coming from the unspecified group (GEOL 4930 and GEOL 4980).

GEOL Electives:

GEOL 3060 Lunar and Planetary Geology (3)
GEOL 4210 Economic Geology (3)
GEOL 4260 Introduction to Geochemistry (3)
GEOL 5060 Introduction to Micropaleontology (3)
GEOL 5100 Hydrogeology (3)
GEOL 5220 Geomorphology (3) (also cross-listed as GEOG 5220 Geomorphology)
GEOL 5300 Basin Analysis (3)
GEOL 5440 Electron Microprobe Analysis (3)
GEOL 5500 Petroleum Geology (3)
GEOL 5600 Applied Geophysics (4)

GEOL 5700 Geohealth (3)
GEOL 5840 Climate Change and Society (3)
No more than 3 hours total can count towards your 18 hours of GEOL electives from the following:
GEOL 4930 Directed Studies in Undergraduate Research (1-3) (no more than 3 hours)
GEOL 4980 Undergraduate Research Methods (1-3) (no more than 3 hours)
Technical Electives: The following courses are approved. Other courses may be permitted with prior approval of the GEOL advisor. Students must meet with their Geology advisor and have technical electives approved in advance. An approval form must be on file in the Dean's office in order to be cleared for graduation.
CSES 5000, CSES 5080, CSES 5150 ,CSES 5300
ANTH any 2000+ course
BIOL 1030/BIOL 1031, BIOL 2425, BIOL 3030, BIOL 3060, BIOL 3075, BIOL 3200, BIOL 4010, BIOL 4020
CIVL 2010, CIVL 3310, CIVL 4210, CIVL 4310, CIVL 5330, CIVL 5340
CHEM 1040/CHEM 1041, CHEM 1110/CHEM 1120, CHEM 1117/CHEM 1127, CHEM 2070, CHEM 3050, any 3000-5000 course
COMP 2210, any 2000-3000 course
GEOG any 3000-5000 course
MATH any 2000-5000 course
MECH any 3000-5000 course
PHYS 1510 or any 2000-5000 course
STAT any 2000-5000 course

Geology Minor

A minimum of fifteen semester hours including GEOL 1100/1107 Dynamic Earth. Additional GEOL courses may include any other GEOL courses at the 3000 level or above, excluding GEOL 4920 Internship. Students must earn a grade of “C” or better in all minor courses.

Geology — Earth System Science Option (ESYS)

The Earth System Science (ESS) option of the Geology major provides students with a fundamental understanding of the links between the Earth's geological, geographical, biological, chemical, physical, and human subsystems. ESS students examine the cycling of matter and energy through the lithosphere, the hydrosphere, the atmosphere, and the biosphere at multiple temporal and spatial scales. Field research, lab work, and classroom activities allow students to observe and interpret how the Earth’s land surfaces, atmosphere, biosphere, and oceans interact and impact human and environmental health. The ESS degree prepares students for in-demand and profitable career opportunities including water resource management, environmental geology and remediation, geoscience consulting and teaching, geochemical cycles, and geohazards, such as volcanoes, earthquakes, and hurricanes.

Department of Mathematics & Statistics

The Department of Mathematics and Statistics offers degree curricula in Mathematics and in Applied Mathematics (with three options), an Accelerated Bachelor's/Master's program in Data Science, as well as a minor in Mathematics and a minor in Statistics. Majors acquire a firm foundation in mathematics preparing them for further study, or for careers in mathematics or statistics and related fields. For a minor in MATH or STAT see the "Minors" section.

This curriculum of Mathematics provides students with a general background in mathematics, preparing them for graduate studies in Mathematics or careers that require mathematical knowledge and problem-solving skills, and is well suited for students who wish to pursue career in teaching Mathematics in a university/college, or who desire more flexibility or emphasis in liberal arts.

The Department of Mathematics and Statistics offers three options in the field of Applied Mathematics. The option in Applied Mathematics is suitable for students who are preparing for graduate work in mathematics, or applied mathematics, as well as for those anticipating careers which require proficiency with the methods of applied mathematics such as engineering, physical sciences, computer science, and the allied fields of biological, behavioral, or managerial sciences.

The option in Actuarial Science offers a well-balanced curriculum in applied mathematics with advanced preparation for the actuarial profession. It prepares students for a career in the insurance industry and in other businesses relying on the expertise of actuaries. An increasing number of actuaries work in the broader financial services sector including commercial and investment banking and retirement funds. Actuaries are also employed by corporations, as well as by state and federal governments. This program offers courses with syllabi that closely match those for exams offered by the Society of Actuaries required for professional designations. The curriculum for the Actuarial Science option is flexible enough to allow its graduates to enter graduate programs in mathematics and related fields.

The option in Applied Discrete Mathematics prepares students for graduate work in mathematics or theoretical computer science, and for careers in industry supported by discrete mathematics dealing with problems in graph theory, operations research, discrete optimization, computer science, communications and information sciences.

The Accelerated Bachelors/Master's Degree in Data Science is available for students pursuing the option in Applied Discrete Mathematics. The students can take up to nine (9) hours of MATH/STAT coursework at the 6000-level (i.e., MATH 6XX0 and/or STAT 6XX0 electives) while classified as an undergraduate and have it applied to both the student's undergraduate degree and master's degree. After completing the requirements for the undergraduate degree, the student then completes the remaining requirements of the MS-DS degree.

Starting with the Fall 2015 semester, incoming students are required to earn a "C" or better in certain prerequisites to take the follow-on course. The follow-on courses are: Pre-Calculus Algebra and Trigonometry, Calculus I, Calculus II, and Calculus III.

Students should consult the departmental advisor to determine appropriate technical electives for the emphasis of their choice.

Majors

- Applied Mathematics — Actuarial Science Option (p. 1326)
- A (p. 1327)pplied Mathematics — Applied Discrete Mathematics Option (p. 1327)

- Applied Mathematics (p. 1325)
- Mathematics (p. 1329)

Minors

- Mathematics (p. 1330)
- Statistics (p. 1330)

Mathematics Courses

MATH 1000 COLLEGE ALGEBRA (3) LEC. 3. Pr. ALEK score of 1. Fundamental concepts of algebra, equations and inequalities, functions and graphs, polynomial and rational functions. Does not satisfy the core requirement in mathematics. Students who have previous credit in any higher-numbered math course may not also receive credit for this course.

MATH 1100 FINITE MATH AND APPLICATIONS (3) LEC. 3. Pr. ALEK score of 50 or MATH 1000 or MATH 1003. ALEKS Math Placement Assessment score of at least a 50 or MATH 1000. Mathematics Core. Overview of finite mathematics and its applications. Graph theory, matrices, finite and conditional probability; descriptive and inferential statistics, voting methods, game theory.

MATH 1120 PRE-CALCULUS ALGEBRA (3) LEC. 3. Pr. ALEK score of 50 or MATH 1000 or MATH 1003. ALEKS Math Placement Assessment score of at least a 50 or MATH 1000. Mathematics Core. Preparatory course for calculus. This course emphasizes the algebra of functions – including polynomial, rational, exponential, and logarithmic functions. In addition, the course covers non-linear inequalities as well as systems of linear and non-linear equations and inequalities. The course also includes an introduction to sequences and series. No credit is given to students with higher-numbered math course.

MATH 1121 PRE-CALCULUS ALGEBRA WORKSHOP (1) LAB. 2. SU. Pr. P/C MATH 1000 or P/C MATH 1003 or P/C MATH 1120 or P/C MATH 1123. Workshop for College Algebra and Pre-Calculus Algebra.

MATH 1130 PRE-CALCULUS TRIGONOMETRY (3) LEC. 3. Pr. ALEK score of 64 or MATH 1120 or MATH 1123. ALEKS Math Placement Assessment score of at least a 64 or MATH 1120. Mathematics Core. Preparatory course for the calculus sequence. Basic analytic and geometric properties of the trigonometric functions. Complex numbers, De Moivre' Theorem, polar coordinates. Students who have previous credit in any higher-numbered math course may not also receive credit for this course.

MATH 1150 PRE-CALCULUS ALGEBRA AND TRIGONOMETRY (4) LEC. 4. Pr. ALEK score of 64 or MATH 1000 or MATH 1003. ALEKS Math Placement Assessment score of at least a 64 or "C" or better in MATH 1000. Mathematics Core. Algebraic functions, Exponential Logarithmic functions. Analytic and geometric properties of trigonometric functions.

MATH 1151 MATHEXCEL PRECALCULUS WORKSHOP (2) LEC. 2. SU. Coreq. MATH 1150. Appropriate score on the mathematics placement exam or grade of "C" or better in MATH 1000. Workshop for MATH 1150. Two 2-hour sessions per week.

MATH 1610 CALCULUS I (4) LEC. 4. Pr. MATH 1130 or MATH 1133 or MATH 1150 or MATH 1153 or ALEK score of 78. ALEKS Math Placement Assessment score of at least a 78 or "C" or better in MATH 1130 or in MATH 1150. Mathematics Core. Limits, the derivative of algebraic, trigonometric, exponential, logarithmic functions. Applications of the derivative, antiderivatives, the definite integral and applications to area problems, the fundamental theorem of calculus. Students may receive credit for only one of MATH 1610/1617.

MATH 1617 HONORS CALCULUS I (4) LEC. 4. Pr. Honors College. MATH 1130 or MATH 1150 or ALEK minimum score of 78 or MATH 1133 or MATH 1153. ALEKS Math Placement Assessment score of at least a 78 or "C" or better in MATH 1130 or in MATH 1150. Mathematics Core. Honors version of MATH 1610. Membership in the Honors College or Departmental approval required. Recommended for all Mathematics majors: Applied Math-Actuarial Sci (ACTU), Applied Math-Discrete (APDM), Applied Mathematics (AMTH), and Mathematics (MATH). This course covers the same material as MATH 1610 but in a greater depth appropriate for Honors students and Mathematics majors. Students may receive credit for only one of MATH 1610, MATH 1617 or MATH 1680.

MATH 1620 CALCULUS II (4) LEC. 4. Pr. MATH 1610 or MATH 1613 or MATH 1617. "C" or better in MATH 1610 or in MATH 1617. Techniques of integration, applications of the integral, parametric equations, polar coordinates. Vectors, lines and planes in space. Infinite sequences and series. Students may receive credit for only one of MATH 1620 or MATH 1627.

MATH 1627 HONORS CALCULUS II (4) LEC. 4. Pr. Honors College. MATH 1610 or MATH 1613 or MATH 1617. "C" or better in MATH 1610 or in MATH 1617. Honors version of MATH 1620. Membership in the Honors College or Departmental approval required. Recommended for all Mathematics majors: Applied Math-Actuarial Sci (ACTU), Applied Math-Discrete (APDM), Applied Mathematics (AMTH), and Mathematics (MATH). The same material as MATH 1620, but in greater depth appropriate for honors students and Mathematics majors. Students may receive credit for only one of MATH 1620 or MATH 1627.

MATH 1680 CALCULUS WITH BUSINESS APPLICATIONS I (4) LEC. 4. Pr. MATH 1120 or MATH 1123 or MATH 1130 or MATH 1133 or MATH 1150 or MATH 1153 or ALEK score of 68. ALEKS Math Placement Assessment score of at least a 68 or MATH 1120 or MATH 1130 or MATH 1150. Students in College of Business. Mathematics Core. Differentiation and integration of exponential and logarithmic functions, applications to business. Functions of several variables, partial derivatives, multiple integrals.

MATH 1690 CALCULUS WITH BUSINESS APPS II (3) LEC. 3. Pr. MATH 1680 or MATH 1683 or MATH 1610 or MATH 1617 or MATH 1613. Probability, random variables, probability distributions. Further topics in calculus: integration, functions of several variables, applications to probability. Applications to business and related areas. Credit will not be given to majors in Engineering or Math or Physics.

MATH 1950 FIRST YEAR MATHEMATICS SEMINAR (1) SEM. 1. This seminar will provide a shared intellectual experience for incoming freshmen mathematics majors. It will serve as a focused and interactive forum to provide a glimpse into the world of mathematics that lies beyond elementary calculus. Each semester's symposium will be devoted to a specific mathematical topic. Writing about mathematics and explaining mathematical ideas to both “math people” and “non-math people” will be emphasized. Only offered to incoming first-year students (though transfer students and higher rank students may be allowed to enroll on an approval basis). May not be repeated for credit. High School Math will be required.

MATH 2630 CALCULUS III (4) LEC. 4. Pr. MATH 1620 or MATH 1623 or MATH 1627. "C" or better in MATH 1620, MATH 1623 or MATH 1627. Multivariate calculus: vector-valued functions, partial derivatives, multiple integration, vector calculus. Credit will be given for only MATH 2630 or MATH 2637.

MATH 2637 HONORS CALCULUS III (4) LEC. 4. Pr. MATH 1620 or MATH 1623 or MATH 1627. Must have earned a "C" or better in MATH 1620, MATH 1623 or MATH 1627. Honors version of MATH 2630. Membership in the Honors College or Departmental approval required. Recommended for all Mathematics majors: Applied Math-Actuarial Sci(ACTU), Applied Math-Discrete(DISC), Applied Mathematics(AMTH), and Mathematics(MATH). The same material as MATH 2630, but in greater depth appropriate for honors students and Mathematics majors. Credit will be given for only one of MATH 2630 or MATH 2633 or MATH 2637.

MATH 2650 LINEAR DIFFERENTIAL EQUATIONS (3) LEC. 3. Pr. P/C MATH 2630 or P/C MATH 2633 or P/C MATH 2637. Introduction to ordinary differential equations, specifically linear equations of first and second order, and applications.

MATH 2660 TOPICS IN LINEAR ALGEBRA (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627. Matrices, row-reduction, systems of linear equations, (finite-dimensional) vector spaces, subspaces, bases, dimension, change of basis, linear transformations, kernels, orthogonality, Gram-Schmidt.

MATH 2667 HONORS TOPICS IN LINEAR ALGEBRA (3) LEC. 3. Pr. Honors College. MATH 1620 or MATH 1623 or MATH 1627. Must have earned a "C" or better in MATH 1620 or MATH 1623 or MATH 1627. Honors version of MATH 2660. Membership in the Honors College or Departmental approval required. Recommended for all Mathematics majors: (Applied Math-Actuarial Sci(ACTU), Applied Math-Discrete(DISC), Applied Mathematics(AMTH), and Mathematics(MATH). Topics include: matrices, row-reduction, systems of linear equations, (finite-dimensional) vector spaces, subspaces, bases, dimension, change of basis, linear transformations, kernels, orthogonality, Gram-Schmidt. The same material as MATH 2660, but in greater depth appropriate for honors students and Mathematics majors, with possible additional topics as determined by the instructor. Credit will be given for only one of MATH 2660 or MATH 2667.

MATH 2670 INTRODUCTION TO DIFFERENTIAL EQUATIONS (3) LEC. 3. Pr. MATH 1620. Rigorous introduction to ordinary differential equations with emphasis on mathematical justification of solution methods and qualitative analysis of equations and low dimensional systems. The existence and uniqueness theorems. Separable equations, exact equations and integrating factors. Second order linear equations, the Wronskian, method of undetermined coefficients, variation of parameters. Laplace transform. Higher order equations. Systems of first order equations, fundamental matrix.

MATH 2790 MATHEMATICS OF INTEREST THEORY (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627. Mathematical foundations of the theory of interest necessary as preparation for the Society of Actuaries examination on the theory of interest.

MATH 2850 MATHEMATICS FOR ELEMENTARY EDUCATION I (3) LEC. 3. For Elementary Education major or departmental approval. Mathematical insights for elementary school teachers. Sets, the structure of the number system (integers, fraction, decimals).

MATH 2860 MATHEMATICS FOR ELEMENTARY EDUCATION II (3) LEC. 3. Pr. MATH 2850. For Elementary Education majors or departmental approval. Mathematical insights into measurement and geometry for elementary school teachers. Shapes in two and three dimensions. Similarities, congruences and transformations.

MATH 2870 MATHEMATICS FOR ELEMENTARY EDUCATION III (3) LEC. 3. For Elementary Education majors or departmental approval. Mathematical insights into probability, data analysis and functions for elementary school teachers. Uncertainty, probability spaces and an introduction to statistics. Relationships, functions and change.

MATH 3010 HISTORY OF MATHEMATICS (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627. The evolution of modern mathematics from its motivational roots in the physical sciences; the lives and contributions of outstanding mathematicians; the parallel development of mathematics and western culture.

MATH 3100 INTRODUCTION TO ADVANCED MATHEMATICS (3) LEC. 3. Pr. MATH 2630 or MATH 2637. Teaching of the fundamental abilities necessary for the pursuance of mathematical studies. Logic and set theory, mathematical induction, basic number theory, basic analysis. Credit will not be given for both MATH 3100 and Math 3710.

MATH 3710 DISCRETE MATHEMATICS (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Methods of proof, induction, counting, inclusion-exclusion, discrete probability, relations, partial orders, graphs, trees, languages, grammars, finite state machines, automata. Credit will not be given for both MATH 3710 and Math 3100.

MATH 4110 ADVANCED LOGIC (3) LEC. 3. Pr. MATH 3100 or PHIL 3110. Advanced topics in logic. For example: soundness, completeness, incompleteness, set theory, proof theory, model theory, non-standard logics. May count either MATH 4110 or PHIL 4110.

MATH 4790 ACTUARIAL SEMINAR IN THE MATHEMATICS OF FINANCE (3) LEC. 3. Pr. MATH 2790. Intensive seminar in the mathematical aspects of finance, and the theory of interest primarily intended as preparation for the Society of Actuaries Course 2 examination.

MATH 4800 INTRODUCTION TO ACTUARIAL MATHEMATICS (3) LEC. 3. Pr. STAT 3600 and MATH 2790. An introduction to important actuarial methods in modeling and foundational principles of ratemaking and reserving for short-term coverages primarily intended as preparation for part of the Society of Actuaries Exam FAM.

MATH 4820 ACTUARIAL SEMINAR IN PROBABILITY (3) LEC. 3. Pr. STAT 3600. or equivalent. Intensive seminar in calculus, probability, and risk theory primarily intended as preparation for the Society of Actuaries Course 1 examination.

MATH 4930 DIRECTED STUDIES (1-3) IND. Study of individual problems or topics of interest to students. Course may be repeated for a maximum of 3 credit hours.

MATH 4970 SPECIAL TOPICS (1-4) IND. Departmental approval. An individual problems course. Each student will work under the direction of a staff member on a problem of mutual interest. Course may be repeated for a maximum of 4 credit hours.

MATH 4980 UNDERGRADUATE RESEARCH (1-3) IND. Departmental approval. Directed research in the area of specialty under faculty supervison. Course may be repeated for a maximum of 3 credit hours.

MATH 4997 HONORS THESIS (1-6) IND. Pr. Honors College. Course may be repeated for a maximum of 6 credit hours. Membership in Honors College.

MATH 5000 MATH MODELING (3) LEC. 3. Pr. (MATH 2650 or MATH 2670) and (MATH 2660 or MATH 2667). Introduction to mathematical models and related techniques. Includes general principles involving continuous deterministic problems and a detailed, specific term project. Programming ability.

MATH 5010 VECTOR CALCULUS (3) LEC. 3. Pr. (MATH 2630 or MATH 2637 or MATH 2730) and (MATH 2660 or MATH 2667). Departmental approval. Vector-valued functions, vector fields. Gradient, divergence, curl. Integral theorems: Green's Theorem, Stoke's Theorem, Gauss' Theorem. Tensors and differential forms. Applications.

MATH 5030 COMPLEX VARIABLES WITH APPLICATIONS I (3) LEC. 3. Pr. MATH 2650 or MATH 2670. Complex functions and their elementary mapping properties; contour integration and residues; Laurent series; applications to real integrals. MATH 5030-5040 are appropriate for students of engineering or science.

MATH 5040 COMPLEX VARIABLES WITH APPLICATIONS II (3) LEC. 3. Pr. MATH 5030. Linear fractional transformations; conformal mappings; harmonic functions; applications to boundary value problems; analytic continuation; entire functions. MATH 5030-5040 are appropriate for students of engineering or science.

MATH 5050 MATRIX THEORY AND APPLICATIONS (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Canonical forms, determinants, linear equations, eigenvalue problems.

MATH 5060 ELEMENTARY PARTIAL DIFFERENTIAL EQUATIONS (3) LEC. 3. Pr. MATH 2650 or MATH 2670. First and second order linear partial differential equations with emphasis on the method of eigenfunction expansions.

MATH 5110 NUMBER THEORY (3) LEC. 3. Pr. MATH 3100. Greatest common divisor, unique factorization, linear Diophantine equations. Modular arithmetic, Chinese remainder theorem, polynomial congruences. Quadratic residues, Legendre/Jacoby symbols, quadratic reciprocity. Primes. Moebius inversion. Sums of squares. Units and the integers mod n.

MATH 5120 INFORMATION THEORY (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Information and entropy, information rate optimization and channel capacity, variable-length codes, data compression (Kraft-McMillan inequality, Huffman's algorithm), maximum likelihood decoding, Shannon's Noisy Channel Theorem.

MATH 5130 CALCULUS OF VARIATION (3) LEC. 3. Pr. MATH 2650 or MATH 2670. Fundamental concepts of extrema of functions and functionals; first and second variations; generalizations; sufficient conditions; constrained functionals; the general Lagrange Problem; optimal control.

MATH 5140 DATA COMPRESSION (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627 or MATH 1720. Lossless compression methods, including static, dynamic, and higher order Huffman and arithmetic encoding, interval and recency rank encoding, and dictionary methods; lossy transform methods (JPEG).

MATH 5150 ALGEBRAIC CODING THEORY (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Linear codes, Hamming and Golay codes, BCH codes, cyclic codes. Random error detection and correction. Burst-error correction. Decoding algorithms. Credit will not be given for both MATH 5150 and MATH 6150/6156.

MATH 5170 FINITE EXTREMAL SET THEORY (3) LEC. 3. Pr. (MATH 2660 or MATH 2667) and (MATH 3100 or MATH 3710). Finite posets and their Hasse diagrams. Sequences and the Erdos-Szekeres Theorem. Chains and antichains, Dilworth's Theorem. Set systems in the hypercube, Sperner's Lemma and the LYM inequality. Intersecting families, the Erdos-Ko-Rado Theorem. Isoperimetric inequalities in the hypercube. Additional topics related to recent research. Includes paper reading and presentation component.

MATH 5180 CRYPTOGRAPHY (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Classical cryptosystems, the Data Encryption Standard, one-way functions and relevant number theoretic problems (factoring, primality testing, discrete logarithm problem), RSA and other public key cryptosystems.

MATH 5200 ANALYSIS I (3) LEC. 3. Pr. MATH 3100. "C" or better in MATH 3100. Real numbers, infima and suprema; sequences and series of real numbers, convergence and limits, Cauchy sequences and completeness; topology of the real line, Bolzano-Weierstrass and Heine-Borel theorems; real-valued functions of a real variable, continuity and uniform continuity. Emphasis on proofs.

MATH 5210 ANALYSIS II (3) LEC. 3. Pr. MATH 5200. Sequences and series of functions, modes of convergence, power series, elementary functions; derivatives and antiderivatives, the mean-value theorem; Riemann integration and the Fundamental Theorem of Calculus; R^n and abstract spaces, functions of several variables. Emphasis on proofs.

MATH 5280 SYSTEMS OF DIFFERENTIAL EQUATIONS AND APPLICATIONS (3) LEC. 3. Pr. (MATH 2650 or MATH 2670) and (MATH 2660 or MATH 2667). Linear systems of differential equations, stability, phase portraits; non-linear systems, linearization, qualitative properties of orbits, Poincare-Bendixson Theorem; numerical methods; applications.

MATH 5300 THEORY OF DIFFERENCE EQUATIONS (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Linear difference equations, initial value problems, Green's functions, boundary value problems, systems, periodic solutions, nonlinear difference equations, models.

MATH 5310 INTRODUCTION TO ABSTRACT ALGEBRA I (3) LEC. 3. Pr. MATH 3100. "C" or better in MATH 3100. Groups, Groups of Permutations, isomorphisms and homomorphisms; Cyclic Groups, Quotient Groups, The Fundamental Homomorphism Theorem.

MATH 5320 INTRODUCTION TO ABSTRACT ALGEBRA II (3) LEC. 3. Pr. MATH 5310. Theory of rings and fields, Ideals and Homomorphisms, Quotient Rings, Rings of Polynomials, Extensions of Fields, Galois Theory.

MATH 5330 COMPUTATIONAL ALGEBRA (3) LEC. 3. Pr. MATH 5310. Introduction to computation in multivariate polynomial rings and finite fields. Topics include Groebner bases, Buchberger's Algorithm, kinematic/robotics problems, symbolic manipulation software.

MATH 5350 INTRODUCTION TO ALGEBRAIC GEOMETRY (3) LEC. 3. Pr. MATH 5320. LEC. 3. Pr. "C" or better in Math 5320. Affine varieties, Hilbert's Nullstellensatz, the Ideal-Variety Correspondence, irreducibility, polynomial and rational functions, projective varieties, Bezout's Theorem, dimension theory.

MATH 5370 LINEAR ALGEBRA (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Introduction to the theoretical foundations of Linear Algebra including vector spaces, basis, dimension, linear transformations, fundamental subspaces, matrix representations, eigenvalues, eigenspaces.

MATH 5380 INTERMEDIATE EUCLIDEAN GEOMETRY I (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Fundamental concepts and theorems of Euclidean geometry, introduction to higher dimensions. Regular polygons and polyhedra, symmetry groups, convexity, geometric extremum problems. Geometric transformations and their invariants.

MATH 5390 INTERMEDIATE EUCLIDEAN GEOMETRY II (3) LEC. 3. Pr. MATH 5380. Planar graphs and Euler's theorem. The symmetry group of a set, homotheties and similitudes, path, arcs and length of curves, advanced theorems on the circle.

MATH 5460 PERTURBATION METHODS (3) LEC. 3. Pr. MATH 2650 or MATH 2670. Analytical solutions of nonlinear problems, ODEs, PDEs, multiple scales, and transcendental equations in engineering, mathematics, and physics using both regular and singular perturbation methods.

MATH 5500 INTRODUCTION TO TOPOLOGY (3) LEC. 3. Pr. MATH 3100. C or better in MATH 3100. Metric spaces, topological spaces, continuity, compactness, connectedness, product and quotient spaces and local properties.

MATH 5630 INTRODUCTION TO NUMERICAL ANALYSIS I (3) LEC. 3. Pr. MATH 2650 or MATH 2670. Programming ability. Numerical solution of equations, polynomial approximation, numerical differentiation and integration, numerical solutions of ordinary differential equations, error analysis. Written programs using algorithms. Programming ability.

MATH 5640 INTRODUCTION TO NUMERICAL ANALYSIS II (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Programming ability. Numerical solutions of systems of linear equations, numerical computation of eigenvalues and eigen vectors, error analysis. Written programs using the algorithms.

MATH 5650 THEORY OF NONLINEAR OPTIMIZATION (3) LEC. 3. Pr. (MATH 2650 or MATH 2670) and (MATH 2660 or MATH 2667). Kuhn-Tucker conditions, quadratic programming, search methods and gradient methods, Lagrangean and penalty function methods.

MATH 5670 PROBABILITY AND STOCHASTIC PROCESSES I (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Random variables, discrete and absolutely continuous distributions. Poisson process, expectation and conditional expectation. Moment generating functions, limit distributions. Emphasis on probabilistic reasoning and problem solving. Credit will not be given for both MATH 5670 and STAT 5670.

MATH 5680 PROBABILITY AND STOCHASTIC PROCESSES II (3) LEC. 3. Pr. MATH 5670 or STAT 5670. Multivariate distributions. Central Limit Theorem, Laplace transforms, convolutions, simulation, renewal processes, Continuous-time Markov Chains, Markov renewal and semi-regenerative processes, Brownian motion and diffusion. Credit will not be given for both MATH 5680 and STAT 5680.

MATH 5710 LINEAR OPTIMIZATION (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Theory and algorithms for standard linear optimization problems. Simplex algorithm and duality, shortest paths, network flows, min-cost flows and circulations, out-of-kilter method, assignments and matchings.

MATH 5730 ENUMERATION (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Using generating functions and Polya theory to do sophisticated counting. Permutations and combinations, inclusion-exclusion, partitions, recurrence relations, group actions, Polya theory with applications.

MATH 5740 SOCIAL NETWORK ANALYSIS (3) LEC. 3. Pr. (MATH 3100 or COMP 2240) and (P/C COMP 1220 or P/C COMP 1230). Introduction to Social Network Analysis and Python, graph properties and network visualization, Network Metrics, Cascading Behavior in Networks, 2-Mode network, Large-scale structure of networks and corresponding Algorithms, Clustering, Ego analysis and Bipartite networks, Exponential random graph modeling, and Network evolution.

MATH 5750 INTRODUCTION TO GRAPH THEORY (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Algorithmic and theoretical aspects of graph theory: matchings, colorings, scheduling problems, Hamilton cycles. Euler tours, spanning trees, network reliability, connectivity, extremal graphs, planar graphs, disjoint paths.

MATH 5770 COMBINATORIAL DESIGNS (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627 or MATH 1720. Latin squares, mutually orthogonal latin squares, orthogonal and perpendicular arrays, Steiner triple systems, block designs, difference sets and finite geometries.

MATH 5800 ACTUARIAL MATHEMATICS I (3) LEC. 3. Pr. MATH 2790 and STAT 3600. A development of theoretical basis of survival models, life table, life insurance benefits, annuities, premium calculation and policy values primarily intended as preparation for part of the Society of Actuaries Exam FAM.

MATH 5810 ACTUARIAL MATHEMATICS II (4) LEC. 4. Pr. MATH 5800. This course develops the knowledge of theoretical basis to traditional and modern contingent payment models and the application of those models to insurance and other financial risks. It is primarily intended as preparation for the Society of Actuaries Exam ALTAM.

MATH 5840 FOUNDATIONS OF NUMBER THEORY FOR SECONDARY SCHOOL TEACHERS (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. Divisibility, Diophantine equations, congruencies.

MATH 5850 NUMERICAL ANALYSIS FOR SECONDARY TEACHERS (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. The numerical solutions of selected problems arising in calculus and algebra along with the programming techniques. Computer familiarity.

MATH 5860 FOUNDATIONS OF NON-EUCLIDEAN GEOMETRY FOR SECONDARY SCHOOL TEACHERS (3) LEC. 3. Pr. MATH 2630 or MATH 2637 or MATH 2730. B.L. geometry, hyperbolic geometry, absolute geometry, parallel postulates.

MATH 5870 FINANCIAL MATHEMATICS (3) LEC. 3. Pr. (MATH 1610 or MATH 1617) and (MATH 1620 or MATH 1627) and (MATH 2650 or MATH 2670) and STAT 3600. Options and spreads, pricing of such options in accordance with the Black-Scholes Equation, and the binomial pricing model.

MATH 5970 SPECIAL TOPICS (1-3) IND. Departmental approval. Topics may vary as needed. Course may be repeated for a maximum of 3 credit hours.

MATH 6000 MATHEMATICAL MODELING: CONTINUOUS (3) LEC. 3. Introduction to mathematical models and related techniques. Includes general principles involving continuous deterministic problems and a detailed, specific term-project. Programming ability.

MATH 6010 VECTOR CALCULUS (3) LEC. 3. Pr. (MATH 2630 or MATH 2637) and (MATH 2660 or MATH 2667). Departmental approval. Vector-valued functions, vector fields. Gradient, divergence, curl. Integral theorems: Green's Theorem, Stoke's Theorem, Gauss' Theorem. Tensors and differential forms. Applications.

MATH 6030 COMPLEX VARIABLES WITH APPLICATIONS I (3) LEC. 3. Complex functions and their elementary mapping properties; contour integration and residues; Laurent series; applications to real integrals. MATH 6030-6040 are appropriate for students of engineering or science.

MATH 6050 MATRIX THEORY AND APPLICATIONS (3) LEC. 3. Canonical forms, determinants, linear equations, eigenvalue problems.

MATH 6060 ELEMENTARY PARTIAL DIFFERENTIAL EQUATIONS (3) LEC. 3. First and second order linear partial differential equations with emphasis on the method of eigenfunction expansions.

MATH 6110 NUMBER THEORY (3) LEC. 3. Greatest common divisor, unique factorization, linear Diophantine equations. Modular arithmetic, Chinese remainder theorem, polynomial congruences. Quadratic residues, Legendre/Jacoby symbols, quadratic reciprocity. Primes. Moebius inversion. Sums of squares. Units and the integers mod n.

MATH 6120 INFORMATION THEORY (3) LEC. 3. Information and entropy, information rate optimization and channel capacity, variable-length codes, data compression (Kraft-McMillan inequality, Huffman's algorithm), maximum likelihood decoding, Shannon's Noisy Channel Theorem.

MATH 6140 DATA COMPRESSION (3) LEC. 3. Lossless compression methods, including static, dynamic, and higher order Huffman and arithmetic encoding, interval and recency rank encoding, and dictionary methods; lossy transform methods (JPEG).

MATH 6150 ALGEBRAIC CODING THEORY (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Linear codes, Hamming and Golay codes, BCH codes, cyclic codes. Random error detection and correction. Burst-error correction. Decoding algorithms. Credit will not be given for both MATH 5150 and MATH 6150/6156.

MATH 6170 FINITE EXTREMAL SET THEORY (3) LEC. 3. Pr. (MATH 2660 or MATH 2667) and (MATH 3100 or MATH 3710). Finite posets and their Hasse diagrams. Sequences and the Erdos-Szekeres Theorem. Chains and antichains, Dilworth's Theorem. Set systems in the hypercube, Sperner's Lemma and the LYM inequality. Intersecting families, the Erdos-Ko-Rado Theorem. Isoperimetric inequalities in the hypercube. Additional topics related to recent research. Includes paper reading and presentation component. Graduate version of MATH 5170.

MATH 6180 CRYPTOGRAPHY (3) LEC. 3. Classical cryptosystems, the Data Encryption Standard, one-way functions and relevant number theoretic problems (factoring, primality testing, discrete logarithm problem), RSA and other public key cryptosystems.

MATH 6200 ANALYSIS I (3) LEC. 3. or equivalent course, subject to departmental approval. Real numbers, infima and suprema; sequences and series of real numbers, convergence and limits, Cauchy sequences and completeness; topology of the real line, Bolzano-Weierstrass and Heine-Borel theorems; real-valued functions of a real variable, continuity and uniform continuity; intermediate#value and extreme-value theorems. Emphasis on proofs.

MATH 6210 ANALYSIS II (3) LEC. 3. Pr. MATH 6200. Sequences and series of functions, modes of convergence, power series, elementary functions; derivatives and power series, elementary functions; derivatives and antiderivatives, the mean-value theorem; Riemann integration and the Fundamental Theorem of Calculus; R^n and abstract spaces, functions of several variables. Emphasis on proofs.

MATH 6310 INTRODUCTION TO ABSTRACT ALGEBRA I (3) LEC. 3. Departmental approval. Groups, Groups of Permutations, isomorphisms and homomorphisms; Cyclic Groups, Quotient Groups, The Fundamental Homomorphism Theorem.

MATH 6320 INTRODUCTION TO ABSTRACT ALGEBRA II (3) LEC. 3. Pr. MATH 6310. Theory of rings and fields, Ideals and Homomorphisms, Quotient Rings, Rings of Polynomials, Extensions of Fields, and Galois Theory.

MATH 6330 COMPUTATIONAL ALGEBRA (3) LEC. 3. Pr. MATH 6310. Introduction to computation in multivariate polynomial rings and finite fields. Topics include Groebner bases, Buchberger's Algorithm, kinematic/robotics problems, and symbolic manipulation software.

MATH 6350 INTRODUCTION TO ALGEBRAIC GEOMETRY (3) LEC. 3. Pr. MATH 5320. LEC. 3. Pr. "C" or better in Math 5320. Affine varieties, Hilbert's Nullstellensatz, the Ideal-Variety Correspondence, irreducibility, polynomial and rational functions, projective varieties, Bezout's Theorem, dimension theory.

MATH 6370 LINEAR ALGEBRA (3) LEC. 3. Introduction to the theoretical foundations of Linear Algebra Algebra including vector spaces, basis, dimension, linear transformations, fundamental subspaces matrix representations, eigenvalues, eigenspaces.

MATH 6380 INTERMEDIATE EUCLIDEAN GEOMETRY I (3) LEC. 3. Fundamental concepts and theorems of Euclidean geometry, introduction to higher dimensions. Regular polygons and polyhedra, symmetry groups, convexity, geometric extremum problems. Geometric transformations and their invariants.

MATH 6390 INTERMEDIATE EUCLIDEAN GEOMETRY II (3) LEC. 3. Pr. MATH 6380. Planar graphs and Euler's theorem. The symmetry group of a set, homotheties and similitudes, path, arcs and length of curves, and advanced theorems on the circle.

MATH 6460 PERTURBATION METHODS (3) LEC. 3. Pr. MATH 2660 or MATH 2667. Departmental approval. Analytical solutions of nonlinear problems, ODES, PDEs, multiple scales, and transcendental equations in engineering, mathematics, and physics using both regular and singular perturbation methods. May count either AERO/MATH 5460 or AERO/MATH 6460.

MATH 6500 INTRODUCTION TO TOPOLOGY (3) LEC. 3. Departmental approval. Metric spaces, topological spaces, continuity, compactness, connectedness, product and quotient spaces and local properties.

MATH 6630 INTRODUCTION TO NUMERICAL ANALYSIS I (3) LEC. 3. Numerical solution of equations, polynomial approximation, numerical differentiation and integration, numerical solutions of ordinary differential equations, error analysis. Written programs using algorithms. Programming ability.

MATH 6640 INTRODUCTION TO NUMERICAL ANALYSIS II (3) LEC. 3. Numerical solutions of systems of linear equations, numerical computation of eigenvalues and eigenvectors, error analysis. Written programs using the algorithms. Programming ability.

MATH 6650 THEORY OF NONLINEAR OPTIMIZATION (3) LEC. 3. Kuhn-Tucker conditions, quadratic programming, search methods and gradient methods, Lagrangean and penalty function methods.

MATH 6670 PROBABILITY AND STOCHASTIC PROCESSES I (3) LEC. 3. Random variables, discrete and absolutely continuous distributions. Poisson process, expectation and conditional expectation. Moment generating functions, limit distributions. Emphasis on probabilistic reasoning and problem solving. Credit will not be given for both MATH 6670 and STAT 6670.

MATH 6680 PROBABILITY AND STOCHASTIC PROCESSES II (3) LEC. 3. Pr. MATH 6670 or MATH 6676 or STAT 6670 or STAT 6676. Multivariate distributions. Central Limit Theorem, Laplace transforms, convolutions, simulation, renewal processes, Continuous-time Markov Chains, Markov renewal and semi- regenerative processes, Brownian motion and diffusion. Credit will not be given for both MATH 6680 and STAT 6680.

MATH 6710 LINEAR OPTIMIZATION (3) LEC. 3. Theory and algorithms for standard linear optimization problems. Simplex algorithm and duality, shortest paths, network flows, min-cost flows and circulations, out-of-kilter method, assignments and matchings.

MATH 6730 ENUMERATION (3) LEC. 3. Using generating functions and Polya theory to do sophisticated counting. Permutations and combinations, inclusion-exclusion, partitions, recurrence relations, group actions, Polya theory with applications.

MATH 6740 SOCIAL NETWORK ANALYSIS (3) LEC. 3. Introduction to Social Network Analysis and Python, graph properties and network visualization, Network Metrics, Cascading Behavior in Networks, 2-Mode network, Large-scale structure of networks and corresponding Algorithms, Clustering, Ego analysis and Bipartite networks, Exponential random graph modeling, and Network evolution.

MATH 6750 INTRODUCTION TO GRAPH THEORY (3) LEC. 3. Algorithmic and theoretical aspects of graph theory: matchings, colorings, scheduling problems, Hamilton cycles. Euler tours, spanning trees, network reliability, connectivity, extremal graphs, planar graphs, disjoint paths.

MATH 6770 COMBINATORIAL DESIGNS (3) LEC. 3. Latin squares, mutually orthogonal latin squares, orthogonal and perpendicular arrays, Steiner triple systems, block designs, difference sets and finite geometries.

MATH 6800 ACTUARIAL MATHEMATICS I (3) LEC. 3. Departmental approval. A development of theoretical basis of survival models, life table, life insurance benefits, annuities, premium calculation and policy values primarily intended as preparation for part of the Society of Actuaries Exam FAM.

MATH 6810 ACTUARIAL MATHEMATICS II (4) LEC. 4. Pr. MATH 6800. This course develops the knowledge of theoretical basis to traditional and modern contingent payment models and the application of those models to insurance and other financial risks. It is primarily intended as preparation for the Society of Actuaries Exam ALTAM.

MATH 6840 NUMBER SYSTEMS AND ALGEBRA FOR TEACHERS (3) LEC. 3. Pr. MATH 3100. Connections of advanced college-level mathematics with the secondary mathematics curriculum, focusing on number systems, algebra, and functions, to develop mathematical knowledge relevant to teaching. Includes appropriate uses of technology and non-routine mathematics problem solving. Admission to a program in Secondary Mathematics Education or department approval required.

MATH 6850 FUNCTIONS AND MATHEMATICAL MODELING FOR TEACHERS (3) LEC. 3. Pr. (MATH 2650 or MATH 2670) or MATH 2660 or MATH 2667. Connections of advanced college-level mathematics with the secondary mathematics curriculum, focusing on functions and mathematical modeling, to develop mathematical knowledge relevant to teaching. Includes appropriate uses of technology and non-routine mathematics problem solving. Admission to a program in Secondary Mathematics Education or department approval required.

MATH 6860 GEOMETRY FOR TEACHERS (3) LEC. 3. Pr. MATH 2660 or MATH 2667 or MATH 3100. Connect advanced college-level mathematics with the secondary mathematics curriculum, focusing on geometry, to develop mathematical knowledge relevant to teaching. The contents include axiomatic systems of geometry, transformational geometry, and similarity. Appropriate technology and mathematics problem solving skills will be introduced. Admission to a program in Secondary Mathematics Education or department approval required.

MATH 6870 FINANCIAL MATHEMATICS (3) LEC. 3. Pr. (MATH 1610 or MATH 1617) and (MATH 1620 or MATH 1627) and (MATH 2650 or MATH 2670) and STAT 3600. Options and spreads, pricing of such options in accordance with the Black-Scholes Equation, and the binomial pricing model.

MATH 6970 SPECIAL TOPICS (1-3) DSL. Departmental approval. Topics may vary as needed. Course may be repeated for a maximum of 3 credit hours.

MATH 7000 APPLIED MATHEMATICS I (3) LEC. 3. Departmental approval. Linear spaces, matrices, eigenvalues, least squares solutions to linear systems, Hilbert spaces, orthogonal expansions, integral equations, compact operators, Green's functions for boundary value problems, eigenfunction expansions.

MATH 7010 APPLIED MATHEMATICS II (3) LEC. 3. Pr. MATH 7000 or MATH 7006. Calculus of variations, asymptotic expansions, Spectral theory, Fourier transform, Partial differential equations, transform methods and eigenfunction expansions, vibrations, diffusion processes, equilibrium states, Green's functions, boundary layer problems.

MATH 7110 DISCRETE GEOMETRY AND CONVEXITY I (3) LEC. 3. Departmental approval. Geometric objects and configurations with discrete symmetry groups. Regular polygons and polyhedra. Regular arrangements. Plane tilings and patterns.

MATH 7120 DISCRETE GEOMETRY AND CONVEXITY II (3) LEC. 3. Pr. MATH 7110. Convexity and related geometric extremum problems. Packing and covering. Arrangements of extreme density.

MATH 7140 INTRODUCTION TO MODEL THEORY (3) LEC. 3. Departmental approval. First-order languages, Satisfaction. Consequences. The completeness and compactness theorems, models constructed from constants. Elementary substructures and embeddings, Lowenheim-Skolem-Tarskj theorems. Ultraproducts and ultrapowers.

MATH 7150 AXIOMATIC SET THEORY I (3) LEC. 3. Departmental approval. Introduction to modern set theory. The axioms of ZFC, ordinals and cardinals, closed unbounded sets, the constructible universe L, Martin's Axiom.

MATH 7160 AXIOMATIC SET THEORY II (3) LEC. 3. Pr. MATH 7150. Introduction to forcing, independence results, iterated forcing, consistency of Martin's Axiom.

MATH 7180 ALGORITHMIC ALGEBRA I (3) LEC. 3. Departmental approval. Fundamental aspects of algorithmic algebra. Noetherian rings. Theory of Groebner bases. Hilbert Nullstellensatz. Elimination theory. Applications to graph theory and algebraic geometry.

MATH 7190 ALGORITHMIC ALGEBRA II (3) LEC. 3. Pr. MATH 7180. Modules. Groebner bases for modules and syzygy computations. Improved Buchberger's algorithm. Computation of Ext. Groebner bases over rings. Primary decomposition of ideals. Dimension theory.

MATH 7200 REAL ANALYSIS I (3) LEC. 3. Departmental approval. Sigma algebras, measures, measurable functions, integratability, properties of Lebesgue measure, density, Lusin's theorem, Egeroff's theorem, product measures, Fubini's theorem. Limit theorems involving pointwise convergence and integration.

MATH 7210 REAL ANALYSIS II (3) LEC. 3. Pr. MATH 7200. L-p spaces, completeness, duals. Weak convergence, norm convergence, pointwise convergence, convergence in measure. Signed and complex measures. Absolute continuity, Lebesgue decomposition. Measure theory, Lebesgue integration, introductory functional analysis.

MATH 7230 FUNCTIONS OF A COMPLEX VARIABLE I (3) LEC. 3. Departmental approval. Complex numbers, analytic functions, derivatives, Cauchy integral theorem and formulae, Taylor and Laurent series, analytic continuation, residues, maximum principles, Riemann surfaces.

MATH 7240 FUNCTIONS OF A COMPLEX VARIABLE II (3) LEC. 3. Pr. MATH 7230. Conformal mappings, families of analytic functions and harmonic analysis.

MATH 7280 ADVANCED THEORY OF ORDINARY DIFFERENTIAL EQUATIONS I (3) LEC. 3. Departmental approval. Existence and continuation theorems for ordinary differential equations, continuity and differentiability with respect to initial conditions, linear systems, differential inequalities, Sturm theory.

MATH 7290 ADVANCED THEORY OF ORDINARY DIFFERENTIAL EQUATIONS II (3) LEC. 3. Pr. MATH 7280. Stability theory, periodic solutions, boundary value problems, disconjugacy of linear equations, Green's functions, upper and lower solutions, a priori bounds methods, current research.

MATH 7310 ALGEBRA I (3) LEC. 3. Departmental approval. Groups, Lagrange's Theorem, normal subgroups, factor groups, Isomorphism and Correspondence Theorems. Symmetric groups, alternating groups, free groups, torsion groups. Introduction to rings, correspondence theorems.

MATH 7320 ALGEBRA II (3) LEC. 3. Pr. MATH 7310. Rings, modules, vector spaces, and semi-simple modules. Commutative rings; prime and primary ideals, PIDs are UFD, factorizations in integral domains, field extensions, the Galois Correspondence Theorem.

MATH 7340 RING THEORY (3) LEC. 3. Pr. MATH 7320. Topics on: commutative rings (Cohen-Seidenberg theorems, Krull Intersection Theorem, Dedekind domains), or noncommutative rings (projective modules over Artinian algebras, representation type, Noether-Skolem Theorem, division algebras).

MATH 7350 ALGEBRAIC GEOMETRY (3) LEC. 3. Pr. MATH 7320 and P/C MATH 7500. Pr. ``C" or better in Math 7320 and Math 7500. Affine and projective varieties, the Ideal-Variety Correspondence, morphisms and rational maps of varieties, Bezout's Theorem, sheaves, schemes, divisors, sheaf cohomology.

MATH 7360 LIE ALGEBRA (3) LEC. 3. General introduction of Lie algebras including their structures and classifications of semisimple Lie algebras.

MATH 7370 MATRICES I (3) LEC. 3. Departmental approval. Jordan form, functions of a matrix, spectral theorem, singular values, norms, quadratic forms, field of values, inertia; topics of current interest.

MATH 7380 MATRICES II (3) LEC. 3. Pr. MATH 7370. Matrix stability and inertia, inequalities for matrix eigenvalues and singular values, The Kronecker and Hadamard matrix products, the exponential and logarithm matrix map; topics of current interest.

MATH 7390 MULTILINEAR ALGEBRA (3) LEC. 3. Pr. MATH 5370 or MATH 6370. Multilinear algebra, symmetry class of tensors, induced operators, generalized matrix functions, and current research topics.

MATH 7400 FUNCTIONAL ANALYSIS I (3) LEC. 3. Pr. MATH 7210. Departmental approval. Bounded linear transformations and functionals on Banach and Hilbert spaces, weak topologies, linear operators, adjoints, compact operators. Banach algebras, spectral theory, Gelfand transform.

MATH 7410 FUNCTIONAL ANALYSIS II (3) LEC. 3. Pr. MATH 7400. C*-algebras, Hermitian, self adjoint elements, functional calculus for commutative algebras. Normal operators on Hilbert space, spectral theorem, applications, symmetric and self-adjoint operators, normal operators, the spectral theorem.

MATH 7440 PARTIAL DIFFERENTIAL EQUATIONS I (3) LEC. 3. Departmental approval. Second order linear elliptic and hyperbolic equations stressing non-linear and numerical problems, characteristic domains of dependence, energy integrals, finite difference schemes, Sobolev spaces, maximum principle.

MATH 7450 PARTIAL DIFFERENTIAL EQUATIONS II (3) LEC. 3. Pr. MATH 7440. Parabolic and hyperbolic equations, stressing numerical problems, characteristics, domains of dependence, energy integrals, reaction-diffusion problems, Navier-Stokes equations, fixed-point and Galerkin methods.

MATH 7460 ADVANCED PERTURBATION METHODS (3) LEC. 3. Departmental approval. Solutions of nonlinear problems and integrals using WKB, Rayleigh-Janzen, Generalized Scales, Latta, van der Pol, Watson, Laplace, Adomian, homotopy, Pade, Liouville-Green and Burmann transformations. May count either AERO 7460/7466 or MATH 7460/7466.

MATH 7500 TOPOLOGY I (3) LEC. 3. Departmental approval. Separation and countability axioms, covering properties, completeness, connectedness, metric spaces and metrizability, product and quotient spaces, function spaces.

MATH 7510 TOPOLOGY II (3) LEC. 3. Pr. MATH 7500. Homotopy, elementary properties of retracts, fundamental groups, covering spaces, computations of fundamental groups.

MATH 7530 CONTINUUM THEORY I (3) LEC. 3. Pr. MATH 7510. Departmental approval. Topics such as inverse limits, decompositions, hyperspaces, special mappings, topological structures from the pathological (indecomposable continua), to the straightforward (Peano continua).

MATH 7540 CONTINUUM THEORY II (3) LEC. 3. Pr. MATH 7530. Topics in continuum theory such as confluent mappings, epsilon mappings, chains, to-the-boundary theorems, relationship to inverse limits, advanced topics.

MATH 7550 SET THEORETIC TOPOLOGY I (3) LEC. 3. Pr. MATH 7510. Departmental approval. Compactifications, covering properties, metrization theorems and generalized metrizable spaces, topological groups.

MATH 7560 SET THEORETIC TOPOLOGY II (3) LEC. 3. Pr. MATH 7550. Topological Groups, Cardinal invariants, use of set-theoretic axioms such as Martin's Axiom, independence results, advanced topics.

MATH 7600 ADVANCED NUMERICAL MATRIX ANALYSIS (3) LEC. 3. Departmental approval. Topics selected from: discretization matrices, sparse matrices, QR-algorithm, symmetric eigenvalue problems, singular value decomposition, pseudo-inverses, simplex method, matrix algorithms for vector computers.

MATH 7610 NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS I (3) LEC. 3. Pr. (MATH 2650 or MATH 2670) and (MATH 2660 or MATH 2667) and (MATH 5630 or MATH 6630) and (MATH 5640 or MATH 6640). Finite difference methods for ordinary and partial differential equations.

MATH 7630 NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS II (3) LEC. 3. Pr. MATH 7610. Finite element methods for partial differential equations.

MATH 7700 GRAPH THEORY (3) LEC. 3. Algorithmic, enumerative and theoretical aspects of graph theory: matchings and factors, colorings, Hamiltonicity, connectivity, trees, extremal graphs, planarity. May count either MATH 6750 or MATH 7700.

MATH 7710 COMPUTATIONAL GEOMETRY (3) LEC. 3. Departmental approval. Design and time-complexity of computer algorithms for geometry problems studying the geometric ideas needed for computer-aided design, computer graphics and robotics.

MATH 7720 INTRODUCTION TO CODING THEORY (3) LEC. 3. Introduction to methods and algorithms for reliable communications through error control coding. BCH, Reed- Solomon, Reed-muller codes, convolutional codes, Berlekamp-Massey, Viterbi, and iterated decoding algorithms.

MATH 7730 ADVANCED TOPICS IN CODING THEORY (3) LEC. 3. Pr. MATH 7720. Departmental approval. Structure and theoretical properties of codes and related algorithms. Relations to other combinatorial and algebraic objects stressed.

MATH 7740 ADVANCED COMBINATORIAL DESIGNS (3) LEC. 3. Topics of current interest and research in combinatorial design theory. Areas included: latin squares, embeddings, Wilson's constructions, quadruple systems, Hadamard designs, graph designs, orthogonal arrays.

MATH 7750 ADVANCED TOPICS IN GRAPH THEORY (3) LEC. 3. Pr. MATH 6750 or MATH 7700. Topics of current interest and recent research in graph theory. May include edge colorings, algebraic graph theory, network flows, factor theory.

MATH 7760 INTRODUCTION TO ALGEBRAIC TOPOLOGY I (3) LEC. 3. Pr. MATH 7510. Departmental approval. Homology of chain complexes, the axioms of homology and their verification, computations of homology groups.

MATH 7770 INTRODUCTION TO ALGEBRAIC TOPOLOGY II (3) LEC. 3. Pr. MATH 7760. Homology with coefficients and universal coefficient theorem theorems, Cohomology and universal coefficient theorems, homology of products of spaces, cup and cap products, duality in manifolds.

MATH 7780 ADVANCED ALGEBRAIC TOPOLOGY I (3) LEC. 3. Departmental approval. Advanced topics in homology, cohomology, and duality with relations to and further study of homotopy theory. Applications to and further study of manifolds and geometric topology.

MATH 7790 ADVANCED ALGEBRAIC TOPOLOGY II (3) LEC. 3. Pr. MATH 7780. Continuation of MATH 7780; advanced topics in homology, cohomology, and duality with relations to and further study of homotopy theory. Applications to and further study of manifolds and geometric topology.

MATH 7800 PROBABILITY I (3) LEC. 3. Pr., a full year of undergraduate mathematical analysis at a level commensurate with MATH 5200/5210. Measure-theoretic foundations, independence, conditioning, martingales, Markov property, stationarity, random walks, Markov chains, Poisson processes.

MATH 7810 PROBABILITY II (3) LEC. 3. Pr. MATH 7800. Classical and modern topics in stochastic processes (Markov chains, Poisson process, Brownian motion). Applications and stochastic models (queues, stationary processes, population dynamics, finances). Credit will not be given for both MATH 7810 and STAT 7810.

MATH 7820 APPLIED STOCHASTIC PROCESSES I (3) LEC. 3. Classical and modern topics in stochastic processes (Markov processes, Random Walks, Martingales, Brownian motion). Introduction to stochastic integrals and differential equations. Applications (queues, population dynamics, chaos, finances). Credit will not be given for both MATH 7820 and STAT 7820.

MATH 7830 APPLIED STOCHASTIC PROCESSES II (3) LEC. 3. Classical and modern topics in stochastic processes (Markov processes, Random Walks, Martingales, Brownian motion). Introduction to stochastic integrals and differential equations. Applications (queues, population dynamics, chaos finances).

MATH 7870 REAL FUNCTIONS AND DESCRIPTIVE SET THEORY I (3) LEC. 3. Pr. MATH 7210 or MATH 7500. Borel classification of sets, the Baire classification of real functions. Derivatives and approximately continuous functions. The Lebesegue density topology.

MATH 7880 REAL FUNCTIONS AND DESCRIPTIVE SET THEORY II (3) LEC. 3. Pr. MATH 7870. Analytic and coanalytic sets. Lebesegue measurable, universally measurable and Marczewski measurable sets and functions. Baire properties. Singular sets. Category analogs to real analysis.

MATH 7950 SEMINAR (1-3) AAB. SU. Course may be repeated for a maximum of 6 credit hours.

MATH 7960 SPECIAL PROBLEMS (1-10) IND. Departmental approval. Topics may vary as needed. Course may be repeated for a maximum of 10 credit hours.

MATH 7970 SPECIAL TOPICS (1-10) IND. Departmental approval. Topics may vary as needed. Course may be repeated with change in topics.

MATH 7980 RESEARCH AND SPECIAL PROJECT IN APPLIED MATHEMATICS (1-10) RES. SU. Departmental approval. For students working on the Master of Applied Mathematics degree with concentration in numerical analysis. Course may be repeated for a maximum of 10 credit hours.

MATH 7990 RESEARCH AND THESIS (1-10) MST. Course may be repeated with change in topics.

MATH 8310 HOMOLOGICAL ALGEBRA I (3) LEC. 3. Pr. MATH 7320. Departmental approval. Homology and cohomology. Hom and Tensor functors; the adjoint isomorphisms, injective/projective modules, flat modules, the classification of certain rings using homological tools.

MATH 8330 INTRODUCTION TO LIE GROUPS (3) LEC. 3. Pr. MATH 7310 or MATH 7370. Introduce Lie groups via matrix groups. Topics include exponential map, Lie algebras, classical groups, structures and classifications, manifolds, representations.

MATH 8960 SPECIAL PROBLEMS (1-10) IND. Departmental approval. Topics may vary as needed. Course may be repeated for a maximum of 15 credit hours.

MATH 8970 SPECIAL TOPICS (1-10) IND. Departmental approval. Topics may vary as needed. Course may be repeated for a maximum of 15 credit hours.

MATH 8990 RESEARCH AND DISSERTATION (1-10) DSR. Course may be repeated with change in topics.

Statistics Courses

STAT 1010 DATA EPISTEMOLOGY (3) LEC. 3. This course will provide the basic tools to understand, interpret and reason with data in order to critically think about data-driven knowledge. Acquiring notions of logical reasoning and data literacy, the students will know how to analyze and ask the correct questions regarding data collection, representation and interpretation.

STAT 2010 STATISTICS FOR SOCIAL AND BEHAVIOR SCIENCES (4) LEC. 3. LAB. 2. Pr. MATH 1100 or MATH 1120 or MATH 1123 or MATH 1130 or MATH 1133 or MATH 1150 or MATH 1153 or MATH 1610 or MATH 1613 or MATH 1617. Introduction to basic principles of statistical reasoning and statistical procedures used in data analysis in the social and behavioral sciences.

STAT 2017 HONORS STATISTICS FOR SOCIAL AND BEHAVIORAL SCIENCES (4) LEC. 3. LAB. 2. Pr. Honors College. Introduction to statistical data analysis, statistical packages, and APA-style statistical reporting use in research in Psychology and other social and behavioral sciences.

STAT 2510 STATISTICS FOR BIOLOGICAL AND HEALTH SCIENCES (3) LEC. 3. Pr. MATH 1100 or MATH 1120 or MATH 1123 or MATH 1130 or MATH 1133 or MATH 1150 or MATH 1153 or MATH 1610 or MATH 1613 or MATH 1617 or MATH 1680 or MATH 1683. Introduction to statistical concepts, reasoning and methods used in data analysis, descriptive statistics, sampling distributions, statistical inference, confidence intervals, regression or correlation, contingency tables. Students who have previous credit in any higher-numbered math course may not receive credit.

STAT 2600 BUSINESS ANALYTICS I (3) LEC. 3. Pr. MATH 1680 or MATH 1683 or P/C COMP 1000 or COMP 1003. Introduction to analytics in business including use of data to make business decisions, basic predictive business modeling, and communication of analytical results. Minimum 2.0 overall cumulative undergraduate GPA.

STAT 2610 STATISTICS FOR BUSINESS AND ECONOMICS (3) LEC. 3. Pr. MATH 1690. Introduction to statistical analysis, theory, and interpretation used in business and economics.

STAT 2710 STATISTICAL COMPUTING (1) LEC. 1. Pr. (P/C STAT 2010 or P/C STAT 2017) and (P/C STAT 2510 or STAT 2513) and P/C STAT 2610 and P/C STAT 3010. Introduction to basic statistical computing programs and methods..

STAT 3010 STATISTICS FOR ENGINEERS AND SCIENTISTS (3) LEC. 3. Pr. MATH 1610 or MATH 1613 or MATH 1617 or MATH 1710. Introduction to statistical methods and analysis used in engineering and science.

STAT 3600 PROBABILITY AND STATISTICS I (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627 or MATH 1720. Calculus-based introduction to probability and statistics with an emphasis on practical problem-solving.

STAT 3610 PROBABILITY AND STATISTICS II (3) LEC. 3. Pr. STAT 3600. Departmental approval. Continuation of STAT 3600.

STAT 3611 PROBABILITY AND STATISTICS II LABORATORY (1) LAB. 2. Departmental approval. Coreq. STAT 3610. The application of statistical techniques from STAT 3610.

STAT 4000 INTRODUCTION TO DATA SCIENCE (3) LEC. 3. Pr. STAT 2010 or STAT 2017 or STAT 2510 or STAT 2513 or STAT 2600 or STAT 3010 or STAT 3600 or STAT 3603. Departmental approval. This course will provide an entry level introduction to the field of data science. The course will cover the essential statistical and computational tools including programming and analytical models, as well as teamwork, communication, and critical thinking.

STAT 4610 APPLIED REGRESSION ANALYSIS (3) LEC. 3. Pr. STAT 3610 or STAT 3010. Least squares estimation, hypothesis testing and confidence interval estimation in regression; simple, polynomial and multiple linear regression; residual and lack-of-fit analysis; use of dummy variables; multiple and partial correlation analysis; model building algorithms and model comparisons; transformations.

STAT 4620 APPLIED NONPARAMETRIC STATISTICS (3) LEC. 3. Review of elementary probability; goodness-of-fit tests; for singles and several location parameters; tests for scale parameters; distribution tests; measures of association; bootstrap and permutation tests.

STAT 4630 APPLIED TIME-SERIES ANALYSIS (3) LEC. 3. ARIMA models: the autoregressive process, the moving average process, and the ARMA process; forecasting, errors and confidence intervals, updating forecast models; estimation; model building and assessment; applications in econometrics.

STAT 4650 INTRODUCTION TO BAYESIAN STATISTICS (3) LEC. 3. LAB. 0. Pr. STAT 3610. This course will develop an introduction to the Bayesian thinking and the Fundamental Concepts in Bayesian Statistics.

STAT 4970 SPECIAL TOPICS IN STATISTICS (1-3) LEC. Departmental approval. Special topics designed to meet the needs and interest of students. Course may be repeated for a maximum of 6 credit hours.

STAT 4980 UNDERGRADUATE RESEARCH IN STATISTICS AND DATA SCIENCE (1-3) IND/RES. Directed research in Statistics and Data Science. Departmental Approval. Course may be repeated for a maximum of 3 credit hours.

STAT 5000 INTERMEDIATE STATISTICAL METHODS FOR DATA SCIENCE (3) LEC. 3. Pr. STAT 3610 or STAT 3010. C Grade or better in STAT3610 or STAT3010 or equivalent. Principles of probability and statistics, multiple testing and bootstrapping, parametric and nonparametric regression, generalized linear models, time dependent data with a focus on Data Science.

STAT 5110 SAS PROGRAMMING AND APPLICATIONS (3) LEC. 3. Pr. STAT 3010 or STAT 3610. Emphasis is placed on using SAS routines to obtain statistical analyses for common statistical methods and interpreting output.

STAT 5210 R PROGRAMMING FOR DATA SCIENCE (3) LEC. 3, LEC. 3. Pr. STAT 2510 or STAT 3010 or STAT 3610. Fundamental concepts on R programming language and popular R packages. Topics include basic syntax, R objects, control flow, file input and output, building R packages, data manipulation, visualization, interface to C, parallel computing, building web apps.

STAT 5330 DATA BASED DECISION MAKING USING SIX SIGMA (3) LEC. 3. Pr. STAT 3610 and INSY 4330. Departmental approval. Covers statistical tools needed for implementation of "Six Sigma", "Learn Six Sigma" and "Design for Six Sigma". Credit will not be given for both STAT 5330 and STAT 6330/ 6336.

STAT 5600 PROBABILITY AND STATISTICS FOR DATA SCIENCE (3) LEC. 3. Pr. STAT 3610 or (STAT 3010 and MATH 1620) or (STAT 3010 and MATH 1627). Grade of C or better in STAT 3610 or STAT 3010 and Grade of C or better in MATH 1620 or equivalent. Basic probability theory, random variables, multivariate random variables, expectation, random processes, times series, convergence of random processes, Markov chains, maximum likelihood estimation, Bayesian statistics, hypothesis testing, prediction, sampling and resampling methods, multivariate statistics.

STAT 5610 FUNDAMENTALS OF STATISTICAL INFERENCE I (3) LEC. 3. Pr. STAT 3600 and STAT 3610. Probability and independence; discrete and continuous distributions, random variable, moments; joint, marginal, conditional distributions; exponential families; bivariate transformations, covariance and correlation; multivariate distributions, sums of random variables, sampling distributions for normal data, order statistics; convergence of random variables, principles of data reduction; the likelihood principle.

STAT 5620 FUNDAMENTALS OF STATISTICAL INFERENCE II (3) LEC. 3. Pr. STAT 5610. Properties of random samples; generating a random sample; point and interval estimation; hypothesis testing; Analysis of Variance: one-way ANOVA, multi-way ANOVA and ANCOVA; linear regression, multiple regression and GLM methods, logistic regression.

STAT 5630 SAMPLE SURVEY, DESIGN AND ANALYSIS (3) LEC. 3. Pr. STAT 3600. Departmental approval. Estimation of means, proportions, finite populations, stratified sampling, systematic sampling ratio estimations.

STAT 5650 STATISTICAL LEARNING (3) LEC. 3. Pr. STAT 5000. or equivalent. Introduction to modern methods and algorithms in Statistics. Topics include common supervised and unsupervised learning methods such as linear regression, logistic regression, regularization, non-parametric regression, model assessment and selection, neural network, support vector machines, principal components analysis.

STAT 5670 PROBABILITY AND STOCHASTIC PROCESSES I (3) LEC. 3. Pr. MATH 2630 or MATH 2637. Random variables, discrete and absolutely continuous distributions. Poisson process, expectation and conditional expectation. Moment generating functions, limit distributions. Emphasis on probabilistic reasoning and problem solving. Credit will not be given for both STAT 5670 and MATH 5670.

STAT 5680 PROBABILITY AND STOCHASTIC PROCESSES II (3) LEC. 3. Pr. STAT 5670 or MATH 5670. Multivariate distributions, Central Limit Theorem, Laplace transforms, convolutions, simulations, renewal processes Continuous-time Markov chains, Markov renewal and semi-regenerative processes, Brownian motion and diffusion. Credit will not be given for both STAT 5680 and MATH 5680.

STAT 5690 CHAOTIC AND RANDOM PHENOMENA (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627. Statistics and modeling of random phenomena in connection to computational complexity, data analysis, processes of chance and chaotic nonlinear systems. Credit will not be given for both STAT 5690 and MATH 5690.

STAT 6000 INTERMEDIATE STATISTICAL METHODS FOR DATA SCIENCE (3) LEC. 3. Pr. STAT 3610 or STAT 3010. C Grade or better in STAT 3610 or STAT 3010 or equivalent. Principles of probability and statistics, multiple testing and bootstrapping, parametric and nonparametric regression, generalized linear models, time-dependent data.

STAT 6110 SAS PROGRAMMING AND APPLICATIONS (3) LEC. 3. Pr. STAT 3010 or STAT 3610 or P/C STAT 7000. Emphasis is placed on using SAS routines to obtain statistical analyses for common statistical methods and interpreting output.

STAT 6210 R PROGRAMMING FOR DATA SCIENCE (3) LEC. 3. Pr. STAT 2510 or STAT 3010 or STAT 3610. Fundamental concepts on R programming language and popular R packages. Topics include basic syntax, R objects, control flow, file input and output, building R packages, data manipulation, visualization, interface to C, parallel computing, building web apps.

STAT 6330 DATA BASED DECISION MAKING USING SIX SIGMA (3) LEC. 3. Pr. STAT 3610 and INSY 4330. Departmental approval. Covers statistical tools needed for implementation of "Six Sigma", "Learn Six Sigma" and "Design for Six Sigma". Credit will not be given for both STAT 5330 and STAT 6330/ 6336.

STAT 6600 PROBABILITY AND STATISTICS FOR DATA SCIENCE (3) LEC. 3. Pr. STAT 3610 or (STAT 3010 and MATH 1620) or (STAT 3010 and MATH 1627). Grade of C or better in STAT 3610 or STAT 3010 and Grade of C or better in MATH 1620 or equivalent. Basic probability theory, random variables, multivariate random variables, expectation, random processes, times series, convergence of random processes, Markov chains, Maximum Likelihood Estimation, Bayesian statistics, hypothesis testing, prediction, Sampling and Resampling methods, multivariate statistics.

STAT 6610 FUNDAMENTALS OF STATISTICAL INFERENCE I (3) LEC. 3. Pr. STAT 3600 and STAT 3610. This class is first of a two-semester sequence in probability and statistics taught at a calculus-based level. Students should gain an understanding of probability and random variables in order to have the foundation to conduct statistical inference in STAT 5620/6620.

STAT 6620 FUNDAMENTALS OF STATISTICAL INFERENCE II (3) LEC. 3. Pr. STAT 6610. This class is second of a two-semester sequence in probability and statistics taught at a calculus-based level. Students should gain an understanding of inference for the practice of statistics.

STAT 6630 SAMPLE SURVEY, DESIGN AND ANALYSIS (3) LEC. 3. Pr. STAT 3600. Departmental approval. Estimation of means, proportions, finite populations, stratified sampling systematic sampling ratio estimations.

STAT 6650 STATISTICAL LEARNING (3) LEC. 3. Pr. STAT 6000. or equivalent. Introduction to modern methods and algorithms in Statistics. Topics include common supervised and unsupervised learning methods such as linear regression, logistic regression, regularization, non-parametric regression, model assessment and selection, neural network, support vector machines, principal components analysis.

STAT 6670 PROBABILITY AND STOCHASTIC PROCESSES I (3) LEC. 3. Pr. MATH 2630 or MATH 2637. Random variables, discrete and absolutely continuous distributions. Poisson process, expectation and conditional expectation. Moment generating functions, limit distributions. Emphasis on probabilistic reasoning and problem solving. Credit will not be given for both STAT and MATH 6670.

STAT 6680 PROBABILITY AND STOCHASTIC PROCESSES II (3) LEC. 3. Pr. MATH 6670 or MATH 6676 or STAT 6670 or STAT 6676. Multivariate distributions, Central Limit Theorem, Laplace transforms, convolutions, simulations, renewal processes Continuous-time Markov chains, Markov renewal and semi-regenerative processes, Brownian motion and diffusion. Credit will not be given for both STAT 6680 and MATH 6680.

STAT 6690 CHAOTIC AND RANDOM PHENOMENA (3) LEC. 3. Pr. MATH 1620 or MATH 1623 or MATH 1627. Statistics and modeling of random phenomena in connection to computational complexity, data analysis, processes of chance and chaotic nonlinear systems. Credit will not be given for both STAT 6690 and MATH 6690.

STAT 6830 STATISTICS AND PROBABILITY FOR TEACHERS (3) LEC. 3. Pr. STAT 3010 or STAT 3600 or STAT 3603. Connections of advanced college-level mathematics with the secondary mathematics curriculum, focusing on statistics and probability, to develop mathematical knowledge relevant to teaching. Includes appropriate uses of technology and non-routine mathematics problem solving. Admission to a program in Secondary Mathematics Education or department approval required.

STAT 7000 EXPERIMENTAL STATISTICS I (4) LEC. 4. Departmental approval. Paired and independent sample t-tests, ANOVA, F-tests, contrasts, tests for trends, multiple comparisons, CR and RCB designs of experiments, regression.

STAT 7010 EXPERIMENTAL STATISTICS II (3) LEC. 3. Pr. STAT 7000. Advanced topics in experimental design: writing linear models for experiment-expected mean squares, variance components, nested designs, Latin Square Designs, split plot designs, ANOVA and multiple regression.

STAT 7020 REGRESSION ANALYSIS (3) LEC. 3. Pr. STAT 7000. Departmental approval. Introduction to the method of least squares as it applies to regression and analysis of variance. Simple linear regression, multiple regression, model selection and diagnostics.

STAT 7030 CATEGORICAL DATA ANALYSIS (3) LEC. 3. Pr. STAT 3600 or MATH 3600 or STAT 7000. Departmental approval. Methods for analysis or categorical response data. Topics include Chi-square tests, Likelihood Ratio tests, Logistic Regression, and Loglinear Modeling.

STAT 7040 BIOSTATISTICS (3) LEC. 3. Pr. STAT 7000. Departmental approval. Epidemiology, biometry, methods of survival analysis.

STAT 7100 STATISTICAL ANALYSIS OF SURVEY, AGGREGATE AND LARGE DATA SOURCES (3) LEC. 3. Pr. STAT 2010 or STAT 2017. Departmental approval. Techniques commonly used in multivariate statistical analysis of data sources such as surveys, archival records, and other large data sets. Credit will not be given for STAT 7100 and SOCY 7100.

STAT 7250 PRACTICAL DATA ANALYSIS AND COMPUTATION FOR THE LIFE SCIENCES (3) LEC. 2. LAB. 1. Pr. STAT 7020 or WILD 7150. Data from the life sciences and advanced statistical techniques for data analyses and computaMon are brought together through a cross-fertilization of graduate students in the life sciences, statistics, and mathematics. Focus on production of publication-quality research on student-identified projects.

STAT 7270 EXPERIMENTAL DESIGN IN PSYCHOLOGY (4) LEC. 4. Pr. STAT 7000 and STAT 7020. Introduction to the analysis of data collected under differential experimental designs. Credit will not be given for both STAT 7270 and PSYC 7270.

STAT 7300 ADVANCED ENGINEERING STATISTICS I (3) LEC. 3. Pr. STAT 3610. Departmental approval. Advanced concepts of experimental design including blocking, regression approach to analysis of variance, fractional factorials in base-2, and base-3 designs. Emphasis throughout is on improving industrial products and processes. Credit will not be given for both STAT 7300 and INSY 7300.

STAT 7310 ADVANCED ENGINEERING STATISTICS II (3) LEC. 3. Pr. STAT 7300 or STAT 7306 or INSY 7300 or INSY 7306. Fractional factorial experimentation applied for the purpose of process and quality improvement and optimization, introduction to analysis of covariance, multiple regression analysis, and response surface analysis. Credit will not be given for both STAT 7310 and INSY 7310.

STAT 7600 STATISTICAL THEORY AND METHODS I (3) LEC. 3. Pr. STAT 3600. Departmental approval. Random variables, probability theory, random variables, probability distributions, sampling distributions, convergence.

STAT 7610 STATISTICAL THEORY AND METHODS II (3) LEC. 3. Pr. STAT 7600. Likelihood ratio, regression, ANOVA, categorical data, non-parametric methods, decision theory.

STAT 7620 NONPARAMETRIC STATISTICS (3) LEC. 3. Pr. STAT 3600. Departmental approval. Distribution-free methods of statistical inference. Sign, Wilcoxon signed-rank, and Mann-Whitney tests for location, the Chi-Square and Kolmogorov-Smirnov tests for goodness-of-fit. Measures of association.

STAT 7630 BAYESIAN STATISTICS (3) LEC. 3. LAB. 0. Pr. STAT 6620 or STAT 7610. This course will develop an understanding of Bayesian principles and methodologies and cover the modeling and computation required to perform advanced data analysis from the Bayesian perspective.

STAT 7650 COMPUTATIONAL STATISTICS (3) LEC. 3. Pr. STAT 7020 and STAT 7610. This course covers the theory and practice of common algorithms used for simulation, computing, and optimization in Statistics.

STAT 7670 APPLIED LONGITUDINAL DATA ANALYSIS (3) LEC. 3. To introduce students to statistical models and methods for the analysis of longitudinal date, i.e. data collected repeatedly on individuals (humans, animals, etc) over time (or other conditions).

STAT 7700 GENERALIZED LINEAR MODELS (3) LEC. 3. Pr. STAT 7600. Departmental approval. Exponential families and links functions, model fitting, likelihood methods, residual diagnostics, count data, estimating equations.

STAT 7780 SURVIVAL ANALYSIS (3) LEC. 3. Pr. STAT 7000. Departmental approval. Kaplan-Meier estimator, log-rank tests, Cox proportional hazard model, fully parametric models.

STAT 7800 LINEAR MODELS (3) LEC. 3. Pr. STAT 7610 and MATH 2660. Departmental approval. A rigorous development of some of the important topics of applied statistics: the multivariate normal distribution analysis of variance, regression, aspects of experimental design.

STAT 7810 MODERN STOCHASTIC PROCESSES I (3) LEC. 3. Pr. (MATH 6670 or MATH 6676 or STAT 6670 or STAT 6676) and MATH 6210. Classical and Modern Topics in stochastic processes (Markov chains, Poisson process, Brownian motion). Applications and stochastic models (queues, stationary processes, population dynamics, finances). Credit will not be given for both STAT 7810 and MATH 7810.

STAT 7820 APPLIED STOCHASTIC PROCESSES I (3) LEC. 3. Pr. MATH 7810 or MATH 7816 or STAT 7810 or STAT 7816. Classical and modern topics in stochastic processes (Markov processes, Random Walks, Martingales, Brownian motion.) Introduction to stochastic integrals and differential equations. Applications (queues, population dynamics, chaos finances). Credit will not be given for both STAT 7820 and MATH 7820.

STAT 7830 APPLIED STOCHASTIC PROCESSES II (3) LEC. 3. Pr. STAT 7810 or STAT 7816.

STAT 7840 APPLIED MULTIVARIATE STATISTICAL ANALYSIS (3) LEC. 3. Pr. STAT 7000. Multivariate normal distribution, Hotelling's T2, MANOVA, discriminate analysis, principal components.

STAT 7850 THEORY OF STATISTICAL INFERENCE (3) LEC. 3. Pr. STAT 7610. Central limit theorem, Convergence, M-estimate, Statistical functional, U-statistics

STAT 7860 APPLIED TIME SERIES ANALYSIS (3) LEC. 3. Pr. STAT 3610. Departmental approval. Autoregressive and moving average models, differencing, estimation and forecasting, spectral theory.

STAT 7930 STATISTICAL CONSULTING PRACTICUM (3) PRA. 3. Pr. STAT 7000 and STAT 7010 and STAT 7020. This is a course in applied statistics, providing training in statistical consulting. Applications of commonly encountered statistical methods are explored in the consulting environment. Written and oral communication skills are emphasized, and ethical aspects of consulting are introduced. This course provides students with an opportunity to gain practical experience in consulting through various projects with clients, through the AU Statistical Consulting Center.

STAT 7940 CAPSTONE PROJECT (3) LEC. 3. Discuss various topics while working on an industry-level project. Students will complete a semester-long project under the supervision of instructors.

STAT 7950 SEMINAR (1) SEM. SU. Exploration of statistical concepts, fostering active learning through presentations, guest lectures, discussions, and student-led research presentations. Course may be repeated for a maximum of 2 credit hours.

STAT 7960 SPECIAL PROBLEMS IN STATISTICS (1-10) RES. Credit will not be given for both MATH 7960 and STAT 7960. Course may be repeated for a maximum of 10 credit hours.

STAT 7970 SPECIAL TOPICS (1-3) LEC. Departmental approval. Special topics designed to meet the needs and interests of students. Course may be repeated for a maximum of 6 credit hours.

STAT 7980 SPECIAL PROJECT (3) LEC. 3. SU. Departmental approval. Non-thesis project in Statistics for Master's degree in Statistics (non-thesis option).

STAT 7990 RESEARCH AND THESIS (1-10) DSR. Research for Master's thesis in Statistics. Course may be repeated with change in topic.

STAT 8400 ADVANCED QUANTITATIVE METHODS FOR MANAGEMENT I (3) LEC. 3. Pr. STAT 7000. or approved equivalent. Study of the application of linear regression analysis to business research. First advanced course in applied linear statistics models.

STAT 8410 ADVANCED QUANTITATIVE METHODS MANAGEMENT II (3) LEC. 3. or approved equivalent. Introduction to multivariate techniques in business research. Study of the theory and applications of ANOVA, ANCOVA, MANOVA, MANCOVE, Discriminate Analysis & Polytomous Logistic Regression.

STAT 8420 ADVANCED QUANTITATIVE METHODS FOR MANAGEMENT III (3) LEC. 3. Pr. STAT 7100 and STAT 8400 and STAT 8410. or approved equivalent. Third course in statistical modeling. Emphasis on applications of Principal Components Analysis, and Structural Equation Modeling to management research.

STAT 8990 RESEARCH AND DISSERTATION (1-10) LEC. 1-10. Individual doctoral dissertation research. May be repeated for credit. Course may be repeated with change in topics. Course may be repeated for a maximum of 30 credit hours.

Applied Mathematics Option (AMTH)

The Applied Mathematics curriculum is designed for students preparing to pursue graduate studies in Mathematics or Applied Mathematics. It is also suitable for those pursuing careers requiring expertise in applied mathematical methods, including engineering, physical sciences, computer science, and fields such as biological, behavioral, or managerial sciences.

1 Students must complete a two-course sequence in either HIST or LIT (for example, World History 1 and 2 or American Lit 1 and 2). For complete HIST and LIT sequence options, see the *Bulletin*.

2 Students who choose a HIST sequence other than HIST 1010 and HIST 1020 should talk to an advisor about CORE SOC SCI choices.

3 If a LIT sequence is chosen, this course must be a CORE SOC SCI. If a HIST sequence is chosen, this course must be a CORE HUMANITIES.

4 Core Science: One of the sequences PHYS 1600/PHYS 1610, BIOL 1020/BIOL 1030, CHEM 1030/CHEM 1040 with labs, or GEOL 1100/GEOL 1110.

5 For guidelines regarding Math Elective and Interdisciplinary Elective, see advisor.

6 This course must be taken the semester of graduation.

Applied Mathematics — Actuarial Science Option (ACTU)

The Actuarial Science curriculum offers a balanced coursework combining rigorous applied mathematics with advanced training for the actuarial profession. It prepares students for careers in the insurance industry and other sectors that rely on actuarial expertise. Actuaries are increasingly employed in financial services, including commercial and investment banking, retirement funds, corporations, and government. The program's courses align closely with the exams administered by the Society of Actuaries and the Casualty Actuarial Society, and the program is flexible enough to allow graduates to pursue further studies in Mathematics and related fields.

4 MATH or STAT courses at the 3000 level or higher; no more than one 3000-level course. Subject to advisor's approval.

Applied Mathematics — Applied Discrete Mathematics Option (APDM)

The Applied Discrete Mathematics curriculum prepares students for graduate study in Mathematics or theoretical Computer Science, and for careers in fields supported by discrete mathematics. This includes graph theory, operations research, discrete optimization, computer science, communications, and information sciences. An Accelerated Bachelor's/Master's program leading to a Master's in Data Science is also available for students in this curriculum.

[5] For guidelines regarding Discrete Math electives, Math Electives, Applied Analysis Elective, Algebra/Linear Algebra Elective and Interdisciplinary Electives, see advisor.

[6] This course must be taken the semester of graduation.

Mathematics (MATH)

The Mathematics curriculum provides a comprehensive foundation in mathematics, preparing students for graduate studies or careers that require strong mathematical knowledge and problem-solving skills. It is well-suited for those planning to teach mathematics at the college or university level or seeking flexibility with a liberal arts emphasis.

[6] Applied Math Elective: MATH 5630, MATH 5640, MATH 5670, or MATH 5000.

Mathematics Minor

Fifteen semester hours of courses labeled MATH or STAT at the level of 3000 or higher; at least three courses must be designated MATH. A minimum grade of C in each of these courses is required.

Statistics Minor

Code	Title	Hours
Statistics Minor		
Select 15 hours of courses labeled STAT or MATH at the level of 3000 or higher; at least four courses must be designated STAT.		15
Total Hours		**15**

A minimum grade of C in each of these courses is required.

Department of Physics

Physics majors acquire a firm foundation for careers in physics and related fields and excellent preparation for further study. Through the judicious use of electives, this curriculum provides not only a thorough understanding of physics, but also the ability to solve problems in other fields of interest to the student.

Majors

- Physics (p. 1334)
- Physics - Pre-professional concentrations:
  - Physics — Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1335)
  - Physics — Pre-Physical Therapy, Pre-Physician Assistant (p. 1337)

Minors

- Physics (p. 1335)

Courses

PHYS 1000 FOUNDATIONS OF PHYSICS (4) LEC. 3. LAB. 2. Science Core. Newton's Laws, momentum and energy, solids, liquids, gases, plasma, thermodynamics, electricity, magnetism, light, atomic and nuclear physics. Students who have previous credit in any higher-numbered physics course may not receive credit.

PHYS 1001 FOUNDATIONS OF PHYSICS LABORATORY (1) LAB. 2. Coreq. PHYS 1003. Core-curriculum laboratory course in physics focusing on practical applications and hands-on experience. Topics include: Newton's Laws, momentum and energy, solids, liquids, gases, plasma, thermodynamics, electricity, magnetism, light, atomic and nuclear physics.

PHYS 1100 PHYSICS ORIENTATION (1) LEC/SEM. SU. The course will provide incoming Physics majors with an orientation to the Physics program and will develop critical thinking and professional skills that complement academic and research training. Students will be exposed to aspects of physics research through a broad range of topical discussions with the instructor, other faculty and/or outside speakers.

PHYS 1150 ASTRONOMY (4) LEC. 3. LAB. 3. Science Core. Open to non-science majors. Earth, the solar system, stars, neutron stars, black holes, supernova, galaxies, the expanding universe, and modern cosmological theories.

PHYS 1400 PHYSICS FOR AVIATORS (4) LEC. 3. LAB. 3. Pr. (MATH 1130 or MATH 1150 or MATH 1610 or MATH 1617) and SCMH 1010. Departmental approval. The course provides students with an overview of introductory physics topics such as kinematics, laws of motion, conservation laws, thermodynamics, waves, basic electrical circuits, magnetic fields, and optics essential as a foundation of aviation. The course will specifically utilize examples and problems related to aviation.

PHYS 1500 GENERAL PHYSICS I (4) LEC. 3. LAB. 3. Pr. MATH 1130 or MATH 1133 or MATH 1150 or MATH 1153 or P/C MATH 1610 or P/C MATH 1613 or P/C MATH 1617 or P/C MATH 1620 or P/C MATH 1623 or P/C MATH 1627 or P/C MATH 1710 or P/C MATH 1720 or P/C MATH 2630 or P/C MATH 2637. Science Core. Introduction to Newton's Laws, gravitation and cosmology, concept of conservation laws, solids and fluids, thermodynamics. Math at level of MATH 1130 or higher is expected. Credit will not be given for both PHYS 1500 and PHYS 1600 or PHYS 1607.

PHYS 1510 GENERAL PHYSICS II (4) LEC. 3. LAB. 3. Pr. PHYS 1500 or PHYS 1600 or PHYS 1607. Science Core. Electricity and magnetism, AC circuits, waves, nuclear physics, radioactivity and particle physics. Physics at the level of PHYS 1500 or higher is expected. Credit will not be given for both PHYS 1510 and PHYS 1610 or PHYS 1617.

PHYS 1600 ENGINEERING PHYSICS I (4) LEC. 3. LAB. 3. Pr. MATH 1610 or MATH 1613 or MATH 1617 or P/C MATH 1620 or P/C MATH 1623 or P/C MATH 1627 or P/C MATH 2630 or P/C MATH 2637. Science Core. Introduction to Newton's Laws, gravitation, cosmology, conservation of energy, momentum and angular momentum, special relativity, and fluids using introductory calculus. Math at the level of MATH 1610 or higher is required as a prerequisite. Credit will not be given for both PHYS 1500 and PHYS 1600 or PHYS 1607.

PHYS 1607 HONORS PHYSICS I (4) LEC. 3. LAB. 3. Pr. Honors College. Science Core. Honors version of PHYS 1600. Membership in the Honors College or Departmental approval required. Recommended for Physics majors. Math at the level of MATH 1610 or higher is required as a prerequisite. Credit will not be given for both PHYS 1500 and PHYS 1600 or PHYS 1607.

PHYS 1610 ENGINEERING PHYSICS II (4) LEC. 3. LAB. 3. Pr. (PHYS 1600 or PHYS 1607) and (MATH 1620 or MATH 1623 or MATH 1627). Science Core. Thermodynamics, electricity and magnetism, simple AC circuits, waves, and geometric optics. Physics at the level of PHYS 1600 or higher is expected. Math at the level of MATH 1620 or higher is required as a prerequisite. Credit will not be given for both PHYS 1510 and PHYS 1610 or PHYS 1617.

PHYS 1617 HONORS PHYSICS II (4) LEC. 3. LAB. 3. Pr. Honors College. MATH 1620 and PHYS 1600 or PHYS 1607. Science Core. Honors version of PHYS 1610. Membership in the Honors College or Departmental approval required. Recommended for Physics majors. Math at the level of MATH 1620 or higher is required as a prerequisite. Physics at the level of PHYS 1600 or higher is expected. Credit will not be given for both PHYS 1510 and PHYS 1610 or PHYS 1617.

PHYS 2100 INTERMEDIATE MECHANICS (3) LEC. 3. Pr. (PHYS 1610 or PHYS 1617) and (P/C MATH 2630 or P/C MATH 2637 or P/C MATH 2633). Principles and applications of Newtonian mechanics, noninertial reference frames, harmonic motion, central forces, rigid bodies, introduction to Lagrangian and Hamiltonian mechanics.

PHYS 2200 INTRODUCTORY QUANTUM PHYSICS AND RELATIVITY (3) LEC. 3. Pr. PHYS 1617 or PHYS 1610. Observational foundations of quantum physics, relativity and developments of several branches of physics up to their present frontiers.

PHYS 2300 PHYSICS LABORATORY SKILLS (3) LEC. 1. LAB. 5. Pr. PHYS 1617 or PHYS 1610. The measurement process and its unavoidable uncertainties; standard laboratory instruments; data analysis techniques and tools.

PHYS 2400 MATHEMATICAL AND COMPUTATIONAL METHODS OF PHYSICS (3) LEC. 3. Pr. (MATH 2630 or MATH 2637) and (PHYS 1610 or PHYS 1617). This course introduces students of physics and related fields to mathematical tools and techniques that are needed later in the physics curriculum. Topics include complex numbers, linear algebra, linear and partial differential equations, Fourier series and integrals, and vector calculus with physical application. Students will be introduced to the Python-based computational toolkits to aid in their problem solving.

PHYS 3100 INTERMEDIATE ELECTRICITY AND MAGNETISM (3) LEC. 3. Pr. (PHYS 1617 or PHYS 1610) and (MATH 2630 or MATH 2637 or MATH 2730). Electrostatics, Magnetostatics, Laplace's equation, boundary-value problems, multipole expansions, dielectric and magnetic materials. Faraday's law, AC circuits, and Maxwell's equations.

PHYS 3200 STATISTICAL THERMODYNAMICS (3) LEC. 3. Pr. PHYS 2200. The basic laws of thermodynamics, kinetic theory, and statistical mechanics including entropy, the partition function, free energy, and the quantum statistics of Fermions and Bosons.

PHYS 3500 PHYSICS OF THE WORLD AROUND US (3) LEC. 3. Interdisciplinary topic e.g. Biophysics, Astrophysics, Physics of Weather, Physics of Music, or Environmental Physics. Course may be repeated for a maximum of 12 credit hours.

PHYS 3610 APPLICATIONS OF MODERN PHYSICS (3) LEC. 3. Pr. PHYS 2200. Survey of contemporary subdisciplines in physics and technology that are based on the principles of quantum mechanics such as atomic/molecular physics, statistical mechanics, condensed matter/material science, astrophysics, nuclear physics, and elementary particle physics.

PHYS 3620 OBSERVATIONAL ASTRONOMY (3) LEC. 3. Pr. PHYS 1600 and (MATH 1620 or MATH 1627). This course will introduce students to astronomy from an observational perspective. Students will first learn about astronomical images and data analysis and discuss the physics of the solar system, stars, galaxies, and the universe. As part of the course, students will collect and analyze astronomical data using departmental telescopes and access publicly available data from facilities to demonstrate astrophysical principles.

PHYS 4100 FUNDAMENTALS OF QUANTUM MECHANICS (3) LEC. 3. Pr. PHYS 2200 and MATH 2650. Schrodinger equation, stationary and time-dependent solutions, spin and the exclusion principle, perturbation theory, scattering and resonances, the interpretation of quantum mechanics.

PHYS 4200 FUNDAMENTAL EXPERIMENTS IN PHYSICS (3) LEC. 1. LAB. 5. Pr. PHYS 2300. Experiments that demonstrate the fundamental ideas and facts of physics. Data will be collected, analyzed, interpreted and reported in comprehensive lab reports.

PHYS 4930 DIRECTED STUDIES IN PHYSICS (1-5) IND. Departmental approval. Student will study a topic of interest under the direction of a faculty member. Course may be repeated for a maximum of 10 credit hours.

PHYS 4967 HONORS SPECIAL PROBLEMS (1-3) IND. Pr. Honors College. Departmental approval.. Course may be repeated for a maximum of 6 credit hours.

PHYS 4980 UNDERGRADUATE RESEARCH IN PHYSICS (1-5) IND. Departmental approval. Student will work under the direction of a faculty member on a problem of mutual interest. Course may be repeated for a maximum of 10 credit hours.

PHYS 4997 HONORS THESIS (1-6) IND. Pr. Honors College. Departmental approval.. Course may be repeated for a maximum of 6 credit hours.

PHYS 5100 APPLICATIONS OF QUANTUM MECHANICS (3) LEC. 3. Pr. PHYS 4100. Quantum mechanics applied to atomic physics, solid state physics, nuclear physics, particle physics, electrodynamics, and cosmology.

PHYS 5200 TEACHING AND LEARNING OF STEM (3) LEC. 3. This course will provide students with a basic knowledge of the relevant research in cognitive psychology and learning science and the ability to apply that knowledge to enhance their ability to learn and teach science, particularly at the undergraduate level. This course will involve readings, discussion, and application of the ideas through the creation of learning activities. It is suitable for advanced undergraduates and graduate students with some science background.

PHYS 5300 OPTICS (3) LEC. 2. LAB. 2. Pr. PHYS 1617 or PHYS 1610. An overview of optics to include geometrical optics, electromagnetic waves, interference of light, diffraction of light, optical detectors, instrumentation and displays.

PHYS 5500 FUNDAMENTALS OF PHYSICS (3) LEC. 3. A subject such as Wave Mechanics, Mathematical Physics, Nonlinear Dynamics, Optics, Nuclear Physics, Elementary Particles, Relativity, or Electrodynamics. Course may be repeated for a maximum of 9 credit hours.

PHYS 5600 FRONTIERS OF PHYSICS (3) LEC. 3. A subject from the research areas in the Department such as Solid State, Atomic, Plasma, Space, or Computational Physics will be selected by the lecturer. Course may be repeated for a maximum of 9 credit hours.

PHYS 5610 INTRODUCTION TO SOLID STATE PHYSICS (3) LEC. 3. Lattice vibrations, band description of electronic states in metals, semiconductors and insulators, and magnetic, superconducting and defect properties of solids.

PHYS 5620 SURVEY OF PLASMA PHYSICS (3) LEC. 3. Pr. PHYS 3100. Single particle motions: fluid description of a plasma; plasma waves and oscillations; kinetic description, diffusion, and resistivity; non-linear effects.

PHYS 5900 PHYSICS TEACHING SEMINAR (1) LEC. 1. LAB. 0. SU. Introduction to issues, resources and best practices related to the teaching of physics. Physics undergraduate student or instructor approval required.

PHYS 6100 APPLICATIONS OF QUANTUM MECHANICS (3) LEC. 3. Quantum mechanics applied to atomic physics, solid state physics, nuclear physics, particle physics, electrodynamics, and cosmology.

PHYS 6200 TEACHING AND LEARNING OF STEM (3) LEC. 3. This course will provide students with a basic knowledge of the relevant research in cognitive psychology and science education and the ability to apply that knowledge to enhance their ability to learn and teach science, particularly at the undergraduate level. The course will involve readings, discussion, and application of the ideas through the creation of learning activities. It is suitable for advanced undergraduates and graduate students with some science background. Prerequisite: B.S. in a STEM discipline or 20+ credit hours of STEM coursework.

PHYS 6300 OPTICS (3) LEC. 2. LAB. 2. An overview of optics to include geometrical optics, electromagnetic waves, interference of light, diffraction of light, optical detectors, instrumentation and displays.

PHYS 6500 FUNDAMENTALS OF PHYSICS (3) LEC. 3. A subject such as Wave Mechanics, Mathematical Physics, Nonlinear Dynamics, Optics, Nuclear Physics, Elementary Particles, Relativity, or Electrodynamics. Course may be repeated for a maximum of 9 credit hours.

PHYS 6600 FRONTIERS OF PHYSICS (3) LEC. 3. A subject from the research areas in the Department such as Solid State, Atomic, Plasma, Space, or Computational Physics will be selected by the lecturer. Course may be repeated for a maximum of 9 credit hours.

PHYS 6610 INTRODUCTION TO SOLID STATE PHYSICS (3) LEC. 3. Lattice vibrations, band description of electronic states in metals, semiconductors and insulators, and magnetic, superconducting and defect properties of solids.

PHYS 6620 SURVEY OF PLASMA PHYSICS (3) LEC. 3. Single particle motions: fluid description of a plasma; plasma waves and oscillations; kinetic description, diffusion, and resistivity; non-linear effects.

PHYS 6900 PHYSICS TEACHING SEMINAR (1) LEC. 1. LAB. 0. SU. Graduate Students in Physics or Departmental Approval. Introduction to issues, resources and best practices related to the teaching of physics.

PHYS 7100 CLASSICAL MECHANICS (3) LEC. 3. Lagrangian and Hamiltonian formulations of mechanics, canonical transforms. Hamilton-Jacobi theories, action angle variables, rigid rotators, normal modes, and mechanics of continuous media.

PHYS 7200 ELECTRICITY AND MAGNETISM I (3) LEC. 3. Electrostatics, special function expansions, magnetostatics, linear media and Maxwell's equations.

PHYS 7250 ELECTRICITY AND MAGNETISM II (3) LEC. 3. Time dependent Maxwell theory, wave propagation and dispersion, diffraction, scattering, radiation, relativistic covariance and applications.

PHYS 7300 QUANTUM MECHANICS I (3) LEC. 3. Schrodinger wave equation, discrete and continuous spectra, matrix formulation, perturbation theory.

PHYS 7350 QUANTUM MECHANICS II (3) LEC. 3. Time-dependent approximation methods, relativistic wave equations, and second quantization.

PHYS 7400 STATISTICAL PHYSICS (3) LEC. 3. Thermodynamic quantities, equilibrium ensembles for classical and quantum systems, fluctuations, phase transitions and critical phenomena.

PHYS 7850 GRADUATE PHYSICS RESEARCH SEMINAR (1) LEC. 1. LAB. 0. SU. This course is designed to develop and expand incoming graduate student's knowledge and experience with state-of-the-art research as it is done in the Auburn University Department of Physics.

PHYS 7900 DIRECTED STUDIES (1-5) IND. SU. Student will work with a faculty member to study a topic of interest. Course may be repeated for a maximum of 6 credit hours.

PHYS 7930 DIRECTED STUDIES (1-5) IND. Student will work with a faculty member to study a topic of interest. Course may be repeated for a maximum of 6 credit hours.

PHYS 7950 PHYSICS COLLOQUIUM (1) SEM. SU. Offers a series of talks presented by invited speakers on broad fields of physics. Check with graduate advisor for credit allowed. Course may be repeated for a maximum of 6 credit hours.

PHYS 7970 SPECIAL TOPICS IN PHYSICS (1-5) SEM. Seminar or lecture series in a rapidly advancing specialty of physics. Course may be repeated for a maximum of 6 credit hours.

PHYS 7990 RESEARCH AND THESIS (1-10) MST. May be repeated as often as is appropriate. Course may be repeated with change in topics.

PHYS 8100 RELATIVISTIC QUANTUM MECHANICS (3) LEC. 3. Dirac equation, 1D barrier scattering, 3D central potentials, S-matrix theory, Feynman diagrams, quantum electrodynamics, renormalization, tree and loop level problems.

PHYS 8200 INTRODUCTION TO ATOMIC PHYSICS (3) LEC. 3. Hydrogen atom, Hartree-Fock theory, radiative transitions, photoionization, autoionization, electron-atom scattering.

PHYS 8600 PLASMA PHYSICS (3) LEC. 3. A detailed study of plasma physics including particle orbit theory, magnetohydrodynamics, plasma waves and transport phenomena.

PHYS 8700 SOLID STATE PHYSICS (3) LEC. 3. Atomic and electronic structures of solids and the associated electical, optical and transport properties.

PHYS 8900 DIRECTED STUDIES (1-5) IND. SU. Students will work with a faculty member to study a topic of interest. Course may be repeated for a maximum of 10 credit hours.

PHYS 8930 DIRECTED STUDIES IN ADVANCED PHYSICS (1-5) IND. Student will work with a faculty member to study a topic of interest. Course may be repeated for a maximum of 10 credit hours.

PHYS 8970 SPECIAL TOPICS IN ADVANCED PHYSICS (1-5) LEC. Departmental approval. Topic at the forefront of physics research will be chosen by the lecturer. Course may be repeated for a maximum of 10 credit hours.

PHYS 8990 RESEARCH AND DISSERTATION (1-10) DSR. May be repeated as often as is appropriate. Course may be repeated with change in topics.

Physics (PHYS)

The Physics degree prepares students to explore and describe the natural world through mathematical reasoning, analytical thinking, and experimental techniques. Physics majors investigate the fundamental laws that govern matter, energy, space, and time—from subatomic particles to the structure of the universe. Coursework in mechanics, electromagnetism, thermodynamics, quantum physics, and computational modeling develops strong problem-solving skills and scientific literacy. The program emphasizes hands-on lab experience that builds confidence in experimental methods and data analysis, along with a flexible structure that lets students tailor their degree to match their career goals. With a solid foundation in critical thinking and quantitative reasoning, physics graduates are prepared for success in research, engineering, medicine, data science, education, and more. The major is constructed to combine well as a double major with another STEM degree including Engineering.

Total Hours: 120

1 Students must complete a two-course sequence in either HIST or LIT (for example, World History 1 and 2 or American Lit 1 and 2). For complete HIST and LIT sequence options, see the Bulletin.

2 If a LIT sequence is chosen, this course must be a CORE SOCIAL SCIENCE. If a HIST sequence is chosen, this course must be a CORE HUMANITIES.

3 Substitution of MATH 2650 and one of MATH 2660 or MATH 2667 is acceptable

4 Science Electives consist of a sequence of GEOL 1100- GEOL 1110 or CHEM 1030/CHEM 1031 – CHEM 1040/CHEM 1041 or BIOL 1020/BIOL 1021- BIOL 1030/BIOL 1031

5 PHYS and Professional Electives must be at the 3000 level or higher. A Plan of Study indicating choices and physics advisor approval for Physics and Professional electives must be on file in the Dean's Office before scheduling those courses.

6 This course must be taken the semester of graduation.

Physics Minor

Code	Title	Hours
PHYS 2200	Introductory Quantum Physics and Relativity	3
PHYS 2100	Intermediate Mechanics	3
PHYS 3100	Intermediate Electricity and Magnetism	3
PHYS 3200	Statistical Thermodynamics	3
PHYS 4100	Fundamentals of Quantum Mechanics	3
Total Hours		**15**

Physics — Pre-Med (MPHY), Pre-Den (DPHY), Pre-Opt (OPHY)

The Physics – Pre-Health tracks provide students with a strong foundation in the core principles of physics, including mechanics, electromagnetism, and biophysics, while preparing them for the scientific and technological challenges of modern healthcare. Through a combination of coursework, laboratory training, and research experiences, students develop critical thinking, problem-solving, and experimental skills that are highly valued by medical schools and healthcare professions. The curriculum combines a solid background in physics with supporting studies in biology, chemistry, and health sciences. Graduates are prepared for medical school, biomedical

research, healthcare technology development, and other advanced fields, with a skill set that emphasizes scientific inquiry, quantitative reasoning, and practical experience.

Freshman

Total Hours: 122

Long range schedules for COSAM courses are online at http://aub.ie/cosamlrs
Courses in BOLD will be used to calculate GPS in major.
Options for courses labeled CORE are in the Auburn University Bulletin (www.auburn.edu/bulletin) under Core Curriculum.
Students should declare a major in the semester they earn 60 hours.
Students must complete all requirements for that major prior to graduation.
Students planning a Physics major should consult with a pre-health advisor.

1 The Chemistry CHEM 1110/CHEM 1111-CHEM 1120/CHEM 1121 sequence can substitute for CHEM 1030/CHEM 1031-CHEM 1040/CHEM 1041. See advisor for details.
2 Students who have AP or transfer credit for US History should see an advisor for CORE SOC SCI choices.
3 Total electives required may change with choice of major.

Physics — Pre-Physical Therapy (TPHY), Pre-Physician Assistant (APHY)

The Physics – Pre-Health tracks provide students with a strong foundation in the core principles of physics, including mechanics, electromagnetism, and biophysics, while preparing them for the scientific and technological challenges of modern healthcare. Through a combination of coursework, laboratory training, and research experiences, students develop critical thinking, problem-solving, and experimental skills that are highly valued by medical schools and healthcare professions. The curriculum combines a solid background in physics with supporting studies in biology, chemistry, and health sciences. Graduates are prepared for medical school, biomedical research, healthcare technology development, and other advanced fields, with a skill set that emphasizes scientific inquiry, quantitative reasoning, and practical experience.

Total Hours: 121

Long range schedules for COSAM courses are online at http://aub.ie/cosamlrs (http://aub.ie/cosamlrs/)

Courses in BOLD will be used to calculate GPA in major.

Options for courses labeled CORE are in the Auburn University Bulletin (www.auburn.edu/bulletin (http://www.auburn.edu/bulletin/)) under Core Curriculum.

Students must complete all requirements for the major prior to graduation.

Students planning a Physics major should consult with the pre-health advisor.

1 The Chemistry 1110/1111-1120/1121 sequence can substitute for CHEM 1030/1031-1040/1041. See advisor for details.
2 Students who have AP or transfer credit for US History should see an advisor for CORE SOC SCI choices.
3 Students planning a major in Biomedical Sciences should take CHEM 2080/81 as their professional elective in their sophomore or junior year.

Pre-Health Professional Curricula

Pre-health professional curricula are offered in interdisciplinary health sciences, pre-anesthesiologist assistant, pre-dentistry, pre-medicine, pre-optometry, pre-pharmacy, pre-physical therapy, pre-physician assistant, and pre-veterinary medicine. Advisors are available to guide students concerning admissions requirements to the professional schools. The department in which students major will advise them where applicable. Completion of these curricula does not assure admission to a professional school. Competition for admission to professional schools is keen; the number of qualified applicants exceeds the number of places available.

Pre-Anesthesiologist Assistant

The Auburn University/Edward Via College of Osteopathic Medicine-Bluefield Rocovich Early Admission Program (REAP) is a unique opportunity for Auburn University students interested in a career as an Anesthesiologist Assistant (CAA). The Rocovich EAP provides early admission to VCOM-Bluefield's Master of Health Science in Anesthesia (MHSA) Program for highly competitive Auburn students each year who have met the program requirements. Candidates selected for admission into the program are notified in the spring of their junior undergraduate year.

All interested pre-medical/pre-health sciences students should confer with the College of Sciences and Mathematics (COSAM) pre-health advisors for specific course requirements and other details about the program. COSAM offers a major in Biomedical Sciences

that is an excellent choice for students interested in this program. These students can obtain a Bachelor of Science in Biomedical Sciences after successfully completing the first year of the MHSA program.

Pre-Dentistry, Pre-Medicine, Pre-Optometry

These programs are designed to prepare students for dental, medical and optometry schools and lead to a Bachelor of Science degree in one of several majors offered through the college. The requirements are very exacting and demand high scholastic competence and performance.

Auburn University students complete these requirements by enrolling in a core of courses shown in the curriculum model. Each student also declares a major. Students should confer with the College of Sciences and Mathematics (COSAM) pre-health advisors for specific course requirements since these can vary from school to school. The prerequisite courses for most U.S. dental, medical and optometry schools are listed in the curriculum model, either as required courses or as electives. Students may choose to major in a curriculum in another college or school, but they should meet with the COSAM Pre-Health Counseling Specialist as freshmen and/or sophomores for assistance in becoming competitive applicants.

In the junior year, students should attend the mandatory meetings concerning the application process that are conducted by the COSAM Chairman of the Pre-Professional Advisory Committee (PPAC) in October. Also, students in pre-dentistry, pre-medicine or pre-optometry should take the Dental Admission Test (DAT), the Medical College Admission Test (MCAT) or the Optometry Admission Test (OAT) at least a year before the date of entry to professional school and submit applications to the professional schools of their choice at that time.

Pre-Pharmacy

This program meets the requirements for admission to the Auburn University Harrison College of Pharmacy, which is fully accredited by the American Council on Pharmaceutical Education. Complete information about the professional curriculum in pharmacy may be found in the Harrison College of Pharmacy section of this *Bulletin*. To be considered for admission, the applicant must complete the course requirements listed in the curriculum model and meet other admissions criteria set by the Harrison College of Pharmacy.

Although not required, students may want to complete an undergraduate degree before entering pharmacy school. Any major may be acceptable as long as the pre-pharmacy requirements are completed. The College of Sciences and Mathematics offers a major in Biomedical Sciences that is an excellent choice for students interested in this option. Students should confer with the COSAM pre-health advisors for specific course requirements.

Early admission into Harrison College of Pharmacy is possible through the Early Assurance Program. Please visit Harrison College of Pharmacy's website for more information about that program. If a student is admitted to Harrison College of Pharmacy prior to the completion of the full four years, he or she may obtain a Bachelor of Science in Biomedical Sciences by successfully completing the first three years of the Biomedical Sciences/Pre-Pharmacy curriculum and the first three semesters of pharmacy school. Students should consult their advisors about this option.

Pre-Physical Therapy

This program prepares students applying to schools of physical therapy and leads to a bachelor's degree in one of the majors offered in the College of Sciences and Mathematics. Students should confer with their academic advisors for specific course requirements since these can vary from school to school. Students may also choose to major in a curriculum in another college or school, but they should meet with the COSAM Pre-Health Counseling Specialist as freshmen and/or sophomores for information about becoming competitive applicants. Students should review the websites of the schools of their choice during the freshman year to determine any special admission requirements of those schools. Students should take the Graduate Record Examinations (GRE) and complete an official application for admission to the schools of their choice about a year in advance of the expected date of enrollment.

Pre-Physician Assistant

This program is designed to prepare students for enrollment in physician assistant programs and leads to a Bachelor of Science in one of several majors offered through the college. The academic requirements are very demanding and high scholastic competence and performance are expected. Auburn University students complete these requirements by enrolling in a core of courses shown in the curriculum model. Each student also declares a major. Students should confer with the COSAM pre-health advisors for specific course requirements since these can vary from school to school. Students may choose to major in a curriculum in another college or school, but they should meet with the COSAM Pre-Health Counseling Specialist as freshmen and/or sophomores for assistance in becoming competitive applicants and applying.

Students in the pre-physician assistant program should take the GRE or PA-CAT at least a year before the date of entry to professional school and submit an application to the schools of their choice at that time.

Pre-Veterinary Medicine

Students in the Pre-Veterinary Medicine (PVET) curriculum must select a major by the end of their sophomore year. Students in COSAM typically select microbiology (VMCB), organismal biology (VIBO) or genetics (VGEN) as majors. Pre-Veterinary options in the College of Agriculture include animal sciences (ANPV) and poultry science (POPV), A pre-vet option in wildlife (WLPV) sciences also exists in the College of Forestry, Wildlife and Environment. The minimum requirements for admission to the College of Veterinary Medicine at Auburn University are incorporated into the curriculum models for all these majors.

It is possible to gain admission to the College of Veterinary Medicine by completing only the minimum requirements listed. However, it is preferable to select a major and earn a baccalaureate degree. If a student is admitted to the College of Veterinary Medicine prior to completion of the full four years, he or she may obtain a BS degree by successfully completing the first three years of some of the Pre-Veterinary Medicine curricula and the first year of veterinary medical school. Students should consult their advisors regarding which curricula offer this option. All minimum requirements, including courses repeated due to time limitations, must be completed by the end of the spring term preceding the date of admission. Competition for admission to the professional schools is keen with the number of qualified applicants exceeding the number of places available. For additional information, see College of Veterinary Medicine section of this *Bulletin* and the Pre-Veterinary Medicine curricula in the College of Agriculture, COSAM, and the College of Forestry, Wildlife and Environment.

Programs

- Pre-Anesthesiologist Assistant
  - Biomedical Sciences (p. 1346)
- Health Sciences
  - Biomedical Sciences (p. 1343)
- Pre-Medicine, Pre-Dental, Pre-Optometry. Majors in:
  - Biomedical Sciences (p. 1345)
  - BA Chemistry (p. 1283)
  - Genetics (p. 1348)
  - Microbiology (p. 1264)
  - Physics (p. 1335)
  - Organismal Biology (p. 1267) (p. 1267)

  - Physics (p. 1337)
  - Organismal Biology (p. 1268)
- Pre-Veterinary Medicine Majors in:
  - Genetics (p. 1350)
  - Microbiology (p. 1352)
  - Organismal Biology (p. 1353)

Courses

SCMH 1010 CONCEPTS OF SCIENCE (4) LEC. 3. LAB. 2. Interdisciplinary course which presents major scientific concepts in physical and biological sciences. After taking SCMH 1010, students can complete core science requirement series by taking BIOL 1010, CHEM 1010, GEOL 1100, PHYS 1000, or PHYS 1150. Science Core. May count either SCMH 1010 or SCHM 1013 or SCHM 1017.

SCMH 1017 HONORS CONCEPTS OF SCIENCE (4) LEC. 3. LAB. 2. Pr. Honors College. Interdisciplinary course for Honors students which presents major scientific concepts in physical and biological sciences. After taking SCMH 1017, students can complete core science requirement series by taking BIOL 1010, CHEM 1010, GEOL 1100, GEOL 1107, PHYS 1000, or PHYS 1150. Science core. Credit will not be given for both SCMH 1017 and SCMH 1010.

SCMH 1100 COSAM ORIENTATION (1) LEC. 1. Introduction to the College of Sciences and Mathematics and its resources, exploration of STEM careers, orientation to campus resources and facilities, and assistance with academics and transition to Auburn.

SCMH 1890 PRE-HEALTH PROFESSIONS ORIENTATION (1) LEC. 1. SU. Orientation and guidance tailored for non-freshmen and transfer students planning to seek admission into health professions schools and programs such as dentistry, medicine, optometry, pharmacy, physician assistant, and physical therapy.

SCMH 1897 HONORS PRE-HEALTH PROFESSIONS ORIENTATION (1) LEC. 1. SU. Pr. Honors College. Orientation and guidance tailored for non-freshmen and transfer students planning to seek admission into health professions schools and programs such as dentistry, medicine, optometry, pharmacy, physician assistant, and physical therapy.

SCMH 1950 COSAM MAJOR AND CAREER EXPLORATION (1) LEC. 1. Introduction to majors offered by the College of Sciences and Mathematics, motivation and skills for academic success, departmental resources and facilities, and exploration of careers in Sciences and Mathematics.

SCMH 3010 INQUIRY EXPERIENCES FOR SCIENCE TEACHERS (3) LEC. 2. LAB. 2, LLB. 0. This course introduces students to the nature and process of science through project-based instruction. It highlights experimental design, data analysis, and presenting scientific work both orally and in writing. This is a writing enriched course in the required AUTeach course sequence.

SCMH 3050 SERVICE-LEARNING EXPERIENCES IN UNDERSERVED POPULATIONS (3) LEC/PRA. 2. Service learning with a focus on underserved populations. Students engage in experiential learning to meet community needs, enhancing their cultural competence and civic responsibility. Ideal for those in helping professions, STEM, and Pre-Health, it strengthens community partnerships and understanding of complex social issues. Departmental approval required.

SCMH 3810 PRE-PHYSICAL THERAPY PRACTICUM (1) PRA. 2. SU. Departmental approval. Direct observation of physical therapists at an approved facility in the Auburn-Opelika area.

SCMH 3890 PRE-MEDICAL PRECEPTORSHIP (1) LAB. 2. SU. Departmental approval. Direct observation and interaction with physicians at East Medical Center and in individual medical offices.

SCMH 3950 SEMINAR ON MCAT AND DAT SCIENTIFIC FOUNDATIONS (2) LEC. 2. SU. Pr. SCMH 1890 and BIOL 1030 and CHEM 2070. A deep dive into the foundational scientific concepts required for the Medical College Admission Test (MCAT) and the Dental Admission Test (DAT). The course emphasizes interactive discussions and practice of the core science subjects pertinent to the tests, supplemented by problem-solving sessions and mock exams to ensure comprehensive preparation. Department approval.

SCMH 4700 PEDAGOGY OF PEER-LED INSTRUCTION (1) LEC. 1. Pedagogical training course on effective instructional strategies in the STEM disciplines integrating educational theory, pedagogy, content, and practice. Departmental approval required.

SCMH 4920 SCIENCES AND MATHEMATICS INTERNSHIP (1-4) DSL. 8-16. SU. Practical on-the-job training in some area related to Sciences and Mathematics. Course may be repeated for a maximum of 6 credit hours.

SCMH 4970 UNDERGRADUATE SPECIAL TOPICS IN SCIENCES AND MATHEMATICS (1-4) LEC. 1-4. Undergraduate study of specialized topics related to Sciences and Mathematics. Departmental approval required. Course may be repeated for a maximum of 8 credit hours.

SCMH 4980 SCIENCES AND MATHEMATICS UNDERGRADUATE RESEARCH (1-5) IND/RES. Departmental approval. Directed research in an area of specialty within Sciences and Mathematics and interdisciplinary fields. Course may be repeated for a maximum of 6 credit hours.

SCMH 5010 CLINICAL APPLICATIONS I (3) LEC. 2. A study of the clinical/personal issues facing primary care physicians in the rural community. Must be enrolled in the Rural Medicine Program.

SCMH 5020 CLINICAL APPLICATIONS II (3) LEC. 2, CLN/LEC. 1. Pr. SCMH 5010. A continuation of SCMH 5010.

SCMH 5050 PHYSICAL EXAMINATION TECHNIQUES FOR CLINICAL APPLICATIONS (1) LEC. 1. Undergraduate-level course focused on mastering physical examination techniques for medical clinic applications; enhances students' understanding of anatomy and physiology through hands-on patient interactions; develops critical professionalism and communication skills necessary for effective patient care. Departmental approval required.

SCMH 5940 GLOBAL STUDY/TRAVEL IN SCIENCES AND MATHEMATICS (1-12) AAB. Departmental approval. Application required. Students international study travel on topics relevant to Sciences and Mathematics. Course may be repeated for a maximum of 12 credit hours.

SCMH 5970 ADVANCED SPECIAL TOPICS IN SCIENCES AND MATHEMATICS (1-3) LEC. 1-3. Advanced study of specialized topics related to Sciences and Mathematics. Departmental approval required. Course may be repeated for a maximum of 6 credit hours.

SCMH 6010 CLINICAL APPLICATIONS I (3) LEC. 2, CLN/LEC. 2. Departmental approval. A study of the clinical/personal issues facing primary care physicians in the rural community. Must be enrolled in the Rural Medicine Program.

SCMH 6020 CLINICAL APPLICATIONS II (3) LEC. 2, CLN/LEC. 2. Pr. SCMH 6010. Departmental approval. A study of the clinical/societal issues facing primary care physicians in the rural community. Must be enrolled in the Rural Medicine Program.

SCMH 6050 PHYSICAL EXAMINATION TECHNIQUES FOR CLINICAL APPLICATIONS (1) LEC. 1. Graduate-level course focused on mastering physical examination techniques for medical clinic applications; enhances students' understanding of anatomy and physiology through hands-on patient interactions; develops critical professionalism and communication skills necessary for effective patient care. Departmental approval required.

SCMH 6970 ADVANCED SPECIAL TOPICS IN SCIENCES AND MATHEMATICS (1-3) LEC. 1-3. Departmental approval. Advanced study of specialized topics related to Sciences and Mathematics. Course may be repeated for a maximum of 6 credit hours.

SCMH 8150 DOCTORAL SEMINAR ON CURRENT TOPICS IN SCM RESEARCH (3) LEC. 3. The class is a rigorous, seminar style course on Current Topics in SCM Research. Each class will familiarize you with the key insights in a current research topic (i.e., the “hot topics”) in the SCM area. The instructor has chosen to cover a broad range of active research to give you an overview of topics that people are working on currently and are likely to work on in the future.

1 The General Chemistry CHEM 1110/CHEM 1111 - CHEM 1120/CHEM 1121 sequence or the General Chemistry Honors Sequence can substitute for CHEM 1030/CHEM 1031 - CHEM 1040/CHEM 1041. See advisor.
2 Choice as determined by the specific mathematics requirements of the intended professional school.
3 **Professional Electives**: Foreign Language, BIOL 2500 and BIOL 2501, SCMH 3950, SCMH 4700, or any 3000+ BIOL, CHEM, PHYS courses.
4 **Experiential Learning Electives**: Approved Undergraduate Research (such as SCMH 4980 or other departmental research course), Internship course such as SCMH 4920, or Study Abroad course such as SCMH 5940.
5 **BMSC Electives**: see academic advisor for most updated list.
6 Students may only register for UNIV 4AA0 during the semester they plan to graduate.

Biomedical Sciences (BMSC) - IBMS, ABSM, TBMS

Interdisciplinary Health Sciences (IBMS), Pre-Physical Therapy (ABSM), Pre-Physician Assistant (TBMS)

The Health Sciences major (IBMS) provides students with a comprehensive understanding of the biological, behavioral, and social aspects of health, wellness and disease. This interdisciplinary program prepares students for a wide range of careers in healthcare, public health, health education, and research, as well as graduate or professional study in medicine, physician assistant, pharmacy, physical therapy, or other health-related fields. This concentration also builds in a minor to broaden and enrich students' knowledge and skillset.

Total Hours: 120

Long range schedules for COSAM courses are online at https://auburn.edu/cosam/departments/student-services/academic-advising/long-range-planning.html
Courses in BOLD will be used to calculate GPA in major.
Options for courses labeled CORE are in the Auburn University Bulletin (https://bulletin.auburn.edu/) under Core Curriculum.

1 Foundational Electives: PHYS 1500/PHYS 1510 and labs for PT; CHEM 2070/CHEM 2080 and labs for Pre-Pharm; BIOL 3000/BIOL 3001/BIOL 3200/BIOL 3201 for PA.
2 Students must complete a two-course sequence in either HIST or LIT (for example, World History 1 & 2 or American Lit 1 & 2). For complete HIST and LIT sequence options, see the Bulletin.
3 If a LIT sequence is chosen, this course must be a core social science. If a HIST sequence is chosen, this course must be a core humanities.
4 Students must complete a formal minor. Please see advisor for recommended minor. Other minors by college approval.
5 Please see advisor for full list of BMSC Group A and B options.

Biomedical Sciences (BMSC) — Pre-Med (MBMS), Pre-Den (DBMS), Pre-Opt (OBMS)

The Biomedical Sciences (BMSC) major is designed for students aspiring to enter medical school or other professional health programs. This rigorous program provides a strong foundation in the biological and physical sciences, with a curriculum emphasizing human biology, physiology, biochemistry, and molecular genetics. Electives offer an in-depth exploration of many clinically related subjects. Students develop critical thinking and analytical skills through coursework, laboratory experiences, and research opportunities. Courses for professional development and exam preparation are also offered. Graduates are well-equipped for further study in medicine, dentistry, optometry, or biomedical research.

Biomedical Sciences — Pre-Anesthesiologist Assistant (NBMS)

The Pre-Anesthesiologist Assistant major (NBMS) is specifically designed for students preparing for graduate-level education in anesthesiologist assistant programs. This interdisciplinary major provides a strong foundation in the biological sciences, chemistry, physics, and health-related coursework essential for success in the field of anesthesiology. Students will gain a deep understanding of human anatomy, physiology, and biochemistry, while developing critical thinking and clinical reasoning skills. Graduates of this major are well-equipped to apply to Master of Science in Anesthesia (MSA) programs and pursue careers as certified anesthesiologist assistants.

Biomedical Sciences — Pre-Pharmacy (RBMS)

The Pre-Pharmacy major (RBMS) is designed to prepare students for admission into Doctor of Pharmacy (PharmD) programs. This major provides a strong foundation in the sciences—particularly biology, chemistry, and physiology—along with coursework in mathematics, health sciences, and social sciences. Students gain critical thinking and problem-solving skills essential for success in pharmacy school and the healthcare field. Graduates of the Pre-Pharmacy major are well-equipped to pursue advanced studies in pharmacy and enter careers in community pharmacies, hospitals, research institutions, and pharmaceutical industries.

Student should declare a major when they have completed 60 hours.

1 Students may choose to take BCHE 5180 to complete the Biochemistry requirement for HCOP.

2 Students must complete a two-course sequence in either HIST or LIT. For complete HIST and LIT sequence options, see the Bulletin.

3 If a LIT sequence is chosen, this course must be a CORE SOCIAL SCIENCE. If a HIST sequence is chosen, this course must be a CORE HUMANITIES.

Genetics — Pre-Med (MGEN), Pre-Den (DGEN), Pre-Opt (OGEN)

The Genetics major provides a broad perspective on the biological and physical sciences that are fundamental to the study of heredity and evolution. Courses cover the molecular mechanisms that underpin genetic changes as well as cutting-edge analysis of genome-scale data. This flexible major is designed to serve students interested in a broad range of careers related to genetics, including basic research as well as applications in biotechnology, agriculture, and the environment. The introductory coursework provides students with a strong foundation in biology, while upper-level courses can be tailored to include invaluable computational skills. The Genetics major provides students with a strong foundation for careers in healthcare including medicine, pharmacy and genetic counseling. This version of the major is tailored to students interested in pursuing careers in healthcare including medicine, dentistry and optometry.

The genetics major provides a broad foundation in the biological, physical, and mathematical sciences fundamental to the study of heredity and evolution. The major is flexible in order to serve students interested in genetics, either as a basic discipline or in its application in biotechnology, agriculture, environment/conservation, and medicine.

Microbiology/Pre-Veterinary Medicine Option (VMCB)

The Microbiology major provides students with a strong foundation in coursework that emphasizes understanding life at the cellular and molecular level focusing on bacterial life. Students in this major will be well-prepared careers in basic or applied microbiology (including food and environmental microbiology) or research in biomedical science. This major has been tailored to meet the requirements for students interested in pursuing careers in veterinary medicine.

ANSC 3400 Animal Nutrition is now required to enter vet school at Auburn. See advisor for details.

1 Students must complete a two-course sequence in either HIST or LIT (for example, World History 1 and 2 or American Lit 1 and 2). For complete HIST and LIT sequence options, see the *Bulletin*.

2 Students who choose a HIST sequence other than HIST 1010 and HIST 1020 should talk to an advisor about CORE SOC SCI choices.

3 If a LIT sequence is chosen, this course must be a CORE SOC SCI. If a HIST sequence is chosen, this course must be a CORE HUMANITIES.

Organismal Biology — Pre-Veterinary Medicine Option (VIBO)

The Integrative Biology option within the Organismal Biology major provides students with a broad perspective on biological sciences. Introductory courses cover concepts in biology and chemistry and lay a strong foundation for more specialized, upper-level coursework that spans the field of biology, including ecology, evolution, physiology, cell biology and microbiology. This flexible major can be fulfilled through a long list of elective courses and is designed to serve students interested in a broad range of careers related to biology,

including basic research as well as applications in biotechnology, agriculture, and the environment. This major has been tailored to meet the requirements for students interested in pursuing careers in veterinary medicine.

College of Veterinary Medicine

CALVIN M. JOHNSON, *Dean*
MELINDA S. CAMUS, *Associate Dean for Academic Affairs*
FRANK F. BARTOL, *Associate Dean for Research and Graduate Studies*
A. NICKIE BAIRD, *Associate Dean for Clinical Affairs*

THE COLLEGE OF VETERINARY MEDICINE offers a Bachelor of Science (BS) in Public and One Health (PAOH), a professional Doctor of Veterinary Medicine (DVM) degree, and graduate degrees (MS and PhD) in Biomedical Sciences (VMBS).

The undergraduate major is co-directed by Dr. Andrea Perkins and Dr. Kelley Steury and administered through the Office of Research and Graduate Studies, under the leadership of Dr. Frank Bartol. Additional information can be found under the Program tab or at https://www.vetmed.auburn.edu/academics/public-and-one-health/.

The professional Doctor of Veterinary Medicine (DVM) degree is administered through the Office of Academic Affairs, under the leadership of Dr. Melinda Camus. Additional information can be found under the Program tab or at https://www.vetmed.auburn.edu/academics/dvm-professional-degree-program/.

The Master of Science (MS) and Doctor of Philosophy (PhD) degrees in Biomedical Sciences are administered through the Office of Research and Graduate Studies, under the leadership of Dr. Frank Bartol. Additional information can be found under the Program tab or at https://www.vetmed.auburn.edu/academics/graduate-students/.

Public and One Health Courses

PAOH 2100 INTRODUCTION TO PUBLIC HEALTH (3) LEC. 3. Public Health is the science of preventing disease and promoting health in populations through research, policy development, education, provision of health services, and response to disease outbreaks. This course provides an overview of foundational concepts in public health and One Health, featuring lectures by the primary instructor and guest experts on a variety of topics.

PAOH 2107 HONORS INTRODUCTION TO PUBLIC HEALTH (3) LEC. 3. Pr. Honors College. Public Health is the science of preventing disease and promoting health in populations through research, policy development, education, provision of health services, and response to disease outbreaks. This course provides an overview of foundational concepts in public health and One Health, featuring lectures by the primary instructor and guest experts on a variety of topics. Students will attend the same lectures as PAOH 2100 as well as a small number of additional honors meetings.

PAOH 3010 INTRODUCTION TO EPIDEMIOLOGY (3) LEC. 3. Epidemiology is the study of the distribution, determinants, and dynamics of disease or health events in a population. This course introduces the basic principles and methods of epidemiology with an emphasis on prevention and control of diseases of humans and other animals.

PAOH 3017 HONORS INTRODUCTION TO EPIDEMIOLOGY (3) LEC. 3. Pr. Honors College. Epidemiology is the study of the distribution, determinants, and dynamics of disease or health events in a population. This course introduces the basic principles and methods of epidemiology with an emphasis on prevention and control of diseases of humans and other animals. Students will attend the same lectures as PAOH 3010 as well as a small number of additional honors meetings.

PAOH 4830 GLOBAL AND COMPARATIVE HEALTH SYSTEMS (3) LEC. 3. Departmental approval. Different national approaches to providing health care for the population will be compared to the US system.

PAOH 4837 HONORS GLOBAL AND COMPARATIVE HEALTH SYSTEMS (3) LEC. 3. Pr. Honors College. Departmental approval. Different national approaches to providing health care for the population will be compared to the US system.

PAOH 4910 OBSERVING NEEDS IN PUBLIC HEALTH (3) LEC. 3. Through volunteer service to an agency or organization addressing public health needs, students will develop an understanding of the importance for volunteers to support community needs. Additionally, there will be lectures and class discussions on various topics addressing needs of underserved populations.

PAOH 4920 INTERNSHIP IN PUBLIC & ONE HEALTH (1-6) INT. Departmental approval. Application of concepts and skills in public health or One Health in a professional internship experience. Course may be repeated for a maximum of 6 credit hours.

PAOH 4970 SPECIAL TOPICS IN PUBLIC & ONE HEALTH (1-4) LEC. 1-4. Topics of special interest in Public and One Health. May be repeated with change of topic. Course may be repeated for a maximum of 8 credit hours.

PAOH 4980 UNDERGRADUATE RESEARCH IN PUBLIC & ONE HEALTH (1-3) RES. Departmental approval. Directed, supervised undergraduate research in public health, health, or One Health. Course may be repeated for a maximum of 9 credit hours.

PAOH 5100 ZOONOSES AND INFECTIOUS DISEASES (3) LEC. 3. Pr. BIOL 3200. This course presents a comparative approach to infectious disease in humans and animals, while specifically highlighting zoonoses (diseases shared between humans and animals). Students will learn infectious disease epidemiologic concepts, as well as delve into foodborne, vaccine-preventable, sexually transmitted, and vector-transmitted pathogens, as well as common systems-associated infections in both animals and humans.

PAOH 5200 PROGRAM PLANNING AND THEORIES OF HEALTH PROMOTION (3) LEC. 3. This course provides the fundamentals of health promotion and behavior, including theories of change in health behavior and program implementation (planning, marketing, assessment, evaluation). By the end of the course, students should be equipped to initiate a program implementation aimed at improving health.

PAOH 5400 ENVIRONMENTAL HEALTH (3) LEC. 3. Environmental Health serves as an introduction to the effects and regulation of chemical, physical and biological factors in the environment that affect the health of individuals, communities, and ecosystems.

PAOH 5950 ONE HEALTH SEMINAR (2) LEC. 2. This course will explore public health topics relevant to populations of humans, animals, and the environment through guest seminars, large and small group discussion, and student presentations.

PAOH 6100 ZOONOSES AND INFECTIOUS DISEASES (3) LEC. 3. Pr. BIOL 3200. This course presents a comparative approach to infectious disease in humans and animals, while specifically highlighting zoonoses (diseases shared between humans and animals). Students will learn infectious disease epidemiologic concepts, as well as delve into foodborne, vaccine-preventable, sexually transmitted, and vector-transmitted pathogens, as well as common systems-associated infections in both animals and humans.

PAOH 6200 PROGRAM PLANNING AND THEORIES OF HEALTH PROMOTION (3) LEC. 3. This course provides the fundamentals of health promotion and behavior, including theories of change in health behavior and program implementation (planning, marketing, assessment, evaluation). By the end of the course, students should be equipped to initiate a program implementation aimed at improving health.

PAOH 6400 ENVIRONMENTAL HEALTH (3) LEC. 3. Environmental Health serves as an introduction to the effects and regulation of chemical, physical and biological factors in the environment that affect the health of individuals, communities, and ecosystems.

PAOH 6950 ONE HEALTH SEMINAR (2) LEC. 2. This course will explore public health topics relevant to populations of humans, animals, and the environment through guest seminars, large and small group discussion, and student presentations.

VM-Biomedical Sciences Courses

VBMS 3050 STEWARDSHIP IN THE FACE OF CLIMATE CHANGE: LESSONS FROM THE GREAT BARRIER REEF AND BEYOND (2) AAB/FLD. 30. This 2.5 week course is intended to introduce students to the impact of global warming on the flora and fauna of a unique environment through familiarity with the challenges of maintaining health in domestic, wild and commercial land and marine animals of Australia's diverse ecological land and marine park environments. Activities will include implementation of research methods that assess health, service and outreach efforts that will maintain or improve health, and educational trips that will increase understanding of the fragility and strength of integrated yet every changing flora and fauna. A consistent focus will be the past, present and future impact of humans, and efforts intended to minimize or resolve that impact.

VBMS 3900 REPRODUCTIVE SCIENCE AND HEALTH (3) LEC. 3. P/C, One basic organismal biology, physiology or similar life science course. Sophomore level or higher. Foundational physiologic concepts in reproductive science linked to important animal and human reproductive health issues. May count either ANSC 3600 or VBMS 3600.

VBMS 4980 UNDERGRADUATE RESEARCH (1-3) RES. Directed, supervised undergraduate research in veterinary biomedical sciences (VBMS). Course may be repeated for a maximum of 9 credit hours.

VBMS 4987 HONORS RESEARCH (1-3) RES. Pr. Honors College. Supervised undergraduate research in veterinary biomedical science. May count either VBMS 4987 or VBMS 4997. Course may be repeated for a maximum of 9 credit hours.

VBMS 4997 HONORS THESIS (1-3) RES. Pr. Honors College. Undergraduate honors thesis development in veterinary biomedical science. May Count either VBMS 4987 or VBMS 4997. Course may be repeated for a maximum of 9 credit hours.

VBMS 5100 CANCER BIOLOGY & GENETICS (3) LEC. 3. Coreq. BIOL 5220. Biological and genetic mechanisms underlying the development of cancer with a focus on eukaryotic cell mechanisms regulating cell division and communication as well as genetic and phenotype instability. State-of-the-art genomic approaches to personalized medicine and immunotherapy will be discussed. Current literature will be used extensively. Undergraduate courses in genetics and molecular genetics are required or corequisite.

VBMS 6100 CANCER BIOLOGY & GENETICS (3) LEC. 3. Pr. BIOL 3003 and BIOL 5220. Biological and genetic mechanisms underlying the development of cancer with a focus on eukaryotic cell mechanisms regulating cell division and communication as well as genetic and phenotype instability. State-of-the-art genomic approaches to personalized medicine and immunotherapy will be discussed. Current literature will be used extensively. Undergraduate courses in genetics and molecular genetics are required. Additionally, completion of VBMS 7520 Eukaryotic Molecular Biology is encouraged.

VBMS 6111 VETERINARY ANATOMY I (4) LAB. 12. Departmental approval. Gross anatomy of the dog and cat including skeletal and muscular systems, neck, thorax, limbs, abdomen, pelvis, head, and nervous system. Credit will not be given for VMED 5111 and VBMS 6111.

VBMS 6121 VETERINARY ANATOMY II (3) LAB. 9. Pr. VBMS 6111 or VMED 9111. In-depth study of the gross anatomy of the ox, horse, and minor species (chicken) with inclusion of clinical relevance. In-depth presentation of a specific anatomy topics related to course material. May count either VMED 5121 or VBMS 6120.

VBMS 7000 NEUROANATOMY (5) LEC. 3. LAB. 4. Departmental approval. Functional morphology of nervous system from input/output through the long systems; limbic relations to endocrine and autonomic nervous system. Comparative among mammals.

VBMS 7010 PATHWAYS TO SUCCESSFUL RESEARCH (1) LEC. 1. An introduction to topics pertinent to performance of a successful graduate program and in the conduction of responsible research.

VBMS 7020 MICROSCOPIC ANATOMY I (3) LEC. 1. LAB. 4. Departmental approval. A detailed study of microscopic anatomy of basic tissues from multiple animal species. Light microscopy and electron micrograph preparations are used to describe and interpret morphology. Coursework will emphasize the dependence of morphological form on the functional demands of cells and tissue. The lectures characterize the structure and function of the four basic tissues (epithelium, connective tissue, muscle, and nerve) and organ systems. In the lab, students will examine the same structures and learn to identify tissues and organs.

VBMS 7030 MICROSCOPIC ANATOMY II (3) LEC. 1. LAB. 4. Departmental approval. Light microscopy and electron microscopy detailed study of the cardiovascular, hemopoietic, digestive, urinary and respiratory systems of domestic animals.

VBMS 7040 ADVANCED PHYSIOLOGY OF REPRODUCTION (3) LEC. 3. Pr. ANSC 3600 and BIOL 6240 or VBMS 7150. Departmental approval. Developmental, physiological, endocrinological, cellular and molecular mechanisms regulating reproduction, with emphasis on mammalian systems.

VBMS 7070 ENDOCRINOLOGY (4) LEC. 4. Pr. BCHE 7200 and BCHE 7260 and BIOL 6600. Molecular and cellular endocrinology and physiological regulation of hormone synthesis, secretion, and action in mammalian species. Emphasis will be placed on the methodology and key concepts used for endocrine research.

VBMS 7080 MOLECULAR ENDOCRINOLOGY (2) LEC. 2. Pr. VBMS 7070. Departmental approval. Examination of the literature of hormonal synthesis, secretion and mechanism of action with emphasis on receptors, second messenger systems, and gene regulation.

VBMS 7090 ADVANCED PHARMACOLOGY (3) LEC. 3. Departmental approval. The principles of pharmacology in animals are addressed with a clinical perspective. The determinants of drug movement, pharmacokinetics (modeling) and pharmacodynamics, with a focus on drug-receptor interactions and their detection will be followed by a discussion of adverse drug events and selected drug categories, including cannabinoids, nonsteroidal anti-inflammatory drugs and antimicrobials. Student contributions to discussions through the review of contemporary, relevant literature is emphasized.

VBMS 7120 PRACTICAL FLOW CYTOMETRY AND CELL SORTING IN RESEARCH APPLICATION (2-4) LEC. 2. LAB. 4, LLB. 3. Combined Lecture and lab covering the principle of flow cytometry, experiment design, and data analysis. Instructor approval is highly recommended. Course may be repeated for a maximum of 4 credit hours.

VBMS 7130 VETERINARY MEDICINE DIAGNOSTIC ULTRASONOGRAPHY (3) LEC. 3. Pr. (VMED 9120 or VMED 9121 or VMED 5120) and VMED 5121. The principles and practice of veterinary medical diagnostic ultrasonography as they are utilized in evaluating normal and abnormal anatomy. All animal species are used in this course. DVM degree required.

VBMS 7140 PHYSIOLOGY I (5) LEC. 5. Departmental approval. Cellular, Cardiovascular, Renal and Respiratory Physiology.

VBMS 7150 PHYSIOLOGY II (4) LEC. 4. Pr. VBMS 7140. Departmental approval. Gastrointestinal Physiology, Metabolism, Endocrinology, and Reproductive Physiology.

VBMS 7160 NEUROSCIENCE (4) LEC. 3. LAB. 2. Departmental approval. An overview of neuroscience on the subcellular, cellular and system levels.

VBMS 7170 SMALL ANIMAL SOFT TISSUE SURGERY ADVANCED TOPICS (1) LEC. Advanced topics in small animal soft tissue surgery and current literature are reviewed and discussed.

VBMS 7180 RECEPTOROLOGY (4) LEC. 4. Pr. VBMS 7070. Addresses structural and functional aspects of the four classes of receptors, including the mechanism of ligand binding, activation, inactivation, and their relevance to human and animal diseases. Methods used in addressing these questions will also be introduced.

VBMS 7200 VETERINARY ELECTRODIAGNOSTIC TESTING (3) LEC. 3. SU. Departmental approval. This course will cover principles of electrophysiology, electrodiagnostic testing, and pertinent electrodiagnostic literature. Modalities covered include: electromyography, nerve conduction velocity, late waves, repetitive nerve stimulation, evoked potentials, electroretinogram, electroencephalogram, and urethral pressure profile.

VBMS 7210 RADIATION BIOLOGY (4) LEC. 4. Exploration of biological, physical, and chemical basis of radiotherapy with emphasis on the biological effects of ionizing radiation at the cellular and molecular level. Effects of irradiation on the tumor, normal tissues, and the patient will be addressed. DVM degree; Residency in Radiation Oncology or Radiology or Small Animal Oncology and registered in the Graduate School.

VBMS 7220 STRUCTURE AND FUNCTION OF COMPANION ANIMAL SKIN (3) LEC. 3. The course will cover the comparative aspects of the structure and function of the skin of companion animals in healthy and diseases states.

VBMS 7230 CUTANEOUS DISORDERS OF LARGE AND EXOTIC ANIMALS (3) LEC. 3, IND/LEC. 9-12. In depth review of the common and uncommon dermatologic conditions affecting large animal and exotic animal species, including emphasis on those conditions considered zoonotic.

VBMS 7250 NORMAL RADIOLOGICAL ANATOMY (3) LEC. 3. A detailed study of the normal structure, size and position of the various organs of the cat, dog, horse, cow, and other veterinary species as they appear on plain and contrast radiographs. DVM Degree, acceptance in an established residency program.

VBMS 7260 ADVANCED RADIOLOGY (3-5) LEC. Detailed study of concepts and techniques of all imaging procedures. For graduate students and residents in DCS program or DVM or equivalent. Course may be repeated for a maximum of 5 credit hours.

VBMS 7270 RADIOLOGICAL INTERPRETATIONS (1-3) LEC. The interpretation of various diagnostic imaging modalities used in veterinary medicine and their applications in the diagnostic work-up of clinical cases presenting to the College of Veterinary Medicine. DVM Degree. Course may be repeated for a maximum of 3 credit hours.

VBMS 7280 PHYSICS OF DIAGNOSTIC IMAGING (3) LEC. 3. Principles of physics related to the imaging modalities of diagnostic radiology, ultrasonography, magnetic resonance imaging, scintigraphy, computed tomography, and radiation therapy. Students will study physics at the atomic level but must also develop an understanding of construction, function, and hazards of modern imaging equipment. DVM Degree.

VBMS 7290 GRADUATE SEMINAR (3) SEM. Departmental approval. This course offers hands-on experience on presenting cutting-edge research across a wide range of biological disciplines—including (but not limited to) genetics, comparative biology, quantitative biology. The course places emphasis on understanding hypotheses, experimental design, results, and interpretation from past studies. It applies a One Health concept. Course may be repeated for a maximum of 9 credit hours.

VBMS 7300 AVIAN DIAGNOSTIC PATHOLOGY (1-3) LAB. 1-3. SU. Residents enrolled in the Veterinary Biomedical Sciences Avian Pathology specialty program will interpret lesions for the diagnosis of avian diseases using necropsy procedures. Focus will be placed on an integrated comparative understanding of the pathophysiology of disease in commercial poultry. Course may be repeated for a maximum of 3 credit hours.

VBMS 7310 ADVANCED VETERINARY ANESTHESIOLOGY (1) LEC. 1. This course will be delivered in weekly one hour lecture format. The presenter for each lecture will rotate between course students and veterinary faculty. For each hour, the presenter will be required to deliver a lecture on a topic related to the overreaching subject for that semester course. The lecture will be delivered at an in-depth level utilizing currently scientific literature, text books, and other reference materials resulting in delivery of state of the art information. Graduate standing in Biomedical Sciences, College of Veterinary Medicine. Must have a DVM degree or equivalent. Course may be repeated for a maximum of 9 credit hours.

VBMS 7320 EVALUATION OF CURRENT AND EMERGING LITERATURE IN VETERINARY ANESTHESIA (1) LEC. 1. This course will be delivered in weekly one hour lecture format. The presenter for each lecture will rotate between course students and veterinary faculty. For each hour, the presenter will be required to deliver an in-depth evaluation and summary of two medial journal manuscripts related to veterinary anesthesiology. The presenter will be required to discuss the manuscript format, study design, data analysis, results, and conclusions including discussion on the pros and cons of the study. Manuscript selection for each class will be at the discretion of the presenter and copies of the manuscripts will be made available electronically to all faculty and students of the course one week prior to the class. Graduate standing in Biomedical Sciences, College of Veterinary Medicine. Must have a DVM degree or equivalent. Course may be repeated for a maximum of 9 credit hours.

VBMS 7340 LARGE ANIMAL SURGERY AND MEDICINE SEMINAR (1) SEM. 1. Departmental approval. Seminar required of all graduate students in large animal surgery and medicine. Meets at scheduled intervals each year.

VBMS 7350 ADVANCED LARGE ANIMAL UROGENITAL SURGERY (5) LEC. 3. LAB. 6. Departmental approval. Research in surgery. Advanced techniques for urogenital surgical procedures in large domestic animals.

VBMS 7360 ADVANCED LARGE ANIMAL SOFT TISSUE SURGERY (5) LEC. 4. LAB. 2. Departmental approval. Research in surgery. Advanced techniques for soft tissue surgical procedures in large domestic animals.

VBMS 7370 ADVANCED LARGE ANIMAL ORTHOPEDIC SURGERY (5) LEC. 3. LAB. 2. Research and advanced techniques for orthopedic surgical procedures in large domestic animals.

VBMS 7380 ADVANCED FOOD ANIMAL MEDICINE (2) LEC. 2. Departmental approval. In-depth study of food animal medical diseases of all body systems with emphasis on pathophysiologic mechanisms. DVM degree.

VBMS 7400 GYNECOLOGY OF LARGE DOMESTIC ANIMALS (3) LEC. 3. Departmental approval. Diseases and problems of the reproductive system in the female domestic animals. Normal and abnormal conditions of various species are covered. DVM degree.

VBMS 7410 ANDROLOGY OF LARGE DOMESTIC ANIMALS (3) LEC. 3. Departmental approval. Diseases and problems of the reproductive system in male domestic animals. DVM degree.

VBMS 7420 SCIENTIFIC COMMUNICATION (3) LEC. SU. Building skills towards effective and impactful communication of scientific evidence via writing, for thesis/dissertation and scientific journals, and via oral presentation.

VBMS 7440 ADVANCED EQUINE ARTHROSCOPIC SURGERY (5) LEC. 3. LAB. 6. Departmental approval. Research in surgery. Advanced techniques for arthroscopic surgical procedures in the horse. DVM degree.

VBMS 7450 SELECTED TOPICS IN GRADUATE EDUCATION RESEARCH (3) LEC. 3. Departmental approval. This course offers a deep dive into molecular or quantitative research. This course can be designed for students looking to build strong analytic and computational skills. The course emphasizes practical techniques for working with large and complex datasets across a range of research domains. Students will learn to write clear, efficient, and reproducible code while developing workflows that support rigorous, transparent analysis. Course may be repeated for a maximum of 9 credit hours.

VBMS 7460 MICROBIAL PATHOGENESIS (3) LEC. 3. Departmental approval. Mechanisms of infection and disease production by bacteria, viruses, and parasites in animals.

VBMS 7470 ADVANCED EPIDEMIOLOGY (3) LEC. 3. Departmental approval. Advanced epidemiological techniques and their application to disease research, clinical retrospective and prospective studies, and disease outbreak investigation. Introductory statistics course

VBMS 7480 METHODS IN IMMUNOLOGY (5) LEC. 1. LAB. 8. Pr. VBMS 7500. Departmental approval. Theoretical concepts underlying immunological methods combined with practical hands-on immunological experimentation focused on application to research in the biological sciences.

VBMS 7500 CELLULAR AND MOLECULAR IMMUNOLOGY (3) LEC. Departmental approval. Current literature in immunobiology, emphasis on cellular/ biochemical/genetic basis of immune response.

VBMS 7510 VETERINARY CLINICAL ROTATIONS (3) CLN/LEC. 40. Post-DVM (Doctor of Veterinary Medicine) clinical experiences through various specialty services in the Veterinary Medical Teaching Hospital. Departmental approval required. Course may be repeated for a maximum of 24 credit hours.

VBMS 7520 EUKARYOTIC MOLECULAR BIOLOGY (3) LEC. 3. Genetic mechanisms regulating genomes and gene expression by which eukaryotic cells replicate, communicate and differentiate. Current literature will be used extensively.

VBMS 7530 EXPERIMENTAL TECHNIQUES IN MOLECULAR AND CELL BIOLOGY (3) LEC. 2. LAB. 6. Nucleic acid detection/ amplification/sequencing, primer design, CRISPR, transfection, protein/ antibody chemistry, flow cytometry, immunofluorescence microscopy, fluorochromes, radioisotopes, centrifugation, and cell culture will be discussed.

VBMS 7540 CURRENT TOPICS IN MOLECULAR VIROLOGY (3) LEC. 3. Pr. (VBMS 7520 or BIOL 5230 or BIOL 6230). Departmental approval. Viral gene expression and evasion of host defense mechanisms.

VBMS 7550 ADVANCED GENERAL PATHOLOGY (1-3) LEC. SU. Departmental approval. Structured examination of current textbooks and literature related to the pathologic basis of veterinary diseases. Open to residents in anatomic and clinical pathology and other post-DVM students with special approval. Course may be repeated for a maximum of 3 credit hours.

VBMS 7570 DIAGNOSTIC PATHOLOGY (1-3) LEC. SU. Diagnosis of animal diseases using necropsy procedures and histopathology. Required every semester of all graduate students and residents in pathology. DVM degree. Course may be repeated for a maximum of 3 credit hours.

VBMS 7580 SURGICAL PATHOLOGY (1-3) LEC. SU. Histopathologic diagnosis of surgical biopsy or necropsy specimens. Available to residents in anatomic and clinical pathology. Course may be repeated for a maximum of 3 credit hours.

VBMS 7600 ADVANCED CLINICAL PATHOLOGY I (3) LEC. 3. Pr. VMED 5230 or VMED 9230. Departmental approval. The lymphohematopoietic system. Normal components and evaluation of disease states.

VBMS 7610 ADVANCED CLINICAL PATHOLOGY II (3) LEC. 3. Departmental approval. Laboratory evaluation of organ function; disease pattern recognition.

VBMS 7620 DIAGNOSTIC ONCOLOGY (3) LEC. 3. Pr. VMED 9220. Departmental approval. Principles of gross and microscopic interpretation of animal neoplasms using basic and specialized techniques.

VBMS 7630 BASIC AND CLINICAL ONCOLOGY (3) LEC. 3. Comparative aspects of the etiology, pathophysiology, diagnosis and treatment of cancer.

VBMS 7640 MECHANISMS OF DISEASE (3) LEC. 3. Pr. VMED 9220. Departmental approval. Understanding of disease through in-depth discussion of pathophysiology of various disease processes, disorders and diagnostic modalities. Focus will be placed on an integrated comparative understanding of the pathophysiology of disease in major veterinary species as it pertains to current and historically significant disease, as well as emerging diseases. Emphasis is placed on the morphologic, molecular and genetic aspects of disease processes.

VBMS 7650 VETERINARY DERMATOPATHOLOGY I (1-3) LEC. SU. This course aims to share theoretical and practical foundations on dermatopathology with residents in the Anatomic Pathology and/or Veterinary Dermatology program(s). The lectures will consist of 1-hour long Powerpoint presentations or case discussions on relevant integumentary diseases, with summarized clinical features and a particular focus on the histopathology perspective of cases that usually warrant biopsy. At the end of the course, it is expected that residents learn the fundamental terminologies used in dermatopathology, in addition to pattern recognition of major cutaneous diseases that afflict domestic animals. Course may be repeated for a maximum of 3 credit hours.

VBMS 7660 VETERINARY DERMATOPATHOLOGY II (1-3) LEC. SU. This course aims to share theoretical and practical foundations on dermatopathology with residents in the Anatomic Pathology and/or Veterinary Dermatology program(s). The lectures will consist of 1-hour long PowerPoint presentations or case discussions on relevant integumentary diseases, with summarized clinical features and a particular focus on the histopathology perspective of cases that usually warrant biopsy. At the end of the course, it is expected that residents learn the fundamental terminologies used in dermatopathology, in addition to pattern recognition of major cutaneous diseases that afflict domestic animals. Course may be repeated for a maximum of 3 credit hours.

VBMS 7680 PATHOLOGY SEMINAR (1) LEC. 1. Pr. VMED 9220. Departmental approval. Weekly conference to discuss gross and histologic pathology in animal tissues. Open to residents in anatomic and clinical pathology. Course may be repeated for a maximum of 3 credit hours.

VBMS 7690 READINGS IN IMMUNOLOGY AND INFECTIOUS DISEASE (1-3) LEC. 1-3. To familiarize students with current scientific literature in immunology and infectious diseases and the methods employed. Course may be repeated for a maximum of 6 credit hours.

VBMS 7710 ADVANCED EUKARYOTIC MOLECULAR BIOLOGY (3) LEC. 3. Pr. VBMS 7520. Current literature in molecular mechanisms of information transfer and regulation in eukaryotes.

VBMS 7720 DEVELOPMENTAL MOLECULAR BIOLOGY (3) LEC. 3. Genetic mechanisms by which eukaryotes differentiate from single cells to complex multicellular organisms will be covered. Important examples of biomedical dysfunction will be used to illustrate developmental pathways. Current literature will be used extensively.

VBMS 7750 GRADUATE COLLOQUIUM IN VETERINARY CLINICAL SCIENCE (1) CLN. 1. SU. Departmental approval. Forum to present topics relevant to the students clinical and research interests. This a mandatory seminar for graduate students in the Department of Clinical Science. DVM degree Course may be repeated for a maximum of 5 credit hours.

VBMS 7760 ADVANCED VETERINARY NEUROSURGERY (4) LEC. 1. LAB. 3. Enrolled in the CVM's MS or PHD program. Veterinary neurosurgery. All aspects of veterinary neurosurgery will be covered. Content delivery is via didactic lecture, small group discussion, and skills laboratories.

VBMS 7770 ADVANCED SMALL ANIMAL GENERAL SURGERY (3) LEC. 2. LAB. 3. Application of critical thinking skills to perioperative plans and tasks. DVM or VMD degree, or equivalent.

VBMS 7780 VETERINARY WOUND MANAGEMENT AND RECONSTRUCTIVE SURGERY (4) LEC. 2. LAB. 2. Techniques in veterinary wound management and reconstructive surgery in large and small animals. DVM degree or equivalent.

VBMS 7790 SMALL ANIMAL ORTHOPEDICS (2) LEC. 2. Review of orthopedic diseases in small animals, interactive review of recent literature and advanced laboratory sessions intended for residents in small animal surgery. DVM degree or equivalent.

VBMS 7800 ADVANCED SMALL ANIMAL NEUROLOGY (3) LEC. 3. Advanced study of neurodiagnostics and non-surgical therapy of neurological disorders in small domestic animals.

VBMS 7810 ADVANCED SMALL ANIMAL MEDICINE I (3) LEC. Departmental approval. Special study of the causes, methods of diagnosis, treatment and control of non-surgical urogenital diseases of small animals. DVM degree.

VBMS 7820 ADVANCED SMALL ANIMAL MEDICINE II (3) LEC. 3. Departmental approval. Special study of the causes, methods of diagnosis, treatment and control of non-surgical gastrointestinal diseases of small animals. DVM degree.

VBMS 7830 ADVANCED VETERINARY ONCOLOGY (3) LEC. 3. SU. Departmental approval. Special study of veterinary oncology and general tumor biology. DVM degree required. Course may be repeated for a maximum of 6 credit hours.

VBMS 7840 ADVANCED CRITICAL CARE MEDICINE I: PATHOPHYSIOLOGY (2) LEC. 2. Advanced topics in veterinary critical care are discussed. Topics include pathophysiology, pharmacology, and specific therapy of critical illness. Graduate standing in Biomedical Sciences, College of Veterinary Medicine. Course may be repeated for a maximum of 5 credit hours.

VBMS 7850 ADVANCED VETERINARY MEDICAL SPECIALTY TRAINING (1-4) LEC. 1. LAB. 2. SU. Advanced veterinary medical specialty training is provided to residents and board-eligible veterinary trainees with hands-on instruction in clinical activities commensurate with the board-certification expectation of various veterinary medical specialties. Up to 3 hours may be used toward BMS degree program, course may be repeated for a maximum of 6 credit hours.

VBMS 7860 SPECIAL TOPICS IN COMPARATIVE OPHTHALMOLOGY (1) LLB/ST1. SU. This weekly 1 hour course will consist of chapter reviews of veterinary ophthalmology and equine ophthalmology. House officers will develop and present power point slides outlining assigned chapters. Course assignments will also include reading and presenting journal articles from the required list for board preparation, as well as taking mock boards practice journal and image recognition questions. Course may be repeated for a maximum of 15 credit hours.

VBMS 7870 ADVANCED VETERINARY OPHTHALMOLOGY: OPHTHALMIC MEDICINE (3) LEC. 3. Advanced ophthalmology with emphasis on diagnosis, pathophysiology and treatment of ocular diseases of domestic animals. DVM degree or equivalent.

VBMS 7880 ADVANCED VETERINARY OPHTHALMOLOGY: OPHTHALMIC MEDICINE (3) LEC. 1. LAB. 6. Pr. VBMS 7870. Advanced ophthalmology with emphasis on ophthalmic surgery.

VBMS 7890 ADVANCED VETERINARY OPHTHALMOLOGY: OPHTHALMIC BASIC SCIENCES (3) LEC. 3. Advanced ophthalmology with emphasis on diagnosis, pathophysiology and treatment of ocular diseases of domestic animals. DVM degree or equivalent.

VBMS 7900 VETERINARY OPHTHALMIC PATHOLOGY (1) LLB. This course aims to share theoretical and practical foundations on ocular pathology with residents in the Anatomic Pathology and/or Veterinary Ophthalmology program(s). The lectures will consist of 1-hour long PowerPoint presentations on significant ocular/orbital abnormalities, with summarized clinical features and a particular focus on the histopathology perspective of cases that usually warrant biopsy, enucleation, evisceration, or orbital exenteration. At the end of the course, it is expected that residents build acquaintance with the fundamental terminologies used in ocular pathology, in addition to the recognition of major pathologic processes of the ocular/orbital structures.

VBMS 7910 THERIOGENOLOGY JOURNAL CLUB (1) LEC. 1. SU. This course is aimed at discussing current literature in the field of theriogenology, or animal reproduction. Any graduate student in the reproductive sciences is encouraged to participate. Course may be repeated for a maximum of 6 credit hours.

VBMS 7930 ADVANCED SMALL ANIMAL ORTHOPEDICS: AXIAL SKELETON (2) LEC. 2. Advanced topics in small animal orthopedics are discussed. Topics include anatomy, pathophysiology, pharmacology, and medical/surgical therapy of axial skeletal disease in small animals.

VBMS 7940 CURRENT TOPICS IN IMMUNOBIOLOGY (1) LEC. 1. The focus of this journal club is to discuss recently published advanced research topics in immunobiology research field pertaining to graduate student's research work. Course may be repeated for a maximum of 12 credit hours.

VBMS 7950 NEUROLOGY & NEUROSURGERY JOURNAL CLUB (1) LEC. 1. LAB. 0, LEC/SEM. 0. This course is aimed at discussing current literature in the field of veterinary neurology & neurosurgery. Any graduate student in the neurology & neurosurgery residency/internship program is encouraged to participate. Course may be repeated for a maximum of 10 credit hours.

VBMS 7960 VETERINARY NEURORADIOLOGY (1) LEC. 1. SU. Departmental approval. This course will cover fundamental concepts and principles of imaging modalities commonly used in veterinary neurology, namely MRI, CT, & radiography. Course material includes imaging of common neurologic lesions including congenital, neoplasia, trauma, vascular, inflammatory, and infectious diseases.

VBMS 7970 RESEARCH PROBLEMS IN BIOMEDICAL SCIENCES (1-5) RES. Departmental approval. Research problems for graduate students, under supervision of faculty, in variety of specialized disciplines related to the biomedical sciences. Faculty approval. Course may be repeated for a maximum of 15 credit hours.

VBMS 7980 NON-THESIS PROJECT (1-3) LEC. SU. Departmental approval. Non-thesis project, to be determined by faculty advisor and student's graduate advisory committee. DVM degree

VBMS 7990 RESEARCH AND THESIS IN BIOMEDICAL SCIENCES (1-10) MST. Credit to be arranged. Course may be repeated with change in topics.

VBMS 8000 ADVANCED SMALL ANIMAL EMERGENCY AND CRITICAL CARE LITERATURE REVIEW (1) LEC. 1. SU. Review of current literature pertaining to Small Animal Emergency and Critical Care. Review includes group discussion of study design, procedural and physiologic concepts, statistical analysis, and relevance of outcomes.

VBMS 8010 EMERGING PEDAGOGIES IN ANATOMIC PATHOLOGY (1-3) LLB. SU. The overall objective of this course is to expose Graduate Teaching Assistants (GTA) to pedagogy strategies related to general pathology with specific emphasis on competency-based medical education for second-year veterinary students. Trainees will be introduced to diverse classroom dynamics, such as case- and problem-based laboratories, flipped classroom, and other collaborative learning techniques.

VBMS 8360 ADVANCED EQUINE MEDICINE I: GI DISEASE (2) LEC. 2. Advanced topics in equine gastrointestinal disease are discussed. Topics include pathophysiology, pharmacology, and specific therapy of GI disease in horses. Graduate standing in Biomedical Sciences, College of Veterinary Medicine. Must have DVM or equivalent.

VBMS 8370 ADVANCED EQUINE MEDICINE II: RENAL/ENDOCRINE (2) LEC. 2. Advanced topics in equine renal and endocrine disease are discussed. Topics include pathophysiology, pharmacology, and specific therapies. Graduate standing in Biomedical Sciences, College Veterinary Medicine. Must have DVM or equivalent.

VBMS 8380 ADVANCED EQUINE MEDICINE III: NEUROMUSCULAR (2) LEC. 2. Advanced topics in equine neuromuscular disease are discussed. Topics include pathophysiology, pharmacology, and specific therapies. Graduate standing in Biomedical Sciences, College Veterinary Medicine. Must have DVM or equivalent.

VBMS 8390 ADVANCED EQUINE MEDICINE IV: CARDIORESPIRATORY (2) LEC. 2. Advanced topics in equine cardiorespiratory disease are discussed. Topics include pathophysiology, pharmacology and specific therapies. Graduate standing in Biomedical Sciences, College Veterinary Medicine. Must have DVM or equivalent.

VBMS 8480 EXPERIMENTAL METHODS IN VETERINARY MEDICINE (3) LEC. 3. Departmental approval. This course is intended to provide the biomedical sciences graduate student with the necessary tools to design and analyze a straightforward Masters-level veterinary biomedical research study, and interpret common statistical methods in the veterinary biomedical literature. Students will review and discuss examples from the veterinary research literature and acquire experience performing analysis using commonly available software packages.

VBMS 8950 BIOMEDICAL SCIENCES SEMINAR (1) SEM. 1. SU. Recent advances in biochemistry, cell biology and molecular biology will be critically presented and discussed by graduate faculty and students. Course may be repeated for a maximum of 10 credit hours.

VBMS 8990 RESEARCH AND DISSERTATION (1-10) DSR. Course may be repeated with change in topics.

Veterinary Medicine Courses

VMED 9000 ORIENTATION TO VETERINARY MEDICINE (0) SEM. 1. SU. Overview of organized veterinary medicine, history of the profession, professional responsibilities and privileges, and career opportunities within the profession.

VMED 9009 PROFESSIONAL SELF CARE SKILLS (1) LEC. 1. SU. Departmental approval. This course will discuss the factors present within veterinary medicine that put us at risk for empathetic exhaustion, burnout, suicidal ideation and other issues, followed by sharing skills, thoughts and actions that will facilitate resiliency, well-being and fulfillment within the profession.

VMED 9010 VETERINARY JURISPRUDENCE (1) LEC. 1. Provide a foundation in veterinary medical ethics and legal issues associated with veterinary medicine.

VMED 9020 PROFESSIONAL COMMUNICATION SKILLS FOR VETERINARY MEDICINE (1) LEC. 1. LAB. 2. SU. Students will develop skills in communication with faculty, staff, colleagues, pet-owners, and the public sector through lecture and interactive laboratory sessions. These skills will be immediately implementable into everyday student/educational life, clinical practice, and team building settings. Topics include implementation of nonverbal and verbal communication skills during financial discussion, de-escalation, grief and empathy, creating safe spaces for collaborative decision making, and discussing medical errors.

VMED 9030 NATURAL HISTORY AND ANATOMY OF MARINE MAMMALS AND SEA TURTLES (1) LEC. 1, LAB. 0-2. SU. The course will be divided into nine hours of lectures and six hours of labs evenly divided between odontocetes (toothed whales), Pinnipeds (seals, sea lions and walruses) and sea turtles. Lecture topics will include natural history and anatomy of each group. Three fresh tissue wet labs will include dissections of one dolphin (Bottlenose or Spotted), one California Sea Lion and one sea turtle (one of several species found in the northern Gulf of Mexico).

VMED 9040 MARINE MAMMAL STRANDING RESPONSE AND NECROPSY TECHNIQUES (1) LEC. 1, LAB. 0-3. SU. Departmental approval. This course will provide an overview of the stranding response and necropsy techniques for small cetacean, manatees, and pinnipeds (manatee necropsy based on availability). The course will include lectures and necropsies at Dauphin Island Sea Lab.

VMED 9050 PROFESSIONAL DEVELOPMENT AND BUSINESS FUNDAMENTALS (1) LEC. 15. Auburn University CVM Professional Development and Business Fundamentals course is a 1 credit-hour course encompassing the study, understanding and application of pertinent business disciplines guiding the decision-making responsibilities of practice owners, veterinarians, veterinary students, veterinary technicians and practice managers that seek to improve profitability and efficiency allowing for a competitive advantage and long term success in their personal and professional careers.

VMED 9060 ELEVATING YOUR IMPACT: TOOLS FOR COMMUNITY-CENTERED MEDICINE (1) LEC. 12. LAB. 1. SU. This experience will provide students with an introduction to a wide range of animal welfare topics in a hands-on interactive environment. Subject matter experts will present, lead discussions, and facilitate student activities throughout this 2-day intensive weekend elective. Students will have the opportunity to practice spay/neuter techniques using easily buildable string models, become the crime scene investigator on animal cruelty cases, and learn countless other skills that will help them become better advocates for the animals and pet owners in their communities regardless of the specific veterinary field they choose to enter post-graduation.

VMED 9070 APPLIED CLINICAL PATHOLOGY (1) LEC. 1. SU. This course covers the use and interpretation of hematologic, clinical biochemical, coagulation, urinalysis and cytologic laboratory data in the diagnosis of diseases and pathophysiologic processes, building on the foundation established in the first two years of the professional DVM curriculum. The data discussed in this course are taken from clinical cases from the AU teaching hospitals.

VMED 9080 VETERINARY PAIN MANAGEMENT (1) LEC. 1. SU. The veterinary pain management course will serve to increase a student's knowledge base on many aspects of pain management of the veterinary patient. Subjects covered in this course will include in depth review of neuroanatomy and physiology of pain, pathophysiology of pain, pharmacology of medications used for pain management, non-pharmacologic treatments for pain, and specific pain management strategies for various domestic species, and exotic and zoo animals. Content in this class will be delivered through lecture or other formats depending on the presenting faculty. Departmental approval required.

VMED 9090 CANINE AND FELINE DENTISTRY (1) LEC. 1. SU. This elective is designed to build upon Small Animal Dentistry knowledge and teach entry level abilities to help 2nd and 3rd year veterinary students become clinic and practice ready. Departmental approval required.

VMED 9100 PROFESSIONAL PREPAREDNESS (1) LEC. 1. SU. Departmental approval. This course will introduce principles of preparedness for the major challenges students will face both now and after graduation from veterinary school (student loans, home mortgage, vehicle purchase, retirement plan, etc.).

VMED 9110 PHYSIOLOGY I (5) LEC. 5. LAB. 1. Cellular, Cardiovascular, Renal, and Respiratory Physiology.

VMED 9111 VETERINARY ANATOMY I (SMALL ANIMAL) (4) LEC. 2. LAB. 2. Basic concepts of body structure and small animal gross anatomy with veterinary medical applications. Credit will not be given for both VMED 5111 and VBMS 6111.

VMED 9120 PHYSIOLOGY II (4) LEC. 5. Gastrointestinal Physiology, Metabolism, Endocrinology, and Reproductive Physiology.

VMED 9121 VETERINARY ANATOMY II (3) LEC. 1. LAB. 2. In-depth study of the gross anatomy of the ox, horse, and minor species with inclusion of clinical relevance.

VMED 9130 GENETIC AND CELLULAR BASIS OF ANIMAL DISEASE (1) LEC. 3. One credit course focused on the relationship between genetics and animal diseases.

VMED 9131 BASIC MICROANATOMY/DOMESTICS ANIMALS (3) LEC. 1. LAB. 2. Functional comparative microstructure of cells, basic tissues, cardiovascular system, urinary system, skeleton and osteogenesis, respiratory system, and blood of domestic animals.

VMED 9140 ADVANCED ANESTHESIA AND PAIN MANAGEMENT (1) LEC. 1. SU. This course is intended to expand on the basic topics covered in the veterinary curriculum. The content will be selected by the participants on the first day and a syllabus generated based on a consensus of topics the group would like to discuss. All topics in the realm of anesthesia and pain management are within the scope of possibilities. This course is not designed to be a review of topics already covered in other classes, but to expand on those topics. Departmental approval required.

VMED 9141 ORGANOLOGY OF DOMESTIC ANIMALS (2) LEC. 1. LAB. 2. Comparative microstructure of the digestive system, lymphoid system, endocrine system, integumentary system, reproductive system, and placentation of domestic animals.

VMED 9150 DIAGNOSTIC IMAGING (2) LEC. 2. LAB. 1. Basic radiographic and ultrasonographic physics; introduction to computed tomography, magnetic resonance imaging, and nuclear imaging.

VMED 9151 VETERINARY NEUROSCIENCES (4) LEC. 3. LAB. 1. Gross and microscopic morphology and physiology of the peripheral and central nervous systems. Course may be repeated for a maximum of 12 credit hours.

VMED 9160 VETERINARY PUBLIC HEALTH (3) LEC. 3. This first half of this class will include instruction on the zoonoses, and the principles of epidemiology or population medicine. For the zoonoses primary mechanisms of transmission and inclusion in differential diagnosis lists will be emphasized. The role of the veterinarian in prevention of human disease from the zoonoses will be stressed. Epidemiologic methods for investigation of disease distribution and dynamics in populations also will be covered. The second half of the course will provide a broad One Health/ Public Health overview of food safety and food security issues, including pet food and animal feeds. Basic concepts and principles will be illustrated and reinforced through the study of food- and water-borne diseases. This part of the course will address food and water-borne pathogens, their public health impacts (historic and present-day), prevention and mitigation measures (sanitary production and processing, pasteurization, and preservation techniques). The history and importance of regulatory controls and oversight in order to assure food and feed safety, consumer confidence, sustainability, and stable markets for American agriculture will be discussed.

VMED 9170 PROFESSIONAL COMMUNICATION SKILLS (1) LEC. 1. SU. Departmental approval. Students will develop skills in communication with colleagues, clients and staff through lecture and interactive laboratory sessions. Students will also improve their ability to give and receive feedback from peers. Professional presentation skills will be developed during the course with a final presentation given in laboratory setting.

VMED 9180 VETERINARY ETHOLOGY (2) LEC. 2. Basic concepts of ethology and other approaches to animal behavior, introduce diagnostic and treatment methods, discuss relevant cases. Course may be repeated for a maximum of 6 credit hours.

VMED 9190 INTRODUCTION TO VETERINARY PHARMACOLOGY (1) LEC. 3. An organized foundation of information to develop clincial thinking skills in veterinary pharmacology. Course may be repeated for a maximum of 16 credit hours.

VMED 9200 VETERINARY PARASITOLOGY I (3) LEC. 3. LAB. 1. Platyhelminthes, trematodes, and nematodes of domestic animals.

VMED 9210 VETERINARY PARASITOLOGY II (2) LEC. 3. LAB. 1. Arthopods, protozoa, helminths, and acanthocephalans of domestic animals. Parasiticides.

VMED 9220 PRINCIPLES OF VETERINARY PATHOLOGY (3) LEC. 4. LAB. 1. General principles of pathology and mechanisms of disease processes affecting animals.

VMED 9230 VETERINARY CLINICAL PATHOLOGY (4) LEC. 47. LAB. 8. Laboratory test principles and results interpretations in evaluation of hematopoietic, coagulation, hepatic, renal, gastrointestinal, acid/base and fluid status of animals.

VMED 9240 PRINCIPLES OF VETERINARY IMMUNOLOGY (3) LEC. 2. LAB. 1. Principles underlying the immune system's ability to protect animals from disease and mechanisms by which immune responses contribute to disease.

VMED 9250 VIROLOGY & PRIONS (2) LEC. 2. LAB. 1. Principles of infectious agents and their pathogenic attributes, infectious diseases of animals, and mechanisms of antimicrobial agents. Course may be repeated for a maximum of 6 credit hours.

VMED 9260 VETERINARY PHARMACOLOGY (3) LEC. 5. LAB. 1. Overview of drugs relevant to veterinary practice; pharmacoynamics, pharmacokinetics, clinical application.

VMED 9280 BACTERIOLOGY & MYCOLOGY (3) LEC. 3. LAB. 1. Veterinary bacterial and fungal pathogens, diseases caused by each, prevention, treatement and presumptive laboratory diagnoses. Course may be repeated for a maximum of 9 credit hours.

VMED 9290 CLINICAL ANATOMY AND INTRO TO AQUATIC ANIMAL MEDICINE (1) DSL/LLB. SU. This course delves into the unique anatomic and physiologic features of aquatic animals and serves as an introduction into topics including aquaculture, aquatic toxicology, aquatic research models, diseases of fish, and aquatic medicine. In addition, basic fish anatomy and diagnostic techniques will be taught in laboratory sessions.

VMED 9300 REPTILE ANATOMY AND MEDICINE (1) LEC. 1. LAB. 1, LLB. 0. SU. This course will be divided evenly between anatomy and natural history of reptiles. There will be 15 one-hour lectures and 2 two-hour wet labs.

VMED 9301 PHYSICAL DIAGNOSES OF LARGE AND SMALL ANIMALS (2) LEC. 2. LAB. 1. Basic approach to physical examination of large and small animals.

VMED 9309 AVIAN ANATOMY AND MEDICINE (1) LLB. SU. This course will be divided between the anatomy and natural history of birds. There will be 15 one-hour lectures and 2 two-hour wet labs.

VMED 9310 INTRODUCTION TO SURGERY (2) LEC. 2. LAB. 2. Current standing in the DVM professional curriculum and completion of the first 3 semesters of the professional program. Introduction to the fundamental principles and techniques of veterinary surgery.

VMED 9311 SURGICAL PRACTICUM (0-1) LAB. 5. SU. Aseptic technique, instrument handling, suture patterns, surgical ties, anesthetic administration/monitoring, surgical incision/tissue handling, wound closure, postoperative patient management. Course may be repeated for a maximum of 1 credit hours.

VMED 9320 LARGE ANIMAL NUTRITION (2) LEC. 2. LAB. 0. Proper nutrition for health and disease prevention and treatment in large animals in different stages of life. May count either VMED 5320 or VMED 5420. Course may be repeated for a maximum of 6 credit hours.

VMED 9330 EXOTIC COMPANION ANIMAL MEDICINE (2) LEC. 4. Care, diagnosis, and treatment of exotic companion animals. May count either VMED 5330 or VMED 5430. Course may be repeated for a maximum of 6 credit hours.

VMED 9340 EMERGENCY MEDICINE AND CRITICAL CARE (2) LEC. 5. Emergency presentations, critical care management.

VMED 9350 VETERINARY TOXICOLOGY (2) LEC. 2. LAB. 1. Poisons and poisonous plants affecting large and small animals, chemical properties, signs, lesions, diagnosis, treatment.

VMED 9360 PRODUCTION AND PREVENTATIVE MEDICINE (3) LEC. 5. Principles of disease prevention and maximization of production application of food safety principles.

VMED 9370 ONCOLOGY (1) LEC. 3. Diagnostic and therapeutic measures used to manage animals with oncologic diseases.

VMED 9380 PHYSICAL DIAGNOSIS II (1) LEC. 1. LAB. 2. Continued experience in the performance of routine physical examination in small and large animal species. Satisfactory advancement into the second year of the professional (DVM) program.

VMED 9390 ADVANCED ANATOMY AND SURGICAL SKILLS (1) LEC. 1. SU. This elective is based on a flipped classroom model. Each enrollee will be required to prepare one PowerPoint presentation selected from the list of cases provided (or the presenter can elect to bring his or her own case based on past experience) and then discuss it with the group. The presenter will carry out research at home ahead of the class. He will get guidance from instructor who will provide additional notes, video and anatomical resources for each of the listed cases. Departmental approval required.

VMED 9400 EQUINE THERIOGENOLOGY CASE OF THE WEEK (1) LEC. 1. SU. Departmental approval. This course provides students an introduction to equine theriogenology using clinical cases received on the equine theriogenology service of the J.T. Vaughan Large Animal Teaching Hospital.

VMED 9410 APPLIED CLINICAL IMAGING (2) LEC. 3. Define and describe abnormalities of various systems detected through imaging. Course may be repeated for a maximum of 6 credit hours.

VMED 9420 SMALL ANIMAL NUTRITION (2) LEC. 2. Proper nutrition for health and disease prevention and treatment in large animals in different stages of life. May count either VMED 9320 or VMED 9420. Course may be repeated for a maximum of 6 credit hours.

VMED 9440 CLINICAL VETERINARY PARASITOLOGY (1) LEC. SU. Departmental approval. This course will provide students with a case-based lecture format for expansion of foundational parasite knowledge, focusing on further discussions of the diagnosis, treatment, and prevention of common parasitic problems faced by general practitioners (small animal, large animal, and mixed) in the US. Hosts will include, but not be limited to: dogs, cats, horses, cattle, small ruminants, camelids, poultry and swine.

VMED 9450 EQUINE VETERINARY HUSBANDRY (1) LEC. 1. SU. This course is designed to familiarize veterinary students with the basic principles of equine husbandry as related to veterinary medicine, including uses and medical conditions of certain breeds, biosecurity, infectious disease prevention, parasite control programs, dental and hoof care, transport, and nutrition.

VMED 9460 FELINE MEDICINE ELECTIVE (1) LEC/LLB. SU. Departmental approval. This course provides an opportunity to increase practical knowledge of a variety of topics in feline medicine. Topics are designed to supplement course work, or include areas that are not covered in depth in regular courses.

VMED 9470 PRACTICAL KNOWLEDGE FOR EQUINE PRACTITIONERS (1) LEC. 1. SU. Discussions of common equine practice topics by medicine and surgery clinicians and staff.

VMED 9480 SPECTRUM OF CARE SERIES: INFORMATION LITERACY (1) LEC. 1. LAB. 0, LLB. 0. SU. Pr. VMED 9780. As part of the Spectrum of Care Series, this course focuses on identifying, critically evaluating, and applying different types of veterinary literature in academia and different types of private practice models. Additionally, students will be exposed to clinical, novel experiences and research presentations where they will have the ability to think through clinical presentations, provide high-quality feedback, and reflect on applications to their future practice.

VMED 9490 SPECTRUM OF CARE SERIES: EMERGING TECHNOLOGY (1) LEC. 1, LAB. 0-2, LLB. 0. SU. Pr. VMED 9780. As part of the Spectrum of Care Series, this course focuses on emerging technologies in veterinary medicine with a heavy focus on the use of artificial intelligence. This course will focus on how research goes from the benchtop to clinical practice and explore how new technology is developed. Additionally, students will explore the risks, benefits, limitations, and use of artificial intelligence and emerging technologies in veterinary medicine.

VMED 9500 SPECTRUM OF CARE SERIES: PUBLIC SPEAKING AND SOCIAL MEDIA IN MEDICAL PRACTICE (1) LEC. 1, LAB. 0-2, LLB. 0. SU. Pr. VMED 9780. As part of the Spectrum of Care Series, this course focuses on public speaking and use of social media and its practical use in medical practice. This course will be aimed at discussing the various types of speaking that veterinarians and health care professionals are asked to do, how to prepare to give a talk/ continuing education event, and how to engage guest lecturers about best practices in public speaking.

VMED 9502 CURRENT TOPICS IN VETERINARY MEDICINE (1) LEC. 1. SU. Emerging topics in veterinary medicine, current literature. Course may be repeated for a maximum of 15 credit hours.

VMED 9510 HEMOLYMPHATIC SYSTEM (1) LEC. 3. LAB. 1. Diagnosis, treatment and prevention of diseases affecting the integumentary and hemolymphatic systems. Course may be repeated for a maximum of 3 credit hours.

VMED 9520 CARDIOVASCULAR SYSTEM (2) LEC. 3. LAB. 1. Pathophysiology, pathologic lesions, radiographic and ultrasonographic lesions, diagnosis, treatment and prevention of diseases affecting the cardiovascular system.

VMED 9530 RESPIRATORY SYSTEM (3) LEC. 3. Pathophysiology, pathologic lesions, radiographic and ultrasonographic lesions, diagnosis, treatment and prevention of diseases affecting the respiratory system.

VMED 9540 SMALL ANIMAL ALIMENTARY SYSTEM (2) LEC. 5. Pathophysiology, pathologic lesions, radiographic and ultrasonographic lesions, diagnosis, treatment and prevention of diseases affecting the alimentary system. Course may be repeated for a maximum of 6 credit hours.

VMED 9550 URINARY SYSTEM (2) LEC. 3. Pathophysiology, pathologic lesions, radiographic and ultrasonographic lesions, diagnosis, treatment, and prevention of disease affecting the urinary system.

VMED 9560 ENDOCRINE SYSTEM (2) LEC. 3. Pathophysiology, pathologic lesions, diagnosis, treatment and prevention of diseases of the endocrine system.

VMED 9570 THERIOGENOLOGY (4) LEC. 5. Pathophysiology, pathologic lesions, radiographic and ultrasonographic lesions, diagnosis, treatment; and prevention of diseases of the reproductive system.

VMED 9580 NERVOUS SYSTEM (2) LEC. 5. LAB. 1. Pathophysiology, pathologic lesions, radiographic and ultrasonographic lesions, diagnosis, treatment, and prevention of diseases affecting the nervous system.

VMED 9590 MUSCULOSKELETAL SYSTEM (3) LEC. 3. Pathophysiology; pathologic, radiographic and ultrasonographic lesions; diagnosis; treatment; and prevention of diseases affecting the musculoskeletal system.

VMED 9600 ADVANCED EQUINE PHYSICAL DIAGNOSIS I (1) LAB. 1. SU. Departmental approval. An introduction to basic physical examination techniques and clinical conditions commonly used when examining horses clinically. Part 1 of a 2 part series, this course introduces students to common clinical conditions that may be encountered in equine practice.

VMED 9601 VETERINARY CLINICAL ROTATIONS (0-3) CLN. 40. Clinical experiences through various specialty service in the Veterinary Medical Teaching Hospital. Course may be repeated with change in topics.

VMED 9602 RESEARCH PROBLEMS IN BIOMEDICAL SCIENCE (1-10) RES. SU. Research problems in a variety of specialized disciplines for veterinary students and advanced undergraduates.

VMED 9610 ADVANCED EQUINE PHYSICAL DIAGNOSIS II (1) LAB. 1. SU. Departmental approval. This course is a continuation of physical examination techniques and diagnostic procedures used when examining horses clinically. This is the second part of a two part elective to introduce students to common procedures that may be encountered in clinical practice of equine medicine.

VMED 9620 INTEGRATIVE & COMPLEMENTARY MEDICINE (1) LEC. 1. SU. Departmental approval. This course will cover concepts in acupuncture, chiropractic adjustment, massage, and physical therapy as applied to veterinary medicine. The laboratory session will allow for hands on experience through application of techniques.

VMED 9621 CLINICAL ROTATIONS IN VETERINARY MEDICINE (0-2) CLN. 40. Clinical practicum experiences in large and small animal teaching hospitals on the veterinary medical campus. Course may be repeated with change in topics.

VMED 9630 LEGAL PRINCIPLES OF VETERINARY FORENSICS (1) LEC. 1. SU. Fundamental concepts of animal crimes and the role and responsibilities of veterinarians in reporting animal abuse and identifying, documenting, and processing forensic evidence in a criminal case.

VMED 9631 ALTERNATIVE ROTATIONS IN VETERINARY MEDICINE (2) CLN. 40. SU. Clinical practicum experiences in alternative large and small animal disciplines. Course may be repeated with change in topics.

VMED 9640 LARGE ANIMAL ALIMENTARY SYSTEM (2) LEC. 5. Pathophysiology, pathologic lesions, diagnosis, treatment and prevention of diseases affecting the large animal alimentary system. Course may be repeated for a maximum of 6 credit hours.

VMED 9660 BASIC SPANISH FOR VETERINARIANS (1) LEC. 1. SU. Departmental approval. Learn basic words and terminology used in veterinary medicine, including species, household and farm items, basic body parts, etc.

VMED 9669 ADVANCED SPANISH FOR VETERINARIANS (1) LEC. 1. SU. Learn how to communicate in Spanish different diseases, treatments and recommendations for pet owners, including but not limited to dogs, cats, horses, cattle and farm animals. At the end of the course, students should be able to obtain a history, explanation of physical exam and diagnostic tests, description of clinical exam findings, treatments and recommendations.

VMED 9670 OPHTHALMOLOGY (1) LEC. 2. LAB. 1. Common procedures for evaluation, diagnoisis and treatment of eye disorders in domestic species are covered to provide basic veterinary ophthalmology knowledge to veterinary students.

VMED 9680 VACCINES (1) LEC. 1. SU. This course will cover animal and human vaccines, including their history, impact, and recent developments in vaccine technology through evaluation of current primary literature.

VMED 9690 REPTILE AND AMPHIBIAN MEDICINE (1) LEC. 1. SU. Diseases, treatment, husbandry, handling, restraint, examination, sample collection in reptiles and amphibians.

VMED 9700 INTRODUCTION TO ANESTHESIA (3) LEC. 3. LAB. 1. Principles and practices of veterinary anesthesia in large and small animals.

VMED 9720 DISASTER MEDICINE FOR VETERINARIANS (1) LEC. 1. SU. Pr. (VMED 9111 or VMED 5111). Explores the role of the veterinarian in preparing and responding to natural and man-made disasters, including animal health emergencies.

VMED 9730 SELECT TOPICS IN FOOD ANIMAL MEDICINE (1) LEC. 1. SU. This course covers a wide variety of topics involving food animals (bovine, swine, small ruminants, camelids and poultry) which are more in depth than in the standard DVM curriculum.

VMED 9750 DIAGNOSTIC VETERINARY ULTRASONOGRAPHY (1) LAB. 1. SU. Departmental approval. Basic physics, instrumentation, and scanning techniques of ultrasonography. Normal sonographic anatomy correlated with the cross-sectional anatomy of body structures and organs.

VMED 9760 INTRODUCTION TO AMERICAN SIGN LANGUAGE (1) LEC. 1, LAB. 0-1. SU. Introduction to American Sign Language using conversational methods. Covers vocabulary, grammatical usage, and culturally appropriate behavior within the deaf community.

VMED 9780 CLINICAL CONCEPTS & PROFESSIONAL DEVELOPMENT (1) LEC. 1. SU. A weekly case-based presentation that illustrates current concepts in the professional DVM curriculum, as well as concepts that are less commonly emphasized in the curriculum. Course may be repeated for a maximum of 6 credit hours.

VMED 9800 APPLIED SMALL ANIMAL NEUROLOGY (1) LEC. 1. SU. Clinical management of commonly occurring neurologic diseases of small domestic animals.

VMED 9801 PRECEPTORSHIP (3) LAB. 320. SU. Training in a practice situation under the direct supervision of a veterinarian or, under certain conditions, in specialized programs. Approval of Preceptorship Committee.

VMED 9802 DATA ANALYSIS OF EPIDEMIOLOGICAL STUDIES (1) LEC. 1. SU. Departmental approval. This course will cover basic data analysis of epidemiological studies that will be especially useful to students considering pursuit of an internship or residency. Epidemiologic techniques emphasized will be outbreak investigation, evaluation of diagnostic tests and disease surveillance.

VMED 9810 INTEGUMENTARY SYSTEM (2) LEC. 2. Diagnosis, treatment and prevention of diseases affecting the integumentary system.

VMED 9820 THERIOGENOLOGY: A CASE-BASED APPROACH (1) LEC. 1. LAB. 1. SU. Class discussions will surround those topics not covered elsewhere in the core reproductive curriculum (e.g., innate breeding behaviors, advanced techniques such as in-vitro production of embryos, in-depth penile injury management, and advanced dystocia management to name a few). There will be an emphasis placed on current research and literature discussion on a weekly basis.

VMED 9830 MARINE MAMMAL MEDICINE (1) LEC. 1. SU. Departmental approval. Students will receive basic, introductory, and cursory instruction on the clinical medicine involved in the management of some marine mammal species commonly found in oceanariums and marine parks. Provided laboratory session(s) will allow for minor hands-on experience to illustrate concepts. Course is off-site at Gulfworld Marine Park in Panama City Beach FL. Students are financially responsible for travel and lodging expenses.

VMED 9840 WILDLIFE DISEASES (1) LEC. 1. SU. Control and role of veterinarian in prevention of disease in wild animals, specifically wildlife indigenous to U.S.

VMED 9850 MARINE ANIMAL ANATOMY AND NECROPSY TECHNIQUES (2) LAB. SU. Departmental approval. This course will provide an overview of dolphin, pinniped and sea turtle anatomy, necropsy techniques and live and dead animal stranding response. This course will be spread over two weekend-long sessions.

VMED 9860 SURGERY THROUGH HISTORY AND APPLICATION (1) LEC/LLB. SU. Pr. P/C VMED 9310. This class will examine the history and development of surgery using many of the historical figures that shaped modern surgery. The overall goal is to obtain a deeper appreciation of the foundations of surgery and how this foundation impacts its current day practice. Classes will focus on the early contributors to both the performance of surgery and the required knowledge supporting its performance, such as aseptic technique and anesthesia.

VMED 9870 AQUATIC ANIMAL MEDICINE (1) LLB. SU. Departmental approval. Students will receive basic, introductory, and cursory instruction on the clinical medicine involved in the management of some aquatic animal species commonly found in oceanariums. Provided laboratory session(s) will allow for minor hands-on experience to illustrate concepts. Course is off-site at Gulfworld Marine Park in Panama City Beach FL. Students are financially responsible for travel and lodging expenses.

VMED 9890 GENOMICS AND PRECISION MEDICINE (1) LEC. 1. SU. With this course, the student is expected to have a thorough understanding of the historical and current status of the studies on genomics and personalized medicine, with a specific focus on veterinary species.

VMED 9900 DVM GRADUATION COURSE (0) LAB/LEC. SU. Successful completion of this course involves submission of all required competency and case logs, as well as all required graduation assessments.

VMED 9940 COMPANION ANIMAL THERIOGENOLOGY (1) LEC. 1. SU. This course gives students an overview of companion animal reproduction. It is clinically based and offers lectures and discussions to provide a better understanding and deeper knowledge of canine and feline reproduction in practice.

VMED 9950 SPECTRUM OF CARE SERIES: CAPSTONE PRESENTATION (1) SEM. 1. SU. Culminating the final course in the SOCS this course will allow students to apply the skills from their previous courses and implement them into a final Capstone Presentation. In this course students will work with a mentor to prepare an oral presentation and deliverable based on a clinical case, research project, or novel learning experience around the practice of veterinary medicine. Students will also be responsible for providing peer-to-peer feedback for fellow students.

VMED 9995 VETERINARY CLINICAL ROTATIONS - EXTERNSHIPS (0) CLN. Successful completion of didactic veterniary curriculum. Students will participate in clinical rotations including specialty rotations.

Minors

- Public Health (p. 1371)
- Honors Public Health (p. 1370)

Honors Public Health Minor

Honors Public Health Minor

The Honors Public Health Minor is 15 hours consisting of five 3-hour courses: four required courses (12 hours) and one elective course (3 hours). Four of the five courses must be taken at the honors level to successfully complete the minor. Three of the PAOH courses are honors level, so the chosen elective must be an honors elective or contracted for honors credit (arranged through Honors college) to make four total honors courses. The elective must be approved by the Advisor. The minor is limited to students in the Honors College.

Course list:

Code	Title	Hours
PAOH 2107	Honors Introduction to Public Health	3
PAOH 3017	Honors Introduction to Epidemiology	3
PAOH 4837	Honors Global and Comparative Health Systems	3
PAOH 4910	Observing Needs in Public Health	3
Honors Elective (approved by Advisor)		3
Total Hours		**15**

TOTAL HOURS - 171

Students are required to have 3 hours of elective credit in the pre-clinical curriculum (semesters 2-5), but may have more. In spring of year 3 (semester 6), students are required to take EITHER VMED 9320 or VMED 9420, but may take both, if their schedule allows.

Most clinical rotations are two weeks long with rare 3-week exceptions. Each student must complete 13 core clinical rotations and 9 elective rotations, which are selected from a pre-approved list.

University College

University College fosters the growth of interdisciplinary and cross-college academic programs. Its programs are designed to provide intellectual opportunities for students whose interests, aptitudes, and career goals range widely across college boundaries. It is the home of the Interdisciplinary University Studies undergraduate major and the Sustainability Studies and Leadership minors.

Majors

- Interdisciplinary University Studies (p. 1377)

Minors

- Informational and Cyber Analysis (p. 1377)
- Leadership (p. 1378)
- Sustainability Studies (p. 1380)

Undergraduate Certificates

- Contemporary Korea

Interdisciplinary Studies Courses

IDSC 1010 LIFE, CAREER, AND EVERYTHING (3) LEC. 3. This course provides an in-depth exploration of each student's strengths and interests, and includes a series of exercises and experiences designed to guide the student in the selection of a degree path.

IDSC 2000 CONTEMPORARY KOREA (3) LEC. 3. Overview of the human, physical, and technological context of the Republic of South Korea through a combination of lectures, readings, presentations, and discussions, utilizing the expertise of Auburn colleagues across the disciplines.

IDSC 2190 FOUNDATIONS OF INTERDISCIPLINARY UNIVERSITY STUDIES (3) LEC. 3. Provides students with an introduction to (1) the major approaches and applications of interdisciplinary studies, (2) an examination of disciplinary and interdisciplinary thinking; and (3) an introduction to concepts and methods of interdisciplinary study.

IDSC 3210 ADVANCED INTERDISCIPLINARY PROBLEM SOLVING (3) LEC. 2. LAB. 2. Pr. IDSC 1010 and (IDSC 2190 or IDSC 2193). This is a synthesis course designed to provide students with practice in applying interdisciplinary methods to the solution of real-world problems and to prepare them to communicate those solutions to a diverse audience.

IDSC 4920 INTERDISCIPLINARY CAPSTONE EXPERIENCE (3) INT. 3. Pr. IDSC 1010 and (IDSC 2190 or IDSC 2193) and (IDSC 3210 or IDSC 3213). Capstone course designed to apply Interdisciplinary Degree Coursework to an internship project. Course may be repeated for a maximum of 6 credit hours.

IDSC 4930 INTERDISCIPLINARY CAPSTONE EXPERIENCE (3) LEC. 2. LAB. 2. Pr. IDSC 1010 and (IDSC 2190 or IDSC 2193) and (IDSC 3210 or IDSC 3213). Capstone course designed to apply Interdisciplinary Degree Coursework to a senior thesis project. Course may be repeated for a maximum of 6 credit hours.

IDSC 5950 GRADUATE FOOD SYSTEMS SEMINAR (1) SEM. 1. This is a required course for graduate students in the Food Systems Graduate Certificate Program. Discussion and presentation of integrated and interdisciplinary food system topics. Course may be repeated for a maximum of 2 credit hours.

IDSC 6950 GRADUATE FOOD SYSTEMS SEMINAR (1) SEM. 1. This is a required course for graduate students in the Food Systems Graduate Certificate Program. Discussion and presentation of integrated and interdisciplinary food system topics. Course may be repeated for a maximum of 2 credit hours.

Intl Programs-Special Topics Courses

INTL 1500 DEVELOPING A GLOBAL MINDSET IN AN INTERCONNECTED WORLD (1) LEC/SEM. This interdisciplinary course introduces students to the knowledge and skills needed to become globally competent in the 21st century. It also provides an orientation to the university's international resources, offices, majors, minors, curricula, and co-curricular opportunities. An assessment is also made of the students' initial intercultural intelligence.

INTL 1800 ORAL PROFICIENCY IN ENGLISH FOR INTERNATIONAL STUDENTS (3) LEC. 3. SU. Departmental approval. International students develop lecture note-taking skills, classroom oral presentation skills on general and specific subjects, and debating skills. None for degree-enrolled students; for transient students.

INTL 1820 CLASSROOM COMMUNICATION SKILLS FOR INTERNATIONAL TEACHING ASSISTANTS (3) LEC. 3. SU. Oral language skills required for effective classroom communication.

INTL 1830 WRITING PROFICIENCY IN ENGLISH FOR INTERNATIONAL STUDENTS (3) LEC. 3. SU. Skills that international students need to undertake successful research writing in English.

INTL 1840 READING SKILLS FOR ESL (3) LEC. 3. SU. Comprehend extensive university-level readings, identify author's audience, purpose, viewpoint and tone, read 250 words per minute. None for degree-enrolled student; for transient students, one of the following: pBT TOEFL of 500, iBT TOEFL of 61, IELTS of 6.

INTL 3930 DIRECTED INTERNATIONAL STUDY (2-8) AAB. Directed study-abroad or 'internationalization at home' experiences for upper-division or non-degree students to provide students with field learningand campus or distance experiences that build upon allied coursework and co-curricular activities. Course can be offered on-campus or with one or more weeks abroad. Course may also be used for internationalization instruction on campus or by distance for off-campus students. Course may be repeated for a maximum of 8 credit hours.

INTL 3937 HONORS DIRECTED INTERNATIONAL STUDY (2-8) AAB. Pr. Honors College. Directed study-abroad or 'internationalization at home' experiences for upper-division or non-degreestudents to provide students with field learning and campus or distance experiences that build upon allied coursework and co-curricular activities. Course can be offered on-campus or with one or more weeks abroad. Course may also be used for internationalization instruction on campus or by distance for off-campus students. Course may be repeated for a maximum of 8 credit hours.

INTL 3980 GLOBAL MINDSET CAPSTONE COURSE (2) LEC/SEM. Departmental approval. This course assists students in internationalizing their careers by expanding their capacities to work collaboratively within a multi-disciplinary group setting in an international and intercultural context. Through course content, assignments and reflections, students will learn to effectively communicate their global experiences and how these academic and life experiences enhance their ability to succeed in a globally connected world.

INTL 4400 INTERNATIONAL INTERNSHIP (0-12) AAB/INT. SU. Internship abroad or in the US for 0-12 hours, as approved by faculty supervisor per the plan for internship. Can be used for major, minor or certificate as designated in descriptions of these programs. Can be used for internships abroad as well as for international students on CPT/AT that are undertaking an internship in the US. Prerequisites will depend on the faculty supervisor overseeing individual student's internship. Course may be repeated for a maximum of 12 credit hours.

INTL 4407 HONORS INTERNATIONAL INTERNSHIP (1-12) AAB/INT. 20-40. SU. Pr. Honors College. Internship abroad or in the US for 1-12 hours, as approved by faculty supervisor per the plan for internship. Can be used for major, minor or certificate as designated in descriptions of these programs. Can be used for internships abroad as well as for international students on CPT/AT that are undertaking an internship in the US. Prerequisites will depend on the faculty supervisor overseeing individual student's internship. Course may be repeated for a maximum of 12 credit hours.

INTL 4420 INTERNATIONAL INTERNSHIP - FULL TIME ENROLLMENT (0) INT. 20-40. SU. Mirrors INTL 4400 but offered for zero (0) credit hours. This course is meant to track international students participating in internships for 0 credit hours. This course ensures designation as full-time students for immigration needs when approved by a faculty supervisor per the plan for internship. Can be used for major, minor or certificate as designated in descriptions of these programs. Prerequisites will depend on the faculty supervisor overseeing individual student's internship. Course may be repeated for a maximum of 1 credit hours.

INTL 4427 HONORS INTERNATIONAL INTERNSHIP - FULL TIME ENROLLMENT (0) INT. 20-40. SU. Mirrors INTL 4407 but offered for zero (0) credit hours to reflect full-time enrollment for international Honors students. Internship abroad or in the US for 0 credit hours, approved by faculty supervisor per the plan for internship. Can be used for major, minor or certificate as designated in descriptions of these programs. Can be used for internships abroad as well as for international students on CPT/AT that are undertaking an internship in the US. Course may be repeated for a maximum of 1 credit hours.

INTL 6400 INTERNATIONAL INTERNSHIP (1-9) AAB/INT. SU. Internship abroad for graduate level for 1-9 hours, as approved by faculty supervisor per the plan for internship. The plan will need to specify work required by faculty supervisor, hours of work, credits to be earned upon successful completion of course. Faculty supervisor will be responsible for oversight and grading. This course will assist students where an international internship will aid in their studies and career prospects. Can be used for major, minor or certificate as designated in descriptions of these programs. It will be the responsibility of the supervising faculty to supply accessible syllabus, textbook, videos, and other materials. It is the student's responsibility to their internship with the aid of their faculty supervisor. Prerequisite courses will depend on the faculty supervisor overseeing individual student's internship. Course may be repeated for a maximum of 9 credit hours.

INTL 6620 INTERNATIONAL GRADUATE INTERNSHIP IN THE USA - FT ENROLLMENT (0) INT. 20-40. SU. Mirrors INTL 6670 but offered for zero (0) credit hours to reflect full-time enrollment for international students. Domestic internship for international graduate students and for domestic graduate students wishing to work with international companies in the USA. This course can be utilized by students where no such course exists in their college. International graduate students must meet immigration internship requirements; students must check in with International Students and Scholars Services. Course may be repeated for a maximum of 1 credit hours.

INTL 6670 INTERNATIONAL GRADUATE INTERNSHIP IN THE USA (1-9) INT. 20-40. SU. Domestic internship for international graduate students and for domestic graduate students wishing to work with international companies in the USA. This course can be utilized by students where no such course exists in their college. International graduate students must meet immigration internship requirements; students must check in with International Students and Scholars Services within the Office of International Programs. Domestic graduate students must get approval from faculty internship supervisor. Course may be repeated for a maximum of 9 credit hours.

Leadership Courses

LEAD 2000 FOUNDATIONS OF LEADERSHIP (3) LEC. 2. LAB. 1. Introductory course for students pursing the Leadership Minor.

LEAD 2100 WOMEN AND LEADERSHIP (3) LEC. 3. An interactive exploration of the social, political, economic, and cultural implications of women's current and historic leadership roles.

LEAD 2200 INTRODUCTION TO COMMUNITY AND CIVIC ENGAGEMENT (3) LEC. 3. Introduction to Community and Civic Engagement introduces students to the context, issues, skills, and experience of citizenship and civic leadership in a democratic society.

LEAD 3200 LEADERSHIP FOR A GLOBAL SOCIETY (3) LEC. 3. This heavily discussion- and project-based seminar, coupled with reading list and plethora of guests, activities, and online resources, offers participants the tools required or effective leadership in an increasingly global society.

LEAD 4000 LEADERSHIP IN PRACTICE (3) LEC. 3. Pr. LEAD 2000. Capstone course in interdisciplinary leadership minor.

Sustainability Studies Courses

SUST 2000 INTRODUCTION TO SUSTAINABILITY (3) LEC. 3. Introduction to the interdisciplinary study of sustainability. May count either SUST 2000 or HONR 1027/HONR 1037.

SUST 2007 HONORS INTRODUCTION TO SUSTAINABILITY (3) LEC. 3. Pr. Honors College. Introduction to the interdisciplinary study of sustainability. May count either SUST 2000 or HONR 1027/HONR 1037.

SUST 3600 UNDERSTANDING NATURE, SELF, AND SOCIETY (3) LEC. 3. The course examines the intersection between nature, self, and society, and draws on sociological scholarship and nature writing. Through readings, class conversations, imaginative writing reflections, and short field trips, students will be able to critically interrogate our social relationship with nature and study the social dynamics that shape the meanings we attach to nature. Credit will not be given to both SOCY 3600 and SUST 3600.

SUST 4900 DIRECTED STUDIES IN SUSTAINABILILITY (1-3) IND. Departmental approval. Advanced individual research and/or coursework in the field of sustainability studies. Course may be repeated for a maximum of 3 credit hours.

SUST 5000 SENIOR CAPSTONE IN SUSTAINABILITY (3) LEC. 3. Pr. SUST 2000. Capstone research seminar for students completing the Minor in Sustainability Studies.

Certificate in Contemporary Korea

Code	Title	Hours
Required Courses		**9**

Requirements for Minor:		
SOCY 5120	Critical Thinking and Structured Analysis	3
BUAL 2650	Business Analytics II	3
Select 9 hours from the following or other approved area:		9
BUAL, COMP, ECON, GEOG, HIST, ISMN, POLI, SOCY, STAT, VBMS. Please see program advisor for approved courses within each area. The student is responsible for ensuring all pre-requisites are met.		
Admission Requirements:		
Application Form		
Writing Sample		
Continuation Requirements:		
12 of 15 hours must consist of upper-division courses unless an exception is approved.		
Successful completion and/or re-certification of Intelligence Oversight (I/O) training and CITI Basic course.		
Students must maintain a portfolio of relevant documents and material.		
Total Hours		**15**

Interdisciplinary Studies (IDSC)

The Bachelor of Science in Interdisciplinary University Studies allows students to attain a broad education and acquire diverse skill sets unique to a profession they desire to enter. Students seeking an interdisciplinary university studies degree have the opportunity to create a personalized academic program by customizing a curriculum that demonstrates proficiency in broad skills as well as discipline-specific knowledge.

Students may be admitted as freshmen. For progression to Advanced Interdisciplinary Problem Solving (IDSC 3210), a student must first (1) complete Life, Career, and Everything (IDSC 1010) with a grade of C or better, (2) complete Foundations of Interdisciplinary University Studies (IDSC 2190) with a grade of C or better, and (3) complete an approved individualized curriculum plan. Students with more than 90 hours of coursework must receive special permission to be admitted to the major.

Students must also earn a grade of C or better in Public Speaking (COMM 1000), and in one advanced written communication class to be selected from Writing in Law and Justice (ENGL 3020), Technical Writing (ENGL 3040), Writing in the Health Professions (ENGL 3060), Business Writing (ENGL 3080) or Advanced Composition (ENGL 4000). Students may elect to use COMM 1000 to meet 3 hours of the Humanities Core requirements. Students must take IDSC 3210 before they will be allowed to take the Capstone course. IDSC 3210 cannot be taken until the student has passed IDSC 2190 with a grade of C or better. All students must also complete a capstone experience (IDSC 4930 or IDSC 4920) with a grade of C or better. In the capstone experience, students integrate acquired knowledge through a research project (IDSC 4930), or an internship program (IDSC 4920). Students must earn 3

hours of capstone credit and may earn a maximum of 6 hours of capstone credit. Students electing to take the capstone course twice must use elective hours for the additional three hours.

The student creates two or three identifiable areas of emphasis using coursework from two or three different schools or colleges. The emphases must have a total of 45 hours of approved coursework. A student identifying two areas of emphasis must have at least 21 hours of coursework in one emphasis (the majority of which is from one college or school) and up to 24 hours in the other (the majority of which is from the second college or school) for a total of 45 hours. A student identifying three areas of emphasis must have 15 hours of coursework in each emphasis. For two- or three emphasis plans, at least 27 of the 45 hours must be at or above the 3000 level. Students may use existing minors in their emphasis areas or they may work with the departmental representative in a specific area to develop an emphasis. Minors used in emphases become part of the interdisciplinary studies degree and will not be listed on the official transcript or the diploma. Note that the IDSC faculty review committee will not approve a combination of minors or areas of emphasis that substantially recreates an existing degree program in those areas.

Interdisciplinary University Studies

Code	Title	Hours
Auburn University Core Curriculum [1]		41-42
Major Coursework [2]		
Interdisciplinary Foundations and Capstone		**12**
IDSC 1010	**Life, Career, and Everything [3]**	
IDSC 2190	**Foundations of Interdisciplinary University Studies [3]**	
IDSC 3210	**Advanced Interdisciplinary Problem Solving [3]**	
IDSC 4930	**Interdisciplinary Capstone Experience [3]**	
or IDSC 4920	**Interdisciplinary Capstone Experience**	
Advanced Written Communication [4]		**3**
Individual Plan of Study incorporating multiple emphases [5]		**45**
Electives		18-19
Minimum Hours		120

1. COMM 1000 (https://bulletin.auburn.edu/search/?P=COMM%201000) must be used to satisfy 3 hours of Humanities in the Core Curriculum.
2. Major course hours are used to calculate the GPA in the major.
3. Must earn a C or better in each IDSC course. Students must earn a C or better in lower level IDSC courses to successfully progress to upper level IDSC courses.
4. Must earn a C or better in one of the following: ENGL 3020, ENGL 3040, ENGL 3060, ENGL 3080, ENGL 4000
5. The Individual Plan of Study will include a total of 45 hours selected across two emphases (at least 21 hours in one emphasis and no more than 24 hours in the second emphasis) or across three emphases (each with at least 15 hours). Emphases must be selected from at least two different Schools or Colleges. A plan of study substantially recreating an existing degree program in a School or College will not be approved. See the IDSC Advisor for other requirements associated with two- and three-emphases plans of study.

Leadership Minor

Auburn University offers an interdisciplinary Leadership Minor (LEAD). In order to pursue a minor in leadership, students should file a minor declaration, in consultation with the LEAD advisor/coordinator, as early as possible. The declaration is ideally completed within the first semester of taking courses toward the minor. The completion and filing of the declaration is a prerequisite to enrolling the senior capstone class (LEAD 4000) in the LEAD minor. Courses required in the student's major may not be counted toward the minor even if they are on the list of accepted courses. Courses counted toward Core Curriculum requirements may not be counted toward the minor. At least 3 hours must be taken from each of five competency areas, with 9 of the 15 hours at the 3000 level or above. The competency areas are: I.) Leadership Knowledge and Theory, II.) Communication, III.) Problem Solving and Decision Making, IV.) Civic Engagement, and V.) Service Learning.

15 semester Hours in minor (minimum 9 hours at 3000-level or above)

Code	Title	Hours
Leadership Foundations		
LEAD 2000	Foundations of Leadership	3
Leadership Theory and Practice		
LEAD 4000	Leadership in Practice	3

Sustainability Studies Minor

Problems of environmental degradation, social justice, and economic inequality have never been more pressing, and the demand for people with the determination and skills to address them has never been greater. With a diverse selection of courses from colleges across the university, the interdisciplinary minor in sustainability studies offers students the opportunity to gain wide-ranging expertise and hands-on experience with the most crucial issues in contemporary society.

For more information on the Minor in Sustainability Studies, see the program's website at https://cla.auburn.edu/academic-sustainability/.

Minor in Sustainability Studies

15 semester hours in minor (minimum 9 hours at 3000-level or above)

Code	Title	Hours
SUST 2000	Introduction to Sustainability	3
SUST 5000	Senior Capstone in Sustainability	3
Approved Electives [1]		9
Total Hours		**15**

[1] Approved electives, see Minor in Sustainability Studies website for listing. https://cla.auburn.edu/academic-sustainability/.

Exploratory Major

The Exploratory major, offered through the Exploration Center in Career Discovery and Success (p. 169), allows new first-time college students to investigate their options before declaring a degree-granting major. Exploratory majors take EXPL 1010 Exploratory Investigations I, taught by a cross-trained team of academic advisors and career counselors who provide intensive and personalized support designed to help students choose the major that most closely meets their academic aptitudes and interests as well as their long-term goals.

While exploring, students work on college-readiness skills and receive academic advising on what courses will best keep them on track with potential majors. The goal is to help students choose a major with confidence while making progress toward their degree.

This option is ideal for students who are uncertain which broad academic area they wish to pursue, especially if their interests range across more than one of Auburn's colleges. All students who enter Auburn University as an Exploratory major must select a degree-granting major by the end of their second semester.

Students who enter Auburn as transfer students are not eligible to enroll as Exploratory. The Exploration Center does support current Auburn students and incoming transfer students through appointments and exploration resources. For more information on these services, please see the page on Career Discovery and Success (p. 169) in the Academic Services section of this bulletin.

Additional information may be obtained by calling (334) 844-7277 or emailing explore@auburn.edu.

Courses

EXPL 1010 EXPLORATORY MAJOR INVESTIGATIONS I (2) LEC. 2. For students in the Exploratory Major. This course introduces students to the majors offered at Auburn, and through a program of readings, research, professional outreach, analysis, and reflection helps them decide on a degree-granting major.

EXPL 1020 EXPLORATORY MAJOR INVESTIGATIONS II (1) LEC. 1. Pr. EXPL 1010. For students in their second and final semester as an Exploratory Major. This course continues and deepens the exploration through readings, research, professional outreach, analysis, and reflection to help students select a degree-granting major.

Honors College

The Honors College at Auburn University offers a select cohort of high-ability students a unique academic experience designed to provide many of the advantages of a small college in addition to the myriad opportunities available at a large and diverse research university. Because of their academic potential, Honors College students have access to a more academically challenging set of courses and programs. Due to their rigorous Honors-level courses, access to graduate courses, specialized advising, and regular exposure to diverse social and co-curricular programs, Honors College students have closer connections to faculty and with other students, providing a sense of community and identity within the larger university context.

Eligibility

Students may gain admission to the Honors College as an entering freshman based on ACT/SAT scores (29 or SAT equivalent targeted minimum), high school GPA (3.85 minimum), an application essay, and a record of leadership and service. Students already enrolled at Auburn having a 3.4 cumulative, unadjusted GPA may also be considered for admission.

Curriculum

The Honors curriculum provides Honors College students the opportunity for challenging scholarly courses across the university and within their disciplines, culminating in a sustained, in-depth experience in their major fields of study.

The four Honors College graduation distinctions, *University Honors Scholar, University Honors Research Scholar, Honors Scholar,* and *Honors Research Scholar*, are conferred at the time of graduation and printed on students' diplomas and transcripts.

University Honors Scholar

To earn the designation University Honors Scholar, students are required to complete a minimum of 30 hours of Honors College courses, including a minimum of:

- 3 hours of Honors Participation Courses, AND
- 6 hours of coursework identified as Signature Impact Experiences

Students must also complete their disciplinary requirements and have a minimum 3.4 cumulative unadjusted Auburn GPA at the time of graduation.

University Honors Research Scholar

To earn the designation University Honors Research Scholar, students are required to complete a minimum of 30 hours of Honors College courses, including a minimum of:

- 3 hours of Honors Participation Courses; 1 hour of which **must be** **"**Honors Lyceum: Research at Auburn"
- 3 hours of Honors Research Methods
- 6 hours of Honors Seminars
- 6 hours of designated Honors Research Seminars
- 6 hours of coursework identified as Signature Impact Experiences

Students must also complete their disciplinary requirements and have a minimum 3.4 cumulative unadjusted Auburn GPA at the time of graduation.

OR

Honors Scholar

To earn the designation Honors Scholar, students are required to complete a minimum of 24 hours of Honors College coursework, including a minimum of:

- 3 hours of Honors Participation Courses

Students must also complete their disciplinary requirements and have a minimum 3.2 cumulative unadjusted Auburn GPA at the time of graduation.

-OR-

To earn the designation Honors Scholar, students are required to complete a minimum of 7 hours of Honors coursework, including:

- 6 hours of Honors Research/Honors Thesis/Honors Special Topics or 6 hours of graduate level courses in the major field of study at the 6000 or 7000 level, AND
- 1 hour of an Honors Participation course

Students must also complete their disciplinary requirements and have a minimum 3.2 cumulative unadjusted Auburn GPA at the time of graduation.

Honors Research Scholar

To earn the designation University Honors Research Scholar, students are required to complete a minimum of 24 hours of Honors College courses, including a minimum of:

- 3 hours of Honors Participation Courses; 1 hour of which **must be** **"**Honors Lyceum: Research at Auburn"
- 3 hours of Honors Research Methods
- 6 hours of Honors Seminars
- 6 hours of designated Honors Research Seminars

Students must also complete their disciplinary requirements and have a minimum 3.2 cumulative unadjusted Auburn GPA at the time of graduation.

Honors Course Options

The Honors College curriculum is designed to give students flexibility with their choice of Honors courses in order to fulfill their diverse goals, needs, and interests. The Honors College offers students course work that fall into the following general areas:

Honors Academic Courses

- Honors University Core courses
- Honors Departmental courses
- Honors Study and Travel courses (maximum of 1)
- Honors Seminars (maximum of 2)
- Honors Research Methods courses (maximum of 2)
- Honors Research Seminar (maximum of 2)
- Honors Contract courses

Honors Participation Courses

- Honors Freshmen Exploration (one-time enrollment as a first-year student)
- Honors Lyceum (maximum of 2)
- Honors Book Club (maximum of 2)
- Honors Forum (maximum of 3)

Honors Signature Impact Experiences

- Honors Research
- Honors Thesis
- Honors Special Topics
- Honors Contract courses in the major field of study at the 4000-5000 level
- Graduate-level courses in the major field of study (maximum of 12 hours)

Honors Business Minor

The Honors Business minor is 15 hours consisting of five 3-hour courses: four required courses (12 hours) and one elective course (3 hours). Four of the five courses must be taken at the honors level to successfully complete the minor. The minor is limited to students in the Honors College.

Code	Title	Hours
Required Courses:		
ACCT 2110/2117	Principles of Financial Accounting *	3
FINC 3610/3617	Principles of Business Finance	3

MNGT 3100/3107	Principles of Management	3
MKTG 3310/3317	Principles of Marketing	3
Elective Courses (choose one):		
BUSI 3250/3257	International Business	3
ECON 2030/2037	Principles of Macroeconomics	3

* Students completing this minor in the College of Business summer abroad program will satisfy the Accounting requirement with ACCT 2817: Honors Fundamentals of Accounting.

Honors International Minor in Human Sciences

The Joseph S. Bruno Auburn Abroad in Italy program in which a student can earn the International Minor in one semester while studying abroad in Ariccia, Italy:

Code	Title	Hours
HUSC 3380	CHS at AU in Italy	2
HUSC 4017	Honors CHS at AU in Italy: Integrated Global Studies	6
HUSC 4387	Honors CHS at AU in Italy: Study and Travel	2
HUSC 4947	Honors CHS at AU in Italy: Directed Field Experiences	6
Total Hours		**16**

Study Abroad Program admission required. Please contact the CHS Office of Global Education for more information about program availability and application processes.

Honors Public Health Minor

The Honors Public Health Minor is 15 hours consisting of five 3-hour courses: four required courses (12 hours) and one elective course (3 hours). Four of the five courses must be taken at the honors level to successfully complete the minor. Three of the PAOH courses are honors level, so the chosen elective must be an honors elective or contracted for honors credit (arranged through Honors college) to make four total honors courses. The elective must be approved by the Advisor. The minor is limited to students in the Honors College.

Course list:

Code	Title	Hours
PAOH 2107	Honors Introduction to Public Health	3
PAOH 3017	Honors Introduction to Epidemiology	3
PAOH 4837	Honors Global and Comparative Health Systems	3
PAOH 4910	Observing Needs in Public Health	3
Honors Elective (approved by Advisor)		3
Total Hours		**15**

Policies

A grade of “C” or better in Honors courses is required to earn Honors College credit.

In order to remain in good standing as a member of the Honors College, students must meet the following minimum criteria:

1. Students are required to maintain satisfactory progress in completing the requirements of the Honors curriculum. Satisfactory progress is defined by attaining the following minimums by the end of the specified academic year:
   - First year 7 Honors hours
   - Second year 14 Honors hours
   - Third year 21 Honors hours
2. First-year students must attain a minimum of a 3.0 cumulative unadjusted Auburn GPA and second, third, and fourth-year students must maintain a minimum of 3.2 cumulative unadjusted Auburn GPA. A student whose GPA falls below the minimum is give one semester to correct the deficiency or be suspended from the Honors College.

3. All first-year students in the Honors College must meet with an Honors academic advisor in both fall and spring semesters and submit a Plan of Study prior to registration for spring courses. Any changes to the Plan of Study should be done at a meeting with an Honors College advisor.
4. Second, third, and fourth-year students must meet with an Honors academic advisor at least once a year to ensure retention and understanding of the program and to confirm progress being made toward the completion of the Honors requirements.
5. Students who do not successfully maintain good standing (Honors course progression, GPA, meeting at least once a year with their Honors advisor, and/or submission of the Plan of Study) will be suspended from the Honors College. Students may be reinstated upon attaining the minimum GPA and/or providing the Honors College with an updated Plan of Study for Honors courses. It is the student's responsibility to notify the College when good standing has been attained.
6. Any scholarships awarded by the Honors College are contingent upon maintaining membership in good standing in the Honors College. Suspension from the Honors College will result in a loss of Honors scholarship funding.

Honors College Graduation Distinctions

After completing the requirements of the Honors College curriculum, students graduate with a special designation that is noted on their diploma and transcript.

- To graduate as a *University Honors Scholar* or *University Honors Research Scholar,* students must complete all of the requirements for those designations, the requirements for their disciplines, and have a minimum cumulative unadjusted Auburn GPA of 3.4.
- To graduate as an *Honors Scholar or Honors Research Scholar,* students must complete all of the requirements for those designations, the requirements for their discipline, and have a minimum cumulative unadjusted Auburn GPA of 3.2.

Interdepartmental Undergraduate Programs

Bioprocess Engineering (BPEN)

The curriculum in bioprocess engineering is coordinated by the Samuel Ginn College of Engineering and prepares students to seamless combine engineering and natural sciences to design and develop systems, processes and equipment that convert biological and agricultural materials to value-added products such as food, nutraceuticals, polymers and pharmaceuticals. See Department of Biosystems Engineering (p. 631) in the Samuel Ginn College of Engineering for further information.

Biosystems Engineering (BSEN)

The curriculum in Biosystems Engineering is coordinated by the Samuel Ginn College of Engineering and prepares students for productive careers in the biosystems industries and related natural resource and environmental systems sectors. See the Department of Biosystems Engineering (p. 631) in the Samuel Ginn College of Engineering for further information.

Ecological Engineering (ECEN)

The curriculum in ecological engineering is coordinated by the Samuel Ginn College of Engineering and prepares students to solve environmental problems by applying engineering knowledge to natural ecological and biological systems. See Department of Biosystems Engineering (p. 631) in the Samuel Ginn College of Engineering for further information.

Environmental Science (ENVI)

The curriculum in environmental science is an interdepartmental program based on the strengths of Auburn University in the engineering, biological and physical sciences. See the Department of Crop, Soil and Environmental Sciences (p. 216) in the College of Agriculture for further information.

Forest Engineering (FOEN)

The curriculum in Forest Engineering is coordinated by the Samuel Ginn College of Engineering and the College of Forestry, Wildlife and Environment and prepares students for professional careers in forest products industry and related natural resource and environmental systems sectors. See the Department of Biosystems Engineering (p. 631) in the Samuel Ginn College of Engineering for further information.

Materials Engineering (MATL)

The curriculum in materials engineering is an interdisciplinary curriculum conducted cooperatively by departments in the Samuel Ginn College of Engineering and the College of Sciences and Mathematics. See the Department of Mechanical Engineering (p. 704) in the Samuel Ginn College of Engineering for further information.

Reserve Officers' Training Corps

Departments

- Department of Air Force Aerospace Studies (p. 1388)
- Department of Military Science (p. 1390)
- Department of Naval Science (p. 1391)

Aerospace Studies (AFROTC) Courses

AIRF 1010 HERITAGE AND VALUES I (1) LEC. 1. This is a survey course designed to introduce students to the Department of the Air Force (DAF) and provides an overview of the basic characteristics, missions, communications and organization of the Air and Space Forces. This course can only be taken in Fall Semester.

AIRF 1011 AFROTC LEADERSHIP LABORATORY I (0) LAB. 3. SU. Departmental approval. Required for all AFROTC cadets. Leadership Lab (LLAB) is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Department of the Air Force Second Lieutenants and complement the AFROTC academic program. It is a student planned, organized, and executed practicum conducted under the supervision of the Detachment Commander and Operations Flight Commander. This course can only be taken in Fall Semester. Course may be repeated with change in topics.

AIRF 1020 HERITAGE AND VALUES II (1) LEC. 1. This is a survey course designed to introduce students to the Department of the Air Force (DAF) and provides an overview of the basic characteristics, missions, communications and organization of the Air and Space Forces. This course can only be taken in Spring Semester.

AIRF 1021 AFROTC LEADERSHIP LABORATORY II (0) LAB. 3. SU. Departmental approval. Required for all AFROTC cadets. Leadership Lab (LLAB) is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Department of the Air Force Second Lieutenants and complement the AFROTC academic program. It is a student planned, organized, and executed practicum conducted under the supervision of the Detachment Commander and Operations Flight Commander. This course can only be taken in Spring Semester. Course may be repeated with change in topics.

AIRF 2010 TEAM AND LEADERSHIP FUNDAMENTALS I (1) LEC. 1. This course provides a fundamental understanding of both leadership and team building. The lessons and course flow are designed to prepare students for field training and leadership positions in the detachment. This course can only be taken in Fall Semester.

AIRF 2020 TEAM AND LEADERSHIP FUNDAMENTALS II (1) LEC. 1. This course provides a fundamental understanding of both leadership and team building. The lessons and course flow are designed to prepare students for field training and leadership positions in the detachment. This course can only be taken in Spring Semester.

AIRF 3010 LEADING PEOPLE AND EFFECTIVE COMMUNICATION I (3) LEC. 3. Pr. AIRF 2020. Departmental approval. This course utilizes student’s field training experience to take a more in-depth look at leadership. Special emphasis is placed on enhancing communication skills, and why that is important as a leader. Students have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors. This course can only be taken in Fall Semester.

AIRF 3011 AFROTC PHYSICAL TRAINING I (0) LAB. 3. SU. Required for all AFROTC cadets. AFROTC Physical Training (PT) and combatives program for cadets pursuing a commission in the Department of the Air Force. This course can only be taken in Fall Semester. Course may be repeated with change in topics.

AIRF 3020 LEADING PEOPLE AND EFFECTIVE COMMUNICATION II (3) LEC. 3. Pr. AIRF 3010. Departmental approval. This course utilizes student’s field training experience to take a more in-depth look at leadership. Special emphasis is placed on enhancing communication skills, and why that is important as a leader. Students have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors. This course can only be taken in Spring Semester.

AIRF 3021 AFROTC PHYSICAL TRAINING II (0) LAB. 3. SU. Departmental approval. Required for all AFROTC cadets. AFROTC Physical Training (PT) and combatives program for cadets pursuing a commission in the Department of the Air Force. This course can only be taken in Spring Semester. Course may be repeated with change in topics.

AIRF 4010 NATIONAL SECURITY AND PREPARATION FOR ACTIVE-DUTY I (3) LEC. 3. Pr. AIRF 3020. Departmental approval. This course is designed for college seniors and provides them the foundation to understand their role as military officers and how they are directly tied to our National Security Strategy. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. This course can only be taken in Fall Semester.

AIRF 4011 AFROTC LEADERSHIP LABORATORY (0) LAB. 2. SU. Departmental approval. Required AFROTC Leadership Laboratory for students who are pursuing a commission in the US Air Force. Course may be repeated with change in topics.

AIRF 4020 NATIONAL SECURITY AND PREPARATION FOR ACTIVE-DUTY II (3) LEC. 3. Pr. AIRF 4010. Departmental approval. "National Security and Preparation for Active-Duty" is designed for college seniors and provides them the foundation to understand their role as military officers and how they are directly tied to our National Security Strategy. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. This course can only be taken in Spring Semester.

AIRF 4021 AFROTC LEADERSHIP LABORATORY (0) LAB. 0. SU. Departmental approval. Required AFROTC Leadership Laboratory for students who are pursuing a commission in the US Air Force. Course may be repeated with change in topics.

Military Science (AROTC) Courses

MILS 1010 INTRODUCTION TO ARMY (1) LEC. 1. Coreq. MILS 1011. Introduction to the Reserve Officer Training Corps and the US Army.

MILS 1011 INTRODUCTION TO ARMY LAB (1) LAB. 3. Coreq. MILS 1010. Introduction to the Reserve Officer Training Corps and the US Army.

MILS 1020 FOUNDATIONS OF LEADERSHIP (1) LEC. 1. Coreq. MILS 1021. Introduction to the Reserve Officer Training Corps and the U.S. Army.

MILS 1021 FOUNDATIONS OF LEADERSHIP LAB (1) LAB. 2.5. Coreq. MILS 1020. Introduction to the Reserve Officer Training Corps and the U.S. Army.

MILS 2010 LEADERSHIP AND ETHICS (1) LEC. 1. Coreq. MILS 2011. Learn and apply ethics-based leadership skills that develop individual attributes and contribute to effective team building.

MILS 2011 LEADERSHIP AND ETHICS LAB (1) LAB. 2. Coreq. MILS 2010. Learn and apply ethics-based leadership skills that develop individual attributes and contribute to effective team building.

MILS 2020 ARMY DOCTRINE & DECISION MAKING (1) LEC. 1. Coreq. MILS 2021. Introduction to individual and team aspects of military training in small unit operations.

MILS 2021 ARMY DOCTRINE & DECISION MAKING (1) LAB. 2.5. Coreq. MILS 2020. Introduction to individual and team aspects of military training in small unit operations.

MILS 3010 TRAINING MANAGEMENT & WARFIGHTING FUNCTIONS (2) LEC. 2. Coreq. MILS 3011. Departmental approval. Introduction to squad level planning and operations. Admittance into the Advanced Course of Army ROTC.

MILS 3011 TRAINING MANAGEMENT & WARFIGHTING FUNCTIONS LAB (1) LAB. 4. Coreq. MILS 3010. Departmental approval. Practical application of the foundational skills of small unit leadership. Admittance into Advanced Course Army ROTC.

MILS 3020 APPLIED LEADERSHIP IN SMALL UNIT OPERATIONS (2) LEC. 2. Pr. MILS 3010 and MILS 3011. Coreq. MILS 3021. Departmental approval. Introduction to platoon-level planning and operations and the U.S. Army Training Management System.

MILS 3021 APPLIED LEADERSHIP IN SMALL UNIT OPERATIONS LAB (1) LAB. 2.5. Pr. MILS 3010 and MILS 3011. Coreq. MILS 3020. Departmental approval. Series of practical opportunities to lead small groups, receive performance assessments and coaching, and lead again in situations of increasing complexity.

MILS 3030 HISTORY OF THE UNITED STATES ARMY (3) LEC. 3. Survey of the history of the United States Army from the colonial era to present.

MILS 4010 THE ARMY OFFICER (2) LEC. 2. Pr. MILS 3020 and MILS 3021. Coreq. MILS 4011. Plan, conduct and evaluate training and organizational cohesion.

MILS 4011 THE ARMY OFFICER LAB (1) LAB. 4. Pr. MILS 3020 and MILS 3021. Coreq. MILS 4010. Plan, conduct and evaluate training and activities of the ROTC cadet organization.

MILS 4020 COMPANY GRADE LEADERSHIP (2) LEC. 2. Pr. MILS 4010 and MILS 4011. Coreq. MILS 4021. Identify and resolve ethical dilemmas. Refine counseling and motivating techniques.

MILS 4021 COMPANY GRADE LEADERSHIP LAB (1) LAB. 2.5. Pr. MILS 4010 and MILS 4011. Coreq. MILS 4020. Practical application of the principles taught in MILS 4020.

MILS 4040 THE ARMY PROFESSION (0) LEC. 1. SU. U.S. Army current trends and affairs. Army policies and programs. Completion of Army ROTC Advanced Course or Early Commissioning Program.

Naval Science (NROTC) Courses

NAVS 1010 INTRODUCTION TO NAVAL SCIENCE (3) LEC. 3. Basic areas of Naval Science including uniforms and insignia, military courtesy, discipline, warfare components, organizational structure, and supporting elements of the U.S. Navy and U.S. Marine Corps.

NAVS 1011 INTRO TO NAVAL SCIENCE LAB I (1) LAB. 3. An introduction to the Reserve Officer Training Corps and the US Navy and USMC.

NAVS 1020 SEAPOWER AND MARITIME AFFAIRS (3) LEC. 3. Introduction to broad principles, concepts and elements of naval history, seapower, and maritime affairs from past to present.

NAVS 1021 INTRO TO NAVAL SCIENCE LAB II (1) LAB. 3. An introduction to the Reserve Officer Training Corps and the US Navy and USMC.

NAVS 2010 LEADERSHIP AND MANAGEMENT (3) LEC. 3. Fundamentals of leadership and management theory vital to the effectiveness of Navy/Marine Corps officers.

NAVS 2011 LEADERSHIP DEVELOPMENT LAB I (1) LAB. 3. To learn ethics-based leadership skills that develop individual attributes and contribute to effective team building. Includes naval drill, physical fitness and general military leadership instruction.

NAVS 2021 LEADERSHIP DEVELOPMENT LAB II (1) LAB. 3. To learn ethics-based leadership skills that develop individual attributes and contribute to effective team building.

NAVS 2060 NAVIGATION (3) LEC. 3. Theory and principles of piloting involving the use of visual and electronic aids.

NAVS 3011 SMALL UNIT LEADERSHIP LAB I (1) LAB. 3. Introduction to individual and team aspects of military training in small unit operations.

NAVS 3021 SMALL UNIT LEADERSHIP LAB II (1) LAB. 3. Series of practical opportunities to lead small groups, receive performance assessments and coaching, and lead again in situations of increasing complexity.

NAVS 3030 EVOLUTION OF WARFARE (3) LEC. 3. Pr. P/C NAVS 3011 or P/C NAVS 3021. Forms of warfare practices to identify historical continuity and change in the evolution of warfare. Explores the impact of historical precedent, economic factors and technological change on politico-military thought and action.

NAVS 3050 NAVAL SHIP SYSTEMS I (ENGINEERING) (3) LEC. 3. Principles of ship design, construction, and stability. Introduction to thermodynamics and the steam cycle as applied to naval propulsion systems.

NAVS 3060 NAVAL SHIP SYSTEMS II WEAPONS (3) LEC. 3. Theory and employment of systems through a study of fundamental principles of sensor, tracking, computational, and weapons delivery subsystems.

NAVS 4011 ENS AND SECOND LT LAB I (1) LAB. 3. Plan, conduct, and evaluate training and organizational cohesion. Identify and resolve ethical dilemmas. Refine counseling and motivating techniques.

NAVS 4020 LEADERSHIP AND ETHICS (3) LEC. 3. Pr. NAVS 2010. Departmental approval. Integrates an intellectual exploration of Western moral traditions and ethical philosophy with a variety of topics, such as military leadership, core values, and professional ethics.

NAVS 4021 ENS AND SECOND LT LAB II (1) LAB. 3. Discuss current events, affairs, policies and programs that affect the United States Navy and Marine Corps.

NAVS 4030 FUNDAMENTALS OF MANEUVER WARFARE (3) LEC. 3. Historical survey of the development of maneuver warfare in the context of military engagements and developments. Emphasis on the evolution of maneuver warfare in the United States Marine Corps in the 20th century.

NAVS 4050 NAVAL OPERATION AND SEAMANSHIP (3) LEC. 3. Inland and International law governing maritime operations, communication procedures, and other naval/maritime operational procedures.

Air Force Aerospace Studies

Commander, AFROTC Det 005
Professor of Aerospace Studies
Auburn University (334) 844-4355

The Air Force Reserve Officer Training Corps (AFROTC) is an educational program designed to give students the opportunity to become an Air Force or Space Force officer while completing an undergraduate degree. The program is designed to teach the necessary skills needed to accept the challenging opportunities encountered in the Air and Space Forces. AFROTC offers a pathway from college to many exciting career possibilities as an officer: flying, engineering, intelligence, computer systems, aircraft maintenance, management, etc. Interested students should contact the Air Force ROTC department (www.auburn.edu/afrotc (http://www.auburn.edu/afrotc/); email: AFROTC.Recruiter@auburn.edu; Phone: 334-844-4355; or visit us at 243 Nichols Center, Auburn University.)

General Military Course (GMC)

The GMC is the first half of the program and is typically taken during the freshman and sophomore years. This course allows the non-contracted student to “try out” Air Force ROTC without obligation. Students who pick up a High School Scholarship will contract before the semester begins and will have additional expectations to maintain their scholarship. As a member of the GMC, the student will learn basics about the Air Force, Space Force, and the historical development of airpower. The academic classes are one semester hour each. During the spring semester of their sophomore year, the student will compete for the opportunity to attend a Field Training encampment (see Field Training section below for additional information). Successful completion of field training is mandatory for entrance into the Professional Officer Course (POC); typically the junior and senior years of the program. Qualified students may enroll in both freshman and sophomore classes at the same time and spend only one year in the GMC if they only need three more years to graduate. Further, GMC students may be eligible to compete for an AFROTC scholarship that pays tuition and fees, and provides both an allowance for books and a non-taxable monthly stipend while school is in session.

Code	Title	Hours
AIRF 1010	Heritage and Values I	1
AIRF 1020	Heritage and Values II	1
AIRF 2010	Team & Leadership Fund. I	1
AIRF 2020	Team & Leadership Fund II	1

Professional Officer Course (POC)

The POC is the second half of the program, typically taken during the junior and senior years. POC students take on leadership roles, planning and running most cadet activities. This gives them valuable experience that prepares them to become an officer. Students in selected degree programs (e.g. engineering) may spend a third year in the POC to complete their degree. As a junior, the student will learn about various leadership roles and management techniques needed to become an effective Air Force officer. During the senior year, students will learn about foreign policy and national security while preparing them for entrance into active duty. These academic classes are three semester hours each.

Code	Title	Hours
AIRF 3010	Lead People & Effective Comm 1	3
AIRF 3020	Lead People & Effective Comm 2	3
AIRF 4010	Natl Sec. & Active-Duty Prep I	3
AIRF 4020	Natl Sec & Active-Duty Prep II	3

Leadership Laboratory (LLAB)

Each Air Force ROTC student pursuing a commission in the Air Force or Space Force is required to attend Practical Military Training (PMT) for up to six hours per week. PMT consists of a Leadership Laboratory (LLAB) and Physical Training (PT). Although no academic credit is awarded by the university, LLAB is an essential part of officer training. It is a cadet-centered program where the

student will learn such things as military customs and courtesies, drill and ceremonies, and proper wear of uniform. Physical Training is conducted to supplement the student's physical fitness - a requirement of the program. It is designed to help the students achieve passing scores on the Physical Fitness Assessment, offered at least once per semester. LLAB and PT are mandatory for cadets wishing to commission, but participating students who are seeking an Aerospace Studies Minor only are not required to attend.

Curriculum for Leadership Laboratory

Code	Title	Hours
AIRF 1011	AFROTC Leadership Laboratory I	0
AIRF 3011	AFROTC Physical Training I	0
AIRF 1021	AFROTC Leadership Laboratory 2	0
AIRF 3021	AFROTC Physical Training II	0

Field Training (FT)

Cadets completing the General Military Course attend FT during the summer at Maxwell Air Force Base, Alabama. This rigorous program of leadership training, physical conditioning, and academics assesses the cadet’s potential to be an officer. Cadets also receive survival and firearms training, career information, and may have the opportunity to engage in one or more military aircraft orientation flights. Cadets receive travel pay and a daily allowance for attending FT.

Air Force ROTC Scholarships

Air Force ROTC offers scholarships on a competitive basis to high school seniors and college students. These scholarships are offered to highly qualified students, primarily in scientific/technical majors or nursing. Please visit www.afrotc.com (http://www.afrotc.com) for the latest information about scholarships.

Army — Military Science

The purpose of the Army ROTC program is to select, train, and motivate the future leadership of the active Army, Army National Guard and Army Reserve. The curriculum is available to both men and women and prepares students to become effective leaders and managers in a variety of challenging fields.

The Army ROTC curriculum is divided into two courses: a Basic Military Course open to all students and an Advanced Military Course for qualified juniors, seniors and graduate students. The Basic Military Course serves to acquaint Auburn students with the Army and its role in our society; The Advanced Military Course prepares students for service as commissioned officers. Successful completion of both courses and award of a bachelor's degree constitute the normal progression to earning a commission as a Second Lieutenant. Students who are undecided about pursuit of a commission may participate in the Basic Military Course. This affords freshman and sophomore students the opportunity to make an informed decision on the advantages of an officer's commission while incurring no military obligation.

The Basic Military Course

The Basic Military Course consists of a four-semester block of instruction normally taken during the freshman and sophomore years. Successful completion of MILS 1010, MILS 1020, MILS 2010, and MILS 2020 with a leadership lab (MILS 1011, MILS 2021, MILS 2011, and MILS 2021) satisfies the academic requirements for progression to the Advanced Military Course. Two credit hours per semester are earned for the lecture and lab. Subject to departmental approval, students may complete all four courses in one academic year.

The basic military science courses provide unique classroom and hands-on instruction in orienteering, small unit tactics, first aid, physical fitness, and leadership skills. They introduce the student to the Army as a profession, lay the foundation of value-based, ethical decision-making, illuminating the Army's place in society preparing the Cadet for the Advanced Military Course that follows. The Professor of Military Science may admit the student to the Advanced Military Course upon completion of these courses and labs. Contracted Cadets currently receive a tax-free allowance of $420 per month while enrolled.

Courses are offered in the fall and spring semesters and credits earned may be applied as elective credits toward degree requirements in all schools of the university.

Basic Camp — Cadet Summer Training (CST)

Students who are unable to complete the Basic Military Course during their freshman and sophomore years may qualify for admission to the Advanced Course by successfully completing Basic Camp at Fort Knox, Kentucky.

Basic Camp consists of approximately five weeks of training conducted during the summer months. Students desiring to exercise this option are required to submit a formal application and pass a general medical physical and a physical fitness test. Students who participate in the Basic Camp will receive approximately $900 in addition to travel expenses to and from Fort Knox. Uniforms, housing, medical care and meals are furnished by the Cadet Command during training.

Interested students are strongly encouraged to enroll in a military science course and leadership lab during the spring semester of their sophomore year. Deadline for application is May 15. All applicants must contact the Military Science Department no later than May 1.

The Advanced Military Course

Successful completion of the Basic Military Course or approved alternative training, a minimum 2.0 grade-point average, and medical qualifications are pre-requisites for enrollment in the Advanced Military Course. Service veterans, transfer students from junior or military colleges, members of the National Guard or Army Reserve, and former military academy Cadets may qualify for direct entry into the Advanced Military Course two academic years before their projected graduation.

The Advanced Military Course is designed to develop a Cadet's leadership and management potential, physical stamina, Army Values, as well as the character traits desired of an Army officer. The program's objective is to produce the highest caliber junior officer, fully capable of accepting command in the modern Army, exercising management responsibilities and serving the broader community.

The Advanced Military Course consists of a four-semester block of instruction taken during the junior and senior years (MILS 3010, MILS 3020, MILS 4010, and MILS 4020). Successful completion of the courses, with a leadership lab (MILS 3011, MILS 3021, MILS 4011, and MILS 4021) each semester fulfills military science academic requirements for award of an officer's commission. Three credit hours per semester are earned for the lecture and laboratory. Cadets currently receive a tax-free allowance of $420 per month while enrolled.

Students enrolled in the Advanced Military Course are required to successfully complete approximately five weeks of leadership training at Fort Knox, Kentucky, during the summer to become eligible for commissioning. Attendance at Advanced Camp normally occurs in the summer following the junior year. The purpose of the course is to provide each Cadet hands-on experience in leadership development as well as extensive training in military tactics, techniques and related subjects vital to success as a junior officer. Cadets attending the Advanced Camp receive approximately $900 in addition to travel expenses to and from Fort Knox. Uniforms, housing, medical care and meals are furnished by the government during the training.

Additional voluntary training at one or more of a variety of active Army service schools is available to select Cadets each summer. Students may apply for attendance at Airborne School, Air Assault School, The Northern Warfare Training Center and Cadet Troop Leadership Training. Students who successfully complete the appropriate course are authorized to wear the Parachutist, Air Assault or other applicable skill badge.

Students who successfully complete the Army ROTC curriculum, and earn a bachelor's degree, serve on active duty or with the Army National Guard or Army Reserve. Active duty is for a period of three or four years with the opportunity for qualified officers to apply for extended service. Current salary and allowances for a Second Lieutenant exceed $45,000. Medical and other benefits are also provided at no cost.

Professional Military Education Requirements

All Army ROTC cadets seeking a commission are required to pass a Written Communication Skills course (currently fulfilled by the University Core Curriculum) and MILS 3030 History of the US Army. An alternate military history course may be substituted with the approval of the Professor of Military Science.

Simultaneous Membership Program

Second, third- and fourth-year students are eligible to participate in the Simultaneous Membership Program with the Army National Guard or Army Reserve. Cadets who participate in this program affiliate with an Army unit, thus affording them the opportunity for enhanced leadership development. Students in this program receive a monthly salary, additional tax-free benefits and GI Bill educational benefits (if otherwise qualified).

Military Science Minor

Scholarship Programs

Each year the Army offers a limited number of four-year, three-year and two-year scholarships to those young men and women who have demonstrated outstanding scholastic, athletic and leadership potential. Scholarships are available on a campus competitive basis and pay most or all of the cost of tuition and fees for both resident and non-resident students or they can opt for a housing and food scholarship of $10,000 per year ($5,000 per semester). Additionally, scholarship students receive a book stipend of $600 per semester and the $420 per month tax-free allowance.

POC is the Admissions and Scholarship Officer, 334-844-5641/4305.

Naval Science

CAPTAIN MICHAEL L. WITHERSPOON
Commanding Officer and Professor of Naval Science

The mission of the Naval Reserve Officer Training Corps is to develop NROTC students mentally, morally, and physically and to imbue them with the highest ideals of duty, honor, and loyalty; to commission college graduates as naval officers who possess a basic professional background, are motivated toward careers in the naval service, and have a potential for future development in mind and character so as to assume the highest responsibilities of command, citizenship, and government. All NROTC programs are open to qualified applicants.

To be eligible for enrollment as a midshipman, an applicant must be a United States citizen; have no moral obligations or personal convictions that will prevent bearing of arms, and supporting and defending the Constitution of the United States against all enemies, foreign and domestic; meet age requirements of at least 17 years on or before 1 September of the year of enrollment and less than 27

years on 30 June of the year an applicant expects to graduate; meet physical requirements for the NROTC Program; and be accepted for admission as a full-time student at Auburn University. Applicants with prior or current active duty in the U.S. Armed Forces may be granted age waivers equal to the number of months served, not to exceed 36 months. Those granted the maximum age waiver must be less than 30 years of age on 30 June of the year they expect to graduate.

NROTC Programs

Four-Year NROTC Navy-Marine Corps Scholarship

Entrance into the Navy-Marine Corps Scholarship Program is via nationwide competition. Applicants typically apply during their senior year of high school, but anyone who meets eligibility requirements and has completed less than 30 semester hours of college credit may apply. Qualifications for enrollment, applications, and information bulletins are available at https://www.nrotc.navy.mil, high schools, colleges, recruiting stations, and the Auburn NROTC Unit, located on the second floor of W. F. Nichols Center. The Department of the Navy pays tuition, fees, $375 per semester for textbooks, and provides a monthly stipend. Freshmen on scholarship receive $250, sophomores $300, juniors $350, and seniors $400 per month. The NROTC program divides degrees into three Tiers with Tier I containing engineering majors, Tier II remaining technical majors, and Tier III liberal arts (for a complete list, see the Auburn NROTC home page). Tiers do not apply to Marine Options. Although the program emphasizes engineering and science majors, students may enroll in any Auburn University major leading to a baccalaureate degree. In addition to the requirements of their major, scholarship students must complete 24 semester hours (21 for Marine Options) of Naval Science courses, calculus I and II (Navy option only), calculus-based physics I and II (Navy option only), a military history/national security policy course and a world cultures course. Summer activities include two at-sea training cruises and one summer period of career orientation lasting approximately four weeks. Marine Option students participate in a six-week officer candidates school, in Quantico, VA, in lieu of the second at-sea training cruise. Successful completion of the ROTC program leads to a commission as an Ensign, U.S. Navy or Second Lieutenant, U.S. Marine Corps.

College Program

The College Program is a non-scholarship option that offers a two- or three-year program. There is no calculus or physics requirement and no preference for technical majors. Interested students should apply directly to the Auburn NROTC Unit during their senior year of high school. Those already at Auburn should apply the spring of their freshman year for the three-year program or the spring of their sophomore year for the two-year program (two year not available for Marine options). College Program students will complete Naval Science and other university courses, a few specific university courses, and attend one summer training session at sea for Navy Option midshipmen or Quantico, VA, for Marine Option midshipmen. Upon graduation, College Program midshipmen may be commissioned as Ensigns, U.S. Navy or Second Lieutenants, U.S. Marine Corps.

Uniforms, Naval Science textbooks, and equipment necessary for the NROTC Program are furnished in all programs.

Active Duty Service Requirements upon Graduation

Active-duty service requirements for scholarship midshipmen vary depending on the warfare area they enter. The basic requirement is eight years, five of which must be on active duty. The remaining three years may be completed on active duty or in the reserves. Specific requirements per warfare community are as follows:

- Surface and Submarine Warfare - 8 years total, at least 5 on active duty
- Naval Aviator (Navy and Marine pilot) - 8 years active duty after qualification as a Naval Aviator
- Naval Flight Officer (Navy and Marine non-pilot aviators) - 6 years active duty after qualification as a Naval Flight Officer
- Marines and Nurse Corps - 8 years total, at least 4 on active duty

Curriculum

The Naval Science curriculum consists of one 3-credit class per semester for eight semesters. In addition, all NROTC students attend one 1-credit Naval Science laboratory class period. Naval Science subjects are listed in this *Bulletin*. Naval Science course hours are considered part of the normal load, which is defined as 15 to 18 credits per semester.

Naval Science Minor

The Department of Naval Science offers a minor to any student, regardless of NROTC affiliation, who completes 15 semester hours of Naval Science, nine semester hours must be courses numbered 3000 or above. The following courses qualify:

Code	Title	Hours
NAVS 1010	Introduction to Naval Science	3
NAVS 1020	Seapower and Maritime Affairs	3

NAVS 2010	Leadership and Management	3
NAVS 2060	Navigation [1]	3
NAVS 3030	Evolution of Warfare [2]	3
NAVS 3050	Naval Ship Systems I (Engineering) [1]	3
NAVS 3060	Naval Ship Systems II Weapons [1]	3
NAVS 4020	Leadership and Ethics	3
NAVS 4030	Fundamentals of Maneuver Warfare [2]	3
NAVS 4050	Naval Operation and Seamanship [1]	3
Total Hours		**30**

1 Navy Option Only
2 Marine Option Only

WILLIAMS, GEOFFREY, R., Associate Professor (ENPL)

WILLIS, LAURA B., Clinical Professor, 2008, MCD Auburn (SLHS)

WILLIS, WHITNIE, Assistant Clinical Professor and Wellstar Joint Faculty Member, 2024 (NURS)

WILLOUGHBY, JANNA, Assistant Professor (FOWS)

WILSON, ADRIENNE, Associate Professor, 2009, MFA SUNY-Brockport, MM BM Ithica (THEA)

WILSON, ALAN E., Professor and Assistant Director, 2007, PhD Georgia Tech, MS Michigan State, BS North Carolina (FISH)

WINDHAM, JERROD, Associate Professor, 2008, MID BIND Auburn (INDD)

WINDHAM, COURTNEY, Associate Professor, 2012, MFA Savannah College of Art and Design, BFA Graphic Design (INDD)

WINTER, RANDOLPH, Associate Professor, 2022, PhD Auburn University, DVM Texas AM University, Diplomate American College of Veterinary Internal Medicine (VMCS)

WINTER, JONI, Assistant Clinical Professor, DNP University of South Alabama, MSN FNP BSN Troy University, AS Southern Union State Community College (NURS)

WITTE, MARIA M., Professor and Associate Dean, Graduate School, 1999, EdD South Florida, MPA Oklahoma, BA Maryland (EFLT)

WITTE, TRACY, Professor and Director of Clinical Program, 2010, PhD MS Florida State, BS Ohio State (PSYC)

WOHLEB, ELISHA C., Clinical Professor, 2007, PhD EdS MEd BS Auburn (CTCH)

WOHRLEY, ANDREW J., Librarian III, 1995, MSLS Indiana, BA Valparaiso ()

WOLAK, MATTHEW, Associate Professor (BIOL)

WOLF, SARA E., Associate Professor, 2000, PhD Arizona State, MEd Wright State, BSEd Ohio (EFLT)

WOLTER, JEREMY, Colonel George Phillips Privett Professor, 2013, PhD MS Florida State, BS Central Florida (MKTG)

WON, SUNJAE, Assistant Professor, 2021, PhD North Carolina State University, MA Boston University (AGEC)

WOOD, MATTHEW P., Associate Professor, 2007, DMA Texas, MM BM Missouri (MUSI)

WOOD, JENNIFER, Instructor (HDFS)

WOODS, LAUREN, Assistant Professor (ARTS)

WOODS-GROVES, SUZANNE, Associate Professor (SERC)

WOOLDRIDGE, ANNE A., Department Head and Professor, 2007, PHD Duke University, MS Louisiana State University, DVM BS Texas AM University, Diplomate American College of Internal Medicine - Large Animal (VMCS)

WORKMAN STOCKLER, JENNA, Assistant Clinical Professor, 2015, DVM Mississippi State University, BS West Virginia University, Diplomate American College of Internal Medicine - Large Animal (VMCS)

WORMS, JAMIE, Lecturer, 2019, PhD Louisiana State University, MA George Washington University, BS University of Maryland (GEOL)

WOROSZ, MICHELLE, Professor, 2006, PhD MS BS Michigan State (AGEC)

WORTHINGTON, DEBRA L., Professor; Director, School of Communication Journalism, 1999, PhD University of Kansas, MA Wichita State, BA Auburn University (CMJN)

WOWER, JACEK, Professor, 1997, PhD MS Mickiewicz (ANSC)

WRIGHT, RUSSELL A., Associate Professor and Extension Specialist, 1997, PhD Wisconsin, MS North Carolina State, BA North Carolina (FISH)

WRIGHT, AMY NOELLE, Professor Associate Dean of Instruction, 2002, PhD North Carolina State, MS BS Virginia Tech. (HORT)

WU, JIA, Assistant Professor, 2024 (CADS)

X

XU, PEI, Associate Professor (AVSC)

Y

YAMPOLSKIY, MARK, Associate Professor (COMP)

YANG, ZUTAO, Assistant Professor, PhD Michigan State University, MS Fudan University, BA Sun Yet-San University (FOWS)

YANKE, AMY B., Associate Professor, 2017, MS Perdue, DVM University of Georgia, Diplomate American College of Internal Medicine- Neurology (VMCS)

YANTIS, DREW, Senior Lecturer, BS Auburn University (BSCI)

YARNOLD, MATT, Director of the Advanced Structural Engineering Laboratory and Associate Professor (CIVL)

YILMAZ, LEVENT, Alumni Professor, 2003, PhD MS Virginia Tech, BS Bilkent University (COMP)

YORDY, MORGAN, Associate Professor, 2016, DNP MSN MSN University of South Alabama, BS Auburn University (NURS)

YOST, KEVEN E., Associate Professor, Synovus Fellow, 2003, PhD Purdue, BA Florida (FINC)

YOUNG, ANDREW, Lecturer (CMJN)

YOUNG, JORDAN, Visiting Assistant Professor, 2024 (ARCH)

YOUNG, CRISTOPHER A., Professor of Practice, 2022, MPH Western Kentucky, DVM Auburn University, Diplomate American College of Veterinary Preventative Medicine (VMAD)

YOUNGBLOOD, ED, Professor, Associate Director of Film Media Studies, 2008, PhD Texas Tech, MA Texas State, BA Southwestern (CMJN)

YOUNGBLOOD, SUSAN, Associate Professor, 2008, PhD Texas Tech, BA Massachusetts-Lowell (ENGL)

YUE, ZONGLIANG, Assistant Research Professor, 2023, University of Alabama at Birmingham, MS Indiana University (HORP)

Z

ZABALA, MICHAEL, Auburn Alumni Engineering Council Associate Professor (MECH)

ZACHARY, MILES, Assistant Professor (MNGT)

ZALIK, RICHARD, Professor, 1985, DSc Technion, Lic Buenos Aires (MATH)

ZAMIELA, CHRISTIAN, Assistant Research Professor, 2024, PhD, MS Mississippi State, BS Millsaps College (INSY)

ZANZOT, JAMES, Senior Lecturer (BIOL)

ZENG, PENG, Associate Professor, 2010, PhD MS BS Purdue (MATH)

ZHAN, WEI, Professor, 2006, PhD Texas AM, MS Chinese Academy of Sciences, BS Lanzhou China (CHEM)

ZHANG, DAOWEI, Alumni and George W. Peake Jr. Professor Associate Dean for Research, 1994, PhD British Columbia, MS Beijing Forestry, BS South-Central Forestry (FOWS)

ZHANG, YAOQI, Alumni Professor, 2003, PhD Helsinki, MS Chinese Academy of Forestry, BS Fujian Agric. and Forestry (FOWS)

ZHANG, XINYU, Associate Professor, 2005, PhD University of Texas-Dallas, ME BE Tianjin University (PFEN)

ZHANG, XINYU, Alumni Professor (CHEN)

ZHANG, YUMING PAUL, Assistant Professor, PhD University of California Los Angeles, BS Fudan University (MATH)

ZHANG, WEI, Assistant Professor (PSYC)

ZHAO, HONG, Assistant Professor, 2021, PhD University of Colorado, BS Peking University (PHYS)

ZHENG, JINGYI (Ginny), Assistant Professor (MATH)

ZHONG, YIMIN, Assistant Professor (MATH)

ZHONG, YADI, Assistant Professor, 2025 (ELEC)

ZHOU, HUAGUO, Elton Z. and Lois G. Huff Professor, 2013 (CIVL)

ZHOU, YANG, Associate Professor (COMP)

ZIEBARTH, NICOLAS, Professor Department Chair, PhD Northwestern University (ECON)

ZORN, MICHELLE, Associate Professor (MNGT)

ZOU, HAIBO, Professor, 2008, PhD Florida State, MS BS Nanjing (GEOL)

ZOU, SHIQIANG, Assistant Professor (CIVL)

ZUGAZAGA, CAROLE, Associate Professor, 2002, PhD MSW Central Florida, BSW Florida State (SOCY)

ZUWIYYA, ZACHARY D., Professor, 1997, PhD University of California, Santa Barbara (FLNG)

Undergraduate Majors

- College of Agriculture (p. 29)
- College of Architecture, Design, and Construction (p. 29)
- Raymond J. Harbert College of Business (p. 30)
- College of Education (p. 30)
- Samuel Ginn College of Engineering (p. 30)
- College of Forestry, Wildlife and Environment (p. 31)
- College of Human Sciences (p. 31)
- College of Liberal Arts (p. 31)
- College of Nursing (p. 32)
- College of Pharmacy (p. 32)
- College of Sciences and Mathematics (p. 32)
- College of Veterinary Medicine (p. 33)
- University College (p. 33)

College of Agriculture

- Agricultural Business & Economics (p. 214)
- Agricultural Communications (p. 278)
- Agricultural Science (p. 264)
- Animal Sciences — Animal Industries Option (p. 233)
- Animal Sciences — Pre-Veterinary & Animal Biosciences Option (p. 234)
- Applied Biotechnology (p. 249)
- Biological and Agricultural Technology Management (p. 242)
- Biosystems Engineering (p. 640)
- Biosystems Engineering — Bioprocess Engineering Option (p. 637)
- Biosystems Engineering — Ecological Engineering Option (p. 642)
- Biosystems Engineering — Forest Engineering Option (p. 639)
- Crop and Soil Sciences (p. 222)
- Crop and Soil Sciences — Turfgrass Option (p. 224)
- Environmental Science (p. 226)
- Fisheries, Aquaculture, and Aquatic Sciences — Fisheries and Aquaculture Option (p. 257)
- Fisheries, Aquaculture, and Aquatic Sciences — Marine Resources Management Option (p. 258)
- Fisheries, Aquaculture, and Aquatic Sciences — Pre-Professional Option (p. 259)
- Horticulture — Fruit and Vegetable Production Track (p. 266)
- Horticulture — Landscape Horticulture Track (p. 268)
- Horticulture — Nursery and Greenhouse Science Track (p. 269)
- Horticulture — Pre-Landscape Architecture Track (p. 270)
- Poultry Science — Production Option (p. 277)
- Poultry Science — Pre-Veterinary Medicine Option (p. 275)

College of Architecture, Design, and Construction

- Architecture
  - Architecture (Foundation Unit) (p. 327)
  - Architecture (Summer Design) (p. 329)
- Building Science (p. 314)
- Environmental Design (p. 339)
  - Environmental Design — Pre-Landscape Architecture (p. 341)

- Graphic Design (p. 305)
- Industrial Design (p. 307)
- Interior Architecture
  - Architecture/Interior Architecture (Foundation Unit) (p. 333)
  - Architecture/Interior Architecture (Summer Design) (p. 336)
- Landscape Architecture (p. 343)

Raymond J. Harbert College of Business

- Accountancy — On-Campus Option for First Degree Candidates (p. 372)
- Accountancy — Online Option for Second Degree Candidates (p. 373)
- Business Administration — On-Campus Option (p. 395)
- Business Administration — Online Degree Completer Program (p. 396)
- Business Analytics (p. 382)
- Finance (p. 389)
- Information Systems Management (p. 384)
- Management (p. 398)
- Marketing (p. 402)
- Supply Chain Management (p. 407)

College of Education

- Agriscience Education (p. 489)
- Business and Marketing Education (p. 490)
- Chemistry Education (p. 492)
- Collaborative Teacher Special Education: K–12 (p. 556)
- Early Childhood Education (p. 493)
- Early Childhood/Elementary Special Education: P–6 (p. 557)
- Elementary Education (p. 494)
- English Language Arts Education/English (p. 496)
- Exercise, Performance & Health Optimization (p. 537)
- Exercise Science (p. 536)
- French Education (p. 498)
- General Science Education (p. 499)
- General Social Science Education/History (p. 501)
- German Education (p. 502)
- Mathematics Education (p. 503)
- Music Education: Instrumental and Vocal (p. 505)
- Physics Education (p. 507)
- Rehabilitation and Disability Studies (p. 559)
- Science Teaching (p. 508)
- Spanish Education (p. 509)

Samuel Ginn College of Engineering

- Aerospace Engineering (p. 630)
- Biosystems Engineering (p. 640)
- Biosystems Engineering — Bioprocess Engineering Option (p. 637)
- Biosystems Engineering — Ecological Engineering Option (p. 642)
- Biosystems Engineering — Forest Engineering Option (p. 639)
- Chemical Engineering (p. 649)
- Civil Engineering (p. 665)

- Computer Engineering (p. 688)
- Computer Science (p. 677)
- Computer Science — Online Degree Completer Program (p. 675)
- Electrical Engineering (p. 690)
- Industrial and Systems Engineering (p. 702)
- Materials Engineering (p. 716)
- Mechanical Engineering (p. 717)
- Software Engineering (p. 679)

College of Forestry, Wildlife and Environment

- Environmental Conservation and Management (p. 741)
- Forestry (p. 743)
  - Forest Engineering Option (p. 639)
- Geospatial Information Science (p. 745)
- Parks and Recreation Management (p. 747)
- Sustainable Packaging (p. 749)
- Wildlife Ecology and Management (p. 750)
- Wildlife Enterprise Management (p. 752)
- Wildlife Sciences — Pre-Veterinary Medicine (p. 754)
-

College of Human Sciences

- Apparel Merchandising, Design and Production Management — Apparel Merchandising Option (p. 796)
- Apparel Merchandising, Design and Production Management — Apparel Design and Production Management Option (p. 798)
- Global Studies in Human Sciences (p. 821)
- Hospitality Management — Culinary Science Option (p. 809)
- Hospitality Management — Event Management Option (p. 811)
- Hospitality Management — Hotel and Restaurant Management Option (p. 812)
- Human Development and Family Science (p. 823)
- Human Development and Family Science — Child Life Option (p. 824)
- Human Development and Family Science — Early Child Development (p. 825)
- Interior Design (p. 800)
- Nutrition — Nutrition/Dietetics Option (p. 838)
- Nutrition — Nutrition Science Option (pre-professional) (p. 835)
- Nutrition — Nutrition Wellness Option (p. 840)
- Philanthropy and Non-Profit Studies (p. 802)

College of Liberal Arts

- Anthropology (p. 1110)
- Art (p. 961)
- Art History Option (p. 962)
- Art Studio/Fine Arts (p. 963)
- Aviation Management (p. 978)
- Communication (p. 1005)
- Economics — Primary Track (p. 1019)
- Economics — Quantitative Track (p. 1020)
- English — Creative Writing Option (p. 1029)
- English — Literature Option (p. 1031)

- English — Professional and Public Writing Option (p. 1032)
- Film and Media Studies (p. 1006)
- Film and Media Studies — Film Option (p. 1008)
- French (p. 1151)
- French — International Trade Option (p. 1153)
- German (p. 1154)
- German — International Trade Option (p. 1156)
- Health Services Administration (p. 1086)
- History (p. 1042)
- International Studies (p. 1157)
- Journalism (p. 1009)
- Journalism — Sports Production Option (p. 1011)
- Law and Justice (p. 1088)
- Music (BA) (p. 1059)
- Music: Commercial Music track (p. 1060)
- Music: Composition (Technology) track (p. 1062)
- Music: Instrumental track (p. 1063)
- Music: Piano track (p. 1057)
- Music: Voice track (p. 1065)
- Neuroscience (p. 1098)
- Philosophy (p. 1071)
- Political Science (p. 1089)
- Professional Flight (p. 980)
- Psychology (p. 1099)
- Public Administration (p. 1090)
- Public Relations (p. 1013)
- Social Work (p. 1111)
- Sociology (p. 1112)
- Spanish (p. 1159)
- Spanish — International Trade Option (p. 1161)
- Speech, Language, and Hearing Sciences (p. 1118)
- Theatre (p. 1127)
- Theatre/Fine Arts — Design/Technology Track (p. 1129)
- Theatre/Fine Arts — Management Track (p. 1130)
- Theatre/Fine Arts — Music Theatre Track (p. 1131)
- Theatre/Fine Arts — Performance Track (p. 1133)

College of Nursing

- Nursing — Traditional (p. 1173)
- RN — BSN (p. 1176)

James Harrison College of Pharmacy

- Drug and Biopharmaceutical Sciences

College of Sciences and Mathematics

- Applied Mathematics (p. 1325)
- Applied Mathematics — Actuarial Science Option (p. 1326)
- Applied Mathematics — Applied Discrete Mathematics Option (p. 1327)
- Biomedical Sciences — Pre-professional concentrations in:

- Pre-Pharmacy (p. 1347)
- Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1345)
- Pre-Anesthesiologist Assistant (p. 1346)
- Health Sciences, Pre-Physical Therapy, Pre-Physician Assistant (p. 1343)

- Chemistry (BA) (p. 1280)
- Chemistry (BA) — Forensics Track (p. 1282)
- Chemistry (BA) — Pre-professional concentrations in:
  - Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1283)
- Chemistry (BS) (p. 1286)
  - Biochemistry Option (p. 1284)
- Genetics (p. 1258)
- Genetics — Pre-professional concentrations in:
  - Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1348)
  - Pre-Veterinary Medicine (p. 1350)
- Geography and Environmental Studies (p. 1303)
- Geology (p. 1304)
  - Geology — Earth System Science Option (p. 1306)
- Laboratory Science (p. 1287)
- Laboratory Science - Histotechnology Track (p. 1289)
- Laboratory Science — Pre-professional concentrations in:
  - Laboratory Science — Pre-Medicine (p. 1290)
  - Laboratory Science — Pre-Physician Assistant (p. 1291)
- Marine Biology (p. 1260)
- Mathematics (p. 1329)
- Medical Laboratory Science (p. 1293)
- Microbiology — Pre-professional concentrations in:
  - Pre-Medical, Pre-Dental, Pre-Optometry (p. 1264)
  - Pre-Physical Therapy, Pre-Physician Assistant (p. 1265)
  - Pre-Veterinary Medicine (p. 1352)
- Microbial, Cellular and Molecular Biology — Microbiology Option (p. 1263)
- Microbial, Cellular and Molecular Biology — Cell & Molecular Biology Option (p. 1262)
- Organismal Biology — Conservation & Biodiversity Option (p. 1269)
- Organismal Biology — Ecology, Evolution & Behavior Option (p. 1271)
- Organismal Biology — Integrative Biology Option (p. 1272)
- Organismal Biology — Pre-professional concentrations in:
  - Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1267)
  - Pre-Physical Therapy, Pre-Physician Assistant (p. 1268)
  - Pre-Veterinary Medicine (p. 1353)
- Physics (p. 1334)
- Physics — Pre-professional concentrations in:
  - Pre-Medicine, Pre-Dental, Pre-Optometry (p. 1335)
  - Pre-Physical Therapy, Pre-Physician Assistant (p. 1337)
- Science Teaching (p. 508)

Accountancy — ABM

Accelerated Bachelor's/Master's Curriculum for the School of Accountancy

The Accelerated Bachelor's/Master's Program (ABM) offers outstanding students in the School of Accountancy an opportunity to earn both the bachelor's and the master's degrees in less time and at less cost than usual. The ABM program allows these exceptional accounting students to count up to 9 hours toward both the bachelor's and master's degrees. Please see the School Accountancy website for additional information.

Below is a chart of all the approved electives that can be taken in the ABM program and what course that replaces at the undergraduate level.

Code	Title	Hours
ACCT 6130	Advanced Accounting Topics (Replaces ACCT 5130 Advanced Accounting Topics)	3
ACCT 6420	Income Tax II (Replaces ACCT 5420 Income Tax II)	3
ACCT 6610	Governmental and Not-for-Profit Accounting (Replaces ACCT 5610 Governmental and Not-for-Profit Accounting)	3
ACCT 6700	Advanced Business Law (Replaces ACCT 5700 Advanced Business Law)	3
ACCT 6810	Corporate Governance & Accounting Ethics (Replaces ACCT Elective)	3

Senior Year for Students in ABM Program - Bachelor of Science in Business Administration, Accounting Major

Courses marked with an asterisk are those that can be substituted by graduate level courses by students enrolled in the ABM program to meet nine undergraduate hours during their senior year and nine graduate hours to be used toward their graduate degree.

Senior			
Fall	**Hours**	**Spring**	**Hours**

	Elective Courses 3	
9	**9**	**3**

Total Hours: 21

Aerospace Engineering — ABM

Accelerated Bachelor's/Master's Curriculum for Aerospace Engineering

The Aerospace Engineering ABM program provides an opportunity for highly motivated undergraduate students to gain a depth of understanding and experience of aerospace engineering beyond that of typical bachelor's level graduates. There is currently a strong demand in industry for aerospace engineers with advanced degrees and this program will enable our students to attain this degree in 3 semesters instead of 4. The Bachelor of Aerospace Engineering undergraduate major can lead to a Master of Science in Aerospace Engineering (thesis or non-thesis) in the ABM track. Please see the Department of Aerospace Engineering's website for additional information.

- AERO 6xx0/7xx0 courses are approved courses that can be taken in the ABM program that replace Aero/Astro Electives at the undergraduate level.
- MATH 6630 can be taken in the ABM program to replace MATH 5630.

Junior/Senior Year for Students in ABM Program - Aerospace Engineering

Courses marked with an asterisk are those used by students enrolled in the ABM program to meet nine undergraduate hours during and nine graduate hours to be used toward their graduate degree.

Senior

Fall	Hours	Spring	Hours
AERO 4140 Aerodynamics III	3	AERO 4630 Aerospace Structural Dynamics	4
AERO 4510 Aerospace Propulsion	4	AERO 4720 Aerospace Design II: Aircraft Design	3
AERO 4620 Aerospace Structures II	4	*Aero/Astro 6xxx/7xxx	6
AERO 4710 Aerospace Design I: Aircraft Design	3	AERO 4AA0 Program Assessment	0

Total Hours: 24

Agricultural Economics and Rural Sociology — ABM

Accelerated Bachelor's/Master's Curriculum for the Department of Agricultural Economics and Rural Sociology

The Accelerated Bachelor's/Master's Program (ABM) offers outstanding students in the Department of Agricultural Economics and Rural Sociology (AGEC) an opportunity to earn both the bachelor's and the master's degrees in less time and at less cost than usual. The ABM program allows these exceptional AGEC students to count up to 9 hours toward both the bachelor's and master's degrees.

The Bachelor of Science in Agricultural Business and Economics or the Agribusiness Minor can lead to a Master of Science in Agricultural Business and Economics (thesis or non-thesis) in the ABM track. Below is an example curriculum for a student in the Bachelor of Science in Agricultural Business and Economics pursuing the Master of Science in Agricultural Business and Economics (thesis). Please see the Department of Agricultural Economics and Rural Sociology website for additional information, ABM tracks and curriculum models.

Below is a chart of all the approved courses that can be taken in the ABM program and the course that it replaces at the undergraduate level.

Code	Title	Hours
AGEC 6010	Farm Management (Replaces AGEC 5010 Farm Management)	3
AGEC 6030	Agricultural Prices (Replaces AGEC 5030 Agricultural Prices)	3
AGEC 6090	Environmental and Natural Resource Economics I (Replaces AGEC 5090 Environmental and Natural Resources Economics I)	3
AGEC 6100	Agricultural Business Management (Replaces AGEC 5100 Agricultural Business Management)	3
ECON 6020	Advanced Microeconomics (Replaces Professional Elective)	3
AGEC 6250	Big Data for Agribusiness Management	3

Senior Year for Students in ABM Program - Agricultural Business and Economics

Courses marked with an asterisk are those that can be substituted by graduate level courses by students enrolled in the ABM program to meet nine undergraduate hours during their senior year and nine graduate hours to be used toward their graduate degree.

Total Hours: 21

Biological and Agricultural Technology Management — ABM

The Accelerated Bachelor's/Master's degree program is designed to provide an opportunity for highly motivated students to gain an in-depth understanding of biological and agricultural technology management beyond that of typical bachelor's level graduates and make them more competitive for industrial positions or for graduate studies. Specifically, the program allows students to take three 6000 level courses (minimum of 9 credit hours) that will count for both the bachelor's and master's degrees. The ABM program can be applied towards the non-thesis or thesis option of the BATM M.S. degree. In addition, the ABM program provides an opportunity for students involved in undergraduate research to build on and develop the research as part of the M.S. thesis requirement. The availability of an ABM will be useful in recruiting and attracting highly motivated high school students. Finally, the ABM program allows students to obtain a non-thesis M.S. degree in 12 months or obtain a thesis-based M.S. degree in about 18 months after earning a Bachelor of Science degree in Biological and Agricultural Technology Management. Note that the duration of the thesis-based M.S. degree is highly dependent on the type of research conducted for the M.S. degree. Students who are interested in the ABM program are highly encouraged to discuss with the department head or the BSEN Graduate Program Officer.

Code	Title	Hours
BATM 6150	Drone Technologies in Agricultural and Biological Systems	3

Biological Sciences - ABM

Accelerated Bachelor’s/Master’s Curriculum for Biological Sciences - Organismal Biology

The Accelerated Bachelor’s/Master’s degree program is designed to provide an opportunity for highly motivated students to gain an in-depth understanding of Biological Sciences - Organismal Biology beyond that of typical bachelor’s level graduates and make them more competitive for industrial positions or for graduate studies. Specifically, the program allows students to take three 6000 level courses (9 credit hours) that will count for both the bachelor’s and master’s degrees. The ABM program can be applied towards the thesis option of the BIOL M.S. degree. In addition, the ABM program provides an opportunity for students involved in undergraduate research to build on that research and develop it into an M.S. thesis. The availability of an ABM will be useful in recruiting and attracting highly motivated high school students. Finally, the ABM program allows students to obtain a M.S. degree in 12 - 15 months. Students who are interested in the ABM program are highly encouraged to discuss with the department head or the BIOL Graduate Program Officer

Below is a chart of all the approved courses that can be taken in the ABM program and what course that replaces at the undergraduate level.

Code	Title	Hours
IBIO Pathway:		
BIOL 7540	Professional Aspects of Biology (Replaces 5000 level BIOL elective)	3
BIOL 6XXX/7XXX Eco/Evo/Devo elec. (replaces 5000 level Eco/Evo/Devo elective)		3
BIOL 6XXX/7XXX Physiology elec. (replaces 5000 level Physiology elective)		3
MCMB Pathway:		
BIOL 7540	Professional Aspects of Biology (Replaces 5000 level BIOL elective)	3
BIOL 6210	Microbial Physiology (Replaces BIOL 5210)	3
BIOL 6260	Prokaryotic Molecular Genetics (Replaces BIOL 5260)	3

Civil Engineering — ABM

Accelerated Bachelor's/Master's Curriculum for Civil Engineering

The Civil Engineering Accelerated Bachelor's/Master's Program (ABM) provides an opportunity for highly motivated undergraduate students to gain a depth of understanding and experience of civil engineering beyond that of typical bachelor's level graduates. There is currently a strong demand in the industry for civil engineers with advanced degrees. Application and matriculation requirements apply to interested students. The Bachelor of Civil Engineering undergraduate major can lead to a Master of Civil Engineering in the ABM track. Please see the Department of Civil and Environmental Engineering website for additional information.

CIVL 6xx0/7xx0 electives are approved courses that can be taken in the ABM program that replace Technical Elective I & II at the undergraduate level.

Senior Year for Students in ABM Program - Civil Engineering

Courses marked with an asterisk are those used by students enrolled in the ABM program to meet six undergraduate hours during their senior year and six graduate hours to be used toward their graduate degree.

Computer Science and Software Engineering — ABM

Accelerated Bachelor's/Master's Curriculum for the Department of Computer Science and Software Engineering

The Accelerated Bachelor's/Master's Program (ABM) offers outstanding students in the Department of Computer Science and Software Engineering (CSSE) an opportunity to earn both the bachelor's and the master's degrees in less time and at less cost than usual. The ABM program allows these exceptional CSSE students to count up to 9 hours toward both the bachelor's and master's degrees.

Two CSSE undergraduate majors (CSCI or SWEN) can lead to a Master of Science in Computer Science and Software Engineering (thesis and non-thesis), Cybersecurity Engineering (non-thesis), or Data Science and Engineering (non-thesis) in the ABM track. Below is an example curriculum for a student in CSCI or SWEN pursing the MS in Computer Science and Software Engineering (non-thesis). Please see the Department of Computer Science and Software Engineering website for additional information and ABM tracks.

Consumer and Design Sciences — ABM

Accelerated Bachelor’s/Master’s Curriculum for the Department of Consumer and Design Sciences

The Accelerated Bachelor’s/Master’s Program (ABM) offers outstanding students in the Department of Consumer and Design Sciences an opportunity to earn both the bachelor's and the master's degrees in less time and at less cost than usual.

Two Consumer and Design Sciences undergraduate majors (Apparel Merchandising, Design and Production Management or Interior Design) can lead to a Master of Science in Consumer and Design Sciences in the ABM track. Below are example curricula for a student in Apparel Merchandising, Design and Production Management or Interior Design pursing the MS in Consumer and Design Sciences.

Apparel Merchandising, Design and Production Management

The ABM in Apparel Merchandising, Design and Production Management (AMDP) degree program will provide an opportunity for highly motivated and academically strong students to gain a depth of understanding of apparel merchandising, design, and product development beyond that of typical bachelor's level graduates. It should make them more competitive in the job market or for additional graduate studies. The ABM program allows these exceptional students to count up to nine hours toward both the bachelor's and master's degrees.

Students with at least 45 credit hours but no more than 96 and a 3.4 GPA will be eligible to apply for the program. Applications for the ABM Program will consist of plans of study for both the Bachelor of Science in AMDP and the Master of Science in Consumer and Design Sciences. Applications will be due October 1 in the Fall of the Junior Year. Upon approval by the Undergraduate Program Coordinator, the Graduate Program Officer and the Department Head, students will be admitted to the accelerated program and may register in the 6000-level courses at the appropriate time in their plan of study. This would begin in the spring of the junior year of their undergraduate program and continue until the last semester in the normal bachelor's degree program at which time the B.S. degree will be awarded.

The Master of Science in Consumer and Design Sciences would be completed in May of the second year in the advanced degree program. Nearing or on completion of the BS degree, students must apply to the Graduate School and be accepted into the MS program in the Department of Consumer and Design Sciences.

All undergraduate students enrolled in the program will be required to meet with the undergraduate program coordinator each semester before registering. Graduate students will have a major professor directing their thesis research. The Graduate Program Officer is available as needed. Please see the Department of Consumer and Design Sciences website for additional information.

Below is a chart of all the approved courses that can be taken in the ABM program and what course that replaces at the undergraduate level.

Crop, Soil, and Environmental — ABM

Accelerated Bachelor's/Master's Curriculum for the Department of Crop, Soil and Environmental Sciences

The Accelerated Bachelor's/Master's Program (ABM) offers outstanding students in the Department of Crop, Soil and Environmental Sciences an opportunity to earn both the bachelor's and the master's degrees in less time and at less cost than usual. The ABM program allows these exceptional students to count up to 9 hours toward both the bachelor's and master's degrees.

The Bachelor of Science in Crop and Soil Science in either the Production Option, Science Option, Soil, Water, and Land Use Option, or the Turfgrass Option, or the Bachelor of Science in Environmental Sciences can lead to a Master of Science in Crop, Soil and Environmental Sciences the ABM track. Below is an example curriculum for a student in the Science Option of Crop and Soil Science pursing the Master of Science in Crop, Soil and Environmental Sciences. Please see the Department of Crop, Soil and Environmental Sciences website for additional information, ABM tracks and curriculum models.

Below is a chart of all the approved courses that can be taken in the ABM program and what course that replaces at the undergraduate level.

Data Science and Engineering — ABM

Accelerated Bachelor's/Master's Curriculum for Data Science and Engineering

The Accelerated Bachelor's/Master's Program (ABM) offers outstanding students in the Department of Mathematics and Statistics an opportunity to earn both the bachelor's and the master's degrees in less time and at less cost than usual. The ABM program allows these exceptional students to count up to nine credit hours toward both the bachelor's and master's degrees. The Bachelor of Science in Applied Mathematics - Applied Discrete Mathematics Option undergraduate major can lead to a Master of Science in Data Science and Engineering - Data Science track in the ABM track. Please see the Department of Mathematics and Statistics for additional information.

Below is a chart of all the approved courses that can be taken in the ABM program and what course that replaces at the undergraduate level.

Code	Title	Hours
STAT 6000	Intermediate Statistical Methods for Data Science (Replaces STAT 5000 Intermediate Statistical Methods for Data Science)	3

Electrical and Computer Engineering — ABM

Accelerated Bachelor's/Master's Curriculum for the Department of Electrical and Computer Engineering

The Accelerated Bachelor's/Master's Program (ABM) provides an opportunity for highly motivated undergraduate students in the Department of Electrical and Computer Engineering an opportunity to earn both the bachelor's and the master's degrees in less time and at less cost than usual. The ABM program allows these exceptional students to count up to 9 hours toward both the bachelor's and master's degrees. Two undergraduate majors (Electrical Engineering and Computer Engineering) can lead to a Master of Science in Electrical and Computer Engineering (thesis and non-thesis) in the ABM Program.

ELEC 6xxx/7xxx elective courses are approved courses that can be taken in the ABM program that replace ELEC electives at the undergraduate level for students pursing the Electrical Engineering Degree. CMPE 6xxx/7xxx elective courses are approved courses

that can be taken in the ABM program that replace CMPE electives at the undergraduate level for students pursing the Computer Engineering Degree.

Below is an example curriculum for a student in Electrical Engineering pursing the MS in Electrical and Computer Engineering (non-thesis). Please see the Department of Electrical and Computer Engineering website for additional information and ABM tracks.

Senior Year for Students in ABM Program - Electrical Engineering

Entomology and Plant Pathology — ABM

Accelerated Bachelor’s/Master’s Curriculum for the Department of Entomology and Plant Pathology

The Accelerated Bachelor’s/Master’s Program (ABM) in the Department of Entomology and Plant Pathology offers outstanding students an opportunity to earn both the bachelor's and the master's degrees in less time and at less cost than usual. The ABM program allows these exceptional students to count up to 9 hours of graduate level classes toward both the bachelor's and master's degrees.

The Bachelor of Science in Crop and Soil Science in either the Production Option, Science Option, Soil, Water, and Land Use Option, or the Turfgrass Option, or the Bachelor of Science in Environmental Sciences can lead to a Master of Science in Entomology or Plant Pathology in the ABM track. Students pursing a Bachelor of Science in Horticulture, Biological Sciences, or Forestry are also eligible for the ABM track that leads to a Master of Science in Entomology or Plant Pathology. Below is an example curriculum for a student in Environmental Sciences pursing the Master of Science in Plant Pathology. Please see the Department of Entomology and Plant Pathology website for additional information, ABM tracks and curriculum models.

Below is a chart of all the approved courses that can be taken in the ABM program and what course that replaces at the undergraduate level for students pursing the Master of Science in Entomology.

Geography — ABM

Accelerated Bachelor's/Master's Curriculum for Geography

The Accelerated Bachelors/Masters (ABM) of Geography degree program provides an opportunity for highly-motivated students to gain an in-depth understanding of materials related to geography beyond that of typical bachelor's level graduates and make them more competitive for the employment of graduate studies. The ABM program also allows an opportunity for students involved in undergraduate research to build upon those efforts and develop them into a master's thesis. In addition, the ABM program in Geography allows students to complete both a bachelor's and master's degree in five calendar years by allowing undergraduates to enroll in graduate level classes during their senior year. Application and matriculation requirements apply to interested students. Please see the Department of Geosciences website for additional information.

Below is a chart of all the approved courses that can be taken in the ABM program and what course that replaces at the undergraduate level.

Code	Title	Hours
GEOG 6700	Quant Meth & Spatial Analysis (Replaces GEOG 5700 Quantitative Methods and Spatial Analysis)	3
GEOL 7100	Geocommunication (Replaces GEOG 4740 Senior Seminar)	3

Geology — ABM

Accelerated Bachelor's/Master's Curriculum for Geology

The Geology Accelerated Bachelor's/Master's Program (ABM) provides an opportunity for highly motivated undergraduate students to gain a depth of understanding and experience of geology beyond that of typical bachelor's level graduates. The ABM program allows these exceptional students to count up to 9 hours toward both the bachelor's and master's degrees.

The Bachelor of Science in Geology undergraduate major can lead to a Master of Science in Geology (thesis or non-thesis) in the ABM track. Please see the Department of Geosciences website for additional information.

Senior Year for Students in ABM Program - Geology

GEOL 7100 (Geocommunications) substitutes GEOL 4740 (Senior Seminar) and GEOL 6xxx elective courses are approved courses that can be taken in the ABM program that replace GEOL electives at the undergraduate level.

Courses marked with an asterisk are those used by students enrolled in the ABM program to meet nine undergraduate hours during their senior year and nine graduate hours to be used toward their graduate degree.

Global Studies — ABM

Accelerated Bachelor’s/Master’s Curriculum for Global Studies

The Accelerated Bachelor’s/Master’s Program (ABM) offers outstanding undergraduate students in Global Studies an opportunity to earn both the bachelor's degree and continue on to the Master of Development Practice degree in less time and at less cost than usual. The ABM in Global Studies degree program provides an opportunity for highly motivated and academically strong students to gain a depth of understanding of global development issues beyond that of typical bachelor's level graduates and allows these exceptional students to count up to nine hours toward both the bachelor's and master's degrees.

Students with at least 45 credit hours but no more than 96 and a 3.4 GPA are eligible to apply for the program. Applications for the ABM Program consist of the Accelerated Bachelor's/Master's Degree Program Application form and an essay detailing how the program fits into the student's academic and professional goals. Applications are due October 1 in the Fall of the Junior Year. Upon approval by the Undergraduate Program Coordinator and the Graduate Program Officer, students are admitted to the accelerated program and may register in the 6000+ level courses at the appropriate time in their plan of study. This begins in the spring of the junior year of their undergraduate program and continues until the last semester in the normal bachelor's degree program at which time the B.S. degree will be awarded.

The Master of Development Practice can be completed in one calendar year after completion of the BS degree. Nearing or on completion of the BS degree, students must apply to the Graduate School and be accepted into the MDP program. All undergraduate students enrolled in the program will be required to meet with the undergraduate program coordinator each semester before registering.

Below is a chart of all the approved courses that can be taken in the ABM program. GSHS 6050 can replace GSHS 5050 in the bachelor's degree. Other graduate-level classes on this list can replace elective credit in the bachelor's program.

Select nine hours of the following courses to meet the BS/MDP requirements (minimum grade of B):

Code	Title	Hours
GSHS 6050	Design Thinking in Global Studies in Human Sciences	3

Industrial and Systems Engineering — ABM

Accelerated Bachelor's/Master's Curriculum for the Department of Industrial and Systems Engineering

The Department of Industrial and Systems Engineering Accelerated Bachelor's/Master's (ABM) program provides an opportunity for highly motivated undergraduate students to gain a depth of understanding and experience of industrial and systems engineering beyond that of typical bachelor's level graduates.

The Bachelor of Industrial and Systems Engineering or the Business Engineering Technology Minor can lead to a Master of Science in Industrial and Systems Engineering or a Master of Engineering Management in the ABM program. Below is an example curriculum for a student in the Bachelor of Industrial and Systems Engineering pursuing the Master of Science in Industrial and Systems Engineering.

Junior and Senior Year for Students in ABM Program - Industrial and Systems Engineering

Approved graduate level INSY electives can be taken in the ABM program to replace INSY electives or TECH electives at the undergraduate level for students pursuing the Bachelor of Industrial and Systems Engineering. Courses marked with an asterisk are those that can be substituted with graduate level courses by students enrolled in the ABM program to meet nine undergraduate hours during their junior and senior year and nine graduate hours to be used toward their graduate degree.

Junior

Fall	**Hours**	**Spring**	**Hours**

Industrial Design — ABM

Accelerated Bachelor's/Master's Curriculum for Industrial Design

The Industrial Design Accelerated Bachelor's/Master's Program (ABM) provides an opportunity for highly motivated undergraduate students to gain a depth of understanding and experience of industrial design beyond that of typical bachelor's level graduates. The ABM program allows these exceptional students to count up to 9 hours toward both the bachelor's and master's degrees.

The Bachelor of Industrial Design undergraduate major can lead to a Master of Industrial in the ABM track. Please see the School of Industrial and Graphic Design website for additional information.

Below is a chart of all the approved courses that can be taken in the ABM program and what course that replaces at the undergraduate level. INDD 6960 Special Problem is a one hour course taken in the spring of senior year to develop graduate research interest.

Code	Title	Hours
INDD 6210 Portfolio (Replaces INDD 5120 Professional Portfolio)		3
INDD 7910	Industry Practicum (Replaces INDD 4210 Industrial Design Thesis)	5

Senior Year for student in ABM - Industrial Design

Courses marked with an asterisk are those used by students enrolled in the ABM program to meet nine undergraduate hours during their senior year and nine graduate hours to be used toward their graduate degree.

Mechanical Engineering — ABM

Accelerated Bachelor's/Master's Curriculum for Mechanical Engineering

The following are the steps for a Mechanical Engineering undergraduate student following the current model curriculum to enter and complete the proposed ABM program:

- Seek admission (Deadline for application is March 1) to ABM Program in Spring semester of Junior year; **minimum 3.4 GPA**
- Start ABM Program in Fall semester of undergraduate Senior year
- Graduate with BME degree in Spring of undergraduate Senior year and **gain 9 credits of MECH 6xxx** credits towards ABM program during Senior year
- Complete 3 hours of 6000 or 7000 level Science/Engineering course during first Summer of MS program
- Complete 3 hours of 6000 or 7000 level Science/Engineering course + 6 hours of MECH 6xxx or MECH 7xxx in first Fall semester of MS (OR, 9 hours of MECH 6xxx or MECH 7xxx in first Fall semester of MS)
- Complete 3 hours of 6000 or 7000 level Science/Engineering course + 6 hours of MECH 6xxx or MECH 7xxx in first Spring semester of MS (OR, 9 hours of MECH 6xxx or MECH 7xxx in first Spring semester of MS)
- Complete degree in Spring semester of MS

Senior Year for Students in ABM Program - Mechanical Engineering

Courses shown in bold below are those used by students enrolled in the ABM program to meet nine undergraduate hours and nine hours to be used toward their graduate degree.

Nutrition — ABM

Accelerated Bachelor's/Master's Curriculum for Nutrition

The Nutrition Accelerated Bachelor's/Master's Program (ABM) offers outstanding students an opportunity to earn both the bachelor's and the master's degrees in less time and at less cost than usual. The ABM program allows these exceptional students to count 5-8 hours toward both the bachelor's and master's degrees.

The Bachelor of Science in Nutrition in either the Nutrition Science Option, Dietetics Option, or the Wellness Option can lead to a Master of Science in Nutrition (thesis or non-thesis). Below is an example curriculum for a student in the Dietetics Option pursing the Master of Science in Nutrition (non-thesis). Please see the Nutritional Sciences website for additional information, ABM tracks and curriculum models.

Below is a chart of all the approved courses that can be taken in the ABM program and what course that replaces at the undergraduate level.

Code	Title	Hours

Physics — ABM

Accelerated Bachelor's/Master's Curriculum for Physics

The Physics Accelerated Bachelor's/Master's Program (ABM) offers outstanding students the opportunity to earn both the bachelor's and master's degree in less time and at less cost than usual. Outstanding students will have the opportunity to explore the prospects for graduate study, engage with graduate faculty, and deepen their understanding of physics. The program will foster the interaction between undergraduate and graduate physics programs at Auburn. The ABM program allows these exceptional students to count up to 9 hours toward both the bachelor's and master's degrees.

The Bachelor of Science in Physics undergraduate major can lead to a Master of Science in Physics (thesis or non-thesis option) in the ABM track. Please see the College of Science and Mathematics website for additional information.

Below is a chart of all the approved courses that can be taken in the ABM program and what course that replaces at the undergraduate level.

Poultry Science — ABM

Accelerated Bachelor's/Master's Curriculum for the Department of Poultry Science

The Accelerated Bachelor's/Master's Program (ABM) offers outstanding students in the Department of Poultry Science an opportunity to earn both the bachelor's and the master's degrees in less time and at less cost than usual. The ABM program allows these exceptional students to count up to 9 hours toward both the bachelor's and master's degrees.

The Bachelor of Science in Poultry Science (either the Production Option or the Pre-Vet Option) undergraduate majors as well as a Poultry Science minor can lead to a Master of Science in Poultry Science or a Master of Agriculture in Poultry Science in the ABM track. Below is an example curriculum for a student in the Pre-Vet Option of Poultry Science pursing the Master of Science in Poultry Science. Please see the Department of Poultry Science for additional information and ABM tracks.

Below is a chart of all the approved courses that can be taken in the ABM program and what course that replaces at the undergraduate level.

Public Administration — ABM

Accelerated Bachelor's/Master's Curriculum for Public Administration

The Accelerated Bachelor's/Master's Program (ABM) offers outstanding students an opportunity to earn both the bachelor's and the master's degrees in less time and at less cost than usual. The ABM program allows these exceptional students to count up to 12 hours toward both the bachelor's and master's degrees.

The Bachelor of Arts in Public Administration undergraduate major can lead to a Master of Public Administration in the ABM track. In addition, undergraduates majoring in Political Science with a concentration or minor in Public Administration are eligible to pursue the Master of Public Administration in the ABM track. Below is an example curriculum for a student in Public Administration pursing the Master of Public Administration. Please see the Department of Political Science website for additional information and ABM tracks.

Below is a chart of all the approved courses that can be taken in the ABM program for undergraduate students majoring in Public Administration and undergraduate students majoring in Political Science with a minor or concentration in Public Administration and what course that replaces at the undergraduate level.

Admissions

- Admission Requirements
- Policies and Procedures for Admissions
- Application for Admission (p. 1508)
- Admission of Transient Graduate Students (p. 1509)
- Provisional Admission (p. 1509)
- McNair Scholars (p. 1509)
- Active Military Personnel (p. 1510)
- Correspondence Work Unacceptable (p. 1510)
- Student Classifications (p. 1510)
- Master's Accelerator Program (p. 1510)

Admission Requirements

Departments make admissions decisions based on the compatibility of the applicant's goals with departmental resources, the availability of spaces for new students, and a holistic evaluation of the applicant's potential for success in the program. Other considerations might typically include standardized test scores, grades and/or GPAs, letters of recommendation, writing samples, research or applied experience, and interviews.

To be considered for admission, the applicant must satisfy the following requirements:

1. The applicant must hold a bachelor's degree from a regionally accredited U.S. institution or provide proof of equivalent training from a recognized academic institution outside the United States. Equivalency is determined by international evaluators in the Graduate School.
2. The applicant must be in good standing at the institution last attended.
3. The applicant must submit standardized examination scores (GRE, GMAT, TOEFL, and/or IELTS) if required for application to the degree program. Applicants with an earned doctorate (Professional, EdD, PhD) from an accredited institution whose instruction is in English may be exempted from this requirement.
4. The successful applicant normally will meet one of the following: a) a GPA of at least 2.75 on all undergraduate course work at an accredited United States institution in fulfillment of the requirements for a baccalaureate degree; b) a GPA of at least 3.0 on all graduate course work at an accredited United States institution in fulfillment of the requirements for a graduate degree; or c) an acceptable GRE or GMAT score as determined by the program to which the applicant applies.
5. Applicants whose native language is not English must submit: 1) TOEFL scores of at least 550 on the written test (213 on the computer-based test); 2) 79 on the Internet Based Test with at least 16 in each section; 3) IELTS overall band score of at least 6.5; or 4) demonstrate English proficiency during an oral examination (interview) satisfactory to the examining committee and approved by the graduate dean.

6. The applicant must be recommended for admission by the graduate faculty in the applicant's area of study. Departments may (and frequently do) establish higher standards than those described here, and may require that applicants submit additional materials. Applicants should contact the department to which they seek admission for information about additional requirements.
7. The applicant must disclose all institutions beyond secondary school, including Auburn University, which the applicant has previously attended; similarly, all course work and/or degrees must be disclosed. Withholding information requested on the application for admission, including attendance at any other institution, or giving false information, may make the applicant ineligible for admission to the university or subject to dismissal.

Final evaluation of application files will not occur until all of the above requirements have been met. Applicants will be notified by the dean of the Graduate School when an admissions decision has been made. Some departments, operating with a limited number of spaces for students each year, make final decisions for the fall semester in early spring.

Policies and Procedures for Admissions

Auburn University is an equal-opportunity educational institution, and as a matter of policy, does not discriminate in its admissions policy on the basis of race, color, sex, religion, disability, sexual orientation, age, or national origin. Applications for resident and non-resident students are accepted for all curricula; however, the number of students and academic credentials of the applicants accepted for admission are determined by the availability of facilities and faculty.

Admission of Transfer Students

Transfer applicants must provide official transcripts (not duplicated or faxed copies) from each college attended, including any at which the applicant enrolled while in high school. A minimum 3.00 cumulative GPA on a 4.0 scale on all college work attempted and eligibility to re-enter the institution last attended are required to be considered for transfer admission.

Application for Admission

To apply for graduate study, submit to the Office of Graduate Admissions:

1. A formal application. Applications for admission are submitted online at applygrad.auburn.edu/portal/apply (https://applygrad.auburn.edu/portal/apply/). Domestic applications must be accompanied by a fee of $60; international applications must be accompanied by a fee of $70. These fees may be paid online via credit card.
2. Unofficial transcript(s) from all institutions that were attended. If admitted to a program, applicants will be required to submit a final official transcript from each institution, sent directly from the institution(s), prior to registration. Official transcripts may be sent at any time but will be required before registration. An applicant who, because of current enrollment, cannot provide final transcripts at the time of application, should submit the incomplete transcripts from the current institution. Applicants do not need to provide transcripts for credits earned at Auburn University.
3. Standardized general test scores may be required for graduate program admission. A waiver of standardized test scores may be available in certain circumstances—please check the Graduate School's Test Score Waivers (https://nam11.safelinks.protection.outlook.com/?url=http%3A%2F%2Fgraduate.auburn.edu%2Fprospective-students%2Ftest-score-waivers%2F&data=05%7C01%7Ckcc0019%40auburn.edu%7C96eb20ddecb84a0f95bb08da7569efb8%7Cccb6deedbd294b388979d72780f62d3b%7C1%7C0%7C637951395097017301%7CUnknown%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQIjoiV2luMzIiLCJBTiI6Ik1haWwiLCJXVCI6Mn0%3D%7C3000%7C%7C%7C&sdata=aD2CMNBndWaWhy29D83ciDxgkOKo2D8beEdu5aRHWNs%3D&reserved=0) webpage for current information. Prospective graduate applicants should check with individual departments for specific program admission requirements. International applicants must also submit Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores. Applications and dates for these tests may be obtained at many colleges and universities; by writing the Educational Testing Service, P.O. Box 6000, Princeton, NJ 08541-6000; by telephoning (609) 771-7670 for the GRE, (609) 771-7330 for the GMAT, or (609) 771-7100 for the TOEFL; or by accessing the Educational Testing Service website at www.ets.org (https://nam11.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.ets.org%2F&data=05%7C01%7Ckcc0019%40auburn.edu%7C96eb20ddecb84a0f95bb08da7569efb8%7Cccb6deedbd294b388979d72780f62d3b%7C1%7C0%7C637951395097017301%7CUnknown%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQIjoiV2luMzIiLCJBTiI6Ik1haWwiLCJXVCI6Mn0%3D%7C3000%7C%7C%7C&sdata=%2BT2Y59atBBW6RkNxg3Ur6Erb3XHFf2yRqtrGFvEM92s%3D&reserved=0).

4. Additional Materials. Academic programs typically require additional materials to evaluate an applicant's potential for graduate study. Prospective students must also contact the department in which they wish to study to obtain information regarding additional admission requirements, such as writing samples and letters of recommendation. With the exception of the application, official transcripts, and standardized test scores, which should be sent to the Graduate School, materials requested by programs should be sent directly to the academic department.

Admission to any graduate degree program is granted by the dean of the Graduate School upon the recommendation of the department of proposed study. Applications and all other relevant material must be received by the Graduate School at least 45 days before the first day of class of the semester in which the student wishes to begin graduate study. International applicants should submit all required materials at least 90 days before the first day of class of the semester in which the student wishes to begin graduate study. However, most academic units make admission decisions several months in advance. Thus, applicants should check with the department to which they seek admission to determine when materials should be submitted. Approval is valid for a maximum of 12 months beyond the beyond the entrance date given on the application, with the approval of the program admitting the student. If the student does not register during this period, a new request for approval must be submitted. Application materials become the property of Auburn University and may not be returned to the applicant or forwarded to other institutions.

Admission of Transient Graduate Students

A graduate student in good standing in an accredited college or university may be admitted as a transient when faculty and facilities are available. To be eligible, the student must submit a special Graduate Transient Form prior to the beginning of the semester for which transient status is requested. The form, available from the Graduate School or on the Web at www.grad.auburn.edu, must bear the signature of the student's department head and graduate dean or his/her designee. Transient status is granted for one semester only and does not constitute admission or matriculation as a degree candidate.

Provisional Admission

First-time applicants to Auburn University's Graduate School who hold the bachelor's degree from an accredited U.S. institution (or who provide proof of equivalent training from a recognized academic institution outside the United States) and who are otherwise academically qualified but who do not meet certain other requirements for admission may be admitted on a provisional basis.

These other requirements include but are not limited to the following: 1) scores above the minimum required on standardized tests of English language proficiency, 2) scores above the minimum required on the GRE or GMAT, or 3) the submission of official documentation (e.g., transcripts).

Departments may set higher standards or may not consider students for provisional admission.

International students whose English language proficiency is marginally below the Graduate School's required levels are required to enroll in Auburn University's Auburn Global program and satisfy proficiency requirements before enrolling in graduate-level course work.

Other students who are admitted on a provisional basis are given an opportunity to demonstrate that they can perform graduate-level work and can be expected to make reasonable progress toward earning a graduate degree. They may also be required to remedy deficiencies in undergraduate preparation by taking upper-division courses.

Provisionally admitted students must demonstrate their ability to perform at the graduate level by obtaining a "B" grade point average (3.0 on a 4.0 scale) in their first 12 semester hours of graduate-level work. These 12 semester hours must be completed within the first three consecutive semesters following admission.

Students admitted on a provisional basis will be fully admitted to the Graduate School only when all conditions for admission have been met, including the completion of at least 12 semester hours of approved graduate-level courses at Auburn University with a grade point average of at least 3.0.

Students admitted provisionally who fail to satisfy all conditions for admission within the allotted time period will be dismissed from the Graduate School.

McNair Scholars

The Graduate School recognizes the achievement of students who have successfully completed a Ronald E. McNair Postbaccalaureate Achievement Program by waiving the Graduate School application fee. A letter confirming participation in the program is required.

Active Military Personnel

The Graduate School recognizes the contributions of students actively serving in the United States military by waiving the Graduate School application fee. A letter confirming active duty status is required.

Correspondence Work Unacceptable

Study by correspondence shall not be counted toward a graduate degree.

Student Classifications

For administrative purposes, Auburn University students are assigned to a class level. Those that apply to graduate students are:

- MST — Students who hold full admission to Master's programs.
- EDS — Students who hold full admission to Specialist in Education programs.
- PHD — Students who hold full admission to Doctor of Philosophy programs.
- GCRT — Students admitted to an approved Graduate Certificate program.
- GND — Students who hold a Bachelor's degree (or post-baccalaureate degree) may apply for admission to the Graduate School as a non-degree student for personal development, to obtain or renew certification, or to take a limited number of courses preliminary to enrolling in a graduate degree program. No more than 12 hours of credit earned while enrolled as a non-degree student may later be counted toward a graduate degree; however, students officially enrolled in an approved graduate certificate program may count up to the maximum number of credit hours allowed by the certificate program toward a graduate degree. Non-degree students who later decide to pursue a graduate degree must re-apply for admission to the Graduate School and the graduate degree program.
- GPR — Students who meet requirements for provisional admission except that they have not taken the GRE or GMAT (if required by the admitting program) or have not submitted all transcripts. This classification is for one semester only, and satisfactory scores and/or all transcripts must be submitted by the end of that semester. This classification cannot be used by international students, who must submit official transcripts and satisfactory scores on all required examinations before they are admitted.

Master's Accelerator Program

The Master's Accelerator Program (MAP) eases the transition from a bachelor's degree in your home country to graduate school in the U.S. It provides three simple routes to enter your graduate program at Auburn. MAP combines credit-bearing courses from your master's degree with additional support, teaching, and cultural experiences, helping to ensure your future success. All MAP students complete a comprehensive series of English language, research, and professional development modules (the Professional Development Suite), and a series of credit-bearing graduate courses (the Academic Suite) prior to transferring into their intended degree program.

Auburn Global offers four ways for international students to enter their graduate program. The entry path that is best for you will depend on your qualifications and personal preferences. Choose from the Integrated Master's Accelerator, the Master's Accelerator (one term) or Master's Accelerator (two or three terms). For more details on these options see: http://www.auburnglobal.org/about-map. Students in the Master's Accelerator Program are enrolled in a minimum of 14 clock hours in Fall and Spring semesters, and 9 clock hours in summer.

Auburn offers 23 graduate programs through the Master's Accelerator Program, in engineering, education, mathematics, and public administration, and community planning.

MAP students take a core curriculum* and credit bearing courses from their chosen master's degree.

Courses	Map 3	MAP 2- Sem 1/MAP 3- Sem 2	MAP 1- Sem 1/MAP 2 - SEM 2/MAP 3 - Sem 3	IMAP-semester 1
Support		Professional Development I (Optional CAP Program)	Professional Development Sequence II (Optional CAP Program)	Optional
English	Graduate Academic English	English for Professional Purposes (EPP), English for Specific Purposes (ESP), & The Art of Presenting–Advanced Oral Communications	Making the Case: Structure, Argument, and Composition in Research Contexts	Optional, Custom-tailored

Analysis	Special Topics (MATLAB)	The Active Research Colloquium I & Data Management: Gathering, Analyzing, and Interpreting Data	The Active Research Colloquium II Tools of the Trade:	Optional

Registration

- Leave of Absence (p. 1511)
- Withdrawing from Courses (p. 1511)
- Continuous Enrollment Policy (p. 1511)
- Exceptions to the Continuous Enrollment Policy (p. 1512)
- Inactive Status (p. 1512)
- Non-Graduate Students and Graduate Work (p. 1512)
- Non-Graduate Students Enrolled in Accelerated Bachelor's/Master's Degree Plans or in the Honors College (p. 1512)
- Registration and Graduation Requirements (p. 1512)
- Transfer of Credit from Other Institutions (p. 1513)
- Transfer to a Different Degree Program (p. 1513)
- Undergraduate Courses, S/U Option and Auditing Courses (p. 1513)

Leave of Absence

A student may be granted a leave of absence for medical reasons, family necessity or dependent care, military service, or other approved personal reasons. Students planning to discontinue enrollment for a semester or more must request approval for a leave of absence. Students may petition the Graduate School for a leave of absence for a maximum of two semesters during the entire program; however, the Graduate School may approve extensions to the maximum two semester leave of absence (e.g., for military service obligations extending beyond two semesters).

A petition for a leave of absence (or extension), signed by the Graduate Program Officer or head of the academic unit, must be approved by the dean of the Graduate School. The Graduate School may request appropriate documentation. The request must be filed and approved before the anticipated absence. An approved leave of absence will enable students to re-enter their program without applying for re-activation or owing retroactive tuition and enrollment fees.

A student on leave is not required to pay fees, but in turn may not use Auburn University faculty, facilities, resources, or services intended only for enrolled students; receive a graduate assistantship, fellowship or financial aid from the University or take any Auburn courses related to the plan of study.

Withdrawing from Courses

See the Withdrawal Policy (p. 153)

Continuous Enrollment Policy

All full- and part-time degree-seeking graduate students must be continuously enrolled. Continuous enrollment is defined as registration for a minimum of one credit hour in at least two semesters in a given academic year (fall, spring, summer) until the degree is awarded or status as a degree-seeking student is terminated through an official university withdrawal.[1] Students must register for the term in which they take their examinations, defend their dissertations, and complete degree requirements (including summer term). Although the Graduate School and individual graduate programs will monitor the enrollment status of graduate students, it is ultimately the responsibility of graduate students to ensure that they are meeting the enrollment provisions of this policy.

* Students who enroll for the first time during spring or summer semesters will not be declared inactive if they register in at least two semesters during their first full and subsequent academic years.

Exceptions to the Continuous Enrollment Policy

The Graduate School, if circumstances warrant, may grant exceptions to the Continuous Enrollment Policy. Appeals should be made directly to the dean of the Graduate School.

Inactive Status

Students who fail to register for at least two semesters in a given academic year will be declared inactive. To be re-activated, students must apply for re-activation to the program in which they were enrolled and the Graduate School. Students must also complete the re-admission form. Re-activation is not guaranteed. In order to fulfill the continuous registration requirement, students who are re-activated must register retroactively for a minimum of one credit hour and pay the associated tuition and fees for all semesters that have elapsed since they were last enrolled—up to a maximum of two semesters per academic year and a total of four semesters.

Non-Graduate Students and Graduate Work

An Auburn University undergraduate student may register for graduate courses provided that the following conditions are met: the student has at least a 3.0 GPA, is within 30 semester hours of graduating, has the written consent of the instructor of each graduate course, and obtains approval in advance from the Graduate School. A maximum of 12 semester hours of graduate course work taken in this option later may be applied toward a graduate degree at Auburn University with the approval of the student's advisory committee provided that appropriate arrangements are made in advance with the Graduate School and a grade of B or higher is achieved on all courses used for graduate credit. The total course load taken at the time the undergraduate student is in a graduate course may not exceed 16 semester hours per semester. The same guidelines apply to undergraduate students taking graduate courses for undergraduate credit. A student may not use the same graduate course for both undergraduate and graduate credit. An exception is made for non-graduate students officially enrolled in the Honors College or an approved Accelerated Bachelor's/Master's Degree Plan (see Non-Graduate Students Enrolled in Accelerated Bachelor's/Master's Degree Plans below).

Any post-baccalaureate, non-degree student desiring enrollment in a graduate course must receive written consent of the instructor and approval of the Graduate dean in order to register for such a class.

Non-Graduate Students Enrolled in Accelerated Bachelor's/Master's Degree Plans or in the Honors College

An Auburn University undergraduate student officially admitted and enrolled in an approved Accelerated Bachelor's/Master's degree plan (ABM) may register for graduate courses that are listed as required or elective courses in the student's ABM plan. Similarly, students officially admitted and enrolled in the Honors College may enroll in a limited number of graduate courses. A maximum of nine hours (in a 30-hour master's program) or 12 hours (in a 36-hour or more master's program) may be counted towards *both* degrees, provided that a grade of B or higher is achieved on all courses used for graduate credit. No courses may be counted for both undergraduate and graduate credit in a program in which the double counting of courses is prohibited by an accrediting agency. The total course load taken at the time the undergraduate student is in a graduate course may not exceed 16 semester hours per semester.

Registration and Graduation Requirements

Thesis and dissertation students needing thesis or dissertation final approval and submission and the final examination, or non-thesis graduate students needing to complete projects, would register for GRAD 7000, 7990 Research and Thesis, 8990 Research and Dissertation, or 7980 Project, as applicable. Non-thesis graduate students requiring only a final examination would register for GRAD 7000. Students may not register for GRAD 7000 for more than one semester. Exceptions can be made by the Graduate School under special circumstances.

Students are required to submit a graduation application to the Graduate School prior to the semester of expected graduation. Graduation day is the official last day of each semester and, therefore, is the deadline to submit the Committee, Transfers, Exceptions and Candidacy (CTEC) Form and graduation application for graduation in the following semester. It is the responsibility of graduate students to check records for compliance with graduation requirements. Students who have completed a graduation check for a previous term must notify the Graduate School of pending graduation before the 15th class day of each subsequent semester. Graduate degrees are awarded at the end of each semester.

A graduate student may carry a maximum course load of 16 hours per semester (14 in the summer term) including undergraduate courses. Graduate students must carry nine hours per semester or enroll in (GRAD 7AA0/GRAD 8AA0) with concurrent enrollment for a

minimum of one hour of 7990/8990 to be classified as full-time students. Enrollment in (GRAD 7AA0/GRAD 8AA0) requires completion of the Loan Deferment Request form available through the Graduate School website.

Transfer of Credit from Other Institutions

Graduate credit taken in residence at an international institution or at a regionally accredited U.S. institution may be transferred when recommended by the student's major professor, advisory committee, graduate coordinator, and when also approved by the dean of the Graduate School. Such transfer credit must fall within the time limits of the degree. Students seeking transfer credit must provide documentary evidence showing that the course is comparable to similar graduate courses at Auburn University and relevant to the student's plan of study. Students must also provide an official transcript showing credit earned for the course. No prior commitment is made concerning whether transfer credit will be accepted.

The total number of credit hours that may be transferred from another accredited institution towards a master's, education specialist, or doctoral degree varies by program and may be no more than 50% of the total credit hours for the program. Such transfer credit 1) must fall within the time limits of the degree; and, 2) must be approved by the advisory committee and the Dean of the Graduate School.

In the case of graduate degree programs offered through joint, cooperative, or consortial agreements, the student must earn a majority of credits from the participating institutions. No transfer credit will be approved without an official transcript. No course on which a grade lower than B was earned may be transferred. Additionally, credit will not be allowed if the combined GPA on graduate work taken at other schools is less than 3.0 on a 4.0 scale, nor may transfer credit be used to improve the GPA on courses taken at Auburn University.

Students who are admitted to a graduate certificate program may use a limited amount of course work taken at another accredited university to meet certificate requirements, with the approval of the program faculty and the Graduate School.* The total number of credits transferred shall not exceed 40% of the total required for the Certificate. Total credits allowed to transfer may be less as determined by the Certificate Program. Such transfer credit must fall with the time limits of the certificate program. Students must provide an official transcript showing credit earned for the course and documentary evidence that the course is comparable to similar graduate courses in the certificate program at Auburn University. No course on which a grade lower than B was earned may be transferred.

*A student may not use the same graduate course for both undergraduate and graduate credit.

Transfer to a Different Degree Program

For a student to transfer from one department to another requires **that the student be in good academic standing**, a new application for admission and the usual application fee. Changes in application status (master's to doctoral, doctoral to master's) or enrollment status (master's to doctoral or doctoral to master's) must be requested by the applicant/student involved and endorsed by the department head or chair, major professor, and advisory committee for enrolled students and approved by the dean of the Graduate School. Current international students must recertify full financial sponsorship for the issuance of a new 1-20 form.

Undergraduate Courses, S/U Option and Auditing Courses

A graduate student may register for undergraduate courses (1000-4000-level). For students enrolled in Graduate School, grades earned in undergraduate courses will not be used in calculation of the GPA for either retention or graduation but will appear on the graduate transcript. This policy took effect with the posting of grades fall 1998. For courses taken before fall 1998, grades earned in undergraduate courses may be used in calculation of the GPA for retention, but not for graduation. A graduate student may elect any course to be graded under the Satisfactory (S)-Unsatisfactory (U) option, if the major professor so recommends. Students are not allowed to select this option after the 15th class day. Courses listed on the Plan of Study must be graded A, B, C, D or F except for those designated as S/U. Similarly, a graduate student may elect to audit any course not on the Plan of Study. The student may not change from audit to credit after classes begin but may change from credit to audit before the 15th class day. All uses of the S/U and audit option require approval of the Graduate School.

Academic Progress

- Incomplete Grades (p. 1514)
- Grades (p. 1514)
- Academic Standing (p. 1514)
- Advisors (p. 1514)
- Academic and Professional Progress (p. 1514)

- Academic Requirements for Students in the Professional Program of Veterinary Medicine (p. 1515)
- Student Athletes (p. 1516)
- Student Financial Aid Recipients (p. 1516)
- Veterans (p. 1516)

Incomplete Grades

A grade of “incomplete” must be removed within the following six months or it will be recorded permanently as an F and the course will have to be repeated. This applies regardless of the student’s enrollment status. A student not enrolled during the following six months is not exempt from this rule. No student may graduate until “incomplete” and “no record” grades are removed, and the removal must be completed at least three weeks before the date of graduation, regardless of whether or not the course is included on the plan of study worksheet.

Grades

To receive a graduate degree at Auburn University, a student must earn a cumulative GPA of 3.0 on a 4.0 scale on all courses carrying graduate credit. No more than nine hours beyond the student’s Plan of Study is allowed in obtaining the cumulative graduate GPA (CGGPA). No grade below C (including unsatisfactory grades for courses taken under the S/U option) is acceptable for credit toward a graduate degree. Each graduate course in which a grade below C is received must be repeated at Auburn University if it is counted toward the student’s degree. Both the original grade and the grade for any repeated course will be counted in calculating the CGGPA. Course credits transferred from another institution may not be used to satisfy this requirement. Courses retaken will not count against the nine-hour limit beyond the student’s Plan of Study in obtaining the minimum CGGPA.

Academic Standing

Only grades in Auburn University courses approved for graduate credit will be used in determining the overall GPA for continuation in the Graduate School. If at the end of any semester the cumulative graduate GPA (CGGPA) falls below 3.0, the student will be placed on **academic probation.** If the CGGPA remains below 3.0 after the next eleven credit hours of graduate enrollment (both graded and ungraded) or two consecutive terms (whichever comes first), the student will be placed on **academic suspension.*** Students on academic suspension may not hold a graduate assistantship. The student may be readmitted only after completion of a remediation plan recommended by the academic unit and approved by the Dean of the Graduate School. Course work taken as part of the remediation plan must be completed within two consecutive terms and may count toward both the student’s degree and CGGPA with the recommendation of the department head and the approval of the graduate dean.* Upon completion of the remediation plan, the student must have addressed academic deficiencies and have a CGGPA of 3.0 or above. Once approved by the graduate dean, remediation plans may not be amended or extended beyond the original deadline. If a student fails to complete the remediation plan as approved or if the student earns a grade of C or below while completing the remediation plan, the student will be dismissed from the Graduate School and the designation ACADEMIC DISMISSAL will be placed on the student’s official record.

*The summer term is counted as one of the consecutive semesters only if a student is enrolled during the summer term.

Advisors

The dean of the Graduate School is the general counselor to all graduate students. A faculty advisor or major professor will be designated for each student in accordance with departmental policy. There also will be an advisory committee for each student. The major professor generally serves as the chair of the advisory committee. In the case of co-chairs, at least one must be a member of the graduate faculty at the appropriate level at Auburn University. Some required forms and reports regarding the student’s program must be approved by the major professor, advisory committee, department head or chair and the dean of the Graduate School. Students should ascertain which signatures must be obtained.

Academic and Professional Progress

Monitoring the academic progress of graduate students and graduate teaching assistants on a regular basis is important to their success and to the success of Auburn’s graduate programs. The Graduate School requires that each department conduct — at least on an annual basis —an evaluation of the progress of each graduate student enrolled in a doctoral program and each Graduate Teaching Assistant (GTA). Departments are also encouraged to monitor the progress of all other degree-seeking students. Annually, each department will report to the Graduate School, confirming that the evaluation of all doctoral students and GTAs has been completed.

The student’s advisory committee monitors each graduate student’s progress toward a degree, and issues of professional and personal development may be considered. While failure to maintain academic standards is reason for dismissal, a student also may be dismissed from the Graduate School if progress is unsatisfactory in other areas.

In such cases, the advisory committee will prepare a statement of grievance and discuss it in a meeting with the student. The statement must have the unanimous support of all members of the committee. The student will be warned that corrective measures must be taken within a specified time to avoid action that might result in dismissal. The committee determines the period allowed for correction. Copies of the statement of grievance and summary of the meeting will be provided to the student, the department head/chair, and the academic dean.

If the deficiency is not corrected within the time allowed by the committee, a statement reiterating the grievance and recommending dismissal should be sent to the graduate dean with copies to the student, the department head/chair, and the academic dean.

The graduate dean will give the student an opportunity to respond and will make a final determination. The student and the advisory committee will be notified.

The action taken will not appear on the student's official transcript, and release of information is restricted under the University's policy on the confidentiality of student records.

Academic Requirements for Students in the Professional Program of Veterinary Medicine

Academic Requirements

All applicants and students in the professional program are subject to the academic and disciplinary regulations of the College of Veterinary Medicine in addition to those of Auburn University. Any student who earns less than a 2.25 GPA for any term will be placed on academic probation (academic warning). A student who fails to earn a 2.25 GPA in each of the succeeding two terms of enrollment will be dropped from the rolls of the College of Veterinary Medicine for scholastic deficiency. In addition, a student who does not have a veterinary college cumulative average of 2.25 at the end of any academic year will be required to withdraw from the College of Veterinary Medicine. Any student who receives a **D** in any course or is required to remediate a course to receive a passing grade will be placed on academic probation. If the student receives a second **D** in the same calendar year or academic year, they will be required to withdraw from the College of Veterinary Medicine. A student will be removed from academic probation after two terms, assuming they have met the terms of probation. A student who makes a grade of **F** in any course will be required to withdraw from the College of Veterinary Medicine. If a student who is dismissed for academic reasons is re-admitted, they may be required to repeat additional courses as deemed necessary by the Admissions and Standards Committee. Clinical courses are unique in that the art and skills to be developed in them can be acquired only through full participation in the laboratories. Attendance in these courses is required except in case of illness or other extenuating circumstances as may be judged by the involved instructor. Grading in these clinical laboratory courses is primarily by subjective evaluation. When a course involves student rotation through several disciplines or sections, the student must receive a passing grade in each area before a passing grade can be given for the course. Any student who earns a D or F in any clinical rotation or is required to remediate a course to receive a passing grade will be placed on academic probation. If the student receives a second F during clinical rotations, that student will be required to withdraw from the College of Veterinary Medicine. If the student receives a second and third D or F during clinical rotations (i.e., D-D-F or D-D-D), that student will be required to withdraw from the College of Veterinary Medicine. If the college admissions and standards committee permits re-admission, the student may be required to repeat all clinical experiences to meet the requirements for the clinical year.

Required Withdrawal

The faculty of the College of Veterinary Medicine reserve the right to require the withdrawal at any time of any student who in the judgment of the Admissions and Standards Committee is not profiting from the instruction offered, who is neglectful, dishonest or indifferent in the performance of required duties and studies or whose character or conduct is inconsistent with good order of the veterinary college or with the standard of the veterinary profession.

Requirements for Graduation

To be eligible for the D.V.M. degree, candidates must complete all of the required courses in the order listed in the curriculum in veterinary medicine, along with at least four hours of elective credit, with a minimum overall GPA of 2.25. In addition, each senior student must participate in a clinicopathologic conference (CPC) to fulfill their oral communication requirement. Following completion of all academic work, each student is required to serve a preceptorship of 8 weeks with an approved practicing veterinarian. A report of satisfactory completion of the preceptorship is required for graduation. A graduation fee must be paid at the beginning of the semester of graduation and all indebtedness due the institution must be paid prior to graduation.

Student Athletes

In addition to meeting the general academic requirements of the university, student athletes must meet all academic requirements, including those relating to satisfactory progress toward a degree, set forth in the legislation of the Southeastern Conference (SEC) and of the National Collegiate Athletic Association (NCAA).

Student Financial Aid Recipients

In addition to meeting the general academic requirements of the university, applicants for student financial aid funds must maintain Satisfactory Academic Progress to receive, or to continue to receive, assistance through federal, state, and institutional student aid programs. Descriptions of these Satisfactory Academic Progress requirements for distinct classifications of Auburn students are available from the Office of Student Business & Account Services.

Veterans

Veterans Resource Center

The Auburn University Veterans Resource Center (AUVRC) assists veterans, guardsmen, reservists, active duty, military dependents, and survivors receiving Veteran Affairs (VA) federal education benefits in all aspects of academic success, while transitioning to campus and community. The center provides timely and comprehensive support with a range of services for current and former military service members, including eligible military dependents, by collaborating with university faculty and staff, state representatives, the local veteran community, and civilian-advocate organizations.

Contact the AUVRC: (334) 844-8167, veterans@auburn.edu, or visit https://veterans.auburn.edu/.

Priority Registration

Priority Registration is given to groups of students who fall under certain categories, including veterans. The priority status must be recognized by the Registrar's Office when the time tickets are set in order for the student's special registration status to be activated.

International Opportunities

- International Academic Opportunitie (p.)s (p. 1516)
- International Internships, Academic/Curricular Practical Training (p. 1516)
- Office of International Programs (p. 1516)
- OIP International Student and Scholar Services (p. 1517)
- OIP Auburn Abroad Experience (p. 1517)

International Academic Opportunities

Access to international opportunities is provided throughout many colleges, schools, departments and other student support units. However, there are several units on campus that provide specialized services for study abroad and international students attending Auburn University.

International Internships, Academic/Curricular Practical Training

Academic internship experience both within the US and abroad are highly encouraged for all disciplines and all AU students. Students interested in participating in such experiences should check with their academic units for specific requirements. For international students practical training is available: UNIV 4920 Curricula Practical Training depending on US immigration status as Curricular Practical Training (F) or Academic Training (J). Students may also do academic internships abroad under Auburn Abroad. For further details on Auburn Abroad or CPT/AT students should check with the Office of International Programs.

Office of International Programs

The Office of International Programs (OIP) is a unit of the AU Division of Academic Affairs. Its mission is to provide leadership and relevant administrative support to academic units, faculty, students, and staff for the effective promotion and efficient adoption of Auburn University's internationalization goals. The International Students and Scholar Service component of the OIP assists foreign national students, visiting scholars, and university employees in achieving their academic objectives. The Auburn Abroad unit of the OIP promotes and facilitates student and faculty participation in an international education experience through programs outside of the United States. For additional information, contact: Office of International Program, 228 Foy Hall; 334-844-5001; intledu@auburn.edu; or www.auburn.edu/international. (http://www.auburn.edu/academic/international/)

OIP International Student and Scholar Services

The ISSS unit of the OIP provides assistance and guidance to foreign national students, visiting scholars, and University employees regarding US immigration requirements and Auburn policies for studying and/or working at Auburn University. Documentation of eligibility for study in the United States, work authorizations, and other government documents required by international students, scholars, and employees are issued and monitored by the ISSS. ISSS holds orientation programs at the beginning of each term for new international students. Currently, the university has more than 2500 international students, visiting scholars, and employees from over 100 nations. For additional information please visit the ISSS website, https://www.auburn.edu/academic/international/isss/.

OIP Auburn Abroad Experience

The Office of International Programs (OIP) Auburn Abroad unit seeks to develop, expand and facilitate credit bearing study, internship and exchange opportunities outside of the United States. Each year more than 1200 Auburn University students participate in the Auburn Abroad experience on over 93 programs. More than 90 percent of these students go on faculty led programs and Exchange Programs with the rest going on other university or provider programs. With some planning, credit earned through the Auburn Abroad experience can be integrated with Auburn University degrees and applied to core, major, minor, and elective courses. Students on Auburn University faculty-led programs, the CORE curriculum program in Barcelona, Spain and Exchange Programs will earn AU credit and will receive grades on their transcript. Students going on other university programs will earn transient/transfer credit for their courses abroad. If a student chooses to go on other university programs, they will need to be enrolled in an Auburn Abroad placeholder course to be able to use their financial aid.

Auburn Abroad experiences vary considerably in length and are available for all semesters including summer. Each college and school within Auburn University has programs abroad tailored to their students' needs. The Auburn Abroad staff conducts a Fall Study Abroad and Passport Fair, and over 100 other information sessions each year to inform students about international opportunities. Both undergraduate and graduate students can participate in the Auburn Abroad Experience. Requirements for acceptance into the Auburn Abroad Experience include the following: (1) a minimum institutional cumulative GPA of 2.25 for undergraduates and 3.0 for graduate students, (2) the student must attain the age of 19 prior to the start date of program, (3) the student's record must show no pending Auburn University judicial actions and the student must be in good academic standing in their college or school. Faculty directors for programs abroad may also have additional requirements. Although some programs require prior knowledge of a foreign language, there are many that do not.

Students considering any type of credit bearing experience abroad should start their Auburn Abroad Experience by attending either (1) a weekly, thirty-minute Study Abroad 101 session conducted by the Auburn Abroad Staff or (2) by attending a faculty led program orientation session. Sessions are conducted on Thursdays at 3pm and repeated on Fridays at 11am in the Auburn Abroad conference room, 242 Foy Hall. These sessions include an introduction to the on-line Auburn Abroad application process, hints on searching for faculty led and other types of programs abroad, the credit approval process, transcript information, information on a variety of funding resources, and paperwork needed for scholarship, PACT V.A. and other benefit programs. Students interested in faculty led programs must contact the faculty director(s) for the dates of their orientation sessions. After students attend a study abroad orientation session, they are ready to start their on-line study abroad application, found at www.auburn.edu/studyabroad (http://www.auburn.edu/academic/international/auab/) on the Program Search link. They need to complete this on-line application, submit a completed Course Approval Form, and respond to any Auburn Abroad Unit emails requesting additional information. The Course Approval Form requires special attention and students must obtain all required signatures including department chair and dean. The on-line application and requested materials must be completed and submitted by the deadline dates listed on www.auburn.edu/studyabroad (http://www.auburn.edu/academic/international/auab/) to be considered. Current deadline dates are: Summer Programs: March 30; Fall Programs - April 30 and Spring Programs: October 15.

The OIP staff monitors students' on-line applications and will enroll individual students in one of the following Auburn Abroad Full Time Placeholder courses: (UNIV 2940/UNIV 2945 , UNIV 4940 /UNIV 4945 , UNIV 5940 /UNIV 5945 or UNIV 7940/UNIV 7945). These placeholder courses will be listed on the students' transcripts while they are abroad. Once students complete their course work abroad and the Auburn Abroad staff receives and processes their transcript through the registrar, then the actual, approved courses listed on their Course Approval Form will be listed on the students' transcripts as Auburn University Credit. These processes and dates are subject to change and it is the individual student's responsibility to attend orientation sessions and check the website to insure that they are in compliance. In addition to receiving credit for an abroad experience, students enrolled in Auburn Abroad are provided opportunities to attend pre-departure sessions and will be enrolled in the Auburn University International Travel Assistance plan. Students will receive an enrollment card and material to read concerning the assistance plan, health and safety issues. The Auburn Abroad staff, along with the Office of Campus Safety and Security routinely monitor global situations and will provide assistance to students in distress abroad. Returning students are encouraged to become Global Tiger Peer Advisors when they return, share their "Global Tiger Tale" on the Auburn Abroad website and submit photos from their experience abroad for the annual student photo

contest. For additional information please visit the OIP Auburn Abroad Experience Website at www.auburn.edu/studyabroad (http://www.auburn.edu/academic/international/auab/) and/or send an email to: auab@auburn.edu.

Graduate Assistantships & Fellowships

- Tuition Waiver (p. 1518)
- Graduate Assistantships (p. 1518)
- Types of Graduate Assistantships (p. 1519)
- Annual Evaluation of Graduate Teaching Assistants and Doctoral Students (p. 1519)
- Background Check Policy (p. 1520)
- Graduate Fellowships (p. 1520)
- Graduate Assistantship Workload Policy (p. 1520)
- Graduate Assistant Performance Improvement and Administrative Action Policy (p. 1520)
- Sexual and Gender Based Misconduct Policy Training for University Graduate Assistants (p. 1521)

Tuition Waiver

Non-Alabama resident graduate assistants may receive a waiver of the out-of-state portion of their tuition if they are on at least a 25 percent graduate assistantship (new appointments beginning in Fall 2013 must be at 33 percent) and are paid a minimum monthly stipend set each year by the provost. Such graduate assistants who have been on assistantship for consecutive fall and spring semesters are eligible to have the out-of-state portion of their tuition waived for the summer semester whether or not they are on assistantship that semester. Students will need to contact the Graduate School to have this waiver applied.

Graduate Assistantships

Graduate assistant appointments are temporary. Continuation depends upon availability of funds, level of enrollment, research needs, and satisfactory performance. Salaries are paid in accordance with the budget policies and payroll procedures of the university. The Board of Trustees is obligated to pay certain fixed charges against the institution and thereafter pay salaries in full insofar as funds are available. If for any reason beyond the control of the Board of Trustees funds are not available, salaries will be prorated.

Each graduate assistant must be in a degree-seeking program and registered in the classification of MST, EDS, PHD, or GPR. The student also must be registered for at least one course (during each academic term of the assistantship), must satisfy the minimum course load specifications of the individual departments and must be making satisfactory progress toward the degree.

Workloads for graduate assistants are defined on the basis of a normal teaching load or the equivalent time in other duties as determined by each department head and the dean of the school or college in which the assistant is employed. For example, a one-third workload is one-third of a normal teaching load. Graduate students may hold multiple assistantships and the assistantships may come from different units on campus, but together they cannot add up to more than a 0.50 FTE (20 hours per week) appointment. Maximum course loads for graduate assistants are determined by individual departments. It is recommended that graduate students working more than half-time not carry a full academic load.

Requirements that graduate students register for hours not included in the plan of study as a condition of employment or to enhance credit hour production for administrative purposes are inappropriate. Similarly, requiring hours on the plan of study beyond the degree requirements established by the Graduate Faculty for such administrative purposes is also inappropriate unless the additional requirements are required by university policy.

International graduate students on F1 visas cannot hold a greater than 50 percent work appointment. International graduate students on F2 visas cannot hold a work appointment. Multiple assistantships for international graduate students cannot add up to more than a 50 percent work appointment.

All international graduate teaching assistants who are assigned to scheduled lecture or laboratory sections must be certified in spoken English proficiency. Evidence of satisfactory speaking skills can be demonstrated with a score of 23 or higher on the Speaking Section of the Internet-based TOEFL (iBT), or a score of 7 on the Speaking section of the IELTS, or a score of 4.4 and above in the Speaking section of the iTEP (which replaced the SPEAK test), which is administered at Auburn University prior to the start of classes. Applicants who hold a baccalaureate degree from an accredited institution whose instruction is in English may be exempted from this requirement. A student may be asked to enroll in a course designed to improve the oral communication skills of international teaching assistants. Hiring units are responsible for making sure that international Graduate Teaching Assistants meet the minimum requirements for employment, including but not limited to a satisfactory background check and proficiency in English. For each international Graduate

Teaching Assistant, hiring units are required to submit the International Graduate Teaching Assistant Certification of Eligibility for Employment form and supporting documentation.

Types of Graduate Assistantships

Graduate Teaching Assistants (GTAs)

A Graduate Teaching Assistant must meet eligibility requirements and be supervised by an appropriate graduate faculty member. The GTA's primary responsibility is to support the instructional mission of the University. For a student to be classified as a GTA, at least 50% of the student's responsibility as a teaching assistant must be devoted to the direct instruction of students, typically in a classroom or laboratory setting.* The GTA's responsibilities may also include, for example: advising or mentoring of students; proctoring exams; grading papers, homework, and/or projects; preparing instructional materials; or providing other general assistance in the instructional process. GTAs may not be given duties to support faculty research or duties primarily clerical in nature. Whatever their instructional responsibilities, GTAs must be supervised by a faculty member who is responsible for monitoring and evaluating their performance at least on an annual basis. GTAs who have no prior teaching experience must be given some form of training before being allowed to teach. Any GTA with primary responsibility for a course must have a minimum of 18 semester hours of graduate course credit in that field of instruction.

*GTAs are not permitted to serve as instructor of record for courses numbered 6000 or above, although they may assist with laboratories for such courses. Additionally, they may not teach or assist with a course in which they are enrolled.

Graduate Research Assistants (GRAs)

A Graduate Research Assistant (GRA) must meet eligibility requirements and be supervised by an appropriate graduate faculty member. The GRA's primary duty is to engage in original, professional-level research under a faculty member's supervision in the course of obtaining a graduate degree. The faculty supervisor determines the students' specific duties and is responsible for monitoring and evaluating the GRA's performance at least on an annual basis.

Graduate Extension Assistants (GEAs)

A Graduate Extension Assistant must meet eligibility requirements and be supervised by an appropriate graduate faculty member or extension agent. GEAs are responsible for various kinds of extension work and interaction with the public. The various branches of the Extension Service award these assistantships. A faculty member or extension agent should be responsible for monitoring and evaluating the performance of GEAs at least on an annual basis.

Graduate Assistants (GAs)

Graduate Assistants must meet eligibility requirements and be supervised by a faculty member, administrator, or other appropriate university employee. GAs are responsible for duties other than teaching, research, or extension. These responsibilities can be varied and could include performing administrative duties not related to the GA's field of study or the instructional or research missions of the university. Whatever their responsibilities, GAs should be supervised by a faculty member, administrator, or other appropriate university employee who is responsible for monitoring and evaluating their performance at least on an annual basis.

*Tuition waivers for graduate assistants not engaged in teaching, research, or extension are subject to taxation and income tax withholding.

Policy on Paid Leave for Graduate Assistants (GTAs, GRAs, and GAs)

All graduate assistants (GTAs, GRAs, and GAs) are exempt employees, meaning they are paid on a monthly basis for their assigned FTE. It is Auburn University policy that graduate assistants be paid during official University holidays and breaks, including Fall Break, Spring Break, and/or official University closures.

Annual Evaluation of Graduate Teaching Assistants and Doctoral Students

Policy: Effective beginning Fall 2014, the Graduate School will require that each department conduct—at least on an annual basis—an evaluation of the progress of each Graduate Teaching Assistant (GTA) and each graduate student enrolled in a doctoral program. Continuation is contingent upon satisfactory performance.

Reporting: Annually, each department will report to the Graduate School, confirming that the evaluation of all GTAs and doctoral students has been completed. In addition, the department will provide the Graduate School with a summary report of all instances in which a GTA or doctoral student has received an unsatisfactory review.

Expectations: Each department will be responsible for developing procedures (if not already in place) for the annual evaluation of the progress of GTAs and doctoral students. Following guidelines for best practices, the review should include at least the following:

- A student self-report and assessment of academic progress; teaching (if applicable); and research (if applicable) [prepared in advance of the review conference];
- A report prepared by the student's advisor (and preferably at least one other faculty member, e.g., a member of the student's advisory committee) that assesses the student's academic progress, teaching (if applicable), and research (if applicable) that identifies strengths and weaknesses, and establishes expectations for the next year. The report may be augmented by reports from teaching supervisors or other members of the student's advisory committee.
- An opportunity for the student to discuss the report in person.
- A signed copy of the written assessment should be placed in the student's file and a copy given to the student.

Background Check Policy

The Graduate School requires that all graduate student employees (including hourly paid) have an approved consumer report and/or investigative consumer report (background check) as a condition for appointment. The information contained in these reports may be used to deny an individual employment or continued employment with Auburn University. The background report and its contents are deemed private and confidential and shall be disclosed only for the purposes described in "Procedures for Securing Background Reports for Graduate Students Before Hiring" to those University employees who have a need to know, or as otherwise required or permitted by law. This policy is effective for all graduate student employees whose new appointments begin on or after January 1, 2014.

Graduate Fellowships

Auburn University provides in-state tuition fellowships to most of its students holding graduate assistantships. Though administered through the Graduate School, applicants should contact the specific academic departments concerning eligibility and availability.

Graduate Assistantship Workload Policy

Graduate students may not normally hold an appointment of more than 50 percent, whether the appointment is from a single unit or multiple units. This policy also applies to internship appointments (whether called an internship or externship). Graduate students may hold multiple assistantships (assistantships and/or hourly employment) from one or more units on campus, but the cumulative appointments cannot add up to more than a 0.50 FTE (20 hours per week) appointment. This allows the students the time needed to devote to their academic programs. An exception is automatically allowed in the special case of a graduate assistant assigned to teach one four credit course and one three/four credit course. In such cases, appointments will be made at 0.58/0.67 FTE, respectively. Other exceptions may be requested, with compelling academic justification, in writing to the Provost by the dean. For multiple assistantships from different units, coordinating approval memos from the home unit and the hiring units are required. Please note that federal regulations limit the cumulative appointment for international graduate students to no more than a 0.50 FTE (20 hours per week) appointment.

Graduate Assistant Performance Improvement and Administrative Action Policy

Failure to Satisfy Performance Standards

Performance Improvement Meetings — In addition to regularly scheduled performance reviews, when a supervisor determines that a graduate assistant is failing to meet satisfactory performance standards, the supervisor will meet with the assistant. Together, they will review the duties and responsibilities expected of the graduate assistant, and the supervisor will identify those areas in which the performance of those duties and responsibilities is judged to be unsatisfactory. The supervisor will then advise the graduate assistant that if his or her performance does not improve to a satisfactory level within a time period specified by the supervisor, the assistantship will be terminated. The time period established by the supervisor should provide a sufficient and reasonable time for the graduate assistant to demonstrate a satisfactory level of performance. In some instances, the graduate assistant's failure to meet satisfactory standards of performance may be disruptive of the educational process (e.g., failure to appear for a teaching assignment, or failure to grade examinations in a timely fashion). In such instances, the graduate student should be advised that any subsequent failure to meet satisfactory performance standards may result in termination of the assistantship. As soon as possible following this meeting (generally within three working days) the supervisor will provide the assistant with a written summary of the meeting, including notice of areas of unsatisfactory performance and the time period specified for improvement to a satisfactory level. A copy will be sent to the department chair for review/approval and to the dean of the Graduate School.

Termination of an Assistantship — If a graduate assistant fails to meet acceptable standards of performance as prescribed in the performance improvement meeting, the supervisor will notify the department chair. The department chair will schedule a meeting

with the supervisor and graduate assistant as soon as possible, generally within three working days. At that meeting, the graduate assistant's performance will again be reviewed. If it is concluded that the graduate assistant has failed to meet acceptable performance standards, the department chair may terminate the graduate assistantship appointment. The department chair will provide a written notice summarizing the meeting and the action taken to the supervisor, graduate assistant, the dean of the college, and the dean of the Graduate School within five working days of the meeting.

Acts of Misconduct and Unprofessionalism — Acts of misconduct or unprofessionalism may require prompt action. Such acts may include, but are not limited to:

1. Refusing to obey reasonable and necessary instructions or job assignments, insubordination, or using abusive or unprofessional language in the workplace.
2. Indulging in offensive or obscene manner.
3. Drinking intoxicants on University property, with exception of events acting in accordance with the University Campus Alcohol Policy.
4. Using illegal drugs on University property.
5. Stealing or misappropriating University property or property belonging to students or university employees.
6. Scientific misconduct

Appropriate actions include termination of an assistantship, suspension of an assistantship for a specified period, and reduction of the FTE and/or benefits associated with that assistantship. If a supervisor believes a graduate assistant has engaged in such an act of misconduct or unprofessionalism, the following steps are to be taken.

For incident(s) of unprofessional acts or behavior which violate accepted norms of professional conduct, the supervisor will provide notice of the proposed administrative action to the graduate assistant and document the situation in a written report. In such cases, the graduate assistant may be placed on immediate administrative leave with pay from the assistantship duties, at the discretion of the supervisor. The report will be provided to the department chair to whom the supervisor reports, who will schedule a meeting with the supervisor and graduate assistant as soon as possible, generally within three working days. At that meeting, the incident(s) will be reviewed, and the proposed administrative action may be affirmed, amended, or overturned by the department chair. The department chair will provide a written notice summarizing the meeting and his/her decision regarding administrative action to the supervisor, graduate assistant, the dean of the college, and the dean of the Graduate School within five working days of the meeting.

Acts of misconduct may include, but are not limited to, theft, fraud, physical altercation, and sexual harassment. Additionally, for misconduct covered by the Student Code of Conduct, Title IX Sexual Harassment Policy, and/or the Policy Against Discrimination and Harassment, the case will also be referred to the Affirmative Action/Equal Employment Opportunity – Title IX Office.

Supervisors and students should be aware that termination or reduction of the FTE of an assistantship, will have large financial impacts, which can be particularly problematic for a student if termination or FTE reduction occurs before the last class day of a semester. A description of the rules regarding graduate assistant benefits, including tuition fellowships and health insurance, can be found on the Graduate School website.

Appealing Action Regarding an Assistantship — If a graduate assistant wishes to appeal a decision of administrative action regarding an assistantship, including termination, he/she may file a written appeal within five working days of receipt of the department chair's written notice with the dean of that college. The graduate assistant will be notified in writing of the result of the appeal within five working days of the submission of the written appeal. The decision resulting from this process is final and not subject to further appeal.

Sexual and Gender Based Misconduct Policy Training for Auburn University Graduate Assistants

Title IX & Discrimination: Identifying & Responding to Sexual Misconduct Training for Auburn University Graduate Assistants

The Graduate School requires that all Graduate Assistants, including Graduate Teaching Assistants, Graduate Research Assistants, Graduate Extension Assistants, and Graduate Assistants, have approved Title IX & Discrimination: Identifying & Responding to Sexual Misconduct training as a condition for continued appointment. The specific form of the required training will be determined in consultation with the Graduate School and the Office of Affirmative Action/Equal Employment Opportunity.

Doctoral Degrees

- Admission (p. 1522)
- Summary of Procedures for Doctoral Degree Programs (p. 1522)
- Advisory Committee and Plan of Study Worksheet (p. 1523)
- Course Requirements (p. 1523)
- Time Limit (p. 1524)
- Dissertation (p. 1524)
- Annual Evaluation of Graduate Teaching Assistants and Doctoral Students (p. 1524)
- The Doctor of Philosophy Degree (p. 1524)
- Final Examination (p. 1525)
- Language Requirement (p. 1525)

The doctor of philosophy is offered in administration of elementary and secondary education, administration of higher education, administration of supervision and curriculum, adult education, aerospace engineering, animal sciences, biological sciences (botany, microbiology and zoology), career and technical education, chemical engineering, chemistry, civil engineering, computer science and software engineering, counselor education, counseling psychology, discrete and statistical sciences, early childhood education, educational psychology, electrical and computer engineering, elementary education, English, English language arts education, fisheries and allied aquacultures, forestry and wildlife sciences, history, horticulture, human development and family studies, industrial and systems engineering, kinesiology, management, materials engineering, mathematics, mathematics education, mechanical engineering, music education (instrumental and vocal), nutrition, food science, physics, plant sciences (agronomy and soils, plant pathology, and entomology), poultry science, psychology, public administration and public policy, reading education, rehabilitation and special education, science education (biology, chemistry, general science and physics), and social science education (general social science and history), plus interdepartmental programs in biomedical sciences (anatomy, physiology, and pharmacology; large animal surgery and medicine; pathobiology; radiology; and small animal surgery and medicine), economics (agricultural economics and forestry), integrated textile and apparel science (consumer affairs and polymer and fiber engineering), and pharmaceutical sciences.

Admission

Prospective candidates for the degree of doctor of philosophy are admitted under the same procedures and requirements outlined in the general regulations elsewhere in this *Bulletin*. A student must be admitted to a specific doctoral program, but admission does not mean admission to candidacy for the degree, which occurs only after satisfactory completion of the general oral examination.

Summary of Procedures for Doctoral Degree Programs

The student should:

1. Obtain application forms through the Graduate School website and apply by submitting all required materials to the Graduate School by the departmental deadlines. The Graduate School forwards the application to the appropriate departmental screening committee. The department head or chair then makes a recommendation to the dean of the Graduate School, who sends a letter notifying the applicant of the decision.
2. Apply for an assistantship, if applicable, through the department involved.
3. Become familiar with the requirements for the doctoral degree as published in this Bulletin.
4. Consult with the departmental advisor and become familiar with departmental procedures.
5. Discuss and develop a plan of study during the first semester with an advisor or major professor.
6. Acquire necessary forms at the Graduate School or on the Web at www.grad.auburn.edu.
7. Establish an advisory committee through the major professor and department head or chair. Official appointment of the advisory committee occurs when the Committee, Transfers, Exceptions, and Candidacy (CTEC) Form is approved by the Graduate School.
8. Prepare a plan of study worksheet and have it approved by the advisory committee and department head or chair. Submit the Committee, Transfers, Exceptions, and Candidacy (CTEC) Form.
9. Complete course work, including language requirements, if any, and as detailed in the plan of study worksheet.
10. Arrange for the general written and oral examinations through the advisory committee. Students must have completed 30 graded credit hours of coursework in order to proceed with the General Oral Examination. After the written examination, schedule the General Oral Examination by submitting the Request for the Report on the General Oral Examination. The advisory committee, as identified in the Committee, Transfers, Exceptions, and Candidacy (CTEC) Form, must be approved by the Graduate School prior to scheduling the General Oral Exam.

11. Submit the dissertation proposal for approval by the advisory committee and become familiar with Electronic Thesis and Dissertation Guide, available through the Graduate School website.
12. Submit the graduation application through AU Access at least one semester before graduation.
13. Register for at least one course the semester of graduation.
14. Prepare dissertation and submit a committee-approved first draft to the Graduate School for review and approval by the University Reader, who serves as the representative of the graduate faculty.
15. Study recommendations of the University Reader and make appropriate changes in the dissertation.
16. On approval of the dissertation by the Dean of the Graduate School, arrange for final oral examination.

Advisory Committee and Plan of Study Worksheet

After a student has enrolled in the doctoral program, an advisory committee should be selected by the student, student's advisory committee chair (sometimes called the major professor), and department/program chair. As described in the following paragraph, the committee chair and members should be formally selected and approved using the Committee, Transfer, Exception and Candidacy (CTEC) form. If change(s) in the committee makeup are required (either chair or member(s)), the committee chair (for committee makeup) and/or department head (for chair changes) should assist the student in identifying replacement members. Please note that a student must have a full committee (committee chair and at least the minimum number of qualified committee members) in order to continue in the program after the CTEC form has been submitted. Committee chair/membership replacements should be made within one academic term to avoid the student being placed on inactive status (link: https://bulletin.auburn.edu/thegraduateschool/registration/#Inactive%20Status (https://nam11.safelinks.protection.outlook.com/?url=https%3A%2F%2Fbulletin.auburn.edu%2Fthegraduateschool%2Fregistration%2F%23Inactive%2520Status&data=05%7C01%7Cwittemm%40auburn.edu%7C3dec4ca0b34f435d2dfe08db4cda3008%7Cccb6deedbd294b388979d72780f62d3b%7C1%7C0%7C638188272231877600%7CUnknown%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQIjoiV2luMzIiLCJBTiI6Ik1haWwiLCJXVCI6Mn0%3D%7C3000%7C%7C%7C&sdata=axDrMiUR1x91Z7nhsJx4lUdskMJsEQ2O1fG4nlW6%2BrU%3D&reserved=0).

The advisory committee is responsible for developing the student's plan of study worksheet and conducting the doctoral general and final examinations. It should consist of at least four members of the Auburn University graduate faculty. Additional voting members may be appointed to the committee (including no more than one non-Auburn University faculty member, who must hold the terminal degree in the field). Three of the Auburn University-affiliated committee members, including the major professor, must be members of the graduate faculty at Level 2. The major professor must also be a graduate faculty member in the department/program granting the degree. The formal appointment of the advisory committee occurs when the Committee, Transfers, Exceptions, and Candidacy (CTEC) Form is approved by the Graduate School.

Changes to the plan of study worksheet may be warranted as required by student needs, research interests, and course availability. If so, submit a new CTEC Form if there are changes such as transfer courses and/or exceptions.

Course Requirements

The minimum number of hours in a doctoral program is 60 semester hours earned through instruction beyond the bachelor's degree, including 1) a minimum of 30 semester hours graded (e.g. A, B) graduate course work (6000-level and above); and 2) a minimum of 30 semester hours of additional graduate course work (6000-level and above) that may include ungraded courses, 7990 and 8990 and must include at least 10 hours of 8990. Some departments require more than 60 semester hours, and requirements may vary according to a student's background and interest.

The total number of credit hours that may be transferred from another accredited institution toward a doctoral degree varies by program but must be less than 50 percent of the credit hours listed on the Plan of Study. Such transfer credit 1) must fall within the time limits of the degree; and, 2) must be approved by the advisory committee and the dean of the Graduate School. A maximum of four hours of 7990 (Research and Thesis) from a completed master's program may be counted.

All doctoral students must complete a minimum of 10 hours of 8990. Enrollment in 8990 may take place at any time the student and the advisory committee deem appropriate. During any one semester, the number of hours of 8990 in which the student enrolls should reflect the amount of instructional time being spent on the dissertation and the degree to which university resources are being utilized. Students may enroll, during any one semester, for as few as one hour or as many as 16 hours of 8990. Dissertation students submitting their dissertation, awaiting committee review and approval, or taking their final examination must register for 8990 Research and Dissertation in the semester(s) when these steps in the process take place. The requisite 10 hours of 8990 should be included in the plan of study worksheet. No grade is assigned.

The Dean of the Graduate School is authorized to approve alternatives to these course work requirements in exceptional cases and on an individual basis.

Time Limit

Programs and departments should conduct annual reviews of doctoral candidates to assess progress toward the completion of the degree. Students are expected to achieve candidacy within six years and to complete all requirements for the degree within ten years. Upon admission to candidacy, the student has four calendar years to complete all remaining requirements for the doctoral degree. The student's time to completion begins with the earliest completed course approved for inclusion in the plan of study. If unable for any reason to complete the requirements on time, the student may petition, with the approval of the advisory committee, the dean of the Graduate School for a one year extension. Students failing to complete the degree in the allotted time revert to the status of an applicant and must petition, with the approval of the advisory committee, the dean of the Graduate School to retake the oral examination.

Dissertation

A dissertation is required of all candidates for the degree of doctor of philosophy. It shall constitute an original contribution to knowledge. The student conducts the research and prepares the dissertation under the direction of the major professor. Only dissertations prepared according to the Electronic Thesis and Dissertation Guide, available through the Graduate School website, are accepted by the Graduate School. Submission of a dissertation is defined as the time at which the first complete draft of such is submitted to the major professor for review. All dissertations are published electronically through AUETD and disseminated by ProQuest. Auburn University reserves the right to make copies of the dissertation, but the student retains all publication rights.

Annual Evaluation of Graduate Teaching Assistants and Doctoral Students

Policy: Effective beginning Fall 2014, the Graduate School will require that each department conduct — at least on an annual basis — an evaluation of the progress of each Graduate Teaching Assistant (GTA) and each graduate student enrolled in a doctoral program.

Reporting: Annually, each department will report to the Graduate School, confirming that the evaluation of all GTAs and doctoral students has been completed. In addition, the department will provide the Graduate School with a summary report of all instances in which a GTA or doctoral student has received an unsatisfactory review.

Expectations: Each department will be responsible for developing procedures (if not already in place) for the annual evaluation of the progress of GTAs and doctoral students. Following guidelines for best practices, the review should include at least the following:

- A student self-report and assessment of academic progress; teaching (if applicable); and research (if applicable) [prepared in advance of the review conference];
- A report prepared by the student's advisor (and preferably at least one other faculty member, e.g., a member of the student's advisory committee) that assesses the student's academic progress; teaching (if applicable); and research (if applicable) that identifies strengths and weaknesses, and establishes expectations for the next year. The report may be augmented by reports from teaching supervisors or other members of the student's advisory committee.
- An opportunity for the student to discuss the report in person.
- A signed copy of the written assessment should be placed in the student's file and a copy given to the student.

The Doctor of Philosophy Degree

The doctor of philosophy is conferred in recognition of the mastery of a special field of learning as shown by the satisfactory completion of a prescribed course of study and investigation, the successful passing of general examinations covering the major and minor fields, the preparation of an acceptable dissertation reflecting high achievement in scholarship and independent original investigation, and the passing of a final examination on the dissertation and related subjects. The degree is a research degree. It is not conferred merely upon fulfillment of technical requirements, but awarded in recognition of the ability to think and work independently, originally, and creatively in a chosen field. Some departments have special requirements for the degree, and the student will be governed by those, including the ones listed in departmental statements under Courses of Instruction elsewhere in this publication.

General Doctoral Examination

A general examination, often called the "preliminary examination," is required of all applicants for the degree of doctor of philosophy. It consists of written and oral testing by the student's advisory committee (or by an examination committee designated by the student's academic program) in the student's major and minor. The written portion of the examination does not require approval in advance by the Graduate School. The oral portion, however, does require such approval. Students must have completed 30 graded credit hours of coursework in order to proceed with the General Oral Examination. After the written examination, the General Oral Examination is

scheduled by submitting the Request for the Report on the General Oral Examination. The advisory committee, as identified in the Committee, Transfers, Exceptions, and Candidacy (CTEC) Form, must be approved by the Graduate School prior to scheduling the General Oral Exam.

The primary purpose of the General Oral Examination is to assess the student's understanding of the broad body of knowledge in a field of study. The examination also affords the advisory committee an opportunity to review the student's proposed research and understanding of research methods and literature in the chosen field. If the general examination reveals deficiencies in any of these areas, the advisory committee may recommend remedial work, re-examination, or discontinuation of doctoral study.

The General Oral Examination should be conducted immediately after the successful completion of the written examination and well before the final examination. The two examinations should not be taken in the same semester. Some departments have specific requirements for conducting these examinations, and the student should become familiar with these. Successful completion of the General Oral Examination requires unanimous support of the student's advisory committee. If the General Oral Examination is failed, a re-examination may be given on recommendation of the committee and approval by the dean of the Graduate School. Further examinations require exceptional circumstances and approval by the Graduate Council. The student becomes a candidate for the degree upon successful completion of the General Oral Examination.

Final Examination

After the dissertation has been completed (except for minor revisions) and has been approved by the student's advisory committee, it is submitted to the Graduate School. A University Reader (a member of the graduate faculty [Level 1 or 2] who serves to represent the university's graduate faculty and the Graduate School) will be appointed to review the dissertation. However, the student's advisor may request appointment of the University Reader at any time rather than waiting until after the dissertation is drafted. When the Graduate School has received an approved evaluation from the University Reader, the student may apply for the final examination on a form sent by the Graduate School. The examination is administered by the student's advisory committee. The University Reader also attends and participates. The examination, which generally is oral but may be both oral and written, includes the major and minor fields and a defense of the dissertation. Successful completion requires unanimous support of all members of the committee, including the University Reader. Any member of the Graduate Faculty may attend.

Language Requirement

Language requirements for graduate degrees vary with departments. The Department of Foreign Languages offers proficiency courses in a number of languages. The department also offers reading proficiency examinations for those students who wish to demonstrate proficiency without taking a course. Such students must apply to the Graduate School for these examinations by the 15th class day of the semester.

The Master's Degree Program

- Summary of Procedures for Master's Degree (p. 1526)
- Advisory Committee (p. 1526)
- Plan of Study Worksheet (p. 1526)
- Time Limit (p. 1527)
- Language Requirement (p. 1527)
- Master's Degree Options (p. 1527)
- The Thesis Option (p. 1527)
- Major and Minor Subjects (p. 1527)
- The Non-Thesis Option (p. 1528)
- Master of Arts (p. 1528)
- Master of Science (p. 1528)
- Special or Professional Master's Degrees (p. 1528)
- Concurrent Master's Degrees (p. 1528)

The minimum requirements for most master's degrees can be satisfied in one academic year of two semesters or nine months. In practice, however, many students need three semesters or longer. Certain departments have special requirements as outlined in this *Bulletin*. In addition, those students who hold assistantships or fellowships, those who engage in time-consuming work off-campus, or those with scholastic deficiencies of any sort cannot meet all requirements in the minimum time. Also, research is unpredictable and

frequently requires more time than anticipated. Certain departments offer a master's degree under two plans, referred to as the Thesis Option and the Non-Thesis Option.

Summary of Procedures for Master's Degree

The student should:

1. Obtain application forms through the Graduate School website and apply by submitting all required materials to the Graduate School by the departmental deadlines.
2. Apply for an assistantship, if pertinent, with the department involved.
3. Become familiar with requirements for the desired degree as outlined in this *Bulletin*.
4. Consult with departmental advisor and become oriented to departmental procedures.
5. Plan schedule of study for the first semester with advisor.
6. Establish an advisory committee through the department head or chair and departmental advisor; usually done during the first semester of course work.
7. Prepare a plan of study worksheet and have it approved by the advisory committee and department head or chair. Submit the Committee, Transfers, Exceptions, and Candidacy (CTEC) Form.
8. Consult with the advisor on approval for the thesis plan, if applicable, and become familiar with the Electronic Thesis and Dissertation Guide, available through the Graduate School website.
9. Fulfill language requirements, if any.
10. Submit the graduation application through AU Access at least one semester before graduation.
11. Register for at least one course the semester of graduation.
12. Prepare thesis manuscript, if applicable.
13. Arrange for final oral examination with the advisory committee.

Advisory Committee

The student works under the direction of an advisory committee composed of three members recommended by the appropriate department/program head or chair. Two must be members of the Auburn University graduate faculty. Note, only a major professor is required for Master's Non-Thesis, course-only degree options. If change(s) in the committee makeup are required (either chair or member(s)), the committee chair (for committee makeup) and/or department head (for chair changes) should assist the student in identifying replacement members. Please note that a student must have a full committee (committee chair and at least the minimum number of qualified committee members) in order to continue in the program after the CTEC form has been submitted. Committee chair/membership replacements should be made within one academic term to avoid the student being placed on inactive status (link: https://bulletin.auburn.edu/thegraduateschool/registration/#Inactive%20Status (https://nam11.safelinks.protection.outlook.com/?url=https%3A%2F%2Fbulletin.auburn.edu%2Fthegraduateschool%2Fregistration%2F%23Inactive%2520Status&data=05%7C01%7Cwittemm%40auburn.edu%7C3dec4ca0b34f435d2dfe08db4cda3008%7Cccb6deedbd294b388979d72780f62d3b%7C1%7C0%7C638188272231877600%7CUnknown%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQIjoiV2luMzIiLCJBTiI6Ik1haWwiLCJXVCI6Mn0%3D%7C3000%7C%7C%7C&sdata=axDrMiUR1x91Z7nhsJx4lUdskMJsEQ2O1fG4nlW6%2BrU%3D&reserved=0).

The committee chair (or one of the co-chairs) must be a graduate faculty member in the department/program granting the degree. This committee will approve the student's program of study, plan of study worksheet, conduct required examinations and direct the required field project or thesis. Students in a teaching field (e.g., music education, science education, foreign language education) work under a committee composed of at least two members from the College of Education and one member from a related academic field. The names of the committee members are submitted through the Committee, Transfers, Exceptions, and Candidacy (CTEC) Form. Submit a new CTEC Form if there are changes such as transfer courses and/or exceptions.

Plan of Study Worksheet

Early in the graduate program, each student should confer with the appropriate departmental advisor or major professor to select courses and discuss research interests. Use the program or department's plan of study worksheet to plan for courses, transfer courses, exceptions, requirements, and/or graduation. Once approved, and at least one semester before graduation, submit the Committee, Transfers, Exceptions, and Candidacy (CTEC) Form to the Graduate School. The student is responsible for carrying out the planned program and for asking the major professor to make necessary changes.

Time Limit

All graduate work toward a master's degree must be completed within a period of six calendar years. The student's time to completion begins with the earliest completed course approved for inclusion in the Plan of Study.

Language Requirement

Language requirements for graduate degrees vary with departments. The Department of Foreign Languages offers proficiency courses in a number of languages. The department also offers reading proficiency examinations for those students who wish to demonstrate proficiency without taking a course. Such students must apply to the Graduate School for these examinations by the 15th class day of the semester.

Master's Degree Options

The following general regulations are minimum requirements. The professor or committee in charge of a student's work may require more than the specified minimum in order to achieve a well-rounded program. All programs require a minimum of 30 semester hours of graduate courses, 6000-level or above.

The Thesis Option

The master of arts, master of science and master of industrial design are offered under the thesis option. Thesis students register for 7990 Research and Thesis in semesters when working on the thesis, when submitting, defending or awaiting final approval of the thesis, and when taking final examinations.

Major and Minor Subjects

A student under the thesis option must earn a minimum of 30 semester hours, of which at least 21 semester hours must be in a major area of concentration. Depending on departmental requirements or the wishes of the student's advisory committee, the remainder of the course work may be taken within the major field or in a separate but closely related area.

If a student has not met all undergraduate pre-requisites in any field chosen for major or minor work, these should be scheduled as soon as possible, preferably before graduate work begins. The major professor can indicate these on the student's plan of study worksheet.

The topic selected for the thesis must be approved by the student's major professor and advisory committee. The student conducts the research and prepares the thesis under the direction of the major professor. The course, Research and Thesis, is number 7990 in all departments. The student must register for a minimum of four credit hours of this course but may register for as many hours as desired. No more than six hours may be counted toward meeting degree requirements. The student may register for one or more hours at a time. No grade is assigned for this course.

The Electronic Thesis and Dissertation (ETD) Guide, which contains information about requirements for the thesis, is available through the Graduate School website. Submission of a thesis is defined as the time at which the first complete draft of such is submitted to the major professor for review. The Graduate School format checks and accepts only theses prepared according to the ETD Guide. The Graduate School Calendar lists the semester deadline for acceptance of final approved theses. If the electronic thesis needs corrections, the student's graduation may be delayed at least one semester. Auburn University reserves the right to make copies of the thesis, but the student retains all publication rights. All theses are published electronically through AUETD and disseminated through ProQuest.

At the discretion of the program, students may be required to pass a comprehensive examination independent of the required thesis defense. If a program requires a comprehensive examination, the program will publish and submit to the Graduate School a description of the scope and form of the assessment (e.g., comprehensive oral or written examination) and the process for appeal or re-examination should the student fail the examination.

The major professor will schedule the thesis defense not later than the deadline indicated in the Graduate School calendar. The thesis defense should be open to members of the graduate faculty as visitors. Successful completion of the thesis defense requires the unanimous support of all members of the advisory committee. If a student fails the thesis defense, one re-examination may be given on the recommendation of the advisory committee and approval by the Dean of the Graduate School. Further examinations will be allowed only under exceptional circumstances and with approval of the Graduate Council.

The Non-Thesis Option

At the discretion of the program, students may be required to pass a comprehensive examination. If a program requires a comprehensive examination, the program will publish and submit to the Graduate School a description of the scope and form of the assessment (e.g., comprehensive oral or written examination) and the process for appeal or re-examination should the student fail the examination. Non-thesis graduate students who complete a special project must register for 7980 in semesters when working on the project. Non-thesis students requiring only a final examination register for GRAD 7000 in the semester when the exam is taken. Credit hours for 7990 Research and Thesis cannot be counted toward graduation requirements for non-thesis degree programs.

Master of Arts Degrees

A listing of master of arts programs is available through the Areas of Study, Graduate School website.

Master of Science Degrees

A listing of master of science programs is available through the Areas of Study, Graduate School website.

Special or Professional Master’s Degrees

These special or professional degrees are offered: master of accountancy, master of aerospace engineering, master of agriculture (agricultural economics, agronomy and soils, animal sciences, entomology, horticulture, plant pathology, and poultry science), master of applied mathematics, master of aquaculture, master of biological studies, master of building construction, master of business administration, master of chemical engineering, master of civil engineering, master of community planning, master of design build, master of education (curriculum and teaching, educational foundations leadership and technology, health and human performance, and special education, rehabilitation, and counseling school psychology), master of electrical engineering, master of forestry, master of Hispanic studies, master of industrial design (thesis and non-thesis option), master of industrial and systems engineering, master of landscape architecture, master of management information systems, master of materials engineering, master of mechanical engineering, master of probability and statistics, master of public administration, master of social work, master of software engineering, and master of technical and professional communication.

Concurrent Master's Degrees

Auburn University offers a number of approved concurrent master’s degree programs, which are specially designed to offer outstanding Auburn graduate students the opportunity to earn two master’s degrees in less time and cost than usual by allowing students to double count or share more credit hours than allowed for a second master’s degree. A list of approved concurrent master’s degrees can be found on the Graduate School website. Such programs require students to be enrolled concurrently in both degrees. They may share up to 9 credit hours if the total hours for both degrees sum to 65 or less. Or they may share up to 12 credit hours if the total hours for both degrees sum to 66 or more. Approval for concurrent programs requires proposal submission by the offering academic unit(s) and review and approval by the Graduate Council Curriculum Committee and the Graduate Council.

.

Specialist in Education Degree

- Admission (p. 1528)
- Advisory Committee (p. 1529)
- Plan of Study Worksheet (p. 1529)
- Course Requirements (p. 1529)
- Time Limit (p. 1529)

This degree is designed for professionals in education and human services areas who want increased competence in a field of specialization. Areas of specialization are offered in the various departments in the College of Education.

Admission

Scholarship, interpersonal orientation, and potential for leadership are considered in the screening procedure. Appropriate experience in teaching or a leadership position in education or a human services area is requisite. All work beyond the baccalaureate must have been of high quality with a GPA of at least 3.0 on a 4.0 scale.

Advisory Committee

The specialist student works under the direction of an advisory committee composed of three members recommended by the appropriate department/program head or chair. All must be members of the Auburn University graduate faculty. The committee chair (or one of the co-chairs) must be a graduate faculty member in the department/program granting the degree. This committee will approve the student's program of study, conduct required examinations, and direct the required field project. Students in a teaching field (e.g., music education, science education, foreign language education) work under a committee composed of two members from the College of Education and one member from a related academic field. If change(s) in the committee makeup is required (either chair or member(s)), the committee chair (for committee makeup) and/or department head (for chair changes) should assist the student in identifying replacement members. Please note that a student must have a full committee (committee chair and at least the minimum number of qualified committee members) in order to continue in the program after the CTEC form has been submitted. Committee chair/membership replacements should be made within one academic term to avoid the student being placed on inactive status (link: https://bulletin.auburn.edu/thegraduateschool/registration/#Inactive%20Status (https://nam11.safelinks.protection.outlook.com/?url=https%3A%2F%2Fbulletin.auburn.edu%2Fthegraduateschool%2Fregistration%2F%23Inactive%2520Status&data=05%7C01%7Cwittemm%40auburn.edu%7C3dec4ca0b34f435d2dfe08db4cda3008%7Cccb6deedbd294b388979d72780f62d3b%7C1%7C0%7C638188272231877600%7CUnknown%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQIjoiV2luMzIiLCJBTiI6Ik1haWwiLCJXVCI6Mn0%3D%7C3000%7C%7C%7C&sdata=axDrMiUR1x91Z7nhsJx4lUdskMJsEQ2O1fG4nlW6%2BrU%3D&reserved=0).

Plan of Study Worksheet

Prepare a plan of study worksheet and have it approved by the advisory committee and department head or chair. Submit the Committee, Transfers, Exceptions, and Candidacy (CTEC) Form to the Graduate School at least one semester before graduation. Students are required to submit a graduation application to the Graduate School prior to the semester of expected graduation. Graduation day is the official last day of each semester and, therefore, is the deadline to submit the Committee, Transfers, Exceptions and Candidacy (CTEC) Form and graduation application for graduation in the following semester. Submit a new CTEC Form if there are changes such as transfer courses and/or exceptions.

Course Requirements

A minimum of 30 semester hours beyond the master's degree must be taken in a program approved by the student's advisory committee and can be identified through a plan of study worksheet. Professional educators pursuing sixth-year certification are responsible for adapting the plan of study worksheet to requirements in the states in which they will need advanced certification. A relevant field project, approved in advance by the student's committee, must be completed under the supervision of the major professor. A final written report on the field project will be submitted to the advisory committee by the student. The advisory committee will conduct a final examination based on the area of specialization and the field project.

Time Limit

All graduate work toward an Education Specialist degree must be completed within a period of six calendar years. The student's time to completion begins with the earliest completed course approved for inclusion in the plan of study worksheet.

Graduate School General Policies

Policies

- Academic Bankruptcy Policy (p. 156)
- Academic Engagement (p. 156)
- Academic Integrity and Student Conduct (p. 156)
- Academic Programs and Curricula (p. 156)
- Accelerated Bachelor's/Master's Degree Plan (p. 157)
- Accommodation Policy for Students with Disabilities (p. 157)
- Activities Involving Animals (p. 157)
- AUETD Publication and Access Policy (p. 157)
- Calendar (p. 158)
- Class Attendance (p. 158)
- Classified or Proprietary Research (p. 159)

- Credit for Directed Studies (p. 159)
- Exceptions to Graduate School Policies (p. 159)
- General Regulations (p. 159)
- Grades (p. 160)
- Graduate Certificate Definition (p. 161)
- Graduate Curriculum Model Change (p. 162)
- Graduate Program Option Definition (p. 162)
- Graduate Study and University Employees (p. 162)
- Institutions with Special Affiliations (p. 162)

- Points of Contact (p.)
- Research Involving Humans (p. 163)
- Second Graduate or Post-Baccalaureate Professional Degree (p. 163)
- Student Academic Grievance Policy (p. 163)
- Student Records (p. 163)
- Teaching Graduate Courses for Lecturers and Senior Lecturers Policy (p. 166)
- Two-Campus Studies (p. 166)
- Withdrawal Policy (p. 166)

Points of Contact

GEORGE T. FLOWERS, Dean
MARIA WITTE, Associate Dean

The Graduate School is open 7:45–11:45 a.m. and 12:45–4:45 p.m., Monday through Friday.
Telephone: (334) 844-4700. Fax: (334) 844-4348.
E-mail: gradadm@auburn.edu
Web: www.grad.auburn.edu (https://graduate.auburn.edu/)
Mailing Address: 106 Hargis Hall, Auburn, AL 36849-5122

Academic Bankruptcy Policy

Auburn University graduate students who have been suspended or expelled because of poor academic performance may petition the Graduate School for a declaration of academic bankruptcy. Academic bankruptcy allows the student to petition their program, department, and the Graduate School to restart their graduate program after a minimum of a one calendar year separation from Auburn University. For readmission, the student must submit a readmission request form and must be recommended for readmission by the graduate program to which the student is applying. If the graduate program recommends readmission, the student must, in coordination with the Graduate School and program Graduate Program Officer (GPO), identify the semester(s) for which they request academic bankruptcy. If approved, the student forfeits all graduate courses and credits earned at Auburn University for those semesters. Auburn University will retain all forfeited courses on the student's transcript but will not include forfeited courses in the calculation of the Graduate Grade Point Average. Students may not declare academic bankruptcy more than once.

Academic Engagement

Any graduate student enrolled in a degree program culminating in a thesis or dissertation will directly engage in research and/or creative scholarship with the major professor, will have access to the tools needed for the research/scholarly activity, will be immersed in the culture of graduate education, will engage in the professional activities of the discipline, and will complete the research/scholarly activity in a reasonable period of time.

Academic Integrity and Student Conduct

Graduate students at Auburn University are expected to adhere to established standards of academic integrity, personal conduct, and professional conduct. The primary code of conduct is detailed in the Auburn University Code of Student Conduct.

Academic units may also define and publish standards appropriate to their disciplines as well as describing the processes for resolving disputes and appealing decisions. Students found in violation of policies defining academic integrity, personal conduct, and professional conduct may be subject to dismissal from the Graduate School.

Academic Programs and Curricula

An **academic program** is an organized plan of study which, when successfully completed, is recognized by the awarding of a degree. It includes all courses and related activities required by the university and those required by a school, college, department or interdisciplinary program. **At Auburn University, the minimum number of hours in a doctoral program is 60 semester hours earned through instruction beyond the bachelor's degree, including 1) a minimum of 30 semester hours graded (e.g., A, B) graduate course work (6000-level and above); and 2) a minimum of 30 semester hours of additional graduate course work (6000-level and above) that may include ungraded courses 7990 and 8990 and must include at least 10 hours of 8990.** Some departments require more than 60 semester hours and requirements may vary according to a student's background and interest. **The minimum number of hours in a master's degree program is 30 semester hours of courses, 6000-level and above.**

A graduate program option is a formally approved variation of an academic program by the offering department which meets objectives that may be more specifically focused. These additional objectives are integrated with the basic program. A formal graduate program option must preserve the integrity of the academic program of which it is a variant. Specifically, the formal program option must 1) be in a recognized sub-field of the discipline; and 2) share at least half of the total credits of the degree program. Only formally approved graduate program options are designated on the transcript. Other less formal variants, which may carry the name of "track," "concentration," "emphasis," or similar terms, are not designated on the transcript; however, all academic programs and designated variations (whether called "options," "tracks," "concentrations," "emphases" or some similar term) must be approved by the Alabama Commission on Higher Education (ACHE).

A graduate **minor** is an organized sequence or cluster of courses offered by a department or interdepartmental program. Not all departments or interdepartmental programs offer a minor. At Auburn University, the term graduate minor designates those sequences or clusters of courses that have been formally proposed as minors by departments or interdepartmental programs and approved by the Graduate Council. The minimum number of semester hours in a minor is nine, all of which must be in courses at the 6000-level or above and must be completed at Auburn University.

Accelerated Bachelor's/Master's Degree Plan

The Accelerated Bachelor's/Master's Degree Program allows Auburn students in some academic programs to count up to nine approved hours in a 30–35 hour master's program or twelve approved hours in a 36 hour or greater master's program toward both a bachelor's and a master's degrees in the same program area. These hours must be at the graduate level.

Admission Criteria

To be considered for admission, students must have at least 45 hours of credit, with at least 24 hours completed at Auburn University, and must have a cumulative GPA of 3.4 or higher on all coursework completed at Auburn. Individual graduate programs may set higher standards or require additional criteria for admission to the accelerated degree program.

Students must earn the bachelor's degree and meet departmental admission criteria to be fully admitted into the graduate program.

Admission Procedures

Students must work with a graduate advisor in the degree-granting department to complete an Accelerated Bachelor's/Master's Degree Program Application, available on the Graduate School website, including:

1. a list of the courses that count toward both the undergraduate and graduate degree and,
2. the projected dates for the completion of the bachelor's and master's degrees

Students in the Honors College remain eligible to graduate with Honors while participating and should consult with an Honors advisor.

Performance Expectations

Students earning a B or higher in a graduate course can apply the course credit toward the undergraduate and graduate degree (if admitted to the graduate program). A passing grade less than a B cannot count towards the graduate degree but may count toward the undergraduate degree if allowed by the degree program.

Accommodation Policy for Students with Disabilities

Auburn University is committed to providing its students with an accessible campus and equitable learning environment. If you have a disability that requires academic accommodations, access to assistive technology training, or support services, contact the Office of Accessibility for additional information: 1228 Haley Center; 334-844-2096 (Voice/TT) or visit the Office of Accessibility website at accessibility.auburn.edu (https://accessibility.auburn.edu/).

Activities Involving Animals

Auburn University's Animal Resources Program requires compliance with the Animal Welfare Assurance negotiated with the Office of Protection from Research Risks/National Institutes of Health (OPRR/NIH). A major part of that Assurance involves the Institutional Animal Care and Use Committee (IACUC) that ensures compliance with the Assurance, the policies of the U.S. Department of Health and Human Services, the U.S. Department of Agriculture and all other federal, state and local regulations concerning care, treatment and use of animals. All activities, whether teaching, research, production or display of animals, and whether or not the activity is funded, must be approved in advance by the committee. The use of animals for any purpose that is not approved in advance by the IACUC may involve severe penalties for non-compliance with institutional policy and could jeopardize the university's Animal Welfare Assurance filed with the OPRR and the NIH. Information may be obtained through the Animal Care and Use Program (IACUC).

AUETD Publication and Access Policy

AUETD is an online database of electronic theses and dissertations (ETDs) submitted by Auburn University students in partial fulfillment of the university's graduate degree requirements. Its purpose is to make Auburn University's ETDs widely available to the public and easy to find online. The ETDs in the AUETD database are indexed by Google and other internet search engines and may appear in search results for those search engines. Graduate students who want to limit access temporarily to the full text of their ETD must choose one of the limited access options **during the ETD submission process** (see options below). Students who choose to limit access to their ETD should be aware that basic bibliographical information about their ETD (including the abstract) will appear in the AUETD database and that the full text of their ETD will become publicly available immediately upon the expiration of the time limit set for limited access. Students who have questions or concerns about this policy are encouraged to contact a Graduate School advisor at (334) 844-4700 **BEFORE** submitting their ETD to AUETD.

Limited Access Options

1. **Unlimited access:** Publication in AUETD with unlimited access is immediate and irreversible. Once a thesis/dissertation is published in AUETD, access via the world-wide-web may not be denied or reversed.
2. **Limited access:** Upon request, students may limit access to their thesis/dissertation only to users with a valid AU user id and password for a limited time period. Upon request, limited access is granted for a period of time not to exceed: i) six months; ii) one year; iii) two years; or iv) five years. Unless the student petitions to extend the period of limited access, the thesis/dissertation will be published with unlimited access immediately upon the expiration of the time period.
3. **Withheld access:** Upon request, students may withhold access to their thesis/dissertation to all users for a limited time period. This means that all users, including the students and their advisory committees are denied access to the thesis/dissertation in AUETD. Upon request, withheld access is granted for a period of time not to exceed: i) six months; ii) one year; iii) two years; or iv) five years. Unless the student petitions to extend the period of limited access, the thesis/dissertation will be published with unlimited access immediately upon the expiration of the time period.
4. **Copyright:** If students plan to copyright some of all of their thesis/dissertation, these plans should be discussed in advance with the major professor, especially if the thesis/dissertation includes shared data.

Calendar

The university operates on the semester system. The Graduate School calendar at the beginning of this *Bulletin* is also available at the Graduate School and contains the dates of various important deadlines. It should be followed carefully.

Class Attendance

Students are expected to attend all their scheduled classes. College work requires regular class attendance as well as careful preparation. Specific policies regarding class attendance are the prerogative of individual faculty members. Faculty shall inform each class in writing at the beginning of the course regarding the effect of absences on the determination of grades.

The student is expected to carry out all assigned work and to take examinations at the class period designated by the instructor. Failure to carry out these assignments or to take examinations at the designated times may result in an appropriate reduction in grade, except as provided below.

Instructors shall determine the policy regarding grading which they feel is best for the course. This policy shall be presented to the class, in writing, at the beginning of the term and will govern the actions of the instructor in the course.

Arrangement to make up missed major examinations (e.g. hour exams, midterm exams) due to properly authorized excused absences (as defined by the Student Policy eHandbook) shall be initiated by the student within one week from the end of the period of the excused absence. Normally, a make-up exam shall occur within two weeks from the time that the student initiates arrangements

for it. Instructors are encouraged to refrain from giving make-up examinations during the last three days prior to the first day of final examinations. The format of make-up exams and opportunities for students to make up work other than major examinations are at the discretion of the instructor whose make-up policies should be stated in writing at the beginning of the term. Instructors are expected to excuse absences for:

1. Illness of the student or serious illness of a member of the student's immediate family. The instructor may request appropriate verification.
2. The death of a member of the student's immediate family. The instructor may request appropriate verification.
3. Trips for members of the student organizations sponsored by an academic unit, trips for university classes, and trips for participation in intercollegiate athletic events. When feasible, the student must notify the instructor prior to such absences, but in no case more than one week after the absence. Instructors may request formal notification from appropriate university personnel to document the student's participation in such trips.
4. Religious holidays. Students are responsible for notifying the instructor in writing of anticipated absences due to their observance of such holidays.
5. Subpoena for court appearance.
6. Presentations at professional meetings or conferences.
7. Any other reason the instructor deems appropriate.

If the instructor does not appear within 20 minutes after the designated class hour, it may be assumed the class is canceled.

It is university policy that all classes will meet as scheduled on the last day before and the first day after holiday periods designated by the university.

Unresolved problems regarding class attendance or procedures should be referred to the University Student Academic Grievance Committee.

Examinations

Examinations are classified as (1) final examinations at the end of each term; (2) special examinations; and (3) other course examinations as determined by the instructor.

Announced tests in graduate courses will be administered at a regularly scheduled meeting of the course. Exceptions to this regulation may arise in specialized courses requiring performance or oral tests, and in multiple-sectioned laboratory classes requiring practical laboratory tests. Faculty having sound reasons for scheduling tests at times other than regularly scheduled meeting times are to obtain approval from the department head prior to the beginning of the term, and are to present a written schedule of these changes to the class during the first few days of the term. Rescheduled tests are not to interfere with other scheduled academic endeavors of the students involved, and an appropriate reduction in regularly scheduled class time is to be given to compensate for the rescheduled test period.

Classified or Proprietary Research

No thesis or dissertation should be based exclusively on a proprietary or classified research project, nor should a thesis or dissertation include proprietary or classified information. Any graduate student and advisor engaged in such research should identify an alternative topic for the thesis or dissertation. Should a thesis or dissertation include such information, the document must be rewritten with offending material excised.

Credit for Directed Studies

The university policy on directed studies was approved effective August 2006. Auburn University offers directed readings courses, also referred to as special problems courses or independent studies, in accordance with established policy.

Directed readings courses allow in-depth study of a particular subject by a student who is well into her or his major and, in extraordinary circumstances, accommodate scheduling issues when no other remedy is available.

Directed readings courses should not normally be used as replacements for required courses or as a solution to routine scheduling problems.

Approval to Teach Course—A standard Approval for Independent Study/Directed Readings Form (https://www.auburn.edu/academic/provost/forms/ind_study.pdf), available through the Office of the Provost website, will specify the necessary approvals and serve as the vehicle for obtaining them.

Exceptions to Graduate School Policies

Exceptions may be made to policies of the Graduate School under special circumstances. A person wishing to request an exception should write a letter to the dean of the Graduate School stating the nature of the request and the reasons for it. If a student is making the request, the letter should be submitted first to the major professor, who will write a letter of recommendation. Both letters go to the department head. If a member of the faculty is making the request, the letter goes to the department head, who will write a letter of recommendation. All letters go to the associated college/school dean for approval. Letters and comments then are forwarded to the dean of the Graduate School. A request for an extension of time to meet degree requirements must be justified. It must be accompanied by a proposed schedule for completion and assurance that the student is current in subjects included in the plan of study.

General Regulations

Regulations listed here represent the minimums of the Graduate School. However, individual departments may impose more stringent requirements and students will be governed by them.

Grades

Grade Definitions

Final passing grades are A, superior; B, good; C, acceptable; D, passing; and S, satisfactory. Final failing grades are F, failure; FA, failure for excessive absences; U, unsatisfactory; NR, no grade reported; and WF, officially dropped with permission of the student's dean but failing at time of withdrawal and is calculated into the GPA. (For the definition of W, see the following section on Grade Assignment for Class Withdrawal.)

A TD, thesis and dissertation research credit, is assigned to courses 7990 Research and Thesis and 8990 Research and Dissertation.

A grade of IP (In Progress) is used by professional programs, specifically Pharmacy and Veterinary Medicine, for those courses that extend beyond the end of the regular term. Students who are making progress toward completion of their work but have not completed all course requirements may receive the IP grade. The IP grade is not calculated in the GPA until the grade is cleared.

Grades of SA and SN may be assigned in certain specialized classes in which progress to the next level of a program depends on performance in the class. In such cases, a grade of SA in a particular course may be required for advancement. A grade of SN will give the student appropriate earned credit, but will not allow the student to advance in that program.

An NR is assigned systematically when the instructor does not assign a letter grade.

Faculty Policy on Assigning Grades of Incomplete (excludes distance education courses)

Effective Fall 2007, student (or appropriate representative) must contact the instructor in writing prior to the submission of final course grades to request a grade of Incomplete (IN) due to documented reason (illness/death in family/etc.).

If a student does not request an IN, the instructor should grade the student based upon the percentage of course work completed to date and using a 0 for any exams/ assignments not completed.

To be eligible for a grade of IN, the student must have completed (and have passed) more than half of all class assignments for the semester or summer term.

The instructor must fill out the Incomplete Grade-Memorandum of Understanding form, indicating:

- reason for the IN,
- percent of course work currently completed at the time of submission and the grade average on that work,
- detailed information about the additional work needed to complete the course,
- timeline to complete the work (6 months maximum; preferably sooner), and
- grade the student should be assigned if the additional work is NOT completed by the deadline set for the completion of the work; the missing work is calculated as a 0.

Grades of Incomplete automatically become the grade identified by the instructor, if not cleared within 6 months.

If the instructor assigning a grade of IN leaves Auburn University, the department head should make a reasonable attempt to contact the former instructor and then assign a grade based upon the work presented by the student and the information provided on the Incomplete Grade-Memorandum of Understanding form.

Once an IN has been changed to another grade it may not be changed, in the future, to a different grade without approval of the provost.

Documentation of class work must be maintained by the student; the Incomplete Grade-Memorandum of Understanding form must be maintained by the student, faculty and the Office of the Registrar. For instructors who submit the IN Grade forms to the Office of the Registrar prior to course grades being rolled to academic history, the IN will be reflected on the electronic grade roster; faculty will be unable to change that grade on the electronic grade roster.

Instructors should NOT enter a grade on the electronic course roster for those students who are to be assigned the IN grade but leave the grade blank. The system will automatically convert blanks to NR. Once the IN Grade form is received by the Office of the Registrar, that office will convert the NR to the IN grade.

It is the responsibility of the instructor to send a copy of the Incomplete Grade-Memorandum of Understanding form to the Office of the Registrar.

When the student has completed the outstanding work, it is the responsibility of the instructor to initiate the change of grade form and send it to the appropriate department/dean's office for additional signatures and transmittal to the Office of the Registrar.

These policies apply to all students in undergraduate and graduate courses.

Faculty Policy on Grade Changes (includes NR; Excludes IN)

Grades should be accurate when posted.

- Any change of letter grades (A, B, C, D, F, S, U, FA, and NR) should be made only in extraordinary situations.
- Any grade changes must be completed within 6 months of completion of the course.
- Any grade changes outside of this timeframe must also be approved by the provost.
- A final grade may be changed only by the written request of the instructor, with approval of the department head and dean, submitted to the registrar.
- A grade of F and additional penalties may be assigned for academic dishonesty. See the Student Academic Honesty Code section in the Tiger Cub for further information.

Grade Assignment For Class Withdrawals

A student who withdraws from a course prior to the 15th class day during a semester (or the fifth class day of summer term) will have no grade assignment; however, from the 15th class day during a semester (or the fifth class day of summer term) through the withdrawal deadline published in the academic calendar a W (Withdrawn Passing) grade will be recorded for the course. A course may be dropped with a W after the withdrawal deadline only under unusual conditions and only with permission from the student's dean. When approval for dropping the course under such circumstances is granted, a W may be assigned only when the instructor indicates that the student is clearly passing the course. Otherwise, a grade of WF (Withdrawn Failing) is assigned. All failing grades are calculated into GPA as grades of F.

Grade Average and Quality Point Computation

A 4.0 grade scale is used. An A equals 4.0; B, 3.0; C, 2.0; D, 1.0; and F equals 0.0. Only course work attempted at Auburn University is used in determining the grade report average and continuation–in–residence requirements. S and U grades do not enter into grade-point computations.

S-U Grading

Grades of S (Satisfactory) and U (Unsatisfactory) may be assigned only to courses approved to be graded S-U, and courses elected under the S-U option.

A graduate student may enroll in undergraduate courses, except for 6000-level courses taken for graduate credit, under the S-U option on the major professor's recommendation.

Students are not permitted to change from S-U grading to conventional grading or vice versa after the fifteenth class day of the fall and spring terms or the fifth class day of any summer term.

Grade Reports

Grade information may be obtained through AU Access on Auburn University's website.

Graduate Certificate Definition

Graduate certificate programs constitute an integrated curriculum, but not necessarily one aligned with a specific academic program. They may exist within programs, bridge programs or offer content widely useable across programs. Graduate certificate programs consist of a minimum of 9 and maximum of 21 hours of graduate-level course work. The course work may be graded or non-graded. A minimum GPA of 3.0 must be maintained on all graded course work in the certificate program.

Graduate certificate programs pertain to graduate students, whether degree seeking or non-degree seeking. A graduate certificate is distinguished from graduate minors in two primary ways. First, graduate minors are intended exclusively for degree seeking graduate students. Graduate certificates may be directed to both degree seeking and non-degree seeking students. Second, there are limits to the number of course credits taken in pursuit of graduate minors that may be applied to a graduate degree (e.g., masters degrees require 21/30 hours to be in the major discipline). The limiting factor in the application of certificate course credits to graduate degrees is departmental policy or advisory committee recommendations. As an example, if a department developed a certificate program intended only for non-degree seeking students, that department could prevent those certificate courses from applying to a degree. However, in the absence of departmental policy, and with the approval of a student's advisory committee, both degree seeking and non-degree seeking students (if they later change status to degree seeking) may include all certificate-related courses toward degree requirements.

When new graduate certificates are proposed, they undergo the full process of curriculum review. This same process applies regardless of delivery method (i.e., on campus and distance). Special requirements for applicants may be negotiated between the certificate proposing program and the graduate school at the time the program is proposed. Consistent with Graduate School policy related to the Masters and Specialist degrees, all requirements for a graduate certificate must be accomplished within 6 years unless departmental criteria for the certificate necessitate a longer time. Certificate Programs that require an exception to this 6-year time limit must be approved by the Graduate Council. Not only must the content of the proposed certificate be appropriate, but the availability of a viable group of graduate faculty to teach the courses in the certificate must be documented. Proposals for graduate certificate programs must identify a specific person who will serve as coordinator. Certificates that bridge departments must have a home department to which all certificate applicants apply. But each affiliated department must also designate a coordinator. Students who fulfill all requirements for a graduate certificate should submit the certificate completion application through AU Access. The certificate will be noted on the transcript after successful completion of all certificate requirements and the certificate completion application has been approved.

Graduate certificates are to be differentiated from professional development certificates. No comprehensive definition of the latter is offered here, however, in brief, completion of a professional development certificate does not require admission to the Graduate School and is awarded based on participation in non-credit work. The definition of graduate certificate does not limit the ability of departments or other units from defining, implementing, or awarding professional development certificates. Professional development certificates are not subject to the Auburn University curriculum process, nor are their achievement noted on Auburn University transcripts.

Graduate Curriculum Model Change

When a graduate curriculum model is changed, the changes apply only to students who matriculate after the approval of the changes and to currently enrolled students who voluntarily choose to complete the requirements of the new curriculum model. In no case, for students who are continuously enrolled, will the changed curriculum compel them to accumulate additional hours and grade points to graduate. Curriculum model changes are to be implemented at the beginning of the semester in which the largest number of new students typically enroll (fall semester for most programs). Graduate students who have not been enrolled at Auburn University for two or more semesters and who are returning to the same curriculum may be subject to different university, college, school or departmental requirements than those which existed when continuous enrollment ceased.

Graduate Program Option Definition

A graduate program option is a formally approved variation of an academic program by the offering department which meets objectives that may be more specifically focused. These additional objectives are integrated with the basic program. A formal graduate program option must preserve the integrity of the academic program of which it is a variant. Specifically, the formal program option must 1) be in a recognized sub-field of the discipline; and 2) share at least half of the total credits of the degree program. Only formally approved graduate program options are designated on the transcript. Other less formal variants, which may carry the name of "track," "concentration," "emphasis," or similar terms, are not designated on the transcript; however, all academic programs and designated

variations (whether called “options,” “tracks,” “concentrations,” “emphases” or some similar term) must be approved by the Alabama Commission on Higher Education (ACHE).

Graduate Study and University Employees

The educational benefit plan provides tuition waiver benefits to eligible and qualified employees, enabling them to enroll in undergraduate and graduate course work while actively employed at Auburn University. An employee may pursue a graduate degree with the approval by the employee’s immediate supervisor indicating whether or not the requested course is relevant to the student’s current position assignment. The application approval process is through Self Service Banner and is needed for each class each semester. Inquiries should be made through the Human Resource Development, Employee Education Benefits office.

Institutions with Special Affiliations

By special arrangement with Florida A&M University, the Graduate School application fee is waived for students applying from this institution.

Oak Ridge Associated Universities

Auburn University has been a sponsoring institution of the Oak Ridge Associated Universities (ORAU) since 1946. ORAU is a private, not-for-profit consortium of over 145 colleges and universities and a management and operating contractor for the U.S. Department of Energy (DOE) with principal offices located in Oak Ridge, Tennessee. Founded in 1946, ORAU provides and develops capabilities critical to the nation’s technology infrastructure, particularly in energy, education, health and the environment. ORAU works with and for its member institutions to help faculty and students gain access to federal research facilities; to keep members informed about opportunities for fellowship, scholarship and research appointments; and to organize research alliances among our members in areas where their collective strengths can be focused on issues of national importance.

ORAU manages the Oak Ridge Institute for Science and Education (ORISE) for DOE. ORISE is responsible for national and international programs in science and engineering education, training and management systems, energy and environment systems and medical sciences. ORISE’s competitive programs bring students at all levels, K-12 through postgraduate, and university faculty members into federal and private laboratories. Other ORAU activities include the sponsorship of conferences and workshops, the Visiting Scholars program and the Junior Faculty Enhancement Awards. Contact the Office of Vice President for Research and Economic Development for more information about ORAU programs.

Research Involving Humans

Auburn University established the Institutional Review Board for the Use of Human Subjects in Research (IRB) to evaluate research for compliance with the guidelines and policies of the U.S. Department of Health and Human Services, the Public Health Service, the Food and Drug Administration and other federal, state and local regulations. All research using human subjects—whether it is conducted by faculty, staff or students—must be approved in advance by the IRB, regardless of the source of funding, lack of funding or any other consideration. Research involving human subjects not approved in advance may be disallowed and may incur severe penalties for non-compliance with institutional policy. Information and review forms may be obtained through the Office of Human Research (IRB).

Second Graduate or Post-Baccalaureate Professional Degree

For a second graduate or post-baccalaureate professional degree, the student fulfills all requirements applicable to any other graduate or post-baccalaureate professional degree, including the thesis, if appropriate. The student may, on recommendation of the advisory committee, transfer a limited number of credit hours from the previous graduate or post-baccalaureate professional degree. At least 24 semester hours, or 50% of the total hours required for the degree, whichever is greater, must be unique to each degree and be taken at Auburn University.

Student Academic Grievance Policy

The Student Academic Grievance policy, which appears in full in the Student Policy eHandbook, is designed to resolve academic grievances of students which result from actions of faculty or administrators.

Student Records

Confidentiality of Student Records

The university recognizes that the maintenance of student information and educational records is necessary and vital to assist the student’s education and development and to provide opportunities for university research and policy formulation. The university

recognizes its obligation to exercise discretion in recording and disseminating information about students to ensure that their rights of privacy are maintained.

The university will furnish annual notification to students of their right to inspect and review their educational records; the right to request amendment of educational records considered by them to be inaccurate or misleading or that violate privacy or other rights; and of their right to a hearing should the university decline to amend such records. This annual notice will be published in the *Auburn University Bulletin* and an electronic notification is sent to each active Auburn student.

The following guidelines have been developed to ensure the privacy rights of students. For the purposes of this policy statement a student is defined as an individual who has been admitted and has been in attendance in a component unit of the university. Classification as a student in one component unit of the university (e.g., an undergraduate program) does not imply that the person has been accorded the rights outlined below in other component units (i.e., graduate school, professional schools, branch campus).

Student Access to Records

Auburn University's permanent student education record consists of one or more of the following: the official transcript of grades, competency evaluations, and any narrative evaluations. This is in accordance with guidelines established by the American Association of Collegiate Registrars and Admissions Officers (https://www.aacrao.org/) and the State of Alabama policies on Retention of Records.

Students have the right to be provided a list of the type of educational records maintained by the university which are directly related to the student; the right to inspect and review the contents of these records; the right to obtain copies of these records; the right to a response from the university to reasonable requests for explanation and interpretation of these records; the right to an opportunity for a hearing to challenge the content of these records; and if any material or document in the educational record of a student includes information on more than one student, the right to inspect and review only the part of such material or document as relates to the student.

Students do not have access to financial records of their parents; confidential letters and statements of recommendation which were placed in the educational record prior to Jan. 1, 1975, provided such letters or statements were solicited or designated as confidential and are not used for purposes other than those for which they were specifically intended; confidential recommendations, if the student signed a waiver of the right of access, respecting admission, application for employment, and the receipt of an honor or honorary recognition.

Students do not have access to instructional, supervisory or administrative personnel records which are not accessible or revealed to any other individual except a substitute; Campus Security records which are maintained apart from educational records, which are used solely for law enforcement purposes, and which are not disclosed to individuals other than law enforcement officials of the same jurisdiction; employment records except when such employment requires that the person be a student; and the Alumni Office records.

Students do not have access to physical or mental health records created by a physician, psychiatrist, psychologist or other recognized professional acting in his or her capacity or to records created in connection with the treatment of the student under these conditions which are not disclosed to anyone other than individuals providing treatment. A physician or appropriate professional of the student's choice may review these records.

Procedures for Access

The Office of the Registrar has a complete list of educational records maintained by the university which students may obtain. Students should contact the appropriate office to inspect and review their records. An office may require that a university official be present when a student inspects and reviews his or her educational records. Any questions concerning a student's access to records should be directed to the registrar.

Amending Educational Records

Students may request that any information contained in their educational records which they consider to be inaccurate, misleading, or in violation of their privacy or other rights be amended or deleted from the records. (A grade or other academic scores may not be amended, except that the accuracy of recording the information may be challenged.)

Students who request that information in their records be amended should first direct their request to the official with primary responsibility for the information on the record. If the matter is not resolved to their satisfaction, students should direct their requests to the official's dean or division head. If the matter is not resolved to their satisfaction, they may request a formal hearing.

Right to a Formal Hearing and Procedures for Decision

Students may request formal hearings to challenge information contained in their educational records. The hearing will be held in a reasonable time (not to exceed 45 days) and in a reasonable place. Students may be assisted or represented by persons of their choice, including an attorney, at the expense of the student, and shall be afforded a full and fair opportunity to present evidence relevant to the issue(s).

Students or their representative should request the hearing in writing and should specifically identify the information they seek to have amended. The request should be directed to the Office of the Provost/Vice President for Academic Affairs.

The Office of the Provost/Vice President for Academic Affairs will conduct the hearing and render a decision within a reasonable period of time after the conclusion of the hearing and the decision shall be based solely upon the evidence presented at the hearing. The student shall be notified in writing of the reason(s) for the decision and given a summary of the evidence.

If the decision is that the information in the student's educational records is inaccurate, misleading or in violation of his rights and privacy, the statement(s) will be corrected or expunged from the student's records.

If the decision is that the information is not inaccurate, misleading, or in violation of the privacy or other rights of the student and that the information or parts thereof are to remain in the student's educational records, the student shall be notified and given the right to enter a statement in the records setting forth any reason for disagreeing with the decision of the Office of the Provost/Vice President for Academic Affairs. This statement shall be maintained in the records as long as the record or contested portion thereof is maintained, and if the contested educational record or contested portion thereof is disclosed by Auburn University to any party, the student's explanation shall also be disclosed to that party.

The U.S. secretary of education has established a review board to receive complaints regarding violation of student's rights. Students wishing to file a complaint directly to the review board should write to the Family Policy and Regulations Office, Department of Education, Washington, D.C. 20202. Detailed procedures for this complaint procedure are listed under section 99.63 of the regulations issued by the secretary and will be furnished upon request by the registrar, Auburn University.

This policy is adopted pursuant to the Family Educational Rights and Privacy Act, (34 CFR Part 99), and is not intended to impose any restrictions or grant any rights not specifically required by this Act.

Release of Directory Information

The university may release directory information without the student's written consent. Directory information consists of student's complete name; local address and associated telephone number; place of birth; parent/spouse name, address and associated telephone number; mailing address and associated telephone number; E-mail address; photographs, video or other electronic image; participation in recognized activities and sports; weight and height of members of athletic teams; dates of attendance; enrollment time status (full or part time); degrees and awards received; and most recent previous educational agency or institution attended.

A student may deny the release of directory information by completing an Address Change/Information restriction request form available in the Office of the Registrar, Langdon Hall.

To deny the release of information regarding participation in recognized activities the student must notify the vice president for Student Affairs and the student's academic dean in writing. To deny the release of athletic information, the student must notify the director of Athletics in writing. A former student, one who is not in attendance, must contact the appropriate offices to deny the release of information.

Release of Educational Records

The university will release a student's educational record(s) upon the student's written request. The student must:

1. Specify the records to be disclosed.
2. Include the purpose or purposes of the disclosure.
3. State the party or parties and the address to whom the information is to be disclosed.

The student shall, upon request, receive a copy of the record that is to be disclosed. It is university policy to furnish single copies of a student's record at no charge.

The university may release student's educational records to the following without prior written consent:

1. University officials who have a legitimate educational interest in the records. University officials are defined as teachers, administrative personnel and other employees except personnel of the security or law enforcement unit of Auburn University, and other agents acting on behalf of the university. If university officials are required in the performance of their duties to review the educational records of a student, this will be considered to be a legitimate educational interest. Auburn University has designated the National Student Clearinghouse as a university official.
2. Officials of another school in which the student intends to enroll upon request of the transfer school.
3. Government representatives of the Comptroller General of the United States, the Secretary of Education, the U.S. Commissioner of Education, the Director of the National Institute of Education, the Assistant Secretary for Education, State educational authorities, and State officials to whom such information is specifically required to be reported or disclosed by State law adopted prior to Nov. 19, 1974.
4. Appropriate authorities in connection with financial aid with the understanding that only the necessary records will be released.
5. Organizations conducting studies for, or on behalf of, the university or its agencies for the purpose of developing, validating, or administering predictive tests, administering student aid programs, and improving instruction and student life provided that the studies will not permit the personal identification of students and their parents by individuals other than representatives of the organization and provided that the personally identifiable information furnished will be destroyed when no longer needed for the purposes for which the study was conducted.
6. Accrediting organizations to carry out their accrediting functions.
7. Parents of a dependent student as defined in section 152 of the Internal Revenue Code of 1954. University officials may release educational records to parents on the basis of a written documentation from the parent that the student is a dependent as defined under the Code and there is reasonable notification of the student regarding the request.
8. A court of law to comply with a judicial order or lawfully issued subpoena with the understanding that the student will be notified in advance insofar as possible.
9. Appropriate parties to protect the health and safety of the student or other individuals in emergencies with the understanding that only information essential to the emergency situation will be released, that information will be released only to a party who would be in a position to deal with the emergency, and that the student will be notified insofar as possible of the information released, the purpose for the release, and to whom the information was released.

No personal information on a student will be released without a statement from the university to the party receiving the information that no third party is to have access to such information without the written consent of the student.

Each office with educational records will maintain a record of each request and disclosure of personally identifiable information from the educational records of a student except for information requested in writing by the student, information released to the student or the student’s parents, directory information, and information released to university officials and teachers who have a legitimate educational interest in the records. The student may inspect the record of requests, disclosures and the legitimate interests of parties requesting or obtaining information in the appropriate university office.

Teaching Graduate Courses for Lecturers and Senior Lecturers Policy

Lecturers and senior lecturers who otherwise meet graduate faculty criteria (level 1) for the department may be granted permission to teach graduate-level courses and/or serve on graduate student committees on an exceptions basis under the following conditions:

1. A lecturer/senior lecturer desiring to teach a graduate course or serve on a graduate student committee should make a written request to the department chair.
2. If this request is acceptable to the majority of the department's tenure and tenure track graduate faculty and chair, a memo requesting such authorization will be submitted to the graduate dean for review and approval.
3. Authorization may be requested for teaching only, committee service only, or both.
4. No more than one lecturer/senior lecturer may serve on a graduate student committee.
5. Authorization must be requested for each semester a graduate course is to be taught by a given lecturer/senior lecturer.
6. Authorization must be provided each time that a lecturer/senior lecturer serves on a graduate student committee.
7. The department will provide the faculty member with resources appropriate to the graduate service being provided. What constitutes appropriate support would vary by department, but the following points would generally apply:
    a. Service on a graduate committee should not simply be added on top of current service if the lecturer is already performing at least 5% service and has an appointment that is supposed to be 95% teaching and 5% service. If a lecturer serves on a graduate committee, other forms of service should be reduced, or the lecturer should receive a higher percent of his or her appointment for service.

b. In most cases, teaching a graduate course requires being completely up-to-date with the most recent research in the field. Appropriate support might include a course release for a lecturer teaching the course for the first time.
c. A lecturer should not teach a graduate course as an overload class.

Two-Campus Studies

A student seeking a graduate degree at Auburn University, Auburn University at Montgomery, the University of Alabama, the University of Alabama at Birmingham, or the University of Alabama at Huntsville may take up to half the course work at another of these institutions. The courses taken must be approved in advance by the student's Advisory Committee and the respective graduate deans. All credit must be earned at the two institutions in which the student is working, and none may be transferred from another institution. Students engaged in two-campus studies are required to meet the requirements of continuous enrollment at Auburn University.

Withdrawal Policy

A **partial withdrawal** refers to a student dropping one or more courses but remaining enrolled in at least one Auburn University credit-bearing course. A **full withdrawal** (sometimes referred to as a **resignation**) refers to a student dropping all courses and no longer being enrolled in any courses or credit hours at Auburn University.

Before withdrawing from any course(s), students are encouraged to contact their advisors or other relevant offices such as Auburn Cares, Financial Aid, Scholarships, Veterans Resource Center, International Programs, and Athletics due to possible impacts on tuition, graduation timing, financial aid, veteran's benefits, international student standing, eligibility for varsity athletics, etc.

Withdrawing by the Withdrawal Deadline

A student may withdraw from one or more courses anytime on or before the withdrawal deadline published in the Academic Calendar. Withdrawing on or before the census date (also published in the Academic Calendar) results in no course grade and no record of attempting the course on the transcript. Withdrawing after the census date but on or before the withdrawal deadline results in a course grade of W. Grades of W are not used in calculating the Auburn University term or cumulative GPA.

Students withdrawing before the deadline due to a documented serious physical and/or psychological condition or the death or serious illness of an immediate family member should consult with the Auburn Cares office before withdrawing.

Withdrawing After the Withdrawal Deadline

A student may request to withdraw after the withdrawal deadline only under specific conditions or circumstances. Because the conditions necessary for approval of withdrawals after the deadline usually impact all courses, these are normally approved only as full withdrawals. All withdrawals after the deadline require permission through the appropriate approval process. Most commonly, medical or family medical withdrawals begin with the Auburn Cares office and personal or military withdrawals begin with the student's Advising Office.

Medical or family medical withdrawal: A medical withdrawal may be requested when, by recommendation of a licensed health care provider, a student cannot continue enrollment because of a serious physical and/or psychological condition. A family medical withdrawal may be requested when a student cannot continue enrollment due to the death or serious illness of an immediate family member. These withdrawals are reviewed and approved by the Auburn Cares office.

Personal withdrawal: A personal withdrawal may be requested when a student cannot continue enrollment due to documentable, extraordinary personal circumstances. These withdrawals are reviewed and approved by the student's Associate Dean for Academics.

Military withdrawal: A military withdrawal may be requested when a student is called to active military duty prior to the end of the term. These withdrawals are reviewed and approved by the Office of the Registrar.

When a withdrawal after the deadline is approved, grades of W and WF are assigned to courses the student is passing and failing, respectively, as of the withdrawal date. Grades of W are not used in calculating the Auburn University term or cumulative GPA. Grades of WF are used and have the same impact as a grade of F. In situations where it can be clearly demonstrated that a failing grade was directly related to the medical or personal situation leading to a withdrawal, the withdrawal approver may also approve a course grade of W.

Retroactive Dating of Withdrawals

Retroactive dating refers to establishing an effective withdrawal date prior to the actual date of withdrawal. Retroactive dating is most frequently initiated when a student has documentation from a health professional verifying a medical condition that prevented the student from withdrawing on the effective date.

Requests for retroactive dating of withdrawals due to medical or immediate family medical reasons are reviewed and approved by Auburn Cares and should be initiated within one calendar year (for family medical withdrawals) or two calendar years (for medical withdrawals) from the end of the term in question. Retroactive dating of withdrawals due to extraordinary personal circumstances are reviewed and approved by the Associate Dean of the student's college and the Graduate School designee and should be initiated no later than the student's next term enrolled at the university. Requests initiated beyond these deadlines must also be approved by the Graduate School designee.

Graduate Programs

Aerospace Engineering — MS, PhD

Degree Programs

- Aerospace Engineering — MS (p. 1546)
- Aerospace Engineering — PhD (p. 1547)

Graduate studies in aerospace engineering lead to the degrees of master of science and doctor of philosophy. The graduate program prepares students for careers in the aerospace industry, in government laboratories and in academia. Doctoral studies are also designed to produce research scholars.

Applicants should have a bachelor's degree in aerospace or mechanical engineering or its equivalent from an institution of recognized standing, plus satisfactory GRE scores. Degrees in mathematics, physics and other related engineering disciplines may also be appropriate for entrance into the graduate program. Applications will be evaluated on an individual basis by the department's graduate committee.

The master of science may be earned under either thesis or non-thesis options. For both options, a total of 30 semester graduate credits of 6000-7000 level courses are necessary and at least 21 credits must be in aerospace engineering or the AERO category. Substitution of up to six (of the 21) credit hours from other engineering and science disciplines is permitted with prior approval by the graduate programs committee when appropriate courses are unavailable in aerospace engineering. The remaining nine graduate credits can be earned through technical courses in engineering, science or mathematics.

Students pursuing a master of science degree under the thesis option should include six hours of AERO 7990 Research and Thesis as part of their 30 hours. After the completion of thesis research supervised by a major professor, the student must submit a written thesis to a committee of at least three faculty members and pass a final oral examination that includes defending the thesis.

Students pursuing a master of science degree under the non-thesis option will have a plan of study supervised by their graduate committee. The non-thesis master of science degree option does not have a residency, research or final oral examination requirement. The non-thesis degree can be earned entirely through the engineering online graduate program or though on-campus instruction.

For the doctor of philosophy degree, the student must complete a minimum of 60 credit hours beyond the bachelor's degree. A plan of study will be arranged on an individual basis and students may elect to specialize in the general areas of aerodynamics, computational fluid dynamics, control theory, flight dynamics, orbital mechanics, propulsion, structures or structural dynamics. A written qualifying examination and a general doctoral examination, with both written and oral parts, are required of all doctoral candidates. An oral defense of the doctoral dissertation is also required of each student.

There is no language requirement for the master of science or PhD degree.

Aerospace Engineering — MS

Graduate studies in aerospace engineering lead to the degrees of master of science and doctor of philosophy. The graduate program prepares students for careers in the aerospace industry, in government laboratories and in academia. Doctoral studies are also designed to produce research scholars.

Applicants should have a bachelor's degree in aerospace or mechanical engineering or its equivalent from an institution of recognized standing, plus satisfactory GRE scores. Degrees in mathematics, physics and other related engineering disciplines may also be appropriate for entrance into the graduate program. Applications will be evaluated on an individual basis by the department's graduate committee.

The master of science may be earned under either thesis or non-thesis options. For both options, a total of 30 semester graduate credits of 6000-7000 level courses are necessary and at least 21 credits must be in aerospace engineering or the AERO category. Substitution of up to six (of the 21) credit hours from other engineering and science disciplines is permitted with prior approval by the graduate programs committee when appropriate courses are unavailable in aerospace engineering. The remaining nine graduate credits can be earned through technical courses in engineering, science or mathematics.

Students pursuing a master of science degree under the thesis option should include six hours of AERO 7990 (or 7996 for online students): Research and Thesis as part of their 30 hours. After the completion of thesis research supervised by a major professor, the student must submit a written thesis to a committee of at least three faculty members and pass a final oral examination that includes defending the thesis.

Students pursuing a master of science degree under the non-thesis option will have a plan of study supervised by their graduate committee. The non-thesis master of science degree option does not have a residency, research or final oral examination requirement. The non-thesis degree can be earned entirely through the Engineering Online Graduate Program or though on-campus instruction.

There is no language requirement for the master of science degree.

Agricultural Economics — MS, MAg; Applied Economics — PhD

Degree Programs

- Agricultural Economics — MS (p. 1549)
- Agricultural Economics — MAg (p. 1549)
- Applied Economics (Agriculture) — PhD (p. 1550)

Graduate degrees in the Department of Agricultural Economics and Rural Sociology (DAERS) include the master of science (MS) in agricultural economics or rural sociology, the master of agriculture (MAg) in agricultural economics, as well as the PhD in applied economics. Admission to the masters program in agricultural economics requires a bachelors degree from an accredited institution with 15 semester hours in related courses including economics, sociology, statistics, or related subjects accepted by the Graduate Committee. Applicants are required to have a bachelors degree from an accredited institution and generally are required to have a minimum score of 290 (150 V and 140 Q) and a GPA of 3.0 on all completed coursework. Admission into the MS programs requires a minimum GRE score of 900 (450 V and 450 Q). Admission into the PhD program requires and minimum GRE score of 1000 (400 V and 600 Q). Admission into the Master of Agriculture program requires a minimum GRE score of 800 (400 V and 400 Q). International applicants from non-English speaking countries must have a minimum TOEFL score of 550 (213 computer). Applicants with GRE scores below 400 will be required to complete specified English courses. Applicants to all graduate programs are generally required to have a minimum GRA of 3.0 on the last 60 semester hours of completed coursework.

The master's program in rural sociology is part of an Interdepartmental Graduate Program in Sociology. Admission to the program is administered by co-directors representing the Department of Sociology, Anthropology & Social Work and the Department of Agricultural Economics & Rural Sociology. Applicants are required to have a bachelor's degree from an accredited institution and generally are required to have a minimum GRE score of 290 (150 V and 140 Q) and a GPA of 3.0 on all completed coursework. The applicant's resume and letters of recommendation also are considered in making a decision on admission. Further details on the master's degree in rural sociology can be found in the AU Bulletin (p. 1759) and the Interdepartmental Graduate Program in Sociology guide (http://www.cla.auburn.edu/sociology/sociology-program/graduates/program-guide/).

The MS in agricultural economics (thesis option) requires a minimum of 30 semester hours of graduate credit with 6 hours of thesis research. Required of all MS students:

Code	Title	Hours
ECON 6020	Advanced Microeconomics	3
ECON 7130	Mathematical Economics	3
AGEC 7590	Intro To Ag Econometrics	3
AGEC 7700	Research Methods In Ag Econ	3
Total Hours		**12**

Course substitution for will be allowed for ECON 6020 upon approval of the Graduate Program Officer. A total of 12 hours of core course is required in a program of 24 course hours. The remaining 12 hours can be filled with any graduate-level courses approved by the major professor and thesis committee. At least one-half of all credit hours toward the minimum degree requirement must be earned in courses at the 7000-level or above. All MS candidates must pass a comprehensive examination covering the major field, as well as research and thesis. This usually is a two-hour oral examination upon completion of coursework and the thesis, but the student’s advisory committee also may require a written examination.

There is a non-thesis MS option that requires 30 hours of coursework. Twelve of these hours must be in core courses:

Code	Title	Hours
ECON 6020	Advanced Microeconomics	3
ECON 7130	Mathematical Economics	3
AGEC 7590	Intro To Ag Econometrics	3
AGEC 7700	Research Methods In Ag Econ	3
Total Hours		**12**

The remaining 18 hours can be filled with any graduate-level courses approved by the major professor and graduate committee. At least one-half of all credit hours toward the minimum degree requirement must be earned in courses at the 7000-level or above. The non-thesis option requires a “Plan B” paper that serves as the basis for the student’s final oral exam.

Graduate study in rural sociology (MS thesis or MS nonthesis) (p. 1759) is available through the Interdepartmental Graduate Program in Sociology (http://www.cla.auburn.edu/sociology/sociology-program/graduates/program-guide/), which includes rural sociologists from DAERS as well as sociologists and anthropologists from the Department of Sociology, Anthropology, and Social Work.

The master of agriculture (MAg) in agricultural economics requires 32 graduate credit hours, 18 in the major, as approved by the advisory committee. A final oral examination is given by the advisory committee.

A PhD in Economics is offered through the interdepartmental program in economics, which is administered jointly by the Department of Agricultural Economics and Rural Sociology, the Department of Economics, and the College of Forestry, Wildlife and Environment. For students enrolled in the College of Agriculture, the PhD in Applied Economics requires a minimum of 42 credit hours beyond a masters degree or 60 hours beyond a bachelors degree, plus at least 10 hours of dissertation research. All students must take:

Code	Title	Hours
PhD in Applied Economics Agriculture		
Required Courses (34 credit hours):		
ECON 7110	Microeconomics I	3
ECON 7120	Microeconomics II	3
ECON 7130	Mathematical Economics	3
ECON 7210	Macroeconomics I	3
or ECON 7220	Macroeconomics II	
ECON 7310	Econometrics I	3
or ECON 7320	Econometrics II	
AGEC 7690	Microeconometrics in Agricultural Economics I	3
AGEC 7700	Research Methods in Agricultural Economics	3
AGEC 8690	Microeconometrics in Agricultural Economics II	3
AGEC 8990	Research and Dissertation	10
Select at least 15 credit hours from:		
AGEC 7080	Production Economics I	3
AGEC 7090	Resource Economics II	3
AGEC 7110	Agricultural Economic Development	3
AGEC 8060	Theory of Agricultural Markets	3
AGEC 8080	Production Economics II	3
AGEC 8090	Food and Agricultural Policy	3
Select additional credit hours from 6000-8999 level courses to meet the minimum 60 credit-hour requirement.		11
Minimum total credit hours: 60		
TOTAL HOURS		**60**

The PhD written preliminary examination requirement is satisfied by passing a qualifying exam for microeconomics managed by the Department of Economics, from which the first year PhD students take the required core economics courses listed above. There is an oral examination on the field and proposed dissertation research (referred to as the PhD prelim oral exam), and a final oral defense of

the dissertation. For details on exam requirements, see the DAERS Graduate Handbook posted on the department's web site. After satisfactory completion of the PhD prelim oral exam the student advances to candidacy. PhD students are encouraged to consider a graduate minor in statistics, which requires 12 hours of coursework in statistics (see Statistics Department web site for details).

A Graduate Minor in Agricultural Economics (GMAE) is offered for non-majors wishing to obtain training in the application of economic principles to problems affecting rural communities and households. The GMAE requires 12 credit hours of graduate-level coursework in agricultural economics (6 hours must be at the 7000 level or above). The student's graduate committee must include a faculty member from the agricultural economics department, and the student must demonstrate competence in the application of economic principles to problems in research. The latter requirement is typically met via a chapter or section in the student's thesis or dissertation.

Animal Sciences — MS, MAg, PhD

Degree Programs:

- Animal Sciences — MS (p. 1551)
- Animal Sciences — MAg (p. 1551)
- Animal Sciences — PhD (p. 1552)

Graduate study in animal sciences is directed toward the master's and doctoral degrees. The Master of Agriculture (MAg) is offered as a non-thesis degree and prepares students for careers in secondary education, Cooperative Extension and agribusiness. Graduate programs leading to the Master of Science (MS) and Doctor of Philosophy (PhD) degrees provide advanced education and technical training in preparation for careers in public and private sectors related to animal science and technology, food science and technology, animal biotechnology, agribusiness and university-level research and education. Areas of specialization include animal nutrition, biochemistry and molecular biology, food technology and safety, growth biology, meat science and muscle biology, functional genomics and reproductive biology. Interdepartmental minor programs in cell and molecular biosciences, ecology and environmental sciences are also available.

Prospective graduate students are evaluated for admission to the graduate program by a departmental graduate-program committee. The committee makes a recommendation to the department head based on its review of academic transcripts, three letters of recommendation, a written statement of intent from the applicant, and Graduate Record Examination (GRE) General Test score; in the case of an international student, the Test of English as a Foreign Language (TOEFL) is also required. Prior to making formal application, prospective students are expected to first contact a prospective faculty advisor in the Department whose area of specialization is compatible with the prospective student's interest and inquire about openings in his/her program. The departmental graduate-program committee will not review an application from a prospective graduate student unless requested to do so by a

prospective faculty advisor, nor will it recommend that a student be admitted unless a prospective faculty advisor agrees to sponsor the applicant's graduate program.

Admission to the MAg degree program requires that the student has the bachelor's degree or evidence of satisfactory progress toward attainment of the bachelor's degree in animal sciences or a related area in the biological sciences. Admission is based primarily on consideration of Grade Point Average (GPA), GRE scores and, in the case of an international student, TOEFL test scores. Applicants lacking suitable preparatory course work in the basic sciences will be required to correct deficiencies by satisfactorily completing additional courses. The MAg degree requires successful completion of a minimum of 30 credit hours, 21 of which must be in the agricultural or related sciences. Additional courses may be required for individual students. Although MAg students do not write a thesis, they are required to take a comprehensive examination and present a report on their comprehensive scholarly project completed under ANSC 7960 (Special Problems). In addition, MAg students are required to present one academic seminar (ANSC 7950) during their program.

Admission to the MS degree program requires that student have the bachelor's degree or evidence of satisfactory progress toward attainment of the bachelor's degree in animal sciences or a related area in the biological sciences. Admission is based primarily on consideration of GPA, GRE scores and, in the case of an international student, TOEFL test scores. Applicants lacking suitable preparatory course work in the basic sciences will be required to correct deficiencies by satisfactorily completing additional courses. The MS degree requires a minimum of 30 credit hours of graduate work, including at least 21 credit hours in the major field of study. The remainder may be in a minor area selected by the student and upon approval by the advisory committee. In addition to the required course work, the student must complete research, a written thesis and a thesis defense examination as defined by the student's advisory committee. Students are required to present two academic seminars (ANSC 7950) during their program.

Admission to the PhD degree program usually requires that the student have a master's degree from a recognized graduate program. However, evidence of exemplary potential may be considered as a criterion for admission with a bachelor's degree. The doctoral program emphasizes original, scholarly research and includes significant advanced course work. Admission is based primarily on a consideration of GPA, GRE scores and, in the case of an international student, TOEFL test scores. Following completion of all or most course work, doctoral students are required to successfully complete a comprehensive written examination in their area of specialization before taking the oral General Examination, successful performance in which is required for advancement to candidacy. The PhD degree requires a minimum of 60 credit hours beyond the bachelor's degree and a dissertation describing original research. After completion of the dissertation, the student must pass a final oral examination defending the dissertation. There is no foreign language requirement, but knowledge of a foreign language may be recommended by the student's advisory committee. Doctoral students are required to present three academic seminars (ANSC 7950) during their program.

All graduate students receiving departmental assistantships are expected to be engaged in service to the department's research and education programs as deemed appropriate by the academic advisor and department head. All MS and PhD students must register for at least one credit hour of thesis (ANSC 7990) or dissertation (ANSC 8990) research each term. Classified (FLSA-exempt) research associates holding full admission status in the Graduate School for work toward a graduate degree are exempt from this requirement but must complete 10 hours of thesis research in a MS program or 20 hours of dissertation research in a PhD program following completion of a master's degree. A PhD degree program undertaken by classified (FLSA-exempt) research associates but not preceded by a master's degree must include 30 hours of dissertation research credit.

Total Hours		**60**

Architecture – Public Interest Design Option — MS

The Master of Science in Architecture is a post-professional program designed to provide advanced and specialized training within the discipline of architecture for students who desire in-depth, design –based research in areas of practice not offered in traditional professional degree programs at either the undergraduate or graduate level.

Over time, the School of Architecture, Planning, and Landscape Architecture envisions the MS Architecture as a platform for several specialization “options.“ The MS Architecture curriculum will have thirty to thirty-six (30-36) credit hours of required courses (varies by option.) Common to all options will be eighteen (18) hours of core studios (6 CH each, Fall/Spring/Summer,) with the balance of credit hours made up of coursework specific to the “option.” The initial offering considered in this proposal is an Option in Public Interest Design.

The MS Architecture, Option in Public Interest Design is designed to address issues of design practice associated with pressing social issues (such as affordable housing, design for underserved communities, etc.) and will prepare students to serve these communities and to work effectively within collaborative, interdisciplinary project teams.

In addition to the aforementioned eighteen hours of core studios, the MS Architecture, Option in Public Interest Design curriculum will require five 3CH courses (two 3CH courses in the fall, two in the spring, and one in the summer) for a total of thirty-three (33) credit hours. All classes shall be taken in the full-time format. The plan of study is attached.

Fall	Hours	Spring	Hours	Summer	Hours
ARCH 7010 Fall Studio	6	ARCH 7020 Spring Studio	6	ARCH 7030 Summer Studio	6
ARCH 7110 Seminar in Collaborative Design Methods and Process	3	ARCH 7120 Seminar in Design Tectonics	3	ARCH 7130 Seminar in Project Communications	3
ARCH 7210 Executive Issues: Disciplinary Framework	3	ARCH 7220 Executive Issues: Research Methods	3		

Audiology — AuD

The Department of Speech, Language, and Hearing Sciences offers the professional clinical degree: the Doctor of Audiology (AuD). As opposed to the PhD research degree, the AuD is a clinical practice degree. The AuD degree program spans four years (11 semesters including summers), each cohort group begins fall semester. Details are provided at the Department of Speech, Language, and Hearing Sciences website: https://www.cla.auburn.edu/speech-language-hearing-sciences/.

Most graduates of the AuD program work in clinical settings, such as major hospitals, ear, nose and throat clinics, and private practice facilities. A few graduates teach in clinical programs in academic institutions.

To complete the program, students must have transportation for courses and clinics in both Auburn and Montgomery as well as for additional clinical experiences and internships located in other cities within the surrounding region.

Admissions Requirements

A bachelor's degree from an accredited university is necessary, however highly qualified students from any discipline are considered. Foundation courses in language development and phonetics will be added to the curriculum for students without a bachelor's degree in Speech, Language, and Hearing Science. At least one undergraduate course each of math, life sciences, statistics, physical sciences (chemistry or physics required), and behavioral sciences is an accreditation expectation, and applicants lacking any of these must comply before conferral of the AuD degree.

Potential students must apply both to the Auburn University Graduate School and to Communication Sciences and Disorders Centralized Application System (CSDCAS).

Application to Auburn University's Speech, Language and Hearing Sciences Department requires that you complete both the electronic application through the Communication Sciences and Disorders Centralized Application Service (CSDCAS) AND the online application to the Auburn University Graduate School. Here are the specific steps:

1. Apply online to AU's Graduate School and submit payment.
2. Complete the Casper Assessment through Altus Suite. Casper scores are sent directly to Auburn University so you do not need to upload your scores to CSDCAS.
3. Official transcripts from every college or university attended must be sent to CSDCAS.
4. Three professional letters of recommendation must be submitted to CSDCAS.
5. A video: See website for instructions and prompt.
6. A letter of interest, which will serve as a writing sample. See website for instructions.
7. For international students whose native language is not English, the TOEFL must be taken and submitted to both CSDCAS and AU Graduate School. In keeping with the requirements of the Auburn University Graduate School, successful international applicants must score at least 550 on the Test of English as a Foreign Language (TOEFL) paper version (pBT), 213 on the computer version (cBT), and 79 on the internet version (iBT). Additionally, successful applicants must score minimums of 16 on the listening, reading, speaking, and writing components of the iBT.

January 15th is the annual deadline for applications to the graduate program. To be considered for admission, all materials need to be submitted to AU and CSDCAS no later than January 15th.

Graduation Requirements

The curricular plan of study is a static sequence of academic and clinical coursework. The academic and clinical components of the AuD program interact in a logical progression over a four-year period. A total of 124 semester hours are required for the degree.

The early portion of training is largely academic, and the later portions involve mostly applied clinical work. As the program progresses, the balance of academic and clinical work changes substantially. During the first two years of the program, the emphasis is on academic preparation for clinical work. Students must pass comprehensive exams at the end of the 1st and 3rd year (see handbook). In the third year of the program, academic courses are combined with advanced seminars on current issues in clinical practice and the completion of an applied clinical research project referred to as a capstone experience. During this third year of the program, students are engaged in a series of intensive clinical internships at off-campus clinical settings. Students must successfully complete internships at three different clinical settings during the third year and return to campus to participate in seminar course work. In the final year of the program, students participate in a clinical residency during which they work full time for a period of nine months. Clinical residencies may be done at any facility in the United States where a certified audiologist agrees to supervise the student within ASHA guidelines.

Plan of Study

The four-year sequence of academic and clinical course work, including the semester hours, is as follows:

First Year

Fall	Hours	Spring	Hours	Summer	Hours
SLHS 8100 Hearing Science	3	SLHS 8200 Diagnostic Audiology	3	SLHS 8300 Central Auditiory Processing	3
SLHS 8110 Auditory Physiology	3	SLHS 8210 Medical Aspects of Hearing Disorders	3	SLHS 8310 Aural Rehabilitation	3

SLHS 8120 Audiology Clinical Methods	3	SLHS 8220 Amplification I	3	SLHS 8570 Evaluation of Research in Audiology	3
SLHS 8800 The Neurological Bases of Communication Disorders	3	SLHS 8320 Clinical Applications of Amplification	2	SLHS 8910 Clinical Practice in Audiology	2
SLHS 8910 Clinical Practice in Audiology	2	SLHS 8910 Clinical Practice in Audiology	2	SLHS 8980 Capstone Project	1

Second Year

Fall	Hours	Spring	Hours	Summer	Hours
SLHS 8400 Pediatric Audiology	3	SLHS 8410 Aural Habilitation	3	SLHS 8520 Hearing Conservation	3
SLHS 8420 Amplification II	3	SLHS 8500 Electrophysiological Procedures in Audiology	3	SLHS 8610 Implant Technology	3
SLHS 8430 Clinical Application of Diagnostic Audiology	2	SLHS 8510 Clinical Application of Balance Assessment	2	SLHS 8650 Advanced Audiometry	2
SLHS 8600 Balance Disorders	3	SLHS 8810 Private Practice	3	SLHS 8700 Professional Issues	3
SLHS 8910 Clinical Practice in Audiology	2	SLHS 8910 Clinical Practice in Audiology	2	SLHS 8910 Clinical Practice in Audiology	2
SLHS 8980 Capstone Project	1	SLHS 8980 Capstone Project	1	SLHS 8980 Capstone Project	1

Third Year

Fall	Hours	Spring	Hours	Summer	Hours
SLHS 8620 Outcome Measures In Audiology	3	SLHS 8630 Counseling In Audiology	3	SLHS 8920 Clinical Internship	5
SLHS 8920 Clinical Internship	5	SLHS 8920 Clinical Internship	5	SLHS 8950 Audiology Grand Rounds	3
SLHS 8950 Audiology Grand Rounds	3	SLHS 8950 Audiology Grand Rounds	3		
SLHS 8980 Capstone Project	1				

Fourth Year

Fall	Hours	Spring	Hours
SLHS 8940 Clinical Residency	6	SLHS 8940 Clinical Residency	6

Internships and Clinical Residency

During third year, students complete internships in three different locations, and in the final year, they work full-time under the supervision of a certified audiologist. Off campus clinical experiences for the third year are typically located within a two hour drive time radius to allow the student a quality experience and the ability to return to campus for class and capstone research work. The fourth year clinical residency experience can be anywhere in the United States with appropriate supervision and a broad scope of practice.

Other Requirements for the AuD

Along with their course work and internships, students are required to pass comprehensive written exams in order to advance to candidacy. Oral examinations will be conducted if written responses lack detail or clarity. To graduate, students must also successfully complete a capstone project, which can be a planned audiology-related research or clinical project designed to explore a research hypothesis or meet a clinical outcome.

Graduate Assistantship Opportunities

A limited number of graduate assistantships are available for meritorious students to assist in teaching, research, or clinical roles.

Biological Sciences — Graduate Certificate, MS, PhD

Degree Programs

- Biological Sciences — MS (p. 1555)
- Biological Sciences — MS (Non-Thesis, Pre-Professional Option)
- Biological Sciences — PhD (p. 1555)

Graduate Certificate

- Computational Biology (p. 1556)

The Department of Biological Sciences offers graduate training leading to the MS and PhD degrees in biological sciences; a non-thesis master's degree is optional. Candidates for advanced degrees should have an undergraduate degree in an appropriate area from an accredited institution, with adequate training in biology, chemistry, physics and mathematics. Qualified students lacking pre-requisite subjects can be admitted but may be required by the departmental graduate studies committee to make up the pre-requisites. A satisfactory score on the general GRE is required (suggested minimums of 500 on verbal and quantitative tests).

A major of at least 30 and 60 semester hours may be taken for the MS and PhD degrees, respectively. MS and PhD students must present at least one departmental seminar on their research during the semester of their oral or final examination. There is no foreign language requirement.

Interdisciplinary minors may be taken in biochemistry, cell/molecular biology, ecology, environmental studies and plant, animal, or microbial molecular biology.

Computational Biology — Graduate Certificate

Offered by the Department of Biological Sciences, this certificate is designed to provide trainees with a broad understanding and appreciation of the utility of computation in relation to “Big Data”, or large data sets that can only be analyzed with an advanced set of computational skills towards revealing patterns, trends, and associations pertaining to biological and life science phenomena. This certificate program requires 18 credit hours of coursework to be completed. All trainees in the certificate program will complete 11-12 credit hours of required coursework. Trainees will select (at least) 6-7 additional credit hours of coursework from a given list that heavily utilize computational approaches and tailored to their specific research interests.

Code	Title	Hours
Required coursework (11 or 12 credit hours):		**11-12**
BIOL 6800	Introduction to Computational Biology	3
STAT 7000	Experimental Statistics I	4
BIOL 7180	Scripting for Biologists	2-3
or PLPA 6820	Principles and Tools for Reproducible Science in Agriculture	
*Either course is allowed to complete this requirement		
BIOL 7800	Computational Biology Colloquium	2
Selected elective coursework (6-7 credit hours):		**6-7**
From approved list of courses that heavily utilize computational approaches. The list of potential electives is expected to grow and evolve given development of new courses tied to continuing new faculty hires at Auburn University.		

Trainees who successfully complete this certificate program will exhibit proficiency in the comprehension, planning and implementation of computationally intensive experiments and analyses of biological data originating from various sources and should be well-positioned for finding positions in academia, government or the private sector.

Elective coursework list can be found here: https://www.auburn.edu/cosam/departments/biology/certificate/graduate_computational_biology.htm

Biomedical Sciences — MS, PhD

Degree Programs:

- Biomedical Sciences — MS (p. 1557)
- Biomedical Sciences — PhD (p. 1557)

All graduate faculty of the College of Veterinary Medicine participate in a college-wide graduate program leading to the master of science and the doctor of philosophy degrees in biomedical sciences (BMS or VBMS for curriculum descriptions). Participating departments are Anatomy, Physiology and Pharmacology (APP); Clinical Sciences (DCS); and Pathobiology (PATHO).

Applicants to the program are required to meet entrance standards established by the College’s Graduate Program Committee, the Graduate School, and their intended area of study. Either a baccalaureate degree or the Doctor of Veterinary Medicine (DVM) degree or equivalent is required for admission.

The three departmental programs represent the gateway to areas of concentration. The ten BMS concentrations (MS and PhD programs unless otherwise stated): Anatomy (APP), Animal Genetic Disease (PATHO), Animal Parasitology (PATHO), Clinical Sciences (including all DCS Residency Programs, MS only), Infectious Disease (PATHO), Molecular Oncology (multidisciplinary through PATHO), Pathology (Anatomic and Clinical; PATHO), Pharmacology (APP), Physiology (APP), and Veterinary Sports Medicine (DCS, MS only). The BMS program offers specific enrichment activities including seminars and journal clubs, training in grant writing, participation in scientific meetings, and opportunities to present results of research at national and international meetings.

A graduate student advisory committee is appointed by the dean of the Graduate School for each student upon recommendation of the college’s associate dean for research and graduate studies. The student’s faculty adviser usually serves as the chair of this committee, and the remaining members, selected from the graduate faculty, should have expertise relevant to the student’s area of

study. The advisory committee develops a plan of study which must be submitted to the college's associate dean for research and graduate studies for approval and then to the dean of the Graduate School. Study programs are designed to meet the student's needs and interests while featuring research training and assuring a strong background in biochemistry, biophysics and/or molecular biology. Original research is required for all BMS graduates. Courses must be selected in conformity with the regulations of the college's BMS Graduate Program Committee and the Graduate School. For additional information, visit: https://www.vetmed.auburn.edu/.

A dual degree program (DDP) allows students to pursue DVM and graduate degrees simultaneously in a time-and content-integrated manner. Graduates, particularly DVM/PhD graduates, will have strong backgrounds both in veterinary medicine and research so as to be well prepared for successful careers in academia, industry and/or specialty clinics. For the DDP program, students must be admitted into the College of Veterinary Medicine program via application to the Auburn University College of Veterinary Medicine and to the graduate program via application to the Auburn University Graduate School. Students already admitted to the Graduate School may apply for admission to the DVM program in order to gain entry to the combined degree program. Such students must meet specific criteria to be allowed to pursue this course of study (https://www.vetmed.auburn.edu/).

Bioproducts and Bioprocessing — Graduate Certificate

The Graduate Certificate in Bioproducts and Bioprocess Engineering provides a specialization in the application of biological/biochemical principles to solve complex problems that are needed in developing systems for processing and converting biological materials to fuels, products and chemicals. Because of this, the program is inter-disciplinary in nature.

This graduate certificate program is designed for individuals holding baccalaureate degrees in biosystems engineering, or other appropriate engineering/science fields with an interest in biofuels, bioenergy, and bioprocess engineering. Students can complete the certificate program in one academic year (fall and spring semesters) by passing four of the courses listed below (total of 12 credit hours), and attending (in-person) all required one-week labs for each course.

Curriculum Model: The certificate requires students to complete four of the graduate courses (total of 12 credit hours). Students are required to take two required courses (BSEN 6540 and BSEN 6280) and two elective courses (*) from the list. Other elective courses may be allowed at the discretion of the department. Students must earn a B or higher grade in each course.

Code	Title	Hours
BSEN 6540	Biomass and Biofuels Engineering	3
BSEN 6280	Life-Cycle Assessment for Biological Systems	3
BSEN 6270	Metabolic Engineering for Bioprocess	3

BSEN 6240	Bulk Biological Solids Behavior, Handling and Processing	3
BSEN 6260	Renewable Energy in Biosystems Process Operations	3
BSEN 6220	Geospatial Technologies in Biosystems	3
BIOP 6250	Biocomposites	3
PFEN 6200	Polymer Processing	4
PFEN 6510	Polymer Chemistry	3
MATL 7130	Advanced Polymer Science and Technology	3

Biosystems Engineering — MS, PhD

Degree Programs:

- Biosystems Engineering — MS (p. 1558)
- Biosystems Engineering — PhD (p. 1559)

Graduate study in Biosystems Engineering leads to Master of Science (thesis, non-thesis) or Doctor of Philosophy degrees. Instruction, research training, and experience are available in various specialized fields such as ecological and water resources engineering; bioprocess engineering, bioenergy and bioproducts engineering; smart systems for production ag and forestry, controlled environment in agriculture, climate smart ag and forestry systems, and ag systems modeling and data analytics. Applicants are expected to have earned a baccalaureate degree in biosystems engineering or a closely related area. All applicants should provide a written statement of purpose for their graduate study, three letters of reference, and all other data required by Auburn University. Additional details regarding graduate study in the Department of Biosystems Engineering are available at www.eng.auburn.edu/bsen (http://www.eng.auburn.edu/bsen/).

Biosystems Engineering — MS

The MS (thesis option) in Biosystems Engineering requires a minimum of 30 semester credit hours of graduate course work that includes up to 6 credit hours of thesis research. After completion of research, candidates for the MS thesis option must successfully defend the thesis. The specific requirements for the MS (thesis option) are:

Code	Title	Hours
BSEN 7990	Research and Thesis	6
BSEN 6250	Deterministic Modeling for Biosystems	3
BSEN 7950	Seminar	1
Select 6 Credits of Other BSEN Courses (@6000-8999) *		6
Select 6 Credits of Other Engineering Courses (@ 6000-8999) *		6
Select 3 Credits of Statistics or Other Related Courses (@6000-8999) *		3
Select 5 Credits of Other Courses (@ 6000-8999) *		5
Total Hours		**30**

* Specific courses are approved by student advisory committee. BSEN 7990 should be minimum of four credit hours and not more than 6 credit hours.

The MS (non-thesis option) in Biosystems Engineering is offered to those that desire in-depth knowledge in Biosystems Engineering typically needed for non-academic engineering careers. A minimum of 30 semester credit hours of graduate course work is required for this option.

Code	Title	Hours
Biosystems Engineering Non-Thesis (MS)		
BSEN 6250	Deterministic Modeling for Biosystems	3
BSEN 7950	Seminar	1
Select 9 credits of other BSEN courses (@6000-8999) *		9
Select 6 Credits of Other Engineering Courses (@ 6000-8999) *		6

Select 3 Credits of Statistics or other related courses (@6000-8999) *	3
Select 8 Credits of other Courses (@6000-8999) *	8
Total Hours	**30**

* Specific courses are approved by BSEN Graduate Program Coordinator.

The department also offers an accelerated bachelors/masters (ABM) program in Biosystems Engineering. Interested students should contact the department.

Biosystems Engineering — PhD

The Ph.D. in Biosystems Engineering requires a minimum of 60 semester hours of graduate-level course work beyond the bachelor's degree. The total number of credit hours that may be transferred from another accredited institution toward a doctoral degree must be less than 50 percent of the credit hours listed on the Plan of Study. Students must take a qualifying examination (written and oral) administered by the student's advisory committee that tests the student's knowledge and competence in the proposed research area and in the general field of biosystems engineering. The student advances to Ph.D. candidacy after the successful completion of the qualifying examination. The PhD student will conduct independent research and prepare a dissertation. After completion of the dissertation, the student must pass a final oral examination defending his/her dissertation.

Code	Title	Hours

Brewing Science and Operations — Graduate Certificate, MS

The School of Hospitality Management offers the MS in brewing science and operations and a graduate certificate in brewing sciences. Individual program requirements are listed below.

Brewing Science and Operations — MS

The Master of Science (MS) degree in Brewing Science and Operations is designed to provide advanced education for those interested in entering or further developing their career in the craft brewing industry. The MS degree will be non-thesis and delivered entirely online, requiring a minimum of 33 semester hours to complete the degree. The non-thesis track is designed mainly for individuals interested in combining current work life with the need for educational advancement. While there will be an element of primary research attached to the completion of their non-thesis project, the project will primarily relate to some element of the student's current or intended business environment. The program will offer a blend of theoretical and applied courses created to keep students abreast of current management thinking and practice in this emerging field. Particular emphasis is placed on the concepts of good and progressive science, workplace health and safety, effective and sustainable operations, brewing industry supply chains, laws and regulations pertaining to the craft beer industry, and business planning and informed decision-making.

The program will consist of 33 credit hours to be taken across 11 x 3 credit hour classes and will build upon the current Graduate Certificate program in Brewing Sciences. These include:

Code	Title	Hours
HOSP 7100	The Business of Brewing	3

Building Construction — Graduate Certificates, MBC, PhD

Degree Programs

- Building Construction — MBC (p. 1560)
- Building Construction — PhD (p. 1562)

Executive Graduate Certificates

- Construction Management (p. 1563)
- Executive Technical Construction Management (p. 1563)
- Integrated Processes Construction Management (p. 1563)

Building Construction — MBC

The McWhorter School of Building Science offers the Master of Building Construction (MBC).

The McWhorter School of Building Science's non-thesis master of building construction program provides its students with an unparalleled educational experience. From conceptual idea to post-occupancy of facilities, the degree content offers a practical and industry-oriented study of the interdisciplinary and collaborative processes involved in the planning, financing, design, construction and management of the built environment.

Admission to the master of building construction is competitive, and enrollment is limited. The admissions committee considers GRE scores, undergraduate GPA, educational background, letters of recommendation, prior construction industry experience, and other relevant information.

For students holding an accredited undergraduate degree in construction, the MBC curriculum consists of 35 semester hours of academic credit, including a core of BSCI graduate courses (17 credit hours), electives (15 credit hours) and capstone (3 credit hours), taken over a period of three academic terms beginning in the fall of each year.

Students with undergraduate degrees in areas other than construction are given conditional admission to the program, and are required to take a series of five foundation courses (14 credit hours) commencing the summer term prior to fall admission. Upon successful completion of these classes, they are formally admitted to the 35 credit-hour MBC program.

MBC Degree Requirements

Foundation Courses

Offered in Summer and required for students with undergraduate degree in areas other than construction. There are 5 foundation courses worth 14 semester hours of academic credit.

The Core Curriculum

Code	Title	Hours
BSCI 7020	Integrated Bldg Proc I	3
BSCI 7030	Construction Info Management	3
BSCI 7040	Integrated Bldg Proc II	3
BSCI 7050	Executive Issues in Constructi	3
BSCI 7060	Research Methods in BSCI	3
BSCI 7950	Graduate Seminar (I)	1
BSCI 7950	Graduate Seminar (II)	1

All classes are three credit hours except graduate seminar which is one credit hour.

Electives

Four building science electives (12 credit hours) and one approved graduate elective (3 credit hours) from any field.

Capstone

BSCI 7980, students are required to undertake a capstone project in their final semester. The purpose of the capstone project is to demonstrate the student’s ability to independently explore a new topic, demonstrate appropriate application of the materials, and successfully communicate the information in a professional and academically rigorous format.

Note: Online Master's students are not required to take BSCI 7060 (Research Methods) or BSCI 7950 (Graduate Seminar I and II).

Building Construction — PhD

The PhD in Building Construction is a research-based degree focused on the generation of new knowledge through innovative exploration of theory, development of creative perspectives, and applications of new technologies. It emphasizes original interdisciplinary scholarship in key and emerging areas such as high performance buildings, n-D modeling and simulation of building construction processes, sustainability, integrated project delivery, and facilities maintenance and management.

The PhD in Building Construction requires 62 semester hours of graduate course work beyond the bachelor's degree. Up to 21 credit hours from a Master's degree or previous graduate course work are transferable on the approval of the School's PhD committee. It also requires a Comprehensive Written and Oral Examination before dissertation research commencement, a Comprehensive Research Proposal Examination defined as the Proposal Defense, and a Final Oral Examination defined as the Dissertation Defense.

For a PhD in Building Construction, the specific semester hours' requirements are as follows:

Number of credit hours transferable from a Master's degree (6000 or higher level courses): Max.21 (Please refer to degree requirements in the program booklet for details)

Number of credit hours for Building Science (BSCI) graduate courses (6000 level or above): Min. 9

- BSCI 8060: Advanced Research Methods in Building Science-1 (3)
- BSCI 8070: Advanced Research Methods in Building Science-2 (3)
- Other BSCI 6000 or higher level courses from the Course List

Number of credit hours for BSCI or other graduate courses (6000 level or above) directly related to the candidate's area of research: Min. 18

Code	Title	Hours

Dissertation Credit Hours: Min. 10

- BSCI 8990: Dissertation (1-10)

Total Credit Hours above Bachelor's degree: Min. 62

Construction Management — Graduate Certificate

This graduate certificate provides a foundation of all construction processes that constitute a project, from development conception, through project financing and design, into the on-site construction phase and management of the facility. The purpose of the certificate is to provide an introduction to comprehensive construction management topics such as estimating and scheduling as well as an understanding of the contractual and legal aspects that drive the decision-making process in the construction industry.

Code	Title	Hours
Construction Management - Graduate Certificate		
BSCI 7100 - Construction Cost Estimating		3
BSCI 7100 - Construction Project Management and Scheduling		3
BSCI 7120	Construction Law and Risk Management	3
BSCI 7110	Construction Contracting Business	3
or BSCI 7150	Heavy Civil Construction	
Total Hours		**12**

Executive Technical Construction Management — Graduate Certificate

Code	Title	Hours
Executive Technical Construction Management - Graduate Certificate		
BSCI 7030	Construction Information Management	3
BSCI 7100: Mechanical & Plumbing Systems in Buildings		3
BSCI 7100: Electrical Systems in Buildings		3
Elective Course:		
BSCI 7140	Structural Systems of Buildings	3
or BSCI 7130	Building Construction Sustainability	
Total Hours		**12**

Integrated Processes Construction Management — Graduate Certificate

This graduate certificate will develop a student's ability to handle comprehensive project budgets, project development and project financing within the construction industry. Individuals will be able to create construction project financing, project development, and program management plans.

Code	Title	Hours
Integrated Processes Construction Management - Graduate Certificate		
BSCI 7020	Integrated Building Processes I	3
BSCI 7040	Integrated Building Processes II	3
BSCI 7050	Executive Issues in Construction	3

BSCI 7130	Building Construction Sustainability	3
or BSCI 6460	Planning and Decision Making in Construction	
Total Hours		**12**

Business — MBA, MS, PhD

Degree Programs:

- Master of Business Administration (with On-Campus, Online, and Executive and Physicians Executive Options) — MBA (p. 1565)
- Business - (with concentrations in Finance, Information Systems, Management, and Supply Chain Management) — PhD (p. 1566)

Graduate programs in business administration are fully accredited by AACSB International — the Association to Advance Collegiate Schools of Business (AACSB) — and include the master of business administration, the master of science in business administration with a concentration in finance, and the doctor of philosophy in business with concentrations in finance, information systems, management, and supply chain management.

Application for admission to graduate programs in Business should be made directly to the Graduate School. Information concerning specific program requirements may be obtained by visiting https://harbert.auburn.edu/.

An Auburn MBA can be an important part of the advantage needed to succeed in an increasingly competitive business environment. The College of Business offers an on-Campus MBA, an Online MBA, an Executive MBA and a Physicians Executive MBA, all structured to provide students with a world-class learning experience. An MBA from Auburn prepares individuals to enter the workplace in key leadership positions. Hands-on leadership training is integrated throughout the program. The MBA is a 39-hour program. MBA students without two years full-time work experience are also required to do an additional 3-credit hour internship. For on-campus and online students, dual MBA/MS graduate degree options are available in Finance, Management Information Systems, and Industrial and Systems Engineering.

For more information on MBA Program options, please visit: www.harbert.auburn.edu (http://harbert.auburn.edu/).

Graduate Executive Programs

The Graduate Executive Programs comprise the Executive MBA, the Physicians Executive MBA, and the Masters of Real Estate Development Executive programs. These programs are designed to be taken as a cohort with one start in the Fall of each year, an exact sequence of courses taken each term and with graduation in the Spring – five semesters later.

Due to the hybrid nature of these Graduate Executive programs, which use a format that combines on-campus residency with online learning, the residencies typically occur during breaks on campus. See the relevant program website for the exact calendar dates per term for each executive program.

Students in the Graduate Executive Programs are restricted to the exact courses which are offered to that cohort in any one semester.

The course load varies from term to term — from a minimum of 5 hours to a maximum of 9 hours.

The course load is thus considered to be full time as they cannot take more hours or less as they follow the mandated and approved curriculum.

Tuition Costs Excluded VA Benefit Coverage:

VA benefits will not cover costs for lodging, meals, travel, books, supplies or memberships to organizations. As many of these costs are included in the Graduate Executive Programs' tuition, those costs have been broken out and will be billed separately. See the relevant program website for the exact amounts per term.

MBA/MS Dual Degree Options

The MBA/MSIS is a 54-hour program administered jointly by the Business Analytics and Information Systems faculty and the MBA program. The program saves the student fifteen hours of coursework over completing both degrees separately. For the MBA, students without two years full time work experience are required to do an additional 3-credit hour internship. Students must apply separately to each program (MSIS and MBA), but only have to pay one application fee. Students can also opt to apply for the second degree program during their first year in the other program.

The MBA/MS-Finance is a 54-hour program administered jointly by the Finance faculty and the MBA program. The program saves the student fifteen hours of coursework over completing both degrees separately. For the MBA, students without two years full time work

experience are required to do an additional 3-credit hour internship. Students must apply separately to each program (MS-Finance and MBA), but only have to pay one application fee. Students can also opt to apply for the second degree program during their first year in the other program.

The MBA/MS in Industrial & Systems Engineering is a 55-credit hour concurrent degree program administered jointly by the Industrial and Systems Engineering faculty and the MBA program. Students must apply separately to each program (MS Industrial & Systems Engineering and MBA). The concurrent degree path consists of 27 credit hours of MBA core (BUSI) classes, 9 credit hours of INSY core classes, 12 credit hours of INSY electives, a one credit hour INSY seminar course and 6 hours of approved electives. The program saves the student fifteen hours of coursework over completing both degrees separately.

Business — PhD

The PhD Business offer four concentrations:

- Business (Finance) — PhD (p. 1663)
- Business (Information Systems Management) — PhD (p. 1566)
- Business (Management) — PhD (p. 1567)
- Business (Supply Chain Management) — PhD (p. 1787)

The PhD in Business requires 60 semester hours earned through instruction beyond the bachelor 's degree, including 1) a minimum of 30 semester hours graded (e.g., A, B) graduate course work (6000-level and above); and 2) a minimum of 30 semester hours of additional graduate course work (6000-level and above) that may include ungraded courses, 7990 and 8990, and must include at least 10 hours of 8990.

The total number of credit hours that may be transferred from another accredited institution toward a doctoral degree varies by program but must be less than 50 percent of the credit hours listed on the Plan of Study. Such transfer credit 1) must fall within the time limits of the degree; and 2) must be approved by the advisory committee and the dean of the Graduate School. A maximum of four hours of 7990 (Research and Thesis) from a completed master's program may be counted.

All doctoral students must complete a minimum of 10 hours of 8990. Enrollment in 8990 may take place at any time the student and the advisory committee deem appropriate. During any one semester, the number of hours of 8990 in which the student enrolls should reflect the amount of instructional time being spent on the dissertation and the degree to which university resources are being utilized. Students may enroll, during any one semester, for as few as one hour or as many as 16 hours of 8990. Dissertation students submitting their dissertation, awaiting committee review and approval, or taking their final examination must register for 8990 Research and Dissertation in the semester(s) when these steps in the process take place. The requisite 10 hours of 8990 should be included in the Plan of Study. No grade is assigned.

Business (Information Systems Management) — PhD

Code	Title	Hours
PhD Business - Information Systems Management		
ISMN 8990	Research and Dissertation	10
50 Credits in @ 6000-8999		50
Total Hours		**60**

The PhD in Business requires 60 semester hours earned through instruction beyond the bachelor's degree, including 1) a minimum of 30 semester hours graded (e.g., A, B) graduate course work (6000-level and above); and 2) a minimum of 30 semester hours of additional graduate course work (6000-level and above) that may include ungraded courses, 7990 and 8990, and must include at least 10 hours of 8990. Up to 30 hours (if less than half of the total number of hours) of applicable master's level course work may be used to satisfy part of these requirements with advisor approval.

The total number of credit hours that may be transferred from another accredited institution toward a doctoral degree varies by program but must be less than 50 percent of the credit hours listed on the Plan of Study. Such transfer credit 1) must fall within the time limits of the degree; and 2) must be approved by the advisory committee and the dean of the Graduate School. A maximum of four hours of 7990 (Research and Thesis) from a completed master's program may be counted.

All doctoral students must complete a minimum of 10 hours of 8990. Enrollment in 8990 may take place at any time the student and the advisory committee deem appropriate. During any one semester, the number of hours of 8990 in which the student enrolls should reflect the amount of instructional time being spent on the dissertation and the degree to which university resources are being utilized. Students may enroll, during any one semester, for as few as one hour or as many as 16 hours of 8990. Dissertation students submitting their dissertation, awaiting committee review and approval, or taking their final examination must register for 8990 Research and Dissertation in the semester(s) when these steps in the process take place. The requisite 10 hours of 8990 should be included in the Plan of Study. No grade is assigned.

Business Analytics — Graduate Certificate

This graduate certificate will help develop working skills in building data models used in business decision making and business applications, basic data analytics techniques for the business setting;

Managing, governing, extracting, merging, and preparing large data sets for analysis; and data management, emphasizing loading and cleansing data for analysis.

Students must take the two required courses listed below. The remaining 6 hours may come from any BUAL course at the 6000 level or higher, ISMN 6290, or ISMN 6650. Current Auburn University graduate students may substitute one of their program courses for 3 of the 6 hours of electives with approval from the certificate-granting department advisor.

Code	Title	Hours
BUAL 6610	Predictive Modeling for Business Decisions	3
BUAL 6650	Business Data Management and Acquisition	3

Business (Management Concentration) — PhD

Degree Programs:

- Business (Management Concentration) — PhD (p. 1568)

The Doctor of Philosophy in Business with a concentration in Management prepares students for careers in research and teaching. It provides the depth of knowledge and skills required to conduct first-rate research in the field, effectively analyze that research, and present those findings in world-class scholarly presentations and publications.

The Ph.D. in Business - Management, provides students with the opportunity to develop expertise in all phases of the process of change in organizations. The program emphasizes diagnosing organizational problems and implementing interventions to improve performance.

The Ph.D. in Business - Management is a four-year, full-time program. The bulk of coursework is completed in the first two years. The third year is devoted to two required research papers. The fourth year is spent on dissertation research. Completion of the dissertation and its defense is the last requirement for completion of the degree. Students with assistantships may also be required to teach. Students are expected to have a full-time presence on campus.

Applicants to the program must hold a bachelor's degree from a recognized institution, complete a Graduate School application including submitting GMAT (preferred) or GRE scores. For full considerations, applications must be received no later than February 1, prior to the Fall term.

Information concerning specific program requirements may be obtained by visiting the Raymond J. Harbert College of Business website.

Business (Management Concentration) — PhD

Code	Title	Hours
Business - Management Concentration (PhD)		
MNGT 8990	Research and Dissertation	10
50 Credits in @ 6000-8999		50

Dissertation students submitting their dissertation, awaiting committee review and approval, or taking their final examination must register for 8990 Research and Dissertation in the semester(s) when these steps in the process take place. The requisite 10 hours of 8990 should be included in the Plan of Study. No grade is assigned.

Chemical Engineering — MS, PhD

Program Degrees

- Chemical Engineering — MS (p. 1569)
- Chemical Engineering — PhD (p. 1570)

The Chemical Engineering Department offers graduate programs leading to the degrees of master of science and doctor of philosophy. Specialized courses and research training are provided in a wide variety of specialties within chemical engineering or related interdisciplinary areas. Some of these specialties include: surface science, biochemical engineering, catalysis, pulp and paper engineering, environmental engineering, waste conversion, computer-aided process design and simulation, novel bioseparations systems, chemical kinetics and reactor design, biomedical engineering, process control and optimization, thermodynamics, advanced energy research, mass and energy transfer, electrochemical engineering, polymer engineering, interfacial phenomena, process synthesis, material science, nanotechnology, and space science. Additionally, individualized interdisciplinary programs which cross the traditional departmental boundaries are encouraged. These may include collaborative work in chemistry, engineering disciplines, physics, mathematics, agriculture, forestry, biology, microbiology, genetics and health sciences or other areas.

The applicant must hold a bachelor's degree or its equivalent from an institution of recognized standing and must have the pre-requisite undergraduate experience in areas of study relevant to the proposed graduate program. The General Test of the Graduate Record Examination (GRE) is required. If the applicant's undergraduate degree is other than chemical engineering, an individualized plan of study will be developed to impart the critical skills inherent in the bachelor's chemical engineering program. All applicants will be evaluated on an individual basis by the Chemical Engineering Graduate Admissions Committee. The admissions committee will evaluate the undergraduate (and graduate) record, GRE scores, letters of recommendation and any experience in research. Non-core, non-duplicating, "A" grade graduate courses from another university are eligible as determined by the graduate program officer for transfer credit (maximum of 6 credit hours for Masters, 12 credit hours for PhD)

The master of science may be earned under a thesis or non-thesis option. There is not a language requirement for either option. For both options, a total of 30 semester hours of work is necessary and at least 21 hours must be in chemical engineering (CHEN). A total of 12 hours must be taken at the 7000 level or higher, the remaining 18 hours must be at the 6000 level or higher. The following core courses must be taken for a total of 9 hours:

Code	Title	Hours
CHEN 7100	Transport Phenomena	3
CHEN 7200	Chemical Engr Thermodynamics	3
CHEN 7250	Chemical Reaction Engineering	3
Total Hours		**9**

Students pursing a MS with thesis degree should enroll in CHEN 7950 Graduate Seminar each semester of enrollment. These students may include six (6) hours of research and thesis as part of the 30 hours. After completion of the thesis, the student must pass a final oral examination defending the thesis. The non-thesis MS degree option does not have a residency, seminar, research or final oral exam requirement. The non-thesis degree can be earned entirely through the Auburn Engineering Graduate Online Program.

The doctor of philosophy provides for advanced course work and emphasizes original, creative research. A dissertation embodying the results of this research represents the major portion of the requirements for this degree. A minimum of 60 semester hours of graduate work past the bachelor's degree is necessary. Each student may include 10 hours of research and dissertation as part of the 60 hours. Four calendar years beyond the bachelor's degree or three past the master's degree usually are needed to complete the PhD. There are four (4) core graduate courses for a total of 12 credit hours:

Code	Title	Hours
CHEN 7100	Transport Phenomena	3
CHEN 7110	Chem Engr Anlys Adv Transport	3
CHEN 7200	Chemical Engr Thermodynamics	3
CHEN 7250	Chemical Reaction Engineering	3
Total Hours		**12**

Additional 18 credit hours of chemical engineering (minimum 9 credit hours) and/or other elective courses at 6000 level or higher is required. The remaining 30 credit hours are composed of research and dissertation (minimum 10 credit hours), formal courses (6000 level or higher), and graduate seminar.

The General Doctoral Examination consists of two parts, the "PhD Qualifying Examination" and the "PhD Preliminary Oral Examination". The PhD Qualifying Examination will be successfully fulfilled by earning a B or higher in each of the four (4) core graduate courses above.

At the PhD Preliminary Oral Examination, the student will present to their Faculty Research Advisory Committee a thorough description and comprehensive discussion of his/her proposed dissertation research. Successful completion of the Preliminary Oral Examination requires unanimous approval of the student's Faculty Research Advisory Committee. Upon successful completion of the PhD Qualifying and Preliminary Oral Examinations, the student advances to candidacy. After completion of the dissertation, the student must pass a final oral examination defending the dissertation.

There is no language requirement for the PhD.

Chemical Engineering — MS

The master of science may be earned under a thesis or non-thesis option. There is not a language requirement for either option. For both options, a total of 30 semester hours of work is necessary and at least 21 hours must be in chemical engineering (CHEN). There are three (3) core courses that must be taken for a total of 9 hours, and the remaining 21 hours must be at the 6000 level or higher:

Code	Title	Hours
CHEN 7100	Transport Phenomena	3
CHEN 7200	Chemical Engineering Thermodynamics	3
CHEN 7250	Chemical Reaction Engineering	3
Select 12 Credits in @ CHEN 6000-8999		12

Select 9 Credits in @ 6000-8999	9
Total Hours	**30**

Students pursuing a MS with thesis degree should enroll in CHEN 7950 Graduate Seminar each semester of enrollment. These students may include six (6) hours of CHEN 7990 Research and Thesis as part of the 30 hours. After completion of the thesis, the student must pass a final oral examination defending the thesis. The non-thesis MS degree option does not have a residency, seminar, research or final oral exam requirement. The non-thesis degree can be earned entirely through the Engineering Online Graduate Program.

Chemical Engineering — PhD

The doctor of philosophy provides for advanced course work and emphasizes original, creative research. A dissertation embodying the results of this research represents the major portion of the requirements for this degree. A minimum of 60 semester hours of graduate work past the bachelor's degree is necessary. Each student may include 10 hours of research and dissertation as part of the 60 hours. Four calendar years beyond the bachelor's degree or three past the master's degree usually are needed to complete the PhD. There are four (4) core graduate courses for a total of 12 credit hours:

Code	Title	Hours
CHEN 7100	Transport Phenomena	3
CHEN 7110	Chemical Engineering Analysis and Advanced Transport Phenomena	3
CHEN 7200	Chemical Engineering Thermodynamics	3
CHEN 7250	Chemical Reaction Engineering	3
CHEN 8990	Research and Dissertation	10
Select 9 Credits in CHEN 6000-8999		9
Select 29 Credits in @ 6000-8999		29
Total Hours		**60**

Additional 18 credit hours of chemical engineering (minimum 9 credit hours) and/or other elective courses at 6000 level or higher is required. The remaining 30 credit hours are composed of CHEN 8990 Research and Dissertation (minimum 10 credit hours), formal courses (6000 level or higher), and graduate seminar.

The General Doctoral Examination consists of two parts, the "PhD Qualifying Examination" and the "PhD Preliminary Oral Examination". The PhD Qualifying Examination will be successfully fulfilled by earning a B or higher in each of the four (4) core graduate courses above.

At the PhD Preliminary Oral Examination, the student will present to their Faculty Research Advisory Committee a thorough description and comprehensive discussion of his/her proposed dissertation research. Successful completion of the Preliminary Oral Examination requires unanimous approval of the student's Faculty Research Advisory Committee. Upon successful completion of the PhD Qualifying and Preliminary Oral Examinations, the student advances to candidacy. After completion of the dissertation, the student must pass a final oral examination defending the dissertation.

There is no language requirement for the PhD.

Chemistry — MS, PhD

Degree Programs

- Chemistry — MS (p. 1571)
- Chemistry — PhD (p. 1571)

Graduate study in chemistry leads to the MS and PhD degrees. By the end of the second semester, graduate students must submit a Plan of Study which details the courses that will be taken. This is done with the assistance of the major professor and with the consent of the student's advisory committee. The Plan of Study will include the balance of formal graded courses. These should be selected to align with the research project and interests of the student, and should include Seminar (CHEM 7950), Formal Presentations

(CHEM 7750), Directed Individual Study (CHEM 7930), as well as Research and Thesis (MS) or Research and Dissertation (PhD) hours (CHEM 7990 or CHEM 8990).

- For the MS degree, the plan of study will consist of a minimum of 30 hours.
- For the PhD degree, the plan of study will consist of a minimum of 60 hours.
- Both MS and PhD students must pass the final written (thesis/dissertation) and oral (defense) examination.

Chemistry — MS

MS plan of study will consist of a minimum of 30 hours.

Code	Title	Hours
Chemistry (MS)		
CHEM 7750	Formal Presentations in Modern Chemistry	1
4 credits in CHEM 7950 (Seminar)		4
CHEM 7990	Research and Thesis	4
21 Credits in @ 6000-8999		21
Total Hours		**30**

By the end of the second semester, MS students must submit a plan of study which details the courses which will be taken. This is done with the assistance of the major professor and with consent of the student's advisory committee. The courses usually are taken in the major area. Directed Study, CHEM 7930, may be taken for a maximum of 15 hours. Students must orally present their research and defend their theses in the final oral examination.

Chemistry — PhD

PhD students must complete a minimum of 60 hours of courses.

Code	Title	Hours
Chemistry (PhD)		
3 Credits in CHEM 7750		3
6 Credits in CHEM 7950		6
CHEM 8990	Research and Dissertation	10
41 Credits in @ 6000-8999		41
Total Hours		**60**

By the end of the second semester, PhD students must submit a plan of study which details the courses that will be taken. This is done with the assistance of the major professor and with the consent of the student's advisory committee. The rest of the courses usually are taken in the major area. Directed study, CHEM 7930, may be taken for a maximum of 15 hours. Students must pass the written and oral general examination. Students must orally present their research and defend their dissertations in the final oral examination.

Civil Engineering — MCE, MS, PhD

Degree Programs:

- Civil Engineering — MCE (p. 1572)
- Civil Engineering — MS (On-Campus and Distance) (p. 1572)
- Civil Engineering — PhD (p. 1573)

The Department of Civil Engineering offers graduate-level instruction and research programs leading to the degrees of Master of Civil Engineering (MCE), Master of Science (MS) and Doctor of Philosophy (PhD). These programs provide qualified students opportunities for advanced training and specialization and enable them to gain experience conducting engineering research and interpret and communicate their findings. The department offers programs in construction engineering and management, environmental engineering, geotechnical engineering, hydraulics/hydrology, pavements and materials, structural engineering, and transportation engineering.

Coursework may be taken in supportive disciplines including applied statistics, building science, computer science or mathematics, with sufficient justification.

Applicants for the graduate programs must have an earned baccalaureate degree (BCE, BS or BSCE) in civil engineering or a closely related area and must have completed such formal training as to warrant advanced study in the major and minor fields. Applicants from related disciplines may be required to take prerequisites, as determined by the relevant specialty program and the department. There is no formal foreign language requirement.

All MS candidates must write a thesis. At least 30 semester hours of graduate-level course credit must be completed satisfactorily. At least six of the 30 hours must be in CIVL 7990 and at least 24 hours must be in graduate course work other than CIVL 7990. Candidates must pass a comprehensive examination covering the coursework, research and thesis.

Admission requirements for MCE are the same as those for MS. MCE students must take at least 30 semester hours of graduate-level courses, which may include three-semester hours of CIVL 7980. A plan of study must be approved by the student's advisory committee.

PhD applicants must have earned a BS or master’s degree in civil engineering or a related area. Applicants from other related disciplines may be required to take prerequisites determined by the relevant specialty program and the department.

The PhD is conferred in recognition of mastery of a specific field of knowledge and a contribution to that engineering discipline through the doctoral dissertation. The degree is a research degree, requiring not only completion of certain technical requirements but proof of the candidate’s ability to work independently in an engineering research environment.

To be qualified as a PhD candidate, an admitted doctoral student must pass a written comprehensive examination and a follow-up oral critique administered by the student’s advisory committee. The examination may not be taken sooner than one year after the student begins doctoral course work. Additional academic preparation may be prescribed by the advisory committee to strengthen deficiencies identified by the examination, or the student may be suspended from the program. One retake may be permitted after the student has completed the prescribed preparation. Upon successful completion of the examination, the student becomes a candidate for the PhD.

After successfully completing the comprehensive examination, the doctoral candidate will defend the proposed dissertation topic, which must represent a significant contribution to the state-of-the-art. This defense may be included in the oral critique of the comprehensive examination if the advisory committee agrees. Once the committee approves the research topic, the doctoral candidate may proceed with the research and dissertation. When it is completed, the candidate defends the completed dissertation before the advisory committee and the outside reader appointed by the Graduate School.

Civil Engineering — MCE

Code	Title	Hours

Civil Engineering — MS

(On-Campus and Distance Tracks)

Code	Title	Hours
Civil Engineering (MS)		
CIVL 7990	Research and Thesis (4-6 credit hours)	4
24-26 hours in approved graduate level courses 6000-7980 (Electives)		26
Total Hours		**30**

For MS Civil Engineering (Distance) program, students will take the distance sections (D**) of approved graduate-level courses (CIVL 6000-7980 D**) and Research and Thesis (CIVL 7990 D**).

Civil Engineering — PhD

Code	Title	Hours
Civil Engineering (PhD)		
CIVL 8990	Research and Dissertation	10
30 credit hours in committee approved graded graduate level courses (6000-7986)		30
16-20 credit hours in committee approved graded graduate level courses (6000-7986) or Dissertation (CIVL 8990)		20
0-4 Thesis and Research (7990, optional, maximum of 4 credits in Thesis)		0
Total Hours		**60**

Communication — Graduate Certificate, MA

Degree Programs

- Communication — MA (p. 1575)

Graduate Certificate

- Communication Studies (p. 1575)

The School of Communication and Journalism offers the Master of Arts in Communication and the Graduate Certificate in Communication Studies.

Students earning the MA in Communication have excellent employment opportunities working for organizations ranging from Fortune 100 companies to non-profit groups. For those interested in pursuing a doctorate, our graduates have been admitted to the best PhD programs in the communication discipline.

For more information about both the MA and the Graduate Certificate, see https://cla.auburn.edu/cmjn/. Program statistics (e.g., number of students accepted, average GRE scores, etc.) and additional information on the application process are available on that website.

Master of Arts in Communication

Application Process

Applicants for the MA must hold bachelor's degrees from an accredited college or university and must take the General Test of the GRE. They must submit a statement of purpose, undergraduate transcripts, GRE scores, a writing sample, recommendation review forms, and letters of recommendation for consideration by an admissions committee.

They should ensure that these materials are submitted to the Graduate School web application:

- Application fee
- Official scores for the General Test of the GRE
- Official transcripts for every institution attended

They should ensure that these materials are submitted to the graduate program in the Department of Communication and Journalism:

- Statement of purpose
- Recommendation review forms
- Three letters of recommendation
- Writing sample

Deadlines for application materials are posted on the departmental website.

MA Degree Requirements

Students may pursue either a thesis or a non-thesis option for the MA in Communication. The MA-thesis option requires 31 hours beyond the bachelor's degree, including the thesis. The MA-non-thesis option requires 30 hours beyond the bachelor's degree, including appropriate field experience.

The following courses are required for the MA in Communication:

- COMM 7000 Communication Theory
- COMM 7010 Qual Comm Research
- COMM 7020 Quant Comm Research

Upon completion of the required classes, students must pass a written qualifying examination covering material presented in these three courses before continuing in the degree program. All remaining hours are elective course work.

MA-thesis option students will enroll in a minimum of 4 thesis hours (COMM 7990). MA-non-thesis option students will enroll in a minimum of 3 non-thesis project hours (COMM 7980).

All students seeking the master's degree must pass comprehensive exams prior to graduation. The exams include both written and oral components. The nature of the written portion of the comprehensive exams will vary depending on the choice of the thesis or non-thesis option. For students choosing the thesis option, the thesis typically constitutes the written portion of the comprehensive examination. Students choosing the non-thesis option must pass a written examination covering the program of study as well as any research and special project/internship/field experience.

There is no foreign language requirement.

Graduate Certificate in Communication Studies

Application Process

Applicants for the Graduate Certificate must hold bachelor's degrees from accredited colleges or universities and must take the General Test of the GRE. An admissions committee evaluates the applicant's statement of purpose, undergraduate record, GRE scores, writing sample, recommendation review forms, and letters of recommendation.

Applicants should ensure that these materials are submitted to the Graduate School web application:

- Application fee
- Official scores for the General Test of the GRE
- Official transcripts for every institution attended

They should ensure that these materials are submitted to the graduate program in the Department of Communication and Journalism:

- Statement of purpose
- Recommendation review forms
- Three letters of recommendation
- Writing sample

Requirements

The Graduate Certificate in Communication Studies requires 18 hours beyond the bachelor's degree. It does not require a thesis or field experience.

The following courses are required for the Graduate Certificate in Communication Studies:

- COMM 7000 Communication Theory
- COMM 7010 Qual Comm Research
- COMM 7020 Quant Comm Research

Upon completion of these three required classes, students must pass a written qualifying examination covering material presented in these three courses. The remaining 9 hours are elective course work.

Deadlines for application materials are posted on the departmental website.

Graduate Assistantship Opportunities

A limited number of competitive graduate teaching assistantships are available. To get more information about the assistantships and to learn how to apply, please visit the following website: https://cla.auburn.edu/cmjn/graduate-program/assistantship-information/. Students enrolled in the Graduate Certificate in Communication Studies are not eligible for financial aid.

Communication Studies — Graduate Certificate

This graduate certificate provides a foundation of communication theory and prepare students to understand how people communicate with each other, how organizations communicate with the public, and how communication maintains and develops communities ranging from Fortune 100 companies to non-profit groups.

Code	Title	Hours
Communication Studies (Graduate Certificate)

Crop, Soil and Environmental Sciences — Graduate Certificate, MS, MAg, PhD

Degree Programs

- Crop, Soil and Environmental Sciences — MS (p. 1577)
- Crop, Soil and Environmental Sciences — MAg (p. 1577)
- Crop, Soil and Environmental Sciences — PhD (p. 1577)

Graduate Certificates

- Crop and Soil Science (p. 1577)

Graduate training in this department enables outstanding students to achieve a high level of scholarly attainment in the soil, crop and environmental sciences. Within these broad areas, research training and experience may be gained in the specialized fields of soil fertility and plant nutrition; soil chemistry; soil genesis, morphology and classification; soil mineralogy; soil physics; soil microbiology; plant breeding and genetics; weed science; forage, fiber, bioenergy and grain crop production; crop ecology; environmental quality; and turfgrass management.

All graduate students are required to have core undergraduate courses in math, chemistry, physics, botany, plant physiology, genetics, and statistics. The Graduate Studies Committee evaluates each applicant's record and determines prerequisite deficiencies. Qualified students lacking prerequisite subjects can be admitted but will be required to complete course work to satisfy undergraduate course deficiencies. Students are encouraged to visit the department's web site and view the graduate student handbook for specifics. Admission is based primarily on a combination of required grade point average (GPA) and graduate record examination (GRE) scores and TOEFL tests for international students.

Three degrees are offered:

1. **Master of Science** (MS), earned only under the thesis option where importance is placed on both classroom and research training. The MS requires a minimum of 30 semester hours at or above the 6000 level of which 4 hours of thesis research and 2 hours of seminar are included. The student's advisory committee along with the student determines the course of study. In addition, the student must complete research, a written thesis and an oral defense examination of the thesis research.
2. **Master of Agriculture** (MAg) earned under the non-thesis option places more emphasis on classroom training over a broader range of subject matters. The MAg degree requires at least two additional graded courses that replace thesis research hours. An oral defense of course subject matter is required and students must register for GRAD 7000 during the semester the exam is taken. MAg students must write a professional paper as part of a special problems course (CSES 6960) and present an exit seminar (CSES 7950) on this paper.
3. **Doctor of Philosophy** (PhD) requires a minimum 60 semester hours of course work beyond the Bachelor of Science. Of the 60 semester hours, 30 must be graded courses 6000 level and above, 20 of which must be completed at Auburn University while registered in the PhD program. There is no language requirement for this degree. Upon completion of the course work, a PhD

student must satisfy a general written examination administered by each member of the graduate advisory committee. A student must pass all parts of the written examination before scheduling the preliminary oral examination. After satisfactory completion of the preliminary examination, the student advances to candidacy. The PhD student will conduct independent research and prepare a dissertation through the guidance and direction of the advisory committee. Upon completion of the dissertation, the student must pass a final oral examination defending the dissertation.

Graduate students in a program requiring a thesis or a dissertation must register for at least one hour of CSES 7990 or CSES 8990 per semester. Research Associates and similar classifications that also are graduate students are exempt from this requirement but must complete 10 hours of 7990 in the master's program or 20 hours of 8990 if in a PhD program.

Crop, Soil and Environmental Sciences — MS

Code	Title	Hours
CSES 7950	Seminar (I)	1
CSES 7950	Seminar (II)	1
CSES 7990	Research and Thesis	4
Select 24 Credits in @ 6000-8999		24
Total Hours		**30**

Please contact the Department of Crop, Soil and Environmental Sciences regarding the online MS program.

Crop, Soil and Environmental Sciences — MAg

Code	Title	Hours
CSES 6960	Special Problems	3
CSES 7950	Seminar	1
Select 26 Credits in @ 6000-8999		26
Total Hours		**30**

Please contact the Department of Crop, Soil and Environmental Sciences regarding the online MAg program.

Crop, Soil and Environmental Sciences — PhD

Code	Title	Hours
CSES 7950	Seminar (I)	1
CSES 7950	Seminar (II)	1
CSES 8990	Research and Dissertation	10
Select 48 Credits in @ 6000-9999		48
Total Hours		**60**

Within the total 60 hours beyond the B.S. degree, at least 18 hours must be completed at Auburn University, 30 hours must be at or above the 6000, and 6 hours must be at or above the 7000 level in the major area of study.

Crop and Soil Science — Graduate Certificate

This graduate certificate prepares students in the soil, crop and environmental sciences and the knowledge can be applied within the public and private sectors. The purpose of the certificate is to provide research training and experience in specialized fields such as soil fertility and plant nutrition; soil chemistry; morphology and classification; plant breeding and genetics; weed science; and forage.

Code	Title	Hours
Crop and Soil Science - GCRT		
CSES 6020	Soil Fertility and Nutrient Management	3
Select 12 Credits of the following:		12
CSES 6010	Analy Plant, Soil & Ani Data	
CSES 6030	Advanced Crop Science	

CSES 6060	Soil Microbiology
CSES 6061	Soil Microbiology Lab
CSES 6080	Soil Resources and Conservation
CSES 6160	Advanced Turfgrass Management
CSES 6300	Soil Chemistry
CSES 6400	Bioenergy and the Environment
CSES 6500	Forage Production and Utilization
CSES 6960	Special Problems
CSES 7140	Chemistry and Use of Herbicides in Crop Production
CSES 7540	Principles of Plant Nutrition
PLPA 6200	Mycology
PLPA 6500	Plant Nematology
ENTM 6360	Landscape Entomology

Community Planning — MCP

The community planning program at Auburn University is a professionally oriented master's degree program that focuses on the skills that professional planners need for practice in an interactive and interdisciplinary environment. The centerpiece of the program is the opportunity for students and faculty to engage with under-served communities throughout Alabama and the Southeast through outreach, teaching, and engaged research. Through working on projects with communities throughout Alabama and the Southeast, students learn to help diverse and complex communities create and implement plans that improve and protect their quality-of-life, culture, resource base, built environment, natural environment, and economic vitality.

The Master of Community Planning (MCP) is a professional, non-thesis degree. Students will normally earn the degree in two academic years by successfully completing 45 credit hours of course work, including two capstone plan-making workshops. The program offers dual degree options with public administration, and landscape architecture (each of which requires a separate application). Enhanced opportunities for interdisciplinary teaching and learning are offered by the program’s distinctive Alabama City Year Program, in which the program focuses on one city in the Southeast each year and students complete multiple outreach and engagement projects in that city in each of their classes.

Master of Community Planning (45 credit hours)

Code	Title	Hours

Computer Science and Software Engineering — Graduate Certificate, MS, PhD

Degree Programs:

- Artificial Intelligence Engineering — MS (p. 1579)
- Computer Science and Software Engineering — MS (p. 1580)
- Computer Science and Software Engineering (Distance) — MS (p. 1580)
- Computer Science and Software Engineering — PhD (p. 1581)
- Cybersecurity Engineering — MS (p. 1581)
- Data Science and Engineering — MS (p. 1582)

Graduate Certificates:

- Artificial Intelligence Engineering (p. 1579)
- Data Engineering (p. 1582)
- Cybersecurity Engineering (p. 1581)

Artificial Intelligence Engineering — MS

The Master of Science in Artificial Intelligence Engineering (MS-AIEN) degree is a graduate degree that is open to everyone with a baccalaureate degree from an institution of recognized standing, either in computer science, software engineering or another STEM discipline, or with relevant professional experience that provides necessary background knowledge of programming, computing, and mathematics.

It entails a minimum of 30 semester graduate credit hours. All students are required to take three core courses (COMP 6130, COMP 6600, COMP 6630) and seven technical electives from a department-prescribed list of courses related to AI and its subareas such as machine learning, computer vision, natural language processing, etc. These electives may include 3 credit hours of directed studies (COMP 7930) and/or 3 credit hours of capstone engineering project (COMP 7980).

Students who have taken the 5000 level version of any 6000 level course cannot take the course in its 6000 level format. Those students must substitute other graduate courses as approved by the department. All courses required for the degree must be taken for a grade.

Code	Title	Hours
Core Courses:		
COMP 6600	Artificial Intelligence	3
COMP 6630	Machine Learning	3
COMP 6130	Data Mining	3
Technical Electives:		
Select 21 graded credits from a list of department-prescribed technical electives related to AI and its subareas.		21
Total		**30**

Artificial Intelligence Engineering — Graduate Certificate

The graduate certificate program in Artificial Intelligence Engineering (GCRT-AIE)is open to everyone with a baccalaureate degree from an institution of recognized standing, either in computer science, software engineering or another STEM discipline, or with relevant professional experience that provides necessary background knowledge of programming, computing, and mathematics. It entails 12 graduate credit hours. All students are required to take three required courses (COMP 6130, 6600, 6630) and an approved technical elective from a list of department-prescribed courses related to AI and its subareas.

Code	Title	Hours
Required Courses		
COMP 6600	Artificial Intelligence	3
COMP 6630	Machine Learning	3
COMP 6130	Data Mining	3

Approved AI elective	3
Total	
Total Hours	**12**

Computer Science and Software Engineering — MS

The master of science may be earned under a thesis or non-thesis option. The MS (non-thesis) degree requires a minimum of 33 graduate semester credit hours. All courses in the degree must be taken for a grade. The three required 7000-level courses are COMP7270, COMP7300, and COMP7500. Students may take up to three (3) credit hours of COMP7930 Directed Study. Students may take three (3) credit hours of COMP7980 Master of Science Capstone Engineering Project, which is a graded course.

Code	Title	Hours
COMP 7270	Advanced Topics in Algorithms	3
COMP 7300	Advanced Computer Architecture	3
COMP 7500	Advanced Topics in Operating Systems	3
Select 18 Credits in COMP 6000-8999		18
Select 6 Credits in @ 6000-8999		6
Total		**33**

The Master of Science degree (thesis option) requires a minimum of 30 graduate semester credit hours. All courses in the degree must be taken for a grade; the exception is COMP7990 Research and Thesis, which is offered in incomplete/complete format. The three required 7000-level courses are COMP7270, COMP7300, and COMP7500. Students may take up to three (3) credit hours of COMP7930 Directed Study. A thesis is required for the MS-CSSE degree (i.e., thesis option). A written proposal supporting thesis project must be approved by a student's supervisory committee, which is comprised of at least three faculty members. One member of the committee is designated as the major professor (a.k.a., advisor). Students must pass a comprehensive oral examination at the conclusion of their studies. All students with thesis option are required to submit Master's Final Examination Form to the graduate school.

Code	Title	Hours
COMP 7270	Advanced Topics in Algorithms	3
COMP 7300	Advanced Computer Architecture	3
COMP 7500	Advanced Topics in Operating Systems	3
COMP 7990	Research and Thesis	6
Select 9 Credits in COMP 6000-8999		9
Select 6 Credits in @ 6000-8999		6
Total		**30**

Computer Science and Software Engineering (Distance) — MS

The distance-learning option enables students to participate in online learning. The Department of Computer Science and Software Engineering (CSSE) offers the Master of Science distance program (non-thesis), which is the online version of the Master of Science Program in Computer Science and Software Engineering (non-thesis option). The MS (non-thesis) degree requires a minimum of 33 graduate semester credit hours. All courses in the degree must be taken for a grade. The three required 7000-level courses are COMP 7270, COMP 7300, and COMP 7500. Students may take up to three (3) credit hours of COMP 7930 Directed Study. Students may take three (3) credit hours of COMP 7980 Master of Science Capstone Project, which is a graded course.

Code	Title	Hours
COMP 7270	Advanced Topics in Algorithms	3
COMP 7300	Advanced Computer Architecture	3
COMP 7500	Advanced Topics in Operating Systems	3
COMP 6000-8999		18
6000-8999		6
Total Hours		**33**

Computer Science and Software Engineering — PhD

The doctor of philosophy program offers advanced course work and emphasizes original, creative research in computer science and software engineering. A dissertation embodying the results of this research represents the major portion of the requirements for the Ph.D. degree program. A minimum of 60 semester hours of graduate work past the bachelor's degree is required. Each student may include a minimum of 24 hours of research and dissertation (COMP 8990) as part of the 60 hours. There are three (3) core graduate courses for a total of 9 credit hours:

Code	Title	Hours
Core:		
COMP 7270	Advanced Topics in Algorithms	3
COMP 7300	Advanced Computer Architecture	3
COMP 7500	Advanced Topics in Operating Systems	3
Additional:		
Select 9 Graded Credits (Lecture-based) in COMP 6000 or above		9
Select 12 Graded Credits in 6000 or above		12
Select 6 Credits in 6000 or above		6
COMP 8990 Research and Dissertation		24
Total Hours		**60**

Additional 21 credit hours of graded credits (minimum 9 credits of graded lecture courses in COMP 6000 or above) and/or other elective courses at 6000 level or higher is required. The remaining 30 credit hours are composed of COMP 8990 Research and Dissertation (minimum 24 credit hours) and other graduate courses (Graded or Ungraded) at 6000 level or higher. The selected 6 credits in 6000 or above may include COMP 8990; however, these 6 credits cannot be non-COMP ungraded courses.

The General Doctoral Examination consists of two parts: the Ph.D. Qualifying Examination and the Ph.D. General Oral Examination. The Ph.D. Qualifying Examination will be successfully fulfilled by earning a B or higher in each of the three (3) core graduate courses above. In the general oral exam, a Ph.D. student will present to the student's advisory committee a thorough description of the proposed dissertation research. Successful completion of the general oral exam requires unanimous approval of the student's advisory committee. Upon successful completion of the general examination, the student advances to candidacy. After completion of the dissertation, the student must pass a final examination defending the dissertation.

There is no language requirement for the Ph.D. program.

Cybersecurity Engineering — Graduate Certificate, MS

Cybersecurity Engineering — MS

On-Campus or Online

This graduate program prepares students for understanding, analyzing, developing, investigating, protecting, and defending the cyber ecosystem of organizations. As such, it focuses on the engineering and technical aspects of cybersecurity. The degree is designed to appeal to traditional students as well as practitioners through the inclusion of capstone experience.

The Master of Science in Cybersecurity Engineering degree entails a minimum of 33 semester graduate credit hours. The following courses are required:

Code	Title	Hours
Foundational Courses (3 credit hours)		
COMP 7500	Advanced Topics in Operating Systems	3
Required Cybersecurity-Specific Courses (18 credit hours)		
COMP 6350	Digital Forensics	3
COMP 6370	Computer and Network Security	3
COMP 6530	Secure Cloud Computing: Principles, Practice, and Applications	3
COMP 6830	Cybersecurity Threats and Countermeasures	3
COMP 7370	Advanced Computer and Network Security	3

COMP 7720	Software Reverse Engineering	3
Elective Cybersecurity Courses (9 credit hours)		
approved 6000/7000/8000-level coursework relevant to cybersecurity		9
Capstone experience (3 credit hours)		
COMP 7980	Capstone Engineering Project	3
Total Hours		**33**

Students who have taken the 5000-level version of any 6000-level course cannot take the course in its 6000-level format. They must substitute another approved cybersecurity-relevant graduate course. All courses in the degree must be taken for a grade.

Cybersecurity Engineering — Graduate Certificate

On-Campus or Online

Students will take the following three (3) required courses. The focus of this coursework is to equip students with the advanced education required to analyze, develop, investigate, protect, and defend computer and information systems.

Code	Title	Hours
Graduate Certificate in Cybersecurity Engineering (On Campus or Distance)		
COMP 6350	Digital Forensics	3
COMP 6370	Computer and Network Security	3
COMP 7370	Advanced Computer and Network Security	3
Total Hours		**9**

Certificate in Data Engineering

Online or On-Campus Options Available

Code	Title	Hours
Required Courses – 9 Hours		
COMP 6120	Database Systems I	3
COMP 6130	Data Mining	3
COMP 6630	Machine Learning	3
Elective Course – 3 Hours (Select one course from the following three electives)		
STAT 6000	Intermediate Statistical Methods for Data Science	3
STAT 6600	Probability and Statistics for Data Science	3
STAT 6650	Statistical Learning	3
Total Hours: 12		

Data Science and Engineering (On-Campus or Online) — MS

On Campus or Online

The Master of Science in Data Science and Engineering (MS-DSE) degree entails a minimum of 30 semester graduate credit hours. There are two concentrations in the MS-DSE program: *Data Engineering* administrated by the Department of Computer Science and Software Engineering; and *Data Science* managed by the Department of Mathematics and Statistics.

The course list for the Data Engineering concentration offered by the Department of Computer Science and Software Engineering:

Code	Title	Hours
COMP 6120	Database Systems I	3
COMP 6130	Data Mining	3
COMP 6630	Machine Learning	3
STAT 6000	Intermediate Statistical Methods for Data Science	3
STAT 6600	Probability and Statistics for Data Science	3
STAT 6650	Statistical Learning	3

Select 6 Credits in COMP 6000-8999		6
Select 3 Credits in 6000-8999		3
COMP 7980	Capstone Engineering Project	3
Total		**30**

The course list for the Data Science concentration offered by the Department of Mathematics and Statistics:

Code	Title	Hours
STAT 6000	Intermediate Statistical Methods for Data Science	3
STAT 6600	Probability and Statistics for Data Science	3
STAT 6650	Statistical Learning	3
COMP 6120	Database Systems I	3
COMP 6130	Data Mining	3
COMP 6630	Machine Learning	3
Select 6 Credits in STAT 6000-8999		6
Select 3 Credits in 6000-8999		3
STAT 7940	Capstone Project	3
Total		**30**

Depending on the concentration, graduate students are required to take the following courses. The two concentrations share the same list of six foundational courses. Among the three elective courses related to data science and engineering, Data Engineering concentration students must choose at least two COMP6/7000-level graduate courses, whereas Data Science concentration students are required to take at least two STAT6/7000-level graduate courses.

Both the Data Engineering and Data Science concentrations offer a list of elective courses that are highly relevant to data science and engineering. The course selections are at the discretion of the students and the respective graduate program officer (GPO).

Students who have taken the 5000#level version of any 6000#level course cannot take the course in its 6000#level format. Those students must substitute other graduate courses as directed by the GPOs. All the courses including COMP 7980 and STAT 7940 in the degree must be taken for a grade.

Consumer and Design Sciences — MS, PhD

Degree Programs

- Consumer and Design Sciences — MS (p. 1584)
- Consumer and Design Sciences — PhD (p. 1585)

Graduate study in the Department of Consumer and Design Sciences, College of Human Sciences, leads to the master of science and the doctor of philosophy. Major focus areas are apparel design or merchandising, interior design, and consumer behavior. The department emphasizes integration of basic and applied knowledge from multiple fields to enhance professional skills for careers in textile and apparel product development and design; production management; retail management; merchandising in textile and apparel retail or design firms; design of residential and commercial interiors; and college teaching and research. A foreign language is not required. Entrants with limited undergraduate backgrounds in their chosen area may need to complete some undergraduate courses. Graduate teaching and research assistantships are available on a competitive basis.

Applicants for the M.S. must have a bachelor’s degree or its equivalent from an accredited college or university. The General Test of the Graduate Record Examination is required. The admissions committee will evaluate the undergraduate record, GRE scores, letter of intent, resume, and three letters of recommendation. International applicants must submit the Test of English as a Foreign Language and meet the Graduate School admission requirements for this test.

The M.S. degree offers a thesis option and a non-thesis option. The thesis and non-thesis options require 30 semester hours. Individually designed focus areas incorporate courses in Consumer and Design Sciences and other departments.

Requirements common to both options include:

Code	Title	Hours
CADS 7040	Protocol for Graduate Study	1
CADS 7060	Consumer and Design Sciences	3
Total Hours		**30**

The thesis option requires an Oral Examination and Defense of the completed thesis, to be administered by the Graduate Advisory Committee.

An Accelerated BS/MS degree program is available in both apparel merchandising, design and production management and in interior design. Please contact the Department of Consumer and Design Sciences for more information about these accelerated programs.

Applicants for the PhD must have a master's degree or its equivalent from an accredited college or university. The General Test of the Graduate Record Examination is required. The admissions committee will evaluate the undergraduate and graduate record, GRE scores, letter of intent, resume, and three letters of recommendation. International applicants must submit the Test of English as a Foreign Language and meet the Graduate School admission requirements for this test.

The PhD focuses on the integration of the science of design and consumer behavior within a research-based product or services management approach for application in the global economy. A minimum of 60 semester hours of graduate level course work is required. At least 30 of these hours must be graded graduate level course work; at least 20 of these hours must be completed at Auburn University.

Individually designed focus areas incorporate courses in Consumer and Design Sciences and other departments. At least 20–25 graduate credit hours, excluding thesis and dissertation hours, must be in Department of Consumer and Design Sciences courses (or the equivalent).

Requirements include:

Code	Title	Hours
CADS 7040	Protocol for Graduate Study	1
CADS 7050	Research Methods	3
CADS 7060	Consumer and Design Sciences	3
At least 2 CADS graduate level theory courses		6
At least two Graduate level Statistics courses		6-8
Electives to support dissertation topic and/or to meet career goals		27-31
Research & Thesis [1,2]		4
Research & Dissertation		10
Total Hours		**60-66**

1 If student has a non-thesis master's degree, a manuscript suitable for submission to a research journal must be prepared and submitted prior to beginning the dissertation research.

2 If thesis hours are not applicable, 4 hours must be satisfied with approved electives.

PhD students must pass a General Doctoral Examination after completion of the course work and prior to proceeding to the dissertation. The General Doctoral Examination has written and oral parts to evaluate comprehension of existing knowledge in the student's area of study. Upon successful completion of the Examination, the student enters the candidacy for the Doctor of Philosophy degree and proceeds with the dissertation research. The Final Oral Examination is the defense of the dissertation, which must receive unanimous approval by the Graduate Advisory Committee and the outside reader before the PhD can be conferred.

- Community Music (p. 1632)
- Reading Instruction (p. 1633)
- Teaching English as a Second Language (TESL)/Teaching English as a Foreign Language (TEFL) (p. 1633)

The Department of Curriculum and Teaching offers graduate degree programs leading to the Master's of Education (certification option), Master’s of Science (non-certification option), Education Specialist, and Doctor of Philosophy. All graduate teacher certification programs are approved by the Alabama State Board of Education (ALSBE). Auburn University's College of Education is accredited through the Council for the Accreditation of Educator Preparation (CAEP). Music education programs are also accredited by the National Association of Schools of Music (NASM).

Master’s Degree Programs (MEd/MS)

Master’s of Education (MEd) degree programs include both alternative and traditional certification options. Alternative MEd certification programs offer qualified students who hold non-teaching baccalaureate degrees a route to initial teacher certification while simultaneously earning a master’s degree. Traditional MEd certification programs offer advanced study in pedagogy. MS non-

certification programs provide interdisciplinary graduate-level education for community-based or international educators who do not wish to gain teacher certification/licensure in the United States.

Applicants to Master's degree programs must satisfy the Graduate School's admission requirements. Departmental admission requirements include a bachelor's degree from an accredited college or university and meet current ALSDE or Program GPA requirements at the time of unconditional admissions. The GPA must be documented on the official transcript of the degree granting institution and must be the GPA that was used as the basis for granting the degree, not a GPA that includes post-degree courses. Admission requirements also include academic good standing at the institution last attended, letters of recommendation, current resume, clear background check, and approval by the department.

In addition, applicants to alternative MEd certification programs must satisfy the ALSDE teaching field admission requirements. Applicants to a traditional MEd certification program must hold a valid bachelor's-level professional educator certificate in the same teaching field as the MEd, except for English for speakers of other languages (ESOL) and reading education. Admission to the MEd ESOL program requires at least a valid bachelor's-level professional educator certificate in any teaching field. Admission to the MEd certification program in reading education includes (a) a valid bachelor's-level professional educator certificate in early childhood education, elementary education, or collaborative special education teacher Grades K-6 and two full years of full-time classroom teaching experience or (b) a valid bachelor's-level professional educator certificate in any area of education, two full years of full-time classroom teaching experience, and a passing score on the Praxis II Teaching Reading test validated for use in Alabama.

Degree requirements for MEd certification programs are in compliance with regulations established by the ALSBE. Alternative MEd certification programs range from 30-44 hours and typically take a minimum of four semesters to complete if enrolled full-time; additional undergraduate coursework may be required. Degree requirements include a semester long, full-time internship; satisfactory completion of the State's testing program including passing scores on the appropriate content assessments prior to internship; and a written comprehensive exam.

Traditional MEd certification programs and MS non-certification programs require a minimum of 30 semester hours and a comprehensive examination. Requirements for MEd certification programs in reading education and ESOL include a passing score on the appropriate content subject assessment.

In accordance with State regulations, effective for students unconditionally admitted to an MEd certification program prior to July 1, 2017, a minimum GPA of 3.00 is required on all courses used to meet master's-level certification program requirements. Effective for students unconditionally admitted to an MEd certification program July 1, 2017 and after, a minimum GPA of 3.25 will be required on all courses used to meet master's-level certification program requirements.

Specialist in Education Degree Programs (EdS)

Applicants to EdS programs must satisfy the Graduate School's admission requirements. Departmental admission requirements include a master's degree from an accredited college or university, academic good standing at the institution last attended, letters of recommendation, current resume, a valid master's-level professional educator certificate in an appropriate area of teaching, clear background check, and approval by the department. Some programs may have additional requirements (e.g., GRE Score).

Degree requirements for specialist-level teacher certification programs are in compliance with regulations established by the ALSBE. Specialist programs include a minimum of 30 semester hours beyond the master's degree. Additional requirements include satisfactory completion of a field project and a written comprehensive exam.

In accordance with State regulations, effective for students unconditionally admitted prior to July 1, 2017, a minimum GPA of 3.25 is required on all courses used to meet specialist-level certification program requirements. Effective for students unconditionally admitted July 1, 2017, and after, a minimum GPA of 3.50 will be required on all courses used to meet specialist-level certification program requirements.

Master's and Specialist-Level Certification

Individuals completing State-approved MEd certification programs are eligible to apply for Alabama Class A certification; individuals completing State-approved specialist-level certification programs are eligible to apply for Alabama Class AA certification. Effective September 1, 2018, the Alabama State Board for Education will require an acceptable score on the edTPA for initial certification in a teaching field. This state certification requirement applies to individuals completing alternative master's programs. Individuals seeking certification in states other than Alabama are responsible for contacting those state certification offices to obtain their application form and requirements. The State of Alabama signs the National Association of State Directors of Education and Certification (NASDTEC) Interstate Agreement which facilitates the applications of program graduates when they apply for certification in other states.

Doctor of Philosophy Degree Programs (PhD)

Applicants to PhD programs must satisfy the Graduate School's admission requirements. Departmental admission requirements include a competitive GRE score, current resume, statement of purpose, letters of recommendation, and approval by the department.

All doctoral programs require a minimum of 80 semester hours beyond the bachelor's degree. Research methods, statistics, and foundations of education courses are components of all doctoral programs. The remaining hours are divided between the area of specialization and approved support courses. Plans of study for students in secondary education fields must contain at least 30 semester hours of graduate courses in the appropriate teaching fields. After satisfactory completion of coursework and a general written and oral examination, the student advances to candidacy. Doctoral students must register for at least 10 semester hours of doctoral research while completing a dissertation. Doctoral students must enroll each semester during their program.

Graduate Certificates

The Department of Curriculum and Teaching offers graduate certificates in Teaching English as a Second Language (TESL)/Teaching English as a Foreign Language (TEFL), Community Music Education, and Reading Instruction. Departmental admission requirements for these graduate certification programs include a transcript showing the applicant's last degree completed, a current resume, and three letters of recommendation.

The Department in collaboration with the Department of Educational Foundations, Leadership and Technology also offers a graduate certificate in Adult Education and English Language Teaching. Applicants should contact the Department of Educational Foundations, Leadership and Technology for admission requirements for the Adult Education and English Language Teaching graduate certificate program.

Online Learning Graduate Programs and Courses

The Department of Curriculum and Teaching offers the majority of graduate programs through online learning as well as through residential study.

Additional Information

Detailed admission and program requirements for the department's multiple areas of graduate study are available on the Department of Curriculum and Teaching's website, Graduate Application and Admission.

Information about undergraduate programs for the Department of Curriculum and Teaching is available at: Curriculum and Teaching: Undergraduate (p. 471)

Agriscience Education — MEd (Alternative Certification, Online)

Code	Title	Hours
Alternative Class A Education Program Checklist		
Teaching Field: 12 hours		
Required 6 hours:		6
CTCT 7910	Practicum in Area of Specialization	
CTCT 7300 Integrating Technology in Career and Technical Education OR CTSE 7970 Principles of Technology		
Select 6 hours from the following:		6
CTCT 7100	Teaching Mechanical Technology	
CTCT 7120	Courses of Study in Agriscience Education	
CTCT 7300 Integrating Technology in Career and Technical Education OR CTSE 7970 Principles of Technology		
CTCT 7400	Agricultural Literacy Education	

CTCT 7900	Directed Studies	
CTCT 7960	Special Problems	
CTCT 7970	Special Topics in Area of Specialization	
Other advisor-approved courses 6000 level and above in the teaching field (i.e., AGEC, AGRI, ANSC, CSES, CTCT, CTSE, ENTM, FISH, FORY, FOWS, HORT, PLPA, POUL, RSOC)		
Professional Studies: 18-21 hours		**18**
CTCT 6050	Methods of Teaching in Area of Specialization	
CTCT 6060	Program Planning in Area of Specialization	
CTRD 6000	Language and Literacy in the Content Areas [1]	
RSED 6000	Advanced Survey of Exceptionality [1]	
CTCT 7920	Clinical Residency [2]	
Total Hours		**30**

[1] RSED 6000 must be completed if a survey of special education course was not completed prior to unconditional admission. If a survey of special education course was completed prior to unconditional admission, the state diversity course requirement is fulfilled with CTRD 6000 Language and Literacy and the 3-hour course requirement for RSED 6000 will be waived resulting in 18 hours in Professional Studies and 30 total program hours.

[2] Clearance for Clinical Residency includes completion of all other coursework. Exceptions require approval using the Student Petition Form.

In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.25 is required on all courses used to meet program requirements.

Coursework used to meet admission requirements cannot be used again to meet Alternative Class A program requirements.

All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

Undergraduate courses may be required by your advisory committee for your plan of study. This coursework is in addition to the total hours noted above and must be completed prior to Clinical Residency.

Total Hours		**30**

1 Required for graduate assistants teaching courses.

2 RSED 6000 Advanced Survey of Exceptionality must be used to fulfill requirement if survey of special education course was not completed for prior level certification. It may not be used to fulfill the requirement if a survey of special education course was completed for prior level certification. State-approved diversity courses for Auburn University are posted on the ALSDE website.

3 Required if not previously completed.

4 To ensure a field experience, CTCT 8910 is required for those seeking Class AA certification only; this requirement is in addition to any practicum credit counted for Class A certification. CTCT 8980 is required for those seeking the EdS degree.

5 Supporting courses must be applicable to the area of certification (e.g., research, assessment/evaluation, classroom management, pedagogy, human behavior/development, foundations, technology, teaching field).

In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.50 is required on all courses used to meet program requirements.

Coursework used to meet Class A certification requirements may not be used to meet requirements for Class AA certification.

All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

RSED 6000 Advanced Survey of Exceptionality OR state-approved diversity course [3]		
Additional Courses: 6 hours required		**6**
ERMA 7200	Basic Methods in Education Research [1]	
Other advisor-approved courses 6000 level and above [4]		
Total Hours		**30**

[1] Required if not previously completed.

[2] To ensure a field experience, CTEE 7910 is required for those seeking Class AA certification only; this requirement is in addition to any practicum credit counted for Class A certification. CTEE 8980 is required for those seeking the EdS degree.

[3] RSED 6000 Advanced Survey of Exceptionality must be used to fulfill requirement if survey of special education course was not completed for prior level certification. It may not be used to fulfill the requirement if a survey of special education course was completed for prior level certification. State-approved diversity courses for Auburn University are posted on the ALSDE website.

[4] Supporting courses must be applicable to the area of certification (e.g., research, assessment/evaluation, classroom management, pedagogy, human behavior/development, foundations, technology, teaching field).

In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.50 is required on all courses used to meet program requirements

Coursework used to meet Class A certification requirements may not be used to meet requirements for Class AA certification.

All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

English Language Arts Education — MEd (Alternative Certification)

Code	Title	Hours
Alternative Class A Education Program Checklist		
Teaching Field: 12 hours [1]		
At least 1/3 of the program shall be in teaching field courses.		
CTRD 6000	Language and Literacy in the Content Areas [2]	3
Select 9 hours		6
CTSE 6010	Selection and Use of Media for Youth [4]	
CTSE 6020	Rhetoric and Composition for Teachers [4]	
CTRD 6030	The Reading of Adolescents	
Other advisor-approved 6000-7000 level courses in English		
Professional Studies: 21 hours		
CTSE 7520	Curriculum and Teaching in Area of Specialization	3
CTSE 7530	Organization of Program in Area of Specialization	3
or CTSE 7510	Research Studies in Area of Specialization	
CTSE 7540	Evaluation of Program in Area of Specialization	3
RSED 6000	Advanced Survey of Exceptionality [2]	3
CTSE 6210	Teacher Inquiry Workshop: Problems and Possibilities [3]	1
CTSE 7920	Clinical Residency [3]	8
Total Hours		**30**

1 English Language Arts programs shall require at least one course in two areas within the broader field.

2 RSED 6000 must be completed if a survey of special education course was not completed prior to unconditional admission. If a survey of special education course was completed prior to unconditional admission, the state diversity course requirement is fulfilled with CTRD 6000 Language and Literacy and the 3-hour course requirement for RSED 6000 will be waived resulting in 18 hours in Professional Studies and 30 total program hours.

3 Clearance for Clinical Residency includes completion of all other coursework. Exceptions require approval using the Student Petition Form.
In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.25 is required on all courses used to meet program requirements.
Coursework used to meet admission requirements cannot be used again to meet Alternative Class A program requirements.
All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.
Undergraduate courses may be required by your advisory committee for your plan of study. This coursework is in addition to the total graduate program hours noted above and must be completed prior to Clinical Residency.

4 Required unless previously completed at the undergraduate level.

CTSE 7540 required if a graduate level course in evaluation in Science Education not previously completed.

3 To ensure a field experience, CTSE 7910 is required for those seeking Class AA certification only; this requirement is in addition to any practicum credit counted for Class A certification. CTSE 8980 is required for those seeking the EdS degree.

4 Supporting courses may not exceed 6 hours and must be applicable to the area of certification (e.g., research, assessment/evaluation, classroom management, pedagogy, human behavior/development, foundations, technology, teaching field).
In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.50 is required on all courses used to meet program requirements.
Coursework used to meet Class A certification requirements may not be used to meet requirements for Class AA certification.
All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

Does not lead to K–12 teacher certification.

CyberSecurity Management — Graduate Certificate

Students would take the following 3 courses. The focus of this coursework is to develop managerial competencies in addressing cyber security issues within a firm. This is a non-technical degree.

Code	Title	Hours
ISMN 6730	Security and Information Assurance	3
ISMN 6740	Information Risk Analysis	3
ISMN 6750	Information Technology Auditing	3

Development Practice — MDP

With a focus on hunger, poverty, global market changes, humanitarian aid, social policy, and more, Auburn University’s MDP is the first of its kind to bring a human science and quality of life perspective to the field. Do you want to make an impact? Earning a Master of Development Practice means you will. Auburn’s MDP program will train you to think differently to create sustainable solutions to the major issues of our world. You’ll take engaging classes such as program design and social policy that will provide a practical and holistic approach to developing strategies with a global perspective.

Earth System Science — Interdisciplinary PhD Program

The formal requirements for the PhD degree are the same as outlined in graduate school web page: http://bulletin.auburn.edu/thegraduateschool/doctoraldegrees/. This PhD program, due to its interdisciplinary nature, has specific course requirements as below:

Course Requirements: The interdisciplinary PhD degree, without previous graduate course work, requires successful completion of a minimum of 60 semester credit hours at the graduate level (6000-8000 level). The total 60 hours must include: 1) 7 hours of required core courses across earth system science disciplines, 2) a minimum of 10 hours of dissertation credit, and 3) additional elective course work to develop an academic focus with the approval of the faculty adviser and dissertation committee. The maximum number of directed-study credits that may be applied toward the degree is six (6) units. The total number of credit hours of previous graduate course or thesis work may be transferred toward the PhD degree must be less than 50 percent of the credit hours listed on the Plan of Study. A maximum of four hours of Master thesis credit may be transferred and counted toward PhD course requirement. Required core courses (7 hours) include:

1. Earth System Science and Global Change (3 hours)
2. Earth System Observation and Analysis (3 hours)
3. Earth System Science Seminar (1 hour)

The Interdisciplinary PhD Program in Earth System Science (ESS)

The interdisciplinary graduate PhD degree program in Earth System Science is based on the integration of scientific disciplines from five participating colleges and 10 academic departments at Auburn University, providing for a curriculum of unusual richness and breadth. The earth system science involves the linkage of the physical, chemical, and biological, and social sciences to understanding the interactions of Earth-system processes and humans. Our program offers an effective way to train the next-generation professionals in the areas of Earth and Environmental Sciences.

Affiliated Colleges and Programs

Research Opportunities and Laboratory Facilities

Students will be engaged in all aspects of research and mentored by strong cross-disciplinary faculty group, including faculty hires from the CHESS (http://wp.auburn.edu/cgc/) (Climate, Human, and Earth System Science) cluster initiatives. Students can choose among various areas of academic specialization (e.g., climate and earth systems, geological sciences and energy, environmental biogeochemistry, water resources and hydrology, coastal processes, ecosystem and food security, coupled natural and human systems, geospatial sciences, big data science, etc.). Laboratory and coursework provide students with a multidisciplinary background that will enable them to conduct state-of-the art research in earth system science. Auburn's state-of-the-art analytical and computational facilities and labs are available to all students in the PhD program.

Economic Development — Graduate Certificate

The Graduate Certificate in Economic Development provides a specialization in the theories and practice of economic development, primarily within the U.S and Alabama. It is an interdisciplinary graduate certificate offered by the faculty of participating departments (Public Administration, Community Planning, and Agricultural Economics and Rural Sociology) and is administered by the Master of Public Administration program.

Students may pursue the Graduate Certificate in Economic Development as a degree-seeking or non-degree seeking student. To earn the graduate minor, students must complete the program's basic course, Economic Development and Competition (POLI 7700/7706), three elective courses selected from an approved list, and a one-week non-credit intensive economic development training course sponsored by the Government and Economic Development Institute (GEDI). The Auburn Intensive Economic Development Course is accredited by the International Economic Development Council (IEDC). Since its inception, this program has produced 1,300 alumni, 70% of whom have had jobs in community economic development. GEDI will be an active partner with the MPA program, linking the program to its extensive network of economic development practitioners throughout Alabama.

Code	Title	Hours

Economics — MS

The Department of Economics offers the Master of Science in Economics and a PhD track that is described elsewhere. The MS is an academic degree preparing students for careers in business, government, and academia.

More information about the MS in economics is available at https://cla.auburn.edu/economics/.

Admission Requirements for the MS in Economics

Applicants for the MS in economics must have a bachelor's degree or its equivalent from an accredited college or university. A minimum of 18 semester hours of economics and the completion of a calculus sequence are also needed to enter the program. The General Test of the GRE is required. A minimum score of 153 (or 500 on the old GRE scale) on the Verbal GRE portion and a minimum score of 148 (or 600 on the old GRE scale) on the Quantitative GRE portion are required. The graduate committee will evaluate applicants based on their undergraduate records, GRE scores, and letters of recommendation.

Applicants should ensure that the following materials are submitted to the Graduate School web application (https://graduate.auburn.edu/):

- Official scores from the General Test of the GRE
- Official transcripts from every undergraduate institution attended
- Official TOEFL scores for international students

They should ensure that the following materials are submitted to the graduate program officer in the Department of Economics:

- Three letters of recommendation
- Statement of purpose

For applicants to be given full consideration for financial support, a completed application and supporting documents should be received by March 1. Admission and funding decisions will begin shortly thereafter. Later applications will be considered, but decisions will be contingent upon availability.

Graduation Requirements

Students must complete a total of 30 credit hours of course work, including required courses and electives, and comprehensive examinations. No thesis is required for the MS.

Required Core Courses

Masters students are required to complete the following nine core courses. Transferring credit hours from other peer institutions is allowed only in exceptional cases.

First Year			
Fall	**Hours**	**Spring**	**Hours**
ECON 7110 Microeconomics I	3	ECON 7120 Microeconomics II	3
ECON 7130 Mathematical Economics	3	ECON 7210 Macroeconomics I	3
ECON 7310 Econometrics I	3	ECON 7320 Econometrics II	3
Second Year			
Fall	**Hours**		
ECON 7220 Macroeconomics II	3		
ECON 7330 Microeconometrics	3		
ECON 7340 Macroeconometrics	3		

Electives

Students must take 3 hours of electives at the 6000-level or above in consultation with the Director of Graduate Studies. The core curriculum and the electives combine for a minimum of 30 total semester hours.

Comprehensive Examinations

Students must achieve satisfactory (MS level pass) on 3 comprehensive examinations in microeconomics, macroeconomics, and econometrics. Only one retake is permitted on each exam. Please note that there is no thesis required.

Financial Aid

Financial aid, usually in the form of graduate teaching assistantships is available on a competitive basis for PhD students in good academic standing. Funding normally consists of a tuition waiver and monthly stipend.

Applied Economics (Forestry) — PhD

PhD in Applied Economics is administered jointly by the Department of Economics, the Department of Agricultural Economics and Rural Sociology, and the College of Forestry, Wildlife and Environment (CFWE). Forestry students in this program will take core courses in microeconomics, macroeconomics, and econometrics in the Department of Economics and pass written preliminary exams given there. An additional oral examination is required in the CFWE for admission to candidacy. The minimum number of hours in this doctoral program is 60 semester hours earned through instruction beyond the bachelor's degree, including 1) a minimum of 30 semester hours graded (e.g. A, B) graduate course work (7000-level and above); and 2) a minimum of 30 semester hours of additional graduate course work (6000-level and above) that may include ungraded courses, 7990 and 8990 and must include at least 10 hours of 8990. As with all other PhD students in the CFWE, students are required to take Research Methods (FORY 7510) and Seminar (FOWS 7950). Dissertation work under this degree program generally involves in-depth economic analysis of a forestry/natural resources/environment issue or problem.

Code	Title	Hours
Applied Economics Forestry (PhD)		
FORY 7510	Research Methods	2
FOWS 7950	Graduate Seminar	1
FORY 8990	Research and Dissertation	10
Select 37 Credits in @ 6000-8999 (Electives)		37
Select 10 Credits in FORY 6000-8999		10
Total Hours		**60**

Applied Economics (Liberal Arts) — PhD

The PhD in Applied Economics is offered jointly by the Department of Economics, the Department of Agricultural Economics and Rural Sociology, and the College of Forestry, Wildlife and Environment. The PhD track described below is offered in the Department of Economics, which also offers an MS in Economics described elsewhere.

More information about the PhD track offered in the Department of Economics is available at http://www.cla.auburn.edu/economics/.

Admission Requirements

Applicants for the PhD track in Applied Economics offered through the Department of Economics must have a bachelor's degree or its equivalent from an accredited college or university. A minimum of 18 semester hours of economics and the completion of a calculus sequence are also needed to enter the program. The General Test of the GRE is required. A minimum score of 153 (or 500 on the old GRE scale) on the Verbal GRE portion and a minimum score of 148 (or 600 on the old GRE scale) on the Quantitative GRE portion are required. The graduate committee will evaluate applicants based on their undergraduate records, GRE scores, and letters of recommendation.

Applicants should ensure that the following materials are submitted to the Graduate School web application at https://graduate.auburn.edu/:

- Official scores from the General Test of the GRE
- Official transcripts from every undergraduate institution attended
- Official TOEFL scores for international students

They should ensure that the following materials are submitted to the graduate program officer in the Department of Economics:

- Three letters of recommendation
- Statement of purpose

For applicants to be given full consideration for financial support, a completed application and supporting documents should be received by March 1. Admission and funding decisions will begin shortly thereafter. Later applications will be considered, but decisions will be contingent upon availability.

Graduation Requirements

Students must complete a minimum of 60 semester hours of course work at the 7000-level or above. Any course work outside of the Department of Economics must be approved by the director of graduate studies. As part of their 60 credit hours, students complete the required courses listed below. They must also pass comprehensive exams in three areas and complete course work in two advanced fields. Finally, students must write and successfully defend a dissertation.

Core Curriculum

First Year			
Fall	**Hours**	**Spring**	**Hours**
ECON 7110 Microeconomics I	3	ECON 7120 Microeconomics II	3
ECON 7130 Mathematical Economics	3	ECON 7210 Macroeconomics I	3
ECON 7310 Econometrics I	3	ECON 7320 Econometrics II	3
Second Year			
Fall	**Hours**		
ECON 7220 Macroeconomics II	3		
ECON 7330 Microeconometrics	3		
ECON 7340 Macroeconometrics	3		

Program Requirements

Code	Title	Hours
ECON 7110	Microeconomics I	3
ECON 7120	Microeconomics II	3
ECON 7130	Mathematical Economics	3
ECON 7210	Macroeconomics I	3
ECON 7220	Macroeconomics II	3
ECON 7310	Econometrics I	3
ECON 7320	Econometrics II	3
ECON 7330	Microeconometrics	3
ECON 7340	Macroeconometrics	3
ECON Elective at 8000 level		12
ECON 8990	Research and Dissertation	10
ECON 7000 or higher level		11
Total Hours		**60**

Comprehensive Examination

Students must achieve satisfactory performance (Ph.D. level pass) on three comprehensive (preliminary) examinations in microeconomics, macroeconomics, and econometrics. Only one retake is permitted on each exam. Students are graded separately on each exam. All students enrolled in the Ph.D. program MUST pass all three preliminary examinations by the end of the second December after their initial three semesters in the program.

Completion of Two Advanced Fields

Students must complete the coursework and pass a written examination in two advanced fields. Field coursework consists of a minimum two course sequence and must be approved in advance by the director of graduate studies.

Candidacy

Students will be admitted to candidacy after completing two advanced fields, forming a dissertation committee, and successfully passing a general oral examination (dissertation proposal). The oral examination is normally taken during the third year and requires approval by the Graduate School at least one week prior. Upon successful completion of the proposal, the student becomes a candidate for the Ph.D. degree and has four calendar years to complete remaining requirements.

Dissertation and Oral Defense

Students must write a dissertation and pass an oral defense. Students must register for at least 10 semester hours of dissertation research (ECON 8990).

Financial Aid

Financial aid, usually in the form of graduate teaching assistantships, is available on a competitive basis for PhD students in good academic standing. Funding normally consists of a tuition waiver and monthly stipend.

Ecosystems Engineering — Graduate Certificate

The Graduate Certificate in Ecosystems Engineering provides a specialization in the application of ecological and biological principles to solve complex engineering problems in natural and man-made systems. Because of this, the program is inter-disciplinary in nature.

This graduate certificate program is designed for individuals holding baccalaureate degrees in engineering or appropriate science fields with an interest in ecological and natural system problem solving. Students can complete the certificate program in one academic year (fall and spring semesters) by passing four of the courses listed below (total of 12 credit hours), and attending (in-person) all required one-week labs for each course.

The mission of the Department of Biosystems Engineering is to develop and disseminate engineering knowledge to solve problems in agriculture, food, forestry, bioenergy and bioproducts, natural resources, and the environment. This mission is crucial to the overall mandate of Auburn University (the 1862 land-grant university for Alabama) that includes service to the citizens of the state of Alabama through instruction, research and outreach programs and preparing Alabamians to respond successfully to the challenges of a global economy. Increases in water needs and food supplies because of the projected world population of over 9 billion by 2050 will occur at the expense of forest, grassland and aquatic ecosystems. The biosystems engineering department has a 100 year history of developing engineering-based sustainable solutions to address ecosystems engineering issues such as engineering for watershed protection, improvement of water quality by managing and modeling non-point source pollution, design of biological waste treatment and reuse systems, practices for sustainable land development and restoration, etc., all of which are based on a combined knowledge of engineering and biological and ecological principles. Graduates from this program will be competent in restoring ecosystems that have been substantially disturbed by anthropogenic activities, and also be able to develop new sustainable ecosystems that have human and ecological value.

Educational Foundations, Leadership and Technology — Graduate Certificates, MEd, MS, EdS, PhD, Minor

Degree Programs

- Administration of Elementary and Secondary Education — MEd, PhD (p. 1643)
- Administration of Higher Education — MEd, PhD (p. 1645)
- Administration of Supervision and Curriculum — MEd, PhD, EdS (p. 1647)
- Adult Education — MS, MEd, PhD, EdS (p. 1648)
- Educational Psychology — PhD (p. 1651)
- Educational Research, Measurement, and Evaluation — MS (p. 1651)

Graduate Certificates

- College/University Teaching (p. 1649)
- Educational Leadership (p. 1650)
- Extension Educator (p. 1650)
- Instructional Leadership (p. 1652)
- Instructional Technology for Distance Education (p. 1652)
- Program Evaluation (p. 1653)
- Technology Educator (p. 1653)
- Workforce Education, Training, and Development (p. 1654)

Minors

- Critical Studies in Education (p. 1650)
- Psychology of Learning (p. 1800)
- Sport Management (p. 1699)

The Department of Educational Foundations, Leadership and Technology offers degree programs, graduate certificates, and minors. Degree programs lead to a Master's of Education (non-thesis option), Master's of Science (thesis option), Education Specialist, or Doctor of Philosophy. Graduate degrees are available in the areas of administration of elementary and secondary education; administration of higher education; administration of supervision and curriculum; adult education; educational research, measurement, and evaluation; and educational psychology. The graduate certification program in administration of elementary and secondary education (instructional leadership) is approved by the Alabama State Board of Education (ALSBE). The College of Education is accredited by the Council for the Accreditation of Education Preparation (CAEP).

Applicants to the department's graduate programs must satisfy the Graduate School's admission requirements. Departmental admission requirements include a degree from an accredited college or university, a GPA of at least a 2.75 on undergraduate coursework, a statement of intent, three recommendations, and any remaining admission requirements as identified by the program or department.

Master's Degree Programs (MEd/MS)

Master's degree programs are offered in administration of elementary and secondary education; administration of higher education; administration of supervision and curriculum; adult education; and educational research, measurement, and evaluation. All programs require a minimum of 30 semester hours, an internship and/or practicum, and a comprehensive examination.

The M.Ed. in administration of elementary and secondary education leads to Alabama Class A certification. Admission requirements established by the Alabama State Board of Education, including those pertaining to a clear background check, prior certification, and teaching experience, must be satisfied prior to admission to this program. Degree requirements are in compliance with State regulations. Graduation requirements include a passing score on the appropriate Praxis II subject assessment.

In accordance with State regulations, a minimum GPA of 3.25 is required on all courses used to meet master's-level certification program requirements.

Specialist in Education Degree Programs (EdS)

Degree requirements are in compliance with State regulations. Graduation requirements include a passing score on the appropriate Praxis II subject assessment. The Ed.S. program in administration of elementary and secondary education leads to Alabama Class AA certification. Admission requirements established by the Alabama State Board of Education, including those pertaining to a clear background check, prior certification, and teaching experience, must be satisfied prior to admission to one of these programs. Degree requirements are in compliance with State regulations.

In accordance with State regulations, a minimum GPA of 3.50 is required on all courses used to meet specialist-level certification program requirements.

Master's and Specialist-Level Certification

Individuals completing State-approved Master's-level certification programs are eligible to apply for Alabama Class A certification; individuals completing State-approved specialist-level certification programs are eligible to apply for Alabama Class AA certification.

Individuals seeking certification in states other than Alabama are responsible for contacting those state certification offices to obtain their application form and requirements. The State of Alabama signs the National Association of State Directors of Education and Certification (NASDTEC) Interstate Agreement which facilitates the applications of program graduates when they apply for certification in other states. *Note: Some state may not accept Instructional Leadership certificates from other states. Students should check with the state in which they are seeking certification to determine if pursuing an approved program at Auburn will result in reciprocity for instructional leadership*.

Doctor of Philosophy Degree Programs (PhD)

PhD programs require a minimum of 60 semester hours beyond the bachelor's degree. Research methods, statistics, and foundations of education are components of all doctoral programs. The department offers a doctorate in the areas of administration of elementary and secondary education, administration of higher education, administration of supervision and curriculum, adult education, and educational psychology. After satisfactory completion of coursework and a general written and oral examination, the student advances to candidacy. Doctoral students must register for at least 10 hours of dissertation credit while completing a dissertation.

Minor and Graduate Certificates

The Department of Educational Foundations, Leadership and Technology offers graduate minors in psychology of learning, sport management and critical studies in education. Graduate certificates are offered in adult education, college/university teaching, educational leadership, extension educator, instructional leadership, technology educator, instructional technology for distance education, program evaluation, and workforce education, training, and development. In addition, the department in collaboration with the Department of Curriculum and Teaching offers a graduate certificate in adult education and English language teaching.

Additional Information

Detailed admission and program requirements for the department's multiple areas of graduate study are available on the College of Education's website, Academics (https://education.auburn.edu/academic-programs/). The University schedule of courses is available on the Auburn University website.

EDLD 7580	Supervision and Personnel Issues in Education	3
Survey of Special Education / Diversity Course 1		
Internship: 3 hours		
EDLD 7930	Administrative Internship/Residency	3
Total Hours		**30**

1 EDLD 7210 Multiprofessional Leadership for Equity fulfills the state diversity course requirement. However, if a survey of special education course was not completed for prior level certification, RSED 6000 Advanced Survey of Exceptionality (3 hours) must be completed resulting in 36 total program hours.

* In addition to the Graduate School requirement of a cumulative 3.0 GPA on all AU courses carrying graduate credit, a minimum cumulative GPA of 3.25 is required on all courses used to meet program requirements.
An applicant for certification in instructional Leadership who holds Class A certification in another teaching field or area of instructional support must take all courses indicated above that were not required for certification in another program at the Class A level.
Individuals must be unconditionally admitted to the Class A Instructional Leadership program before enrolling in any instructional leadership courses in the program.
Coursework used to meet Class B certification requirements may not be used to meet requirements for Class A certification.
All substitutions for required courses must be approved using the Course Substitution Form, including transfer work.

Critical Studies in Education

The purpose of the critical studies minor is to provide students in this program with opportunities to explore and apply critical theories as they relate to schooling, teaching and learning, and educational research. This critical analysis of education is centered on understanding cultural, institutional, and structural dynamics that create and perpetuate injustice, inequity, and oppression in education and schooling. Students will enact educational praxis that opens, and develops, and sustains critical consciousness around inequity, injustice, and oppression and supports those becoming critically conscious.

Code	Title	Hours
For this minor, students will complete 3 graduate credit hours from the following:		3
FOUN 7000	Cultural Foundations of Education	
FOUN 7010	History of American Education	
FOUN 7020	Social and Cultural Diversity in American Education	
FOUN 7030	Philosophy and Education	
FOUN 7040	Philosophy and Educational Research	
FOUN 7050	Global Perspectives on Education	
FOUN 8010	Global Perspectives on Education	
Students will complete 9 hours of coordinator-approved elective credits. A list of approved elective courses is available from the program coordinator each semester before registration begins.		9
Total Hours		**12**

Educational Research, Measurement, and Evaluation — MS

The program will provide diversified research methods, measurement, and evaluation education for those seeking research and evaluation positions in K-12 school systems, institutional research offices at colleges and universities, and as survey researchers and program evaluators. The overarching outcome of the Master of Science (M.S.) degree program in Educational Research Measurement and Evaluation will be for students to develop foundational competencies necessary to engage in applied research and evaluation in educational and community organizations. The program is focused on developing professionals, equipped with skills in research and evaluation methods that can be applied to school and community settings.

The non-thesis Masters' program will require the completion of 36 credit hours.

Code	Title	Hours
Eighteen (18) of these credit hours will consist of required coursework in quantitative and qualitative research methods, survey research methods, and program evaluation. These courses are:		18
ERMA 7200	Basic Methods in Education Research	
ERMA 7210	Theory and Methodology of Qualitative Research	

ERMA 7300	Design and Analysis in Education I	
ERMA 8100	Program Evaluation	
ERMA 8200	Survey Research Methods	
ERMA 7910	Practicum in Educational Research, Measurement, and Evaluation	
Nine (9) credit hours will be completed in advanced research methods and analysis as approved by the advisor. These nine credits hours will be taken from the following list of existing courses:		9
ERMA 7100	Advanced Study of Educational Measurement and Evaluation	
ERMA 7220	Applied Qualitative Research	
ERMA 7230	Writing as Inquiry in Qualitative Research	
ERMA 7240	Thinking with Theory in Qualitative Research	
ERMA 7310	Design and Analysis in Education II	
ERMA 7400	Mixed Methods Research	
ERMA 7410	Research Methods for Social Justice and Equity	
ERMA 8120	Teacher Evaluation	
ERMA 8210	Prep Research for Publication	
ERMA 8320	Design and Analysis in Education III	
ERMA 8330	Non-Parametric Data Analysis in Education Research	
ERMA 8340	A Practical Introduction to Structural Equation Modeling	
ERMA 8350	Advanced Measurement Theory	
Nine (9) credit hours will be completed in an applied area as approved by the advisor, such as higher education, institutional research, educational psychology, educational leadership and administration, instructional technology, or intensive research methods.		9
Total Hours		**36**

Instructional Leadership — Graduate Certificate

This graduate certificate academically prepares individuals that are interested in becoming an instructional leader or administrator in a K-12 school setting and requires an Alabama Class A certificate in a teaching field.

Code	Title	Hours
Instructional Leadership - GCRT		
EDLD 7210	Multiprofessional Leadership for Equity [1]	3
EDLD 7200	Supervision and Personnel Management	3

Electrical Engineering — MS, PhD

Degree Programs

- Electrical Engineering — MS (p. 1655)
- Electrical Engineering — PhD (p. 1655)

Electrical and Computer Engineering (ECE) offers graduate programs of instruction and research leading to master and doctoral degrees. Instruction is offered and research facilities are available to support graduate study in control systems & robotics, digital signal processing and communications, wireless engineering, electromagnetics modeling and analysis, microelectronics & microelectromechanical systems (MEMS), magnetic resonance imaging (MRI), power systems, digital systems, and computer engineering. Additionally, individualized programs that cross the traditional boundaries of engineering, mathematics and the sciences can be accommodated.

For admission at the master's level, the applicant must hold a bachelor's degree or its equivalent from an institution of recognized standing. Master's degree programs are available to graduates of engineering curricula and, in cases of exceptional academic credentials, to graduates of mathematics and science curricula.

An applicant for admission to the PhD program should hold a master's degree, or have taken a minimum of one academic year of graduate study, from an institution of recognized standing in an area of study related to the proposed doctoral work. An applicant who holds a bachelor's degree in electrical or computer engineering and has exceptional academic credentials may apply for direct admission to the PhD program.

All applicants must submit Graduate Record Examination scores for the General Test, three recommendation letters, a statement of purpose, and a resume. International applicants must also submit scores for either the TOEFL or IELTS exam.

Applications for admission are reviewed by the departmental graduate faculty. Decisions are based upon the applicant's potential for success in advanced-level study as indicated by letters of reference, GRE scores and previous academic achievement.

The MS (thesis option) program requires a minimum of 30 semester hours of work, including 4 to 6 semester hours of research and thesis. MS (thesis option) students must pass an oral examination on the thesis. The MS (non-thesis option) program requires 33 semester hours of coursework, including at least 18 semester hours of ECE courses. Both masters programs must include courses in at least three of the major research areas in ECE and no more than 3 semester hours of independent study.

Students admitted to the doctoral program will take a written qualifying examination soon after entering, covering fundamental undergraduate material in ECE. Additional examinations are given throughout the program. The program generally consists of a minimum of 60 semester hours of course work beyond the bachelor's level, including at least 10 hours of research and dissertation. A minor of at least 9 semester hours in a closely related field outside of the major area of study, either within or outside of ECE, is required.

Electrical Engineering — MS

The following are the requirements for the thesis options (on-campus and distance). Note: Courses in the major area are determined by the advisor.

English — Graduate Certificate, MA, MTPC, PhD

Degree Programs

- English — MA
- English — PhD (p. 1659)
- Technical and Professional Communication — MTPC (p. 1659)

Graduate Certificates

- Technical Communication (p. 1659)

The Department of English offers programs leading to the Master of Arts (MA), the Master of Technical and Professional Communication (MTPC), and the PhD. These graduate programs prepare students for careers in teaching and research, writing, editing, business, and other professions seeking broadly educated individuals skilled in analysis and communication. In addition, individuals holding a teaching certificate may, with an additional graduate course in Communication, earn Alabama Class A or AA certification under a state-approved Strengthened Subject Matter Option program in English/Language Arts. The Department of English also offers the Graduate Certificate in Technical Communication (GCTC).

- More information about the MA in English is available at https://www.cla.auburn.edu/english/programs/graduate-degrees/master-of-arts-in-english/.
- More information about the MTPC is available at https://cla.auburn.edu/english/programs/graduate-degrees/master-of-technical-and-professional-communication/.
- More information about the PhD in English is available at https://www.cla.auburn.edu/english/programs/graduate-degrees/phd-in-english/.
- More information about the Graduate Certificate in Technical Communication is available at https://cla.auburn.edu/english/programs/graduate-degrees/graduate-certificate-in-technical-communication/.

Master of Arts

Admission Requirements

For admission to the MA program, the student must normally have a bachelor's degree from an accredited institution with the equivalent of 24 semester hours of credit in upper-division English courses and satisfactory scores on the General Test of the GRE. Applicants lacking the required undergraduate courses must typically make up these deficiencies before they can be admitted to the degree program.

Applicants should ensure that the following materials are submitted to the Graduate School web application:

- Official transcripts from every undergraduate institution attended
- Official scores from the General Test of the GRE

They should submit the following to the Department of English:

- Writing sample
- Statement of purpose
- Three confidential letters of recommendation that speak to the applicant's potential for successful graduate study

Application materials are due by January 15.

Options and Course Requirements

For the MA, students may select one of the following three tracks: literature, composition and rhetoric, or creative writing. Each track requires a minimum of 30 credit hours of coursework.

The literature track requires the following:

- Three major area courses (one pre-1800 literature, one post-1800 literature, one literary theory)
- One comparative literature, genre, or author-based course
- One technology and culture, globalism, sustainability, or diversity course
- One course in technical and professional communication, rhetoric and composition, linguistics, or creative writing
- Two elective courses in English
- ENGL 7940 Teaching College English
- Two courses in a coordinated minor, chosen from courses in English or another discipline relevant to the student's professional and academic goals

The creative writing track requires the following:

- Three major area courses (ENGL 7130 Fiction Writing and ENGL 7140 Poetry Writing, with one repeated for a total of three creative writing courses)
- One pre-1800 literature course
- One technical and professional communication, rhetoric and composition, or linguistics course
- One technology and culture, globalism, sustainability, or diversity course
- Two courses in a coordinated minor, chosen from courses in English or another discipline relevant to the student's professional and academic goals
- Two elective courses in English
- ENGL 7940 Teaching College English

The composition and rhetoric track requires the following:

- Three major area courses (ENGL 7040 Engl Compn issues And App , ENGL 7050 Studies In Composition, and ENGL 7300 Rhetoric: Theory And Practice)
- One course in technical and professional communication or linguistics
- One literature or creative writing course
- One technology and culture, globalism, sustainability, or diversity course
- Two courses in a coordinated minor, chosen from courses in English or another discipline relevant to the student's professional and academic goals
- Two elective courses in English
- ENGL 7940 Teaching College English

Other Graduation Requirements

In addition to completing the required course work, students must successfully complete a portfolio and pass an oral examination based on the portfolio. They also must demonstrate reading knowledge of one foreign language.

Master of Technical and Professional Communication

Admission Requirements

For admission to the MTPC program, students must have a bachelor's degree from an accredited institution, satisfactory scores on the General Test of the GRE, and excellent writing skills. Undergraduate course work in English is not required.

Applicants should ensure that the following materials are submitted to the Graduate School web application:

- Official transcripts from every undergraduate institution attended, including high school transcripts in the case of AP classes
- Official scores from the General Test of the GRE

They should submit the following to the Department of English:

- A sample of professional or scholarly writing (e.g., a technical manual, a business report, a research essay)
- A statement of purpose explaining their interest in the program
- Three letters of recommendation. At least two of the letters should come from professors or instructors; the other letter may come from an academic adviser, an employer, or some other person who can speak to their potential for success in the MTPC program.

Application materials should be received by January 15.

Course Requirements

- Four required courses (ENGL 7000 Tech and Professional Editing, ENGL 7010 T Pc Issues And Approaches, ENGL 7060 Web Development, ENGL 7080 Document Design
- Three elective courses in English approved by the student's advisory committee
- Three courses in a coordinated minor or three additional courses in English approved by the student's advisory committee
- ENGL 7940 Teaching College English

Other Graduation Requirements

Students must compile a portfolio of work accepted by the student’s advisory committee, make a formal presentation about the portfolio, and pass an oral examination.

Doctor of Philosophy

Admission Requirements

For admission to the PhD program, the student must normally have a master’s degree in English and satisfactory scores on the General Test of the GRE.

Applicants should ensure that the following materials are submitted to the Graduate School web application:

- Official transcripts from every undergraduate and graduate institution attended
- Official scores from the General Test of the GRE

They should submit the following to the Department of English:

- Writing sample
- Statement of purpose
- Three confidential letters of recommendation that speak to the applicant’s potential for successful graduate study

Concentrations and Course Requirements

The PhD requires a minimum of 60 credit hours beyond the BA, including 10 hours of dissertation credit. Students entering our program with an MA in English from Auburn or from another institution transfer in their course work; in consultation with their graduate advisory committee, students then select additional courses. Students may choose to pursue either a concentration in literature or a concentration in composition and rhetoric.

Other Graduation Requirements

After completing course work, students must take general doctoral examinations, both written and oral, over three related areas. These areas might include a literary period, a genre, an issue in composition or rhetorical studies, language and linguistics, or literary and cultural theory. After passing these examinations, students advance to doctoral candidacy. Within three months after advancing to doctoral candidacy, students must submit an approved dissertation prospectus to the director of graduate studies. Students must write and defend a dissertation.

Doctoral students must demonstrate a reading knowledge of two foreign languages or advanced proficiency in one foreign language.

Graduate Certificate in Technical Communication

Admission Requirements

For admission to the Graduate Certificate in Technical Communication, students must have a bachelor’s degree from an accredited institution and excellent writing skills.

Applicants should ensure that the following materials are submitted to the Graduate School web application:

- Official transcripts from every undergraduate institution attended

They should submit the following to the Department of English:

- A sample of professional or scholarly writing (e.g., a technical manual, a business report, a research essay)
- A statement of purpose explaining their interest in the program
- Three letters of recommendation from professors, academic advisers, employers, or others who can speak to their potential for success in the GCTC program

Financial Aid

The department offers financial aid in two forms: fellowships and assistantships. Graduate teaching assistantships or graduate assistantships are often available for the most qualified students, except those enrolled in the GCTC. Assistantships are renewable, provided that students perform satisfactorily and make adequate progress toward the degree. A few outstanding applicants also receive first-year or second-year fellowships. Review of applications for financial aid will begin on January 15 for the MA, PhD, and MTPC.

Entomology — MS, MAg, PhD

Degree Programs

- Entomology — MS (p. 1660)
- Entomology — MAg (p. 1660)
- Entomology — PhD (p. 1661)

The Department of Entomology and Plant Pathology offers three entomology-themed graduate degrees: a Master of Science (MS), a Master of Agriculture (MAg), and a Doctor of Philosophy (PhD). The graduate program emphasizes basic and applied aspects of the science of Entomology, and prepares students for careers in teaching, research and extension, in academic, government, private, and industry settings. The MS degree provides fundamental knowledge of Entomology and introduces students to independent research through a thesis project. The MAg provides that same level of instruction but without a research focus. The PhD builds on the MS or other similar experiences by expanding upon the student's fundamental knowledge. It also fosters a student's ability to conduct original research at the frontiers of entomology through dissertation research.

Admission to the program is based on a combination of a candidate's GPA (usually 3.0 or higher), letter of intent, and Graduate Record Examination (GRE) scores. TOEFL scores are required from international students. TOEFL exemptions are made on a case-by-case basis, depending on your official government language and medium of instruction. Applicants who have received a degree from an accredited U.S. institution may also be considered for this exemption. For a major in entomology at the MS level, the student should have an appropriate degree from a recognized institution with some pre-requisite training in plant sciences, biology, zoology, botany, and chemistry. Qualified students lacking an introductory entomology course may be admitted but will be required by the student's advisory committee to make up this deficiency.

Master's degrees are primarily sought by students holding baccalaureate degrees in agriculture or the biological sciences.

The Master of Science (MS) program in entomology is available to qualified individuals who wish to pursue a master's level program that requires a thesis. Importance is placed on both classroom and research training. The MS requires a minimum of 30 graduate level credit hours (6000 and above).

Code	Title	Hours
MS		
ENTM 6220	Insect Ecology	4
ENTM 6300	Insect Diversity	4
ENTM 7200	Insect Physiology	4
ENTM 7950	Seminar	1
ENTM 7990	Research and Thesis	6
Graduate-level statistics		3
Select 8 Credits in @ 6000-9999 (Elective)		8
Total Hours		**30**

A minimum of 21 graduate level credit hours must be taken in entomology, and 9 credit hours in subjects determined by the committee. The MS student will conduct research and prepare a thesis. After completion of the thesis, the student must successfully defend their thesis work during a final oral examination.

The Master of Agriculture (MAg) program with a specialization in entomology is available to qualified applicants who wish to pursue a master's level program that does not require a thesis. This degree carries the same entrance requirements as the MS, and requires a minimum of 32 graduate level credit hours (6000 and above), 21 of which must be in entomology, including:

Code	Title	Hours
MAg

ENTM 6300	Insect Diversity	4
ENTM 6920	Internship (strongly recommended)	3

ENTM 7200	Insect Physiology	4
Select 17 Credits in @ 6000-9999 [1]		17
Course in Statistics (strongly recommended)		
Total Hours		**32**

[1]The remaining graduate level courses can be taken from a variety of subject areas determined in consultation with the student's advisory committee. A comprehensive examination is required after all courses are completed.

The Doctor of Philosophy (PhD) program in entomology requires 60 graduate level credit hours of course work. Of the 60 semester hours, 30 must be graded graduate courses (6000 and above) while registered in the PhD program. Thirty hours may be transferred in from a previous graduate degree pending approval of the graduate advisory committee. PhD students must complete all courses in the core curriculum. In addition, PhD students should complete a minimum of eight credits that must be from ENTM classes.

Code	Title	Hours
PhD

Finance — MS, PhD

Degree Programs

- Finance (Thesis, Non-Thesis, On-Campus, and Online Options) — MS (p. 1663)
- Business (Finance Concentration) — PhD (p. 1663)

The MS program offers specialized training to graduate students desiring a more intense background in the field relative to the general preparation provided by an MBA. The objective of the program is to prepare students for careers in their chosen profession or for further graduate work. The program has a thesis and non-thesis option (the non-thesis option requires additional course work). The program of study is determined by the student and the student's advisory committee based on the student's background and areas of interest. The program also offers a joint program leading to both the MS Finance and MBA degrees.

The MBA/MS Finance is a 54-hour program administered jointly by the Finance faculty and the MBA program. The program saves the student fifteen hours of coursework over completing both degrees separately. For the MBA, students without two years full time work experience are required to do an additional 3-credit hour internship. Students must apply separately to each program (MS Finance and MBA), but only have to pay one application fee. Students can also opt to apply for the second-degree program during their first year in the other program.

The Ph.D. in Business with Concentration in Finance is a research-oriented degree that prepares students for careers in research and teaching. It provides the depth of knowledge and skills required to conduct first-rate research in the field and present those findings in world-class scholarly publications. Our faculty is supportive of our students and works closely with them. Students will typically work on a joint research project with one or more of their professors early in their program. Thus, students are quickly immersed in doing substantial research.

Ph.D. candidates must be full-time, year around students. The doctoral program requires the development of a sense of scientific curiosity that permeates the extensive coursework and inquiry that is required. The core coursework is an intensive study of the theory and empirical analysis of finance, focused on investments, corporate finance, and financial institutions and markets. Most of the coursework can be completed in the first two years. Students without master's degrees or otherwise lacking an appropriate background may be required to take additional courses.

The preliminary exam is taken after the required coursework is completed. This will usually be at the beginning of the third year. After satisfactory completion of the exam, the last phase of the program is devoted to research, including the publication of articles and completion of the Ph.D. dissertation and its defense. The length of this phase of the program is expected to take two or more years.

Information concerning specific program requirements may be obtained by visiting the Raymond J. Harbert College of Business website.

Business (Finance Concentration) — PhD

Code	Title	Hours
Business - Finance Concentration (PhD)		
FINC 8990	Research and Dissertation	10

Select 50 Credits in @ 6000-8999	50
Total Hours	**60**

The PhD in Business requires 60 semester hours earned through instruction beyond the bachelor's degree, including 1) a minimum of 30 semester hours graded (e.g., A, B) graduate course work (6000-level and above); and 2) a minimum of 30 semester hours of additional graduate course work (6000-level and above) that may include ungraded courses, 7990 and 8990, and must include at least 10 hours of 8990. Up to 30 hours (if less than half of the total number of hours) of applicable master's level course work may be used to satisfy part of these requirements with advisor approval.

The total number of credit hours that may be transferred from another accredited institution toward a doctoral degree varies by program but must be less than 50 percent of the credit hours listed on the Plan of Study. Such transfer credit 1) must fall within the time limits of the degree; and 2) must be approved by the advisory committee and the dean of the Graduate School. A maximum of four hours of 7990 (Research and Thesis) from a completed master's program may be counted.

All doctoral students must complete a minimum of 10 hours of FINC 8990. Enrollment in FINC 8990 may take pace at any time the student and the advisory committee deem appropriate . During any one semester, the number of hours of 8990 in which the student enrolls should reflect the amount of instructional time being spent on the dissertation and the degree to which uni versity resources are being utilized. Students may enroll, during any one semester, for as few as one hour or as many as 16 hours of 8990. Dissertation students submitting their dissertation, awaiting committee review and approval, or taking their final examination must register for 8990 Research and Dissertation in the semester(s) when these steps in he process take place. The requisite 10 hours of 8990 should be included in the Plan of Study. No grade is assigned.

Fisheries, Aquaculture, and Aquatic Sciences — MAq, MS, PhD

Degree Programs

- Fisheries, Aquaculture, and Aquatic Sciences — MAq (p. 1665)
- Fisheries, Aquaculture, and Aquatic Sciences — MS (p. 1665)
- Fisheries, Aquaculture, and Aquatic Sciences — PhD (p. 1666)

The FAAS graduate program prepares students for productive careers in academia and the private and public sectors in aquaculture, aquatic resource management and ecology, and fisheries biology and management. The School offers graduate programs leading to the Master of Science (MS — thesis and non-thesis), Master of Aquaculture (MAq — non-thesis), and Doctor of Philosophy (PhD) degrees.

Students desiring admission for graduate study should have a degree from a recognized academic institution, adequate course work in biology, zoology, botany, chemistry, physics, and mathematics and submit GRE scores (can be waived by faculty). Otherwise qualified students lacking an adequate background in these areas may be admitted but may be required to correct deficiencies after they enroll at Auburn. Applicants must also meet minimum requirements of the Graduate School including English language requirements. Evaluation of applicants includes academic records, GPA, GRE scores (can be waived by faculty), letters of recommendation, and past professional history.

The thesis-based Master of Science degree prepares the student for aquatic resource or aquaculture related careers as well as further studies toward a PhD degree. A minimum of 30 semester hours of 6000-level or above are required. A minimum of 21 semester hours (which includes FISH 7990) of 6000-level and above courses must be taken within the major area of concentration and at least an additional 9 hours taken in a separate but closely related area of concentration. A minimum of 4 semester hours of FISH 7990 (Research and Thesis) is required but no more than 6 semester hours may be counted toward the degree. In addition to the required course work, the student must complete research and a written thesis and pass a comprehensive examination on research and course work as defined by the student's advisory committee.

The non-thesis Master of Science degree prepares the student for a variety of less research focused aquatic resource or aquaculture related careers. A minimum of 34 semester hours, including at least 3 hours from one of these courses, FISH 7460, FISH 7900, FISH 7920, or FISH 7960, are required. In addition to the required course work, the student must pass a comprehensive examination on their relevant experiences and course work as defined by the student's advisory committee.

The MAq is a non-thesis degree that prepares a student for a career in aquaculture management or extension. The degree requires successful completion of a minimum of 42 semester hours beyond the bachelors' degree including graduate business-related courses

(6-12 hrs) and several FISH course (6210 (Principles of Aquaculture), 6220 (Water Science), 6240 (Hatchery Management), 6250 (Aquaculture Production), 6410 (Introduction to Fish Heath), 7640 (Fish Nutrition) 7950 (exit seminar)) and includes a 3- to 5-month internship (FISH 7920). In addition, students must pass a comprehensive oral examination after completion of all course work and internship.

Admission to the Doctor of Philosophy degree program usually requires that the student has a master's degree from a recognized graduate program. The doctoral program emphasizes original scholarly research and includes significant advanced coursework. The PhD degree requires a minimum of 60 semester credit hours beyond the bachelor's degree, of which a minimum of 31 hours must be taken through Auburn University, and a dissertation describing original research. A minimum of 30 hours must be graded graduate courses. The minimum and maximum number of hours of dissertation research (FISH 8990) is 10. Students must pass a general examination, often called the "preliminary examination," typically taken after all graded course work is completed, to become a PhD candidate. The exam includes a written exam followed by an oral exam. The student becomes a **candidate** for the degree on successful completion of the general examination. After completion of the dissertation, the student must pass a final oral examination defending the dissertation.

All graduate students are expected to be engaged in service to the school's research and education programs as deemed appropriate by the academic adviser and School Director. All students receiving assistantships must be registered for at least one course (any course of at least 1 credit hour carrying an Auburn University course number) during each academic term of the assistantship. International students must meet visa requirements for coursework load. All graduate students must present an exit seminar in the School for which credit will be given as either FISH 7950 for master's or FISH 8950 for PhD's.

After completion of the dissertation, the student must pass a final oral examination defending the dissertation.

Food Science — MAg, MS, PhD

Degree Programs

- Food Science — MAg (p. 1667)
- Food Science — MS (p. 1667)
- Food Science — PhD (p. 1668)

Food Science graduate degrees, although technically offered as an option affiliated with poultry science, are managed by the Food Science Program. Students pursuing graduate studies in Food Science can earn Master of Agriculture, Master of Science, and Doctor of Philosophy degrees. These degrees are designed to prepare outstanding students for careers in the food industry, government, and academia. Research training and experience can be acquired in the specialized areas of food safety/microbiology, food quality, food chemistry, sensory evaluation, or processing and product technology.

Applicants apply through the ApplyYourself online platform and must indicate their desire to pursue graduate studies in Food Science. All applications are reviewed by the Food Science Graduate Committee. Application materials include: official copies of all college transcripts, TOEFL scores (for international students), 3 letters of recommendation, a resume, and a statement of purpose. Transcripts and test scores are sent directly to the Graduate School. The letters of recommendation may either be submitted online (preferred) or mailed to the graduate program officer. The resume and statement of purpose are sent to the graduate program officer at the departmental address or via email attachment. The GRE is not required. To pursue MS or MAg degrees in food science, applicants must have a bachelor's degree in food science, nutrition, chemistry, biology, food engineering, or allied sciences from a recognized institution with a minimum GPA of 3.0 out of 4.0. A MS degree with thesis in a relevant field is required to be considered for admission into the PhD program. The course of study, developed by the student and the advisory committee, may include additional courses to address specific needs or course work deficiencies.

Additional information about requirements, policies, and availability of financial support can be obtained from the food science graduate program officer, Dr. Amit Morey (azm0011@auburn.edu).

MS/MAg Degree Requirements

1. The Master of Science (MS degree) requires a research project with a formal written thesis while the Master of Agriculture (MAg) requires a research project with written report. The MS degree requires a minimum of 30 semester credit hours. The MAg degree requires 33 semester credit hours. Both MS and MAg degrees require a comprehensive final oral examination.

2. The Food Science Core Curriculum:

Code	Title	Hours
POUL 6160	Adv Princ Food Safety	3
FDSC 7430	Flavor Chemistry	3
FDSC 7950	Graduate Seminar (Taken 2 times for 1 credit each time.)	1
FDSC 7980	Nonthesis Research	4
or FDSC 7990	Research And Thesis	

3. Food Science Electives – MS students must take 4 food science electives chosen in consultation with the major professor and advisory committee. MAg students must take 5 food science electives. Free electives may be used to acquire the required 30 semester hours (MS) or 33 semester hours (MAg).

PhD Degree Requirements

1. For the PhD degree, a minimum of 30 semester hours of graduate coursework beyond the MS (60 hours beyond the bachelor's degree) is required.
2. The Food Science Core Curriculum:

Code	Title	Hours
POUL 6160	Adv Princ Food Safety	3
FDSC 7430	Flavor Chemistry	3
FDSC 7950	Graduate Seminar (Taken three times for 3 total credits)	1
FDSC 8990	Research and Dissertation	10

3. Food Science Electives – PhD students must take 5 food science electives chosen in consultation with the major professor and advisory committee. Free electives may be used to acquire the required 60 semester hours.
4. Examinations – Upon completion of course work, students must pass general written examinations administered by the advisory committee, followed by a comprehensive preliminary oral examination. After satisfactory completion of these exams, the student advances to candidacy. A dissertation based on an independent research project is required to earn a PhD degree. After completion of the dissertation, the student must pass a final doctoral oral examination defending the dissertation.

Forestry — MNR, MS, PhD

Degree Programs

- Applied Economics (Forestry) — PhD (p. 1669) (p. 1635)
- Forestry — MS (p. 1671)
- Forestry — PhD (p. 1672)
- Professional Forester Option — MNR (p. 1712)

Graduate study in forestry leads to the Master of Natural Resources (MNR), Master of Science (MS), or Doctor of Philosophy (PhD) degrees. In addition to meeting Graduate School admission requirements, applicants are evaluated and recommended for admission by the graduate faculty of the College of Forestry, Wildlife and Environment based on an examination of scores on the TOEFL tests for international students, previous academic records, experience, and recommendations. While exceptions may be made, the faculty generally expect a minimum GPA of 3.0 in previous academic course work. Course deficiencies are identified by the student's advisory committee and approved by the GPO with due consideration for the student's previous training and experience.

Degrees Offered

- **Master of Natural Resources** (MNR) —The MNR is a non-thesis degree.
  - ***Professional Forester*** option is for individuals with baccalaureate degrees in fields other than forestry and who are interested in becoming Registered Foresters in Alabama. This track is a two-year program which begins with a 10-week summer Field Practicum and requires a minimum of 64 semester hours (34 hours of specified undergraduate course work plus 30 hours of graduate course work).
- **Master of Science** (**MS**) A research proposal and thesis based on original research are required components for the MS degree. The program normally requires 2 – 3 years for completion and can be tailored for students with interests in forest management, ecology and environmental sciences, economics, engineering, or business. The MS degree program requires a minimum of 30 hours beyond the bachelor's degree at the graduate level, 21 hours of which must be in the major. A minimum of 4 but not more than 6 hours in Research and Thesis (FORY 7990) is required. All MS students are required to take Research Methods (FORY 7510) and Seminar (FOWS 7950).
- **Doctor of Philosophy** (**PhD**) may be tailored for any of the topical areas listed under the M.S. A research proposal and dissertation based on original research are required components for the PhD degree program. The degree requires 60 semester hours beyond the bachelor's degree. There must be a minimum of 30 semester hours in graded coursework at the 7000-level or above. Of the remaining 30 semester hours, 10 hours must be Research and Dissertation (FORY 8990) and 20 hours of 6000-level or above. While some of these 60 hours can be from previous graduate work, such as a MS degree, the majority of hours of graded coursework at the 6000-level or above must be completed at Auburn. All PhD students are required to take Research Methods (FORY 7510) and Seminar (FOWS 7950). Oral and written preliminary exams are required for advancement to candidacy; The

preliminary exams must be completed no less than two academic terms prior to graduation. The written and oral preliminary examinations for PhD students will normally consist of questions from each committee member regarding technical competency and other related issues.

An urban forestry minor, administered in cooperation with the Department of Horticulture, is available for **MNR**, **MS**, and **PhD** degrees.

Applied Economics (Forestry) — PhD

PhD in Applied Economics is administered jointly by the Department of Economics, the Department of Agricultural Economics and Rural Sociology, and the College of Forestry, Wildlife and Environment (CFWE). Forestry students in this program will take core courses in microeconomics, macroeconomics, and econometrics in the Department of Economics and pass written preliminary exams given there. An additional oral examination is required in the CFWE for admission to candidacy. The minimum number of hours in this doctoral program is 60 semester hours earned through instruction beyond the bachelor's degree, including 1) a minimum of 30 semester hours graded (e.g. A, B) graduate course work (7000-level and above); and 2) a minimum of 30 semester hours of additional graduate course work (6000-level and above) that may include ungraded courses, 7990 and 8990 and must include at least 10 hours of 8990. As with all other PhD students in the CFWE, students are required to take Research Methods (FORY 7510) and Seminar (FOWS 7950). Dissertation work under this degree program generally involves in-depth economic analysis of a forestry/natural resources/environment issue or problem.

Forest Business & Investment — MS

Forest Business and Investment — MS Online Program

Curriculum – 31 credit hours

The Forest Business and Investment program requires 31 credit hours of graduate coursework, of which a minimum of 16 hours must be from the ***Core***. If students do not have a sound forestry background, they must take FORY 7320. The remaining 12–15 credits for the degree can be chosen based on student interest.

Degree Program Core: All are 3 credits except Forest Business and Investment Seminar. All core and elective courses are fully online except FORY 7300 **(16–19 credits required).**

- FORY 7320 – Forest Growth, Silviculture, and Management (*only if they don't have a forestry background; If they don't, they will need to take this course their first semester.*) (3 credits)
- FORY 7400 – Forest Valuation and Economics (3 credits)
- FORY 7650 – Forest Operations and Wood Supply Chain Management (3 credits)
- FORY 7620 – Forest Finance, Accounting and Taxation (3 credits)
- BUSI 7110 – Financial Analysis (3 credits)
- FORY 7350 – Applied Statistics for Forest Business (3 credits)
- FORY 7300 – Forest Business & Investment Seminar (1 credit required)

Supporting Electives: All are 3 credits **(12–15 credits needed) or (any 4–5 courses below)**.

Finance:

- FINC 6250 – Real Estate Finance — must be taken after BUSI 7110.
- FINC 6260 – Real Estate Investment — must be taken after BUSI 7110.
- FINC 7640 – Advanced Investments — must be taken after BUSI 7110.

Business Admin:

- BUSI 7120 – Quantitative Analysis for Business Decisions
- BUSI 7130 – Strategic Analysis and Competitive Environment
- BUSI 7140 – Organizational Leadership, Ethics, and Change
- BUSI 7150 – Operational Excellence through Supply Chain & Quality Management
- BUSI 7230 – Cost Analysis and Systems
- BUSI 7250 – International Business Operations

Supply Chain Management: (*If a student added BUSI 7150 to any of the three courses in each below, students could earn a graduate certificate.*)

Supply Chain Management Innovation Grad Certificate

- SCMN 7600 – Supply Management and Manufacturing (Spring/Summer)
- SCMN 7700 – Demand Management and Fulfillment (Fall)
- SCMN 7800 – Supply Chain Strategy (Fall)

Supply Chain Planning Grad Certificate

- SCMN 6600 – Supply Chain Planning
- ISMN 6370 – Project Management
- BUSI 7120 – Quantitative Analysis for Business Decisions

Supply Chain Operations Grad Certificate

- SCMN 6500 – Inventory and Warehouse Management
- SCMN 6720 – Quality and Process Improvement
- SCMN 6390 – Integrating Business Processes with ERP
- SCMN 7770 – Supply Chain Management (Spring/Fall)

Accounting:

- ACCT 6700 – Advanced Business Accounting Law (Spring/Summer/Fall)

Proposed Plan of Study: ***for graduate students who need FORY 7320***

Fall – semester 1 (9 credits)

- FORY 7320 – Forest growth, silviculture, and management (if not a strong forestry background)
- FORY 7650 – Forest Operations and Wood Supply Chain Management
- FORY 7620 – Forest Finance, Accounting, and Taxation

*If student needs to take FORY 7320, then they would take either FORY 7650 or FORY 7620, not both, their first semester. All students would take Seminar their last fall semester.

Spring – semester 2 (6 credits)

- FORY 7400 – Forest Valuation and Economics
- FORY 7350 – Applied Statistics for Forest Business

Summer – semester 3 (3 credits)

- Elective(s)

Fall – semester 4 (7 credits)

- BUSI 7110 – Financial Analysis
- FORY 7650 – Forest Operations and Wood Supply Chain Management
- FORY 7300 – Forest Business and Investments Seminar

Spring – semester 5 (6 credits)

- Elective(s)

Proposed Plan of Study: ***for graduate students who do not need FORY 7320***

Fall – semester 1 (6 credits)

- FORY 7650 – Forest Operations and Wood Supply Chain Management
- FORY 7620 – Forest Finance, Accounting, and Taxation

* All students would take Seminar their first fall semester.

Spring – semester 2 (6 credits)

- FORY 7400 – Forest Valuation and Economics
- FORY 7350 – Applied Statistics for Forest Business

Summer – semester 3 (3–6 credits)

- Elective(s)

Fall – semester 4 (7–10 credits)

- BUSI 7110 – Financial Analysis
- Elective(s)
- FORY 7300 – Forest Business and Investments Seminar

Spring – semester 5 (6 credits)

- Elective(s)

Forest Finance & Investment — Graduate Certificate

Graduate Certificate in Forest Finance & Investment Requirements

This Graduate Certificate will prepare students to be more knowledgeable in operating their forest business and forest finance and investment decision-making. The program will stress critical thinking and problem-solving skills that are required by employers today and running a forest-based business. The Forest Finance and Investment Certificate is designed to (1) provide graduate-level education for those seeking advanced positions in forest business, and (2) to place students in a position so that they can continue their graduate education.

The certificate requires 15 credits of course work completed of the list of the courses below. Students with a Forestry Background will need to take FORY 7400, FORY 7650, FORY 7620, FINC 7640 and BUSI 7110. Students without a forestry background will be required to take FORY 7320 Forest Growth, Silviculture and Management and any 4 of the other courses for their 15 credits.

Code	Title	Hours
FORY 7320	Forest Growth, Silviculture, and Management	3
FORY 7400	Forest Valuation and Economics	3
FORY 7650	Forest Operations and Wood Supply Chain Management	3
FORY 7620	Forest Finance, Accounting and Taxation	3
FINC 7640	Advanced Investments	3
BUSI 7110	Financial Analysis	3

FORY 7320 Forest Growth, Silviculture, and Management will be required of students that do not have a Forestry Background.

Forestry — MS

Code	Title	Hours

Restoration Ecology — Graduate Certificate

This graduate certificate is designed to advance the level of knowledge and skills for individuals interested or working in the areas of natural resource management, forest and wildlife management, environmental sciences, natural resource management consulting, or environmental education. This graduate certificate is designed to help students better understand natural processes in terrestrial ecosystems; provide information on processes and practices that are relevant to the restoration of these ecosystems; and enhance critical thinking and communication skills.

Code	Title	Hours
Restoration Ecology - Graduate Certificate		
FOWS 6210	Restoration Ecology	
Select 4 Electives from the following:		12
FOWS 6230	Forest Stand Dynamics	
FOWS 6240	Fire Ecology	
FOWS 6250	Longleaf Pine Ecology, Management, and Restoration	
FOWS 6260	Forest Wetlands Restoration Ecology	
or FOWS 7260	Forest Wetlands Restoration Ecology	
FOWS 7220	Forest History of Alabama and the Southeastern United States	
WILD 6410	Human-Wildlife Conflicts	
Total Hours		**12**

Geographic Information Science — Graduate Certificate

This graduate certificate provides students with an understanding of the components of geospatial science and solving geographic problems, scale and map projects, maintaining geospatial datasets, and selecting GIS applications. This certificate prepares students for employment in geographic information aspects of industry, government, or academic fields.

Professional Year

Fall	Hours	Spring	Hours
GEOG 6830 Geographic Information Systems	4	GEOG 6880 Advanced Geographic Information Systems	3
GEOG 6820 Aerial Photography and Remote Sensing	4	GEOG 6700 Quant Meth & Spatial Analysis	3

	Elective	2-3
	8	**8-9**

Total Hours: 16-17

Geography and Environmental Studies — MS

Graduate study in geography is directed toward the master of science degree. The MS degree provides an advanced understanding of key geographical concepts of space, scale, and distance in human and physical processes along with training in advanced geospatial analysis in preparation for employment in industry and government or further academic pursuits. The curriculum is oriented toward a broad applied geographic training with opportunity for specialization through electives, directed studies, and thesis or capstone research.

Admission into the master's program requires a bachelor's degree in geography or related discipline from an accredited institution, an acceptable undergraduate GPA, satisfactory scores on the Graduate Record Examination general test, and three letters of recommendation. Undergraduate course deficiencies may be required and can be made up during the student's first year in the degree program.

The thesis option MS degree requires a minimum of 30 semester hours and the successful completion of a thesis. The 30 hours include:

Code	Title	Hours
GEOG 6800	Geographic Thought	3
GEOG 6700	Quant Meth & Spatial Analysis	3
Graduate-level Geography Courses		6
Graduate Level Electives [1]		18
Total Hours		**30**

[1] 12 hours must come from geography.

The non-thesis option requires a minimum of 39 semester hours and the successful completion of a comprehensive written and oral examination by the faculty committee. The 39 hours include:

Code	Title	Hours
GEOG 6800	Geographic Thought	3
GEOG 6700	Quant Meth & Spatial Analysis	3
Graduate Level Electives [1]		33
Total Hours		**39**

[1] 18 hours must come from geography.

Geology — MS

Graduate study in geology leads to the master of science. The graduate program is oriented toward providing a sound practical background in preparation for employment in industry or government service or further academic pursuits. The curriculum provides broad training in geology with the opportunity for specialization through electives, directed studies, and thesis or capstone research.

Admission into the master's program requires a bachelor's degree in geology (or related Earth science discipline) from an accredited institution with 40 semester hours in geology, an acceptable undergraduate GPA, satisfactory scores on the Graduate Record Examination General Test, and three letters of recommendation. Undergraduate course deficiencies may be made up during the student's first year in the degree program.

The thesis option MS degree in geology requires a minimum of 30 semester hours and completion of a thesis. The 30 hours include:

Code	Title	Hours
GEOL 7100	Geocommunication	3
GEOL 7990	Research and Thesis	4-6
Graduate-level Geology Courses		18
Approved 6000- or 7000-level Geology or Supportive Electives [1]		5-3
Total Hours		**30**

[1] No more than 3 hours of which can be GEOL 7930-Directed Study

Students electing the non-thesis option must complete a minimum of 40 semester hours and a capstone project. The 40 hours include:

Code	Title	Hours
GEOL 7100	Geocommunication	3
Graduate-level Geology Courses		33
Approved 6000- or 7000-level Geology or Approved Electives [1]		4
Total Hours		**40**

[1] All or a portion of which may be GEOL 7930-Directed Study or GEOL 7980- Capstone Project.

Both degree options require (1) satisfactory completion of a summer field course or comparable field experience prior to beginning the second year of residence and (2) demonstrated working knowledge of a computer language or computer-based geographic information system (G.I.S.) before graduation.

Geotechnical Engineering — Graduate Certificate

The overall objective of the program is to provide interdisciplinary graduate#level education for those seeking advanced professional knowledge and skills in geotechnical engineering, who are not enrolled in a graduate degree program.

This Graduate Certificate Program is built on top of the successful Engineering Online Program at Samuel Ginn College of Engineering, which was ranked highly in U.S. News and World Reports for Best Online Engineering Programs. It is an on#campus equivalent education program that combines traditional instruction with modern delivery methods to offer graduate studies beyond Auburn's campus.

The program is structured to advance the working engineer's knowledge and skills in the field of geotechnical engineering. Geotechnical engineers design and analyze engineering systems that are made from or supported by earth materials. These include foundations, earth-retaining structures, excavations, slopes, dams, and landfills. Geotechnical engineers often work closely with other branches of civil engineering on a variety of projects, including solid waste management, groundwater protection, highway and pavement engineering, and foundation design.

At a Glance

- The program requires students to take four related graduate courses (12 credit hours).
- Students attending courses online have the same professors as their on#campus peers.
- Students can access lectures online through a live feed or at their convenience via streaming video.
- The online schedule allows for flexibility to maintain a career while completing the program.

Faculty

Geotechnical Engineering courses are taught by Auburn's outstanding civil engineering faculty.

Health Equity Science — Graduate Certificate

The Graduate Certificate in Health Equity Science (CHES) is administered through the Department of Human Development and Family Science, College of Human Sciences (CHS) under the purview of the Health Disparities Research Initiative (HDRI). The graduate

CHES is part of the training mission of HDRI, which is aimed at cultivating scholarship on health ecology and equity, and developing leaders committed to address health inequities. This is achieved by helping students acquire a strong foundation of knowledge on health ecology and equity issues. In addition, the graduate CHES exposes students to a breadth of advanced topics in health ecology and equity and facilitates gaining depth of knowledge on specialized topics. Graduate students completing this certificate will have a strong understanding of the role of social context in generating disease risks and disparities in health between groups; and also learn how this corpus of knowledge can be translated into health-promoting policies and community-level interventions. They also have the opportunity to gain skills in research on a specific health equity topic through thesis or dissertation research.

Code	Title	Hours
HUSC 6930	Society and Health	3
HUSC 6950	Seminar on Health Ecology and Equity	3
Three (3) additional semester hours through elective courses:		3
HDFS 6300	HDFS and Social Policy	
HUSC 6950	Seminar on Health Ecology and Equity (can be repeated once)	
Total Hours		**9**

[1] Elective courses relevant to the certificate vary from year to year. Courses with substantial content focused on health equity science or social inequality are likely to qualify. Please email course syllabus to Dr. Thomas Fuller-Rowell (tfr1@auburn.edu) to obtain approval.

Steps to Obtain the Certificate:

1. Submit an application for the certificate program through ApplyYourself (https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantLogin.asp?id=auburn-g) and then email Tom Fuller-Rowell (tfr1@auburn.edu) and Stephen Erath (sae0001@auburn.edu) to let them know that you have applied. Note that Auburn University employees and current graduate students are exempted from the application fee requirement.
2. Complete the course requirements that are specified in the certificate description and obtain a grade of B or better in all courses. Note that it is okay to complete some of the course requirements before applying for the certificate.
3. After final grades have been posted for all relevant courses, email Tom Fuller-Rowell (tef0005@auburn.edu) and Stephen Erath (sae0001@auburn.edu) to alert them that your requirements for the certificate have been completed.
4. Your certificate will then be reviewed for approval. After being approved, the certificate will appear on your transcript.

History — Graduate Certificate, MA, PhD

Degree Programs

- History — MA (p. 1678)
- History — PhD (p. 1679)

Graduate Certificate

- Public History (p. 1679)

The Department of History offers two graduate programs: the Master of Arts in History and the PhD in History. Additionally, the department offers a Graduate Certificate in Public History. The graduate programs prepare students for careers in teaching, public history, government, and research. More information is available at https://cla.auburn.edu/history/current-students/graduate/.

MA in History

Admission Requirements

For admission to the MA program, the student must have a bachelor's degree from an accredited institution. For more information about the Department of History's expectations for admission, see https://cla.auburn.edu/history/future-students/graduate/how-to-apply/. Applications must be approved by the department's graduate committee. Applicants lacking course requirements must make up deficiencies before or after admission to the degree program. The committee's decisions are based on a review of all application materials.

Applicants will submit the following materials for consideration:

- Official transcripts from all undergraduate and graduate institutions
- A writing sample
- A statement of purpose
- An application for an assistantship (for those who wish to be considered for funding—note earlier application deadline for assistantships)
- Three confidential letters of recommendation

January 15 is the due date for those applicants who also wish to apply for a graduate assistantship. March 15 is the deadline for all other applications.

MA Requirements

The MA requires a minimum of 31 hours and a culminating project. Of the 31 hours, 13 are in required courses, 15 hours are in elective courses, and 3 hours are in thesis research. In addition to possible concentrations in United States history, European history, and the history of technology, the MA program offers a specialization in public history, including practical training (a 3-hour required internship). The Department does not admit students to pursue non-thesis MA degrees, but a MA degree (non-thesis) can be awarded to students in the doctoral program who have not previously earned the master's upon passing the general examination for admission to candidacy for the PhD.

There is no language requirement for the MA degree.

PhD in History

Admission Requirements

For admission to the PhD program, the student must have a bachelor's degree from an accredited institution. For more information about the Department of History's expectations for admission, see https://cla.auburn.edu/history/future-students/graduate/how-to-apply/. Applications must be approved by the department's graduate committee. The committee's decisions on admission are based on a review of all application materials.

Applicants will submit the following materials for consideration:

- Official transcripts from all undergraduate and graduate institutions
- A writing sample
- A statement of purpose
- An application for an assistantship (for those who wish to be considered for funding—note earlier application deadline for assistantships)
- Three confidential letters of recommendation

January 15 is the due date for those applicants who also wish to apply for a graduate assistantship. March 15 is the deadline for all other applications.

PhD Requirements

The program requires a minimum of 66 semester hours beyond the bachelor's degree, written comprehensive examinations, an oral defense of a written dissertation prospectus, and the dissertation, in addition to demonstrated reading knowledge of at least one foreign language. Of the 66 hours, 26 hours are in required courses, 30 hours are in elective courses, and 10 hours are in Research and Dissertation credit.

Ten courses are required. Seven courses are required for all students regardless of concentration. They are:

- HIST 8720 Introduction to Graduate Studies
- HIST 7700 Seminar In Historical Methods
- HIST 7710 Graduate Research Seminar
- HIST 8700 Historiography and Theory of History
- HIST 8710 Introduction to the Teaching of History
- HIST 7860 Research Project Design
- HIST 8730 Introduction to the Historical Profession

Students focusing on U.S. history are required to take:

- HIST 7240 Debates in Early American History
- HIST 7250 Debates in Modern American History
- HIST 7480 Debates in European History

Students focusing on European history are required to take:

- HIST 7480 Debates in European History (repeat for 6 credits)

And choose one of:

- HIST 7240 Debates in Early American History OR
- HIST 7250 Debates in Modern American History

Students must also take at least one history seminar in a non-U.S. or non-European geographic area.

Fields of Study

Students choose a primary field of study which is typically reflected in their elective coursework, as well as choosing two other fields. Together, these comprise the student's three fields for the comprehensive examinations. Each exam field has a different advisor, one of whom is the student's primary advisor. Exam fields include (but are not limited to):

- African American History
- Colonial/Indigenous North America
- Early American History
- Early Modern Europe
- History of Technology
- History of Medicine
- History of Women/Gender/Sexuality
- Labor History
- Military History
- Modern American History
- Modern Europe
- Public History
- Race, Rights, and Inequalities
- Southern History
- War and Society
- World History
- Other fields as approved by the Graduate Committee

To advance to candidacy, students must demonstrate competence in three fields through written examinations and successfully defend a written dissertation prospectus in an oral defense. Examinations begin in the last semester of coursework (Fall) and conclude the following Spring semester.

The prospectus is defended in an oral examination no more than four months after passage of the last comprehensive examination.

Following a successful defense of the prospectus, doctoral candidates have four years to present the written dissertation and defend it in an oral examination before their major professor and advisory committee. If the oral examination is judged unsatisfactory or not submitted in a timely manner, the general rules of the Graduate School on retests and extension will apply.

The PhD requires a reading knowledge of at least one foreign language as determined by the student's doctoral committee. Language competency should be demonstrated before the student begins the comprehensive examinations process.

Graduate Certificate in Public History

In most circumstances, only students enrolled in a degree program in history or those who have completed an MA in History may enter the graduate certificate non-degree program in history. However, applicants who have completed a master's degree in an allied field may be eligible for admission to the Graduate Certificate in Public History.

Admission Requirements

If applicants are not simultaneously seeking to matriculate into the MA or PhD program, they must have a MA in History or a related field. Applications must be approved by the Public History program officer and by the department's graduate committee.

Applicants will submit the following materials for consideration:

- Official transcripts from all undergraduate and graduate institutions
- A writing sample
- A statement of purpose
- Three confidential letters of recommendation

If applicants are not also seeking admission into the MA or PhD program, materials for admission to the Public History Graduate Certificate program may be submitted at any point during the academic year. The program officer and the department's graduate committee will determine the academic term of admission.

If applicants are also seeking admission to the MA or PhD program, applications for the graduate certificate should be received by March 15.

Graduate Certificate in Public History

Students are required to complete 12 credit hours in public history, including HIST 6810 Fundamentals of Public History, HIST 7910 Public History Internship, and at least two other graduate Public History courses to receive the Graduate Certificate in Public History.

Total Hours		**66**

[1] Students concentrating in U.S. history are required to take all three seminars. Students concentrating on European history should take HIST 7480 two times and either HIST 7240 or HIST 7250.

[2] Students will complete up to 9 hours of graduate readings courses (e.g., HIST 8000, HIST 8010, etc.) in preparation for preliminary examinations. If a student uses less than 9 hours, the remaining hours shift to other graduate history electives.

[3] Of these history graduate elective hours, at least 2 courses must be outside of the student's exam fields. Up to 2 courses may be non-HIST graduate courses.

Public History — Graduate Certificate

This graduate certificate is designed to provide students a grounding in the fundamentals of the field, including the skills necessary to plan and carry out comprehensive programs of research, identifying and locating relevant secondary literature, archives and/or with other substantial collections of primary sources. This certificate will prepare individuals for employment in public history organizations, ranging from museums and public heritage groups to historic sites, archives, and state agencies, including the National Park Service.

Horticulture — Graduate Certificate, MS, MAg, PhD

Degree Programs

- Horticulture — MS (p. 1681)
- Horticulture — MAg (p. 1680)
- Horticulture — PhD (p. 1681)

Graduate Certificates

- Public Horticulture (p. 1681)

Graduate study in horticulture emphasizes the Master of Science and Doctor of Philosophy degrees. Graduates are prepared for careers in teaching, research, business, public horticulture or Cooperative Extension. Master-level programs are available to students with undergraduate degrees in horticulture and to those from other areas seeking opportunities in horticulture-related careers. For the MS program, students must have a bachelor's degree in horticulture or a related area from an accredited university and meet specific departmental academic standards. Applicants from related areas will be required to correct any undergraduate course deficiencies. GRE test scores, GPA, letters of intent and reference, as well as other support material, will be considered in evaluating applicants. A GRE Analytical Writing Score of 3.0 or above is recommended. For applicants scoring less than 3.0 on the essay portion of the GRE, ENGL 3040 Technical Writing will be considered a deficiency course. An absolute requirement for admission is a faculty member willing to serve as the applicant's advisor. The MS requires a minimum of 30 credit hours of graduate work, including at least 21 credit hours in the major field of study and six of which may be research & thesis hours (HORT 7990). The student's plan of study is individually tailored by the student, the major professor and the advisory committee to meet the student's career goals. A thesis based on research by the student is required. Students in the MS program in Horticulture who are on departmental funding cannot change to the Master of Agriculture program.

Admission requirements for the MAg program, a non-thesis degree, are the same as for the MS degree. The MAg requires successful completion of 32 credit hours, 21 of which must be in agricultural sciences. Credit for HORT 7990, Research and Thesis, cannot be counted toward graduation requirements for the MAg. Additional courses may be required for individual students as determined by the major professor and the advisory committee. There is no specific schedule of courses for MS or MAg students or a foreign language requirement for any graduate students in Horticulture. Students in this option must complete a research or special project and pass a comprehensive oral exam covering course work and the project.

Admission to the Doctor of Philosophy program requires the completion of a thesis-based degree and meeting the same requirements as for master-level programs. Doctoral candidates must follow all Graduate School and departmental requirements concerning course work. For the PhD, the Graduate School requires a minimum of 30 semester hours of graded (e.g., A, B, C) graduate course work (6000-level and above) beyond the bachelor's degree, and at least 30 semester hours of additional graduate course work that may include un-graded courses, including 7990 and 8990. The advisory committee may require additional course work. Upon completion of all course work, PhD students may be required to take a general written examination by his/her committee. Students must pass all parts of the written examination before scheduling the required preliminary oral examination (referred to as the PhD prelim exam). After satisfactory completion of the prelim exam the student advances to candidacy. The PhD student will conduct independent research and prepare a dissertation through the guidance and direction of an advisory committee. After completion of the dissertation, the student must pass a final oral examination defending the dissertation.

Several minors are available for horticulture graduate students. Auburn University's Department of Horticulture and College of Forestry and Wildlife Sciences offer a minor in Urban Forestry. An interdisciplinary minor in Environmental Studies administered by the Crop, Soil and Environmental Sciences Department is also an option, as are minors in Ecology and Biochemistry and Cell/Molecular Biology. The department also offers a Graduate Certificate in Public Horticulture.

Public Horticulture — Graduate Certificate

This Graduate Certificate Program is designed to provide opportunities for those wishing to gain the theoretical knowledge and practical skills to connect traditional horticulture and public outreach. Career fields include working in public gardens, arboreta, university extension services, hospitality industry (resorts), zoos, and community gardens. Career practices include public garden administration, teaching, horticultural therapy, garden design and event planning. The curriculum includes courses that give students practical experience with horticultural skills and garden management as well as exposure to top public gardens around the world through travel and internship experiences.

Hospitality Management — MS, PhD

The School of Hospitality Management offers the MS and PhD in hospitality management. The Master of Science (MS) degree is designed to provide advanced education for the rapidly evolving hospitality field. Students will have a choice of two study options: the on-campus thesis or non-thesis program (non-thesis also offered in distance education format). The MS degree requires a minimum of 30 semester hours for the thesis track and 33 for non-thesis. The principal difference between the two programs is the emphasis

on primary research. The thesis track aims to develop the necessary skills to perform high level, timely and relevant research aimed to rejuvenate existing hospitality thinking and practice. The non-thesis track is designed mainly for individuals interested in combining current work life with the need for educational advancement. Non-thesis requirements include completion of a research project relevant to the student's business environment. Both master's tracks offer an interesting blend of theoretical and applied courses created to keep students abreast of current management thinking and practice. Particular emphasis is placed on the concepts of workplace diversity, informed decision-making and management in a global context.

- Hospitality Management — MS (p. 1682)

The Doctor of Philosophy (PhD) program is offered to students interested in developing research skills beyond the master's level and is focused on an academically oriented career. The PhD program places a strong emphasis on methodology and the scientific process and equips students with the skill set necessary to make significant contributions in the chosen research field.

PhD students are required to complete a minimum of 60 credit hours of coursework beyond the bachelor’s degree, at least 10 of which must be for a dissertation. The coursework structure is presented below:

- Hospitality Management — PhD (p. 1682)

Hospitality Management — MS

Code	Title	Hours

Human Development and Family Science — Graduate Certificate, MS, PhD

Degree Programs

- Child Life — MS (p. 1684)
- Human Development and Family Science — MS (p. 1684)
- Human Development and Family Science — Marriage and Family Therapy Option — MS (Thesis/Non-Thesis) (p. 1685)
- Human Development and Family Science — PhD (p. 1686)

Graduate Certificates

- Advanced Research Methods for Human Sciences
- Health Equity Science

The Department of Human Development and Family Science offers graduate instruction leading to the Master of Science in Child Life, the Master of Science in Human Development and Family Science, with an additional option in Marriage and Family Therapy, and the Doctor of Philosophy in Human Development and Family Science. The Department emphasizes the integration of knowledge from various fields to prepare students for careers in research, teaching, and human service provision as well as education, policy, and industry. To promote training and research, the Department operates the Auburn University Early Learning Center, Harris Early Learning Center of Birmingham, and the Center for Marriage and Family Therapy. The Marriage and Family Therapy Option is accredited by the American Association for Marriage and Family Therapy Commission on Accreditation for Marriage and Family Therapy Education. Both the Auburn University Early Learning Center and Harris Early Learning Center of Birmingham are accredited by the National Academy of Early Childhood Programs, a division of the National Association for the Education of Young Children.

For admission, a background in the social and behavioral sciences is highly desirable and should include course work in human development, family relations, psychology and/or sociology, and statistics. There is no language requirement for the MS or PhD degrees.

The department offers two MS concentrations (a) human development and family science and (b) marriage and family therapy. The human development and family science concentration requires a minimum of 30 semester hours and the concentration in marriage and family therapy requires 52 semester hours. Both require a thesis, and other fundamental work.

The PhD program requires a minimum of 60 credit hours beyond the BS. This program requires course work with a theoretical and substantive emphasis in human development and relationships, a research and statistics component, and an empirical dissertation.

Graduate research may focus on human development and relationships or the application of research to improve quality of life at any stage of the life cycle. Competitive graduate assistantships are available to students.

Child Life — MS

Traditional Child Life Program

The Master of Science degree in Child Life requires a minimum of 34 semester hours. Students who successfully complete this program will be eligible to sit for the child life certification examination. The program will include academic work and field work (practicum/internship/internship student supervision) to prepare future certified child life specialists.

Advanced Standing Child Life Program

The Master of Science degree in Child Life (Advanced Standing Program) requires a minimum of 34 semester hours. Students who have completed a 600+ hour child life internship or who are currently Certified Child Life Specialists may qualify for admission into the online Advanced Standing Child Life Program. The program will utilize the certified Child Life experience within the academic coursework to expand on their current scope of practice.

Health Equity Science — Graduate Certificate

The Graduate Certificate in Health Equity Science (CHES) is administered through the Department of Human Development and Family Science, College of Human Sciences (CHS) under the purview of the Health Disparities Research Initiative (HDRI). The graduate CHES is part of the training mission of HDRI, which is aimed at cultivating scholarship on health ecology and equity, and developing leaders committed to address health inequities. This is achieved by helping students acquire a strong foundation of knowledge on health ecology and equity issues. In addition, the graduate CHES exposes students to a breadth of advanced topics in health ecology and equity and facilitates gaining depth of knowledge on specialized topics. Graduate students completing this certificate will have a strong understanding of the role of social context in generating disease risks and disparities in health between groups; and also learn how this corpus of knowledge can be translated into health-promoting policies and community-level interventions. They also have the opportunity to gain skills in research on a specific health equity topic through thesis or dissertation research.

Code	Title	Hours
HUSC 6930	Society and Health	3
HUSC 6950	Seminar on Health Ecology and Equity	3
Three (3) additional semester hours through elective courses:		3
HDFS 6300	HDFS and Social Policy	
HUSC 6950	Seminar on Health Ecology and Equity (can be repeated once)	
Total Hours		**9**

[1] Elective courses relevant to the certificate vary from year to year. Courses with substantial content focused on health equity science or social inequality are likely to qualify. Please email course syllabus to Dr. Thomas Fuller-Rowell (tfr1@auburn.edu) to obtain approval.

Steps to Obtain the Certificate:

1. Submit an application for the certificate program through ApplyYourself (https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantLogin.asp?id=auburn-g) and then email Tom Fuller-Rowell (tfr1@auburn.edu) and Stephen Erath (sae0001@auburn.edu) to let them know that you have applied. Note that Auburn University employees and current graduate students are exempted from the application fee requirement.
2. Complete the course requirements that are specified in the certificate description and obtain a grade of B or better in all courses. Note that it is okay to complete some of the course requirements before applying for the certificate.
3. After final grades have been posted for all relevant courses, email Tom Fuller-Rowell (tef0005@auburn.edu) and Stephen Erath (sae0001@auburn.edu) to alert them that your requirements for the certificate have been completed.
4. Your certificate will then be reviewed for approval. After being approved, the certificate will appear on your transcript.

Industrial Design — MID

The school offers the Master of Industrial Design (MID) degree accredited by the National Association of Schools of Art and Design (NASAD). Applicants must have a bachelor's degree in industrial design or equivalent from an institution of recognized standing. Applicants with a bachelor's degree in an industrial-design-related discipline, such as architecture, graphic design, interior design, and fashion design, etc. are eligible to apply through the regular application process. Acceptance to the MID program is heavily based on portfolio review. Unsuccessful applicants with an industrial-design-related degree, or applicants with a non-design degree, may choose to apply to the graduate program under the condition that a minimum of 43 post baccalaureate credit hours in industrial design be completed at the undergraduate level with a 3.0 GPA. These applicants are admitted during the summer semester and awarded a bachelor of science in industrial design studies (NASAD accredited) upon completion of the three semester post baccalaureate program. Upon admission to the master’s program successful completion of 35 graduate level credit hours, including a thesis is required. A 40-credit hour non-thesis option is available. Minimum (4) credit hours of INDD 7990 Design Thesis is required but may not exceed six hours. Course content beyond the 17-credit hour core curriculum will be structured to accommodate the student’s area of interest. Completion of an industry collaboration studio (INDD 7910 Industry Practicum) is required. There is no language requirement. An external terminal document draft review and a 3.0 overall graduate GPA are required. Participation in school sponsored international

travel programs may be used as credit towards graduation. Students are admitted only in the fall semester. Applications to the graduate program must be complete by February 1.

All courses are (3) credits except Special Problems INDD 6960 (1-5) credits, Thesis Design INDD 7990 (1-5) credits and Industry Practicum INDD 7910 (5) credits. Thesis requires (35) credits minimum, *four semesters*, with no more than (6) credits taken in INDD 7990. Non-Thesis requires (40) credits minimum, *four semesters* with (3) credits taken in INDD 7980. It is required that MID students take no more than 12 graduate credits per semester (9 is full-time) and enter the program during fall semester. All thesis, non-thesis documentation drafts for the MID must be completed and submitted for final graduation review by the respective graduate committee **the semester prior to** the intended semester of graduation. A 3.0 GPA or above is required to qualify for graduation. Select INDD 6960 classes may be offered during the summer semester. Graduate students transferring from other INDD graduate programs will be reviewed for admission on a case-by-case basis but must complete all AU/MID Required Core Courses. **The recommended enrollment in graduate classes is eight students.** No more than 15 credits in INDD 6960 may be used toward graduation.

Industrial and Systems Engineering — Graduate Certificate, MS/MBA, MS, MEM, PhD

Degree Programs:

- Industrial and Systems Engineering — MS (p. 1691)
- Engineering Management — MEM (p. 1689)
- Industrial and Systems Engineering — PhD (p. 1691)

Graduate Certificates:

- Automotive Manufacturing Systems (p. 1689)
- Occupational Safety & Ergonomics (p. 1692)
- Manufacturing Systems (p. 1691)

- Modeling and Data Analytics for Operations (p. 1692)

The department offers the master of science (thesis and non-thesis), a master of engineering management with four options, a joint program leading to both MS and MBA degrees, and the doctor of philosophy. These programs are for students with undergraduate degrees in industrial engineering, other engineering disciplines, mathematics, and sciences.

All masters applicants who have an engineering degree from an ABET-accredited program with a GPA of 2.75 or higher do not have to take the GRE. Otherwise, applicants must submit Graduate Record Examination scores for the General Test except MS/MBA applicants who may instead submit Graduate Management Admission Test scores. All PhD applicants are required to take the GRE.

The MS programs require a total of 31 hours of course work, which includes a one semester hour seminar class. The MS non-thesis is oriented toward professional practice. These students must take 9 semester hours of core courses, 12 hours of INSY electives and 9 hours of INSY or INSY-related electives. The MS thesis has the same course requirements and hours except that 4-6 hours of thesis may be substituted for the same hours of elective courses.

The MEM program requires 30 hours of course work. There are four options: Manufacturing, Systems, Occupational Safety and Ergonomics, and Product Innovation.

The MBA/MS in Industrial & Systems Engineering is a 55-credit hour concurrent degree program administered jointly by the Industrial and Systems Engineering faculty and the MBA program. Students must apply separately to each program (MS Industrial & Systems Engineering and MBA). The concurrent degree path consists of 27 credit hours of MBA core (BUSI) classes, 9 credit hours of INSY core classes, 12 credit hours of INSY electives, a one credit hour INSY seminar course and 6 hours of approved electives. The program saves the student fifteen hours of coursework over completing both degrees separately.

Research involvement is the dominant element in the doctoral program. It provides a quality educational experience for selected individuals whose records indicate excellent potential not only for superior performance in course work, but also for the research and ensuing dissertation which is an original and scholarly contribution to the field. The PhD program requires at least 60 semester hours of coursework beyond the bachelors, including 9 semester hours of core courses. A minimum of one hour of graduate seminar is also required. An additional 12 hours of INSY electives must be taken as well as an additional 9 hours of INSY or INSY-related electives. The student must demonstrate a high level of proficiency in a specific area of industrial and systems engineering as well as a competence in the entire field. A minimum of 10 hours in Research and Dissertation credit is required.

Automotive Manufacturing Systems — Graduate Certificate

Both Fully Online or Fully On Campus

This graduate certificate is for students looking to acquire more knowledge in manufacturing. Students completing this certificate will explore the design, analysis, and operation of manufacturing systems as a combination of humans, machinery, equipment, tooling, controls, building, and transportation that are bound by a common material and information flow through application-based courses in state-of-the-art labs and classroom environments.

Code	Title	Hours
